

BEDTIME STORIES

Mrs. Goldie Explains

"A thing may be or be not so, but hold your tongue unless you know."
—Peter Rabbit.

That is good advice on Peter's part and it really is too bad that he doesn't always follow it. But it is much, very much, easier to give advice than to follow it. Peter is almost sure to do the easiest thing. Many people are just like Peter in this respect.

From where he was sitting Peter could look up and see the great old elm in Farmer Brown's dooryard.

In was very early in the morning. Peter had been over in the Green Forest for the night and was late in starting for home in the dear Old Briar-patch. It really wasn't safe to try to cross the Green Meadows now. Peter decided to spend the day under the bushes growing inside the old stone wall between the Old Orchard and the Green Meadows. He felt safe there for there were openings between the stones of the old wall just big enough for him to slip through should there be need.

From where he was sitting Peter could look up and see the great old elm tree in Farmer Brown's dooryard. It stood alone, its big limbs spreading wide on all sides, the drooping slender tips waving in the light breeze. Peter caught a flash of color amid the leaves at the tip of one of those high overhanging limbs. "It is Goldie the

Oriole," thought Peter, and so it was.

A moment later Goldie was joined by Mrs. Goldie and for a few minutes the two seemed to be very busy about something, just what Peter couldn't make out. Could they be weaving a nest out there? Goldie flew down in the dooryard and Mrs. Goldie came straight over to the Old Orchard. She flew down on the old stone wall just above Peter, then hopped down on the ground a little to one side of him and began to search among the leaves on the ground.

"What are you looking for?" asked Peter.

"Is what I am looking for any business of yours?" asked Mrs. Goldie a bit sharply.

"No, it isn't," confessed Peter. "I saw you and Goldie together up in that big tree and you seemed to be very busy about something. I thought you might be making a nest, but of course that couldn't be."

Mrs. Goldie turned to look at Peter. "Why couldn't it be?" she asked.

"Because you were way out on the swaying tip of the limb, and a silly place for anyone to make a nest," replied Peter.

"Why would it be a silly place?" demanded Mrs. Goldie. She spoke sharply.

"Why—why because it would," said Peter lamely, then hastened to add, "when the wind blows those limbs toss up and down enough to shake any nest loose."

"Not out!" declared Mrs. Goldie. "The wind can't shake our nest loose. We don't build a nest on a limb the way some folks do. We hang it from a limb, and to do that we have to have it way out near the tip where the twigs are small enough for us to hang the nest between them. I would have you know, Peter Rabbit, we have the safest nest anywhere around. A silly place indeed. That shows how little you know," Peter Rabbit. If you had used your eyes you would have seen our nest of last year hanging from the tip of one of the branches of that old tree all winter." Mrs. Goldie turned her back and flew over to join Goldie in the dooryard.

Report Links Cigarette Smoking With Lung Cancer

LONDON (Reuters)—The Medical Council said Thursday that one out of every eight heavy life-time cigarette smokers is likely to die of lung cancer while only about one in 300 non-smokers will die of the same disease.

The government announced immediately that it will back a campaign to warn against the dangers of smoking. The two leading British medical journals called for a campaign to inform the public of "the risks" of smoking.

The Medical Research Council, which advises the government on health matters, published a report that cigarette smoking is the principal factor in the growth of lung cancer in Britain during the last 10 years.

1. A relatively small number of these cases can be attributed to specific industrial hazards.

2. Some cases may be due to atmospheric pollution; it has been known for some years that lung cancer is more common in urban than in rural areas.

3. But "evidence from many countries suggests that a major part of the increase is due to cigarette smoking."

4. The identification of several carcinogenic (cancer producing) substances in tobacco smoke provide a rational basis for this theory.

5. "The identification of several carcinogenic (cancer producing) substances in tobacco smoke provide a rational basis for this theory."

The council described a heavy smoker as one who smokes 25 or more cigarettes a day.

Investigations in Britain and the United States revealed the highest mortality rate from lung cancer was in cigarette smokers, second highest in pipe smokers and the lowest in non-smokers. It gave no evidence on cigar smokers.

The Standing Committee of British Tobacco Manufacturers said Thursday night that in its opinion, there is "no proof from any scientific field that smoking is a cause of lung cancer."

John Caughan Morgan, parliamentary secretary to the health ministry, reported to the Commons on the council's findings.

"The government feels that it is right to ensure that this latest authoritative opinion is brought effectively to public notice, so that everyone may know the risks involved in smoking," Morgan said.

District health authorities and councils for health education "will be asked to take appropriate steps to inform the general public."

The British Medical Journal published an editorial calling for a public campaign to counter the smoking habit.

EVIDENCE MOUNTING
It admitted that "knowledge of the causation of lung cancer is still incomplete," and that other factors besides smoking "are undoubtedly capable of producing the disease."

But, the report added, evidence of a link between smoking and lung cancer has mounted steadily and even the most critical investigation has not disproved the connection.

The council listed five main conclusions:

1. A large increase in the death rate from lung cancer in Britain and other countries during the

Play Safe While You Drive!

Keep alert—chew gum

Avoid traffic jitters and driving drowsiness. Chew gum while you're behind the wheel. Chewing helps relieve strain and tension—helps keep you feeling fresh and alert for safer driving. Chew any brand of gum you like but chew while you drive. Naturally, we recommend Wrigley's Spearmint Gum—for lively, satisfying flavor and real chewing enjoyment.

Foundation For Research On Rheumatic Diseases

TORONTO (CP)—James A. Gairdner, Toronto financier and industrialist, has announced a gift of \$500,000 for the establishment of a Canadian charitable foundation to encourage research into rheumatic diseases.

The foundation's initial capital and investment earnings are to be given as rewards, the top one \$25,000, to the scientist accomplishing significant research into rheumatic and heart disease.

Mr. Gairdner in a statement read by his son, J. S. Gairdner, announced the establishment of the foundation at the closing banquet of the ninth international congress on rheumatic diseases.

Mr. Gairdner said the foundation would not establish research projects, but simply reward research considered significant.

A recipient of the award, similar to one receiving the Nobel Prize, was not bound to use the money in any way.

Mr. Gairdner said he hoped the foundation's earnings from the investments—which he estimated at \$25,000 a year—would enable it to continue indefinitely, but it was open to subscriptions.

Mr. Gairdner, who is 64 and a victim of arthritis, is president of the Toronto investment firm of Gairdner and Company Limited, and president or director of several other Canadian corporations.

The awards are to be made in two classes: a \$25,000 award at least every four years to a distinguished researcher in rheumatic or heart diseases and an annual award of \$3,000 to \$10,000 for outstanding accomplishments in the same field.

The first award of the foundation should be made "by this time next year," Mr. Gairdner said.

They are not limited to Canadians.

Opening lead—queen of diamonds.

An example of a simple type of play that is sometimes missed in the heat of battle is shown in today's hand.

The point involved can best be shown by relating how the play proceeded after South became declarer at the normal four heart contract.

South won the opening lead with the ace of diamonds, played the ace of hearts and another heart to the nine. The queen of clubs was then led and finessed, West winning with the king.

West returned a low diamond to East's king. East played back a spade, the defenders took two

spade tricks, and the contract was down one.

It must be conceded that South was unlucky to find both the king of clubs and ace of spades in West's hand. Had either card been dealt to East, the contract would have been made.

Nevertheless, it was not bad luck alone which defeated the contract. Declarer contributed to his own defeat by failing to adopt a more cautious line of play.

South should not have taken the opening lead of the queen of diamonds. West should have been permitted to win the trick. The purpose of ducking the queen of diamonds is to prevent West later in the play from putting East in the lead with a diamond.

By severing this line of communication between East and West, declarer assures himself of the contract, even though it turns out that the club finesse loses and West has the spade ace.

Suppose West continues with a diamond at trick two. Declarer wins, draws two rounds of trumps as before, and finesses the club. West wins, but he is licked.

He cannot lead a diamond—it gives South a ruff-discard. If he leads the ace of spades, that is also the end. If he leads a club back, declarer disposes of two spades on dummy's long clubs.

All roads lead to fulfillment of the contract, if South takes the precautionary move of losing the first trick to West.

Nasser Promised Not To Blow Up U. S. Pipe Lines

BAGHDAD, Iraq (Reuters)—Egyptian president Gamal Abdel Nasser promised a "special" American envoy he would not blow up American oil pipelines during last fall's Anglo-French invasion of Egypt, a newspaper said here Monday.

The Iraqi newspaper Al-Shaab published what it claimed was text of a secret speech Nasser made to his commanders last March. According to the text, Nasser said he agreed to the American request because the flow of oil through the pipelines was more vital to the United States than her alliance with Britain and France.

The newspaper quoted Nasser as saying Egypt scored a great success against Britain, France and Israel by destroying oil pumping stations in Syria and an oil well in Kuwait last November and December.

NOT A PARTNER
It quoted Nasser as saying: "During this time, the United States, by a special envoy, informed me that the United States had never been a partner in the tripartite aggression against Egypt and would stand by Egypt in order to expel the aggressors from Egyptian territory."

Referring to Egyptian military tactics which have been expelled from Iraq, Jordan, Sudan, Libya and Lebanon, Nasser said: "The activities of our military attaches are most dangerous and important."

How To Win Friends With "Small Talk"

Most of us like to talk a lot. But put us with strangers at parties or business gatherings and we have to struggle to say a few words.

July Reader's Digest shows you how to make these affairs more rewarding (how to click more gracefully with strangers) by using "small talk" to bring out the best in others... and yourself. Get your July Reader's Digest today: 35 articles of lasting interest, including the best from magazine and book favourites, condensed to save your time.
