Americans Still Hopeful Of Reaching Moon First

By BEM PRICE

WASHINGTON (AP) — The history of the space race is essentially on account of spectacular Soviet accomplishments and many lesser U.S. scientific achievements accompanied by glittering promises.

These promises of great things to come often have gone hand-in-hand with explanations of why the United States lags behind Russia.

That the United States is second in the space race was admitted by President Kennedy at his Aug. 22 press conference.

At the same time Kennedy expressed the belief that before the present decade elapses the U.S. will have overtaken and surpassed the Soviets.

On Aug. 11 the Soviets launched Maj. Andrian G. Nikolayev on a 95-hour orbit around the earth. This was followed in 24 hours by the launching of Lt. Col. Pavel R. Popovich on a 71-hour space ride.

The Soviet feat was made possible by the use of boosters with more than twice the thrust capacity of those in operational use by the United States.

Clearly, then, the U.S. now is in no position to duplicate the flights of the two Soviet officers —and won't be for some time.

The acceleration of the U.S. man-in-space program, which only began in a definite fashion in the spring of 1958, has been extraordinary. It also has been accompanied by the equally swift growth of a huge bureaucracy scattered from one end of the country to the other.

When the Soviet Union launched Sputnik I in October, 1957, the initial reaction from the White House, as relayed by James C. Hagerty, press secretary to President Eisenhower, was one of interest but no particular concern.

Asked what the Soviet achievement would do to the U.S. program Hagerty replied that the U.S. has "never thought of our program as one which was in a race with the Soviets."

The first time the U.S.o fically admitted a race was under way came in 1961 at Kennedy's inauguration.

Thereafter the country had a specific goal: A landing on the moon before the end of the 60s.

The key to the space race, then and now, is a big rocket booster.

Wernher von Braun, Germanborn rocket expert and director of the George C. Marshall space flight centre at Huntsville, Ala., was asked by the Associated Press why he thought the United States had a chance to reach the moon ahead of the Russians.

"We have reason to believe that the vehicles used by the Russians have a first stage thrust of 800,000 to 1,000,000 pounds," he said.

"The Russians have an active booster program so it is likely they are working on rockets bigger than the ones they now use.

"So is this country. We have already launched two Saturn C-1s with first stage thrust of 1,300,000 pounds in a program leading to operational use of a C-1 having 1,500,000 pounds in late 1964.

"We are working on the Saturn C-5 with 7,500,000 pounds of thrust in the first stage. It should be fired first in 1965 and become operational in 1967.

"The United States is making remarkable progress. . . . Two years ago I told the Associated Press I thought we had a good fighting chance to do this before the Russians. I still do."

That leaves the question of why the United States has lagged behind the Soviet Union.

Some observers have cited the conservative approach of U.S. military men to new weapon technology which extends from the machine gun perfected by Richard J. Gatlin in 1862 to rockets.

At one time the military could see no immediate use for the flying contraption of Orville and Wilbur Wright.

Dr. Robert H. Goodard developed a liq.id-fueled rocket in the 1920s, but the army couldn't see any use for it as a weapon.

Others could.

DIES OF INJURIES

MONTREAL (CP) — Police Chief Real Belac, 47, of suburban Duvernay, died Tuesday from injuries suffered in a stock car accident at a race-track in nearby Fabreville Aug. 25. Chief Belac, a veteran of 20 years police work, was on duty at the track when a stock car driven by Georges du Boudries, 22, of Duvernay went out of control and slammed into the railing of the track.

NDP Elects Member In B.C. Voting

By JIM PEACOCK

REVELSTOKE, B.C. (CP)— Mrs. Magaret Hobbs has succeeded her late husband as New Democratic Party - CCF member of the British Columbia legislature for Revelstoke.

She won the seat in a byelection Tuesday and said the battle was fought over development of Columbia River power. She said she will continue her husband's stand against the high Arrow Dam planned for the constituency.

Premier W. A. C. Bennett saw the result as a vote of confidence for Social Credit government policy in the river development.

The margin of victory was narrow for the 52 year - old widow of George Hobbs, whose death brought about the byelection. Mrs. Hobbs defeated Social Credit candidate Arvid Lundell, 62-year-old mayor of Revelstoke who once held the legislature seat, by fewer than 100 votes.

Liberal J. Wallace Johnston, 50, trailed far behind in the three-way race.

When counting ended Tuesday night, with four polls containing 72 eligible voters unreported and a 10-vote hospital poll and about 25 absentee ballots not tabulated, Mrs. Hobbs had 1,095 votes, Mr. Lundell had 1,023 and Mr. Johnston 465.

Mr. Bennett, who had said anti-government votes would be votes against Columbia policy, declared the people of Revelstoke "support in ever greater number, the development of the Arrow Dam."

He said the result cut Mr. Hobbs' 1960 majority of 472 votes to a "fraction" of that numbers the development of the feat" for provincial NDP Leader Robert Strachan and means "the end of the provincial Liberal party as a force."

Despite the close vote, Mr. Lundell said he will not seek a recount.

The Social Credit party holds 31 of the 52 legislature seats. There are 16 NDP-CCF members, four Liberals and one vacancy. No date has been set for a byelection in Vancouver Point Grey, left vacant by the death of Mrs. Buda Brown, minister without portfolio in Mr. Bennett's cabinet.

About 77 per cent of the 3,378 eligible voters cast ballots.

Mr. Strachan said the victory proves the NDP-CCF is the strongest party in B.C. and the only one capable of defeating the government in the next election.

RAILWAY LATE WITH BABY CRIB

LONG BEACH, N.Y. (AP) —The Railway Express Company should get "A" for effort, even if they are 14 years late in delivering a crib to Mr. and Mrs. Arthur Cohen.

Cohen went into the army in 1943, and was sent to Fort Benning, Ga., before he went overseas. Joining Cohen at Fort Benning were his wife, Estelle, and their three-month-old daughter, Dorothy.

Mrs. Cohen, among other household effects, had the baby's crib sent to Georgia via railway express. The crib didn't arrive, and the company settled with the Cohens for $121.

This weekend Cohen got a letter from the railway express saying the crib had been found in a warehouse, and asking what should be done with it.

Cohen pointed out that "Baby" Dorothy — now 19 years old — won't fit into the crib. Nor will son Robert, 14.

He added he's sorry, but what to do with the crib is a problem for the railway express.

Opening lead—queen of diamonds.

When declarer has a lot of things to do, the order in which he does them can be quite important. Timing is crucial in many hands, and where there is a choice between the order of plays he can make, declarer should plan his campaign in the safest manner possible.

Here is a typical situation. West leads a diamond and South takes the ace. Declarer has three different plays to consider. He can take a spade finesse, a heart finesse, or lead a club towards the King in the hope that West was dealt the ace.

There is no great hurry about attacking spades or clubs, so he starts by leading a heart and finessing the jack. If the finesse wins, he is sure to make the contract. Unfortunately East turns up with the king and returns a diamond.

Declarer wins and leads another heart to extract the last trump, after which he ruffs a diamond. Now South leads a spade and finesses the queen, even though he was only a singleton spade.

In the actual hand, this play gives South the contract, since he can discard a club on the ace of spades. He later loses two club tricks, but he winds up making four.

Note that if declarer tackles clubs ahead of spades he goes down.

There are good reasons for South to take the spade finesse before playing clubs. First of all, it costs nothing to finesse the spade, true, if the finesse is unsuccessful, he loses a spade trick unnecessarily, but he gets it back automatically because the ace of spades if still in dummy to take care of one of his club losers. It is simply an exchange of losers.

But the main reason for playing spades first is that, if the finesse fails, declarer can still fall back on the club play and make the hand if West has the ace, whereas if he tackles clubs first and the ace is wrong, he goes down without further ceremony. By beginning with spades, South gives himself two chances to make the hand instead of one.

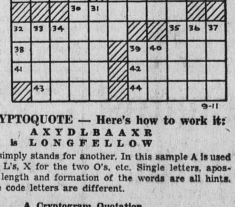
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.
