

[Continued from first page.]  
 fully considered by hon. gentlemen on both sides of the House. I think the people would be perfectly willing to bear a portion of that expenditure, and that our present system might be supplemented by making provision for an agricultural education for the sons of our farmers. The Educational Report for 1888 is an able one, and in it the Chief Superintendent points out that only a few pupils are studying the important subject of agriculture. Now, this matter ought to be taken up and dealt with by the Government, as it is one which vitally affects our interests as a Province. Another expenditure which must be taken hold of by hon. members on both sides of the House, is that for legislation. We all agree that there are too many members in the legislature, and that an effort should be made to reduce this House and to abolish the upper one. It is well known that the Government have made every effort to bring the latter about. In pursuing that course, they followed the example of several of the other Provinces. In Ontario they have no second branch, and are getting along all right without it. If our Government had succeeded in abolishing the Council, they would, I have no doubt, also have reduced the number of members of this House. In this way a large saving could have been effected. When the hon. member for West River addressed the House, he referred to the cost of the House of Assembly, but stopped short when he came to the expenditure for the other branch. I think it must have occurred to him that he was one, who, at the late Council election, lauded that branch of the Legislature, and advised the people to sustain it, in order to protect the rights of the property holders. Last session, when every hon. member of the Opposition opposed the withdrawal from capital of the sum of \$200,000, and expected the measure to be thrown out by the Council, to their utter disappointment, such did not prove to be the case. I think the time has arrived when that branch of the Legislature can and should be dispensed with, and the expense in maintaining it saved to the country. But the hon. member for West River warned the people not to vote for the abolition of the Council, for, if they did so, they would be in the hands of the present Government! He contended that that branch was the only one that conserved the interests of the property holders, and checked hasty legislation. Now, we know that when some of the most important measures, denominated hasty legislation by the Opposition, such for instance, as the Railway Bill, came before the Council, they passed them, and I think they did right in doing so. The Confederation Bill was also passed by the Upper House and last year the obnoxious resolution from the standpoint of the Opposition. I think hon. members opposite will agree with me that it would be an advantage to the country instead of a loss, to lop off that branch of the public service, and to reduce this House as well. However, the Government have done all they could in that respect, but failed to carry their measure. I think they should again take that matter up, and test whether there is a probability of succeeding. Another matter to which I wish to refer is that respecting the wharves or piers. When the discussion on the Draft Address in reply to the Governor's speech took place, the Government were accused by the Opposition of accepting the sum of \$77,000 as payment in full of the sum due this Province for the amount expended on the piers. No proof, however, was given that the Government had signed any receipt as payment, in full, of that money. I am of opinion that notwithstanding it was the policy of the Government to have nothing to do with those piers which were not taken over by the Dominion Government, no matter whose property they are, they should be kept in repair for the use of the people in the shipment of produce, etc. I think, therefore, that it would be a perfectly legitimate procedure for the Government to place in the estimates a sum sufficient for the repair of those wharves. I give the hon. Commissioner of Public Works all due credit for the manner in which he has managed that branch of the public service since he entered upon the duties of his present position; but I regret that he has not had a sufficient sum placed at his disposal to place the public works of the Province in such a condition as they should be. I think all will admit our present road system has been a failure. I have occasion to travel through the country every year after the snow leaves the ground, and I have long ago come to that conclusion. If one day, under the Statute Labor system, were given to the filling of the ruts and trenches caused in the roads by the melting of the snows and the floods from the rains, it would be time well spent. More good would be accomplished in that one day than the result of a whole week's work at mid-summer. Work performed on the roads in summer does little good, as the clay filled into the ruts soon becomes mud and afterwards dust and is washed away. The result is we do not have good roads during the whole open season. Another matter to which I wish to refer is the Stock Farm. That farm annually costs the people of this Province a large sum of money. The two farms of which it consists, east in the neighborhood of \$18,000, and including the buildings erected thereon, the whole property is worth about \$30,000. There is also some very valuable stock on the farm. But many people in the two outlying Counties complain that they receive little or no benefit from it. It is reasonable, of course, to conclude that those farmers who reside in the immediate neighborhood of the farm, receive the greatest benefit therefrom. When we think of the fact that of all the stock raised on that farm only ten or twelve calves are sold and distributed over the Island, I think we must conclude that the benefit received is too small for the expense incurred. I think a very much larger quantity of stock could be raised on the farm and sold for distribution through the country. I am also of opinion that a great deal could be done in the way of experimenting and showing the farmers the best kind of seeds to be used, and crops to be cultivated. This could be done as a connecting link with the teaching of Agriculture in the schools, to which I have already alluded. If this could be done, better results would be obtained in connection with the working of the farm. One thing is clear, the management must be improved or the farm must be sold. But I am not in favor of disposing of it, as I believe that better results could be obtained than we are at present receiving. It has done good work in the past, and should be made to improve in the future. Private enterprise is now doing a great deal toward the improvement of stock, particularly horses of all kinds. I am of the opinion that the failure of the farm is more owing to the want of funds than to any other cause. The honorable member for Springton took exception to the manner in which the Government have prosecuted our claims at Ottawa, and stated that, although \$200,000 had been secured and added to our annual subsidy, we were not any better off. Perhaps I did not hear the hon. gentleman distinctly, but that was what I understood him to say. We all remember that when it was stated that a large sum of money was to be obtained for this province from Ottawa, the Opposition scouted the idea. When the money was actually obtained, the hon. gentleman from Springton (Mr. Sinclair) who has the reputation of being honest, should have been candid enough to give the Government all due credit for securing it. To my surprise, he has never done so. The hon. gentleman must certainly have made a mistake in his calculations respecting this matter. If we have secured \$200,000 per year, and have withdrawn an amount representing but \$10,000 a year, we must surely be still \$190,000 better off than before. Our finances are certainly in a much better position than when the Government obtained power. There is no doubt that they have effected large savings to the country during the ten years in which they have been in office. Had the late Government remained in power, and continued their expenditure at the same rate as during their term of two years, in 1877 and 1878, we would, at the close of the past year, have had an indebtedness of over \$800,000 instead of \$226,000, or thereabouts, after taking large sums of money out of the pockets of the people in direct taxation. There is no doubt that the position taken by the Hon. Leader of the Government, respecting moneys invested in the erection of Public Structures, should have been charged to Capital Account, is a correct one, and based on sound principles. Had this course been adopted at the time those permanent works were erected, it would have been perfectly legitimate. Those public works have been paid for, and it is now too late to charge them to Capital. In the future, should we require to erect large works of a permanent nature, this method might be adopted. In criticizing the policy of the Government, on this occasion, I have endeavored to do in a fair and impartial manner. I trust that the Government will consider the suggestions that I have thrown out, and act upon them in their own interests, and in the interests of the country. I shall not further extend my remarks on this subject at present. The discussion has been conducted in a mild and temperate manner, and I hope that feeling will be continued.

sent receiving. It has done good work in the past, and should be made to improve in the future. The treatment of many thousands of cases of those chronic weaknesses and distressing ailments peculiar to females, at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., has afforded a vast experience in nicely adapting and thoroughly testing remedies for the cure of woman's peculiar ailments.  
**Dr. Pierce's Favorite Prescription** is the outgrowth, or result, of this great and valuable experience. Thousands of testimonials, received from patients and their friends, and a thoroughly testing remedy for the cure of woman's peculiar ailments.  
 Dr. Pierce's Favorite Prescription is the outgrowth, or result, of this great and valuable experience. Thousands of testimonials, received from patients and their friends, and a thoroughly testing remedy for the cure of woman's peculiar ailments.  
 Dr. Pierce's Favorite Prescription is the outgrowth, or result, of this great and valuable experience. Thousands of testimonials, received from patients and their friends, and a thoroughly testing remedy for the cure of woman's peculiar ailments.

As a powerful, invigorating tonic, it imparts strength to the whole system, and to the womb and its appendages, in particular. For overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequalled as an appetizing, cordial and restorative tonic.  
 As a soothing and strengthening medicine, "Favorite Prescription" is unequalled in its efficacy in allaying and subduing nervous excitability, irritability, exhaustion, prostration, hysteria, spasms and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the womb. It induces refreshing sleep, and relieves mental anxiety and despondency.  
**Dr. Pierce's Favorite Prescription** is a legitimate medicine, carefully compounded by an experienced and skillful physician, and adapted to woman's delicate organization. It is purely vegetable in its composition and perfectly harmless in its effects in any condition of the system. For morning sickness, or nausea, from whatever cause arising, weak stomach, indigestion, dyspepsia and kindred symptoms, its use, in small doses, will prove very beneficial.  
**"Favorite Prescription" is a positive cure** for the most complicated and obstinate cases of leucorrhoea, excessive flowing, painful menstruation, unnatural suppressions, prostrations, or falling of the womb, weak back, female weakness, and interversion, retroversion, bearing-down sensations, chronic congestion, inflammation and ulceration of the womb, inflammation, pain and tenderness in ovaries, accompanied with "interuterine" life.  
 As a regulator and promoter of functional action, at that critical period of change from girlhood to womanhood, "Favorite Prescription" is a perfectly safe remedial agent, and can produce only good results. It is equally efficacious and valuable in its effects in any condition of the system. For morning sickness, or nausea, from whatever cause arising, weak stomach, indigestion, dyspepsia and kindred symptoms, its use, in small doses, will prove very beneficial.  
**"Favorite Prescription" is the only medicine for women, sold by druggists, under a positive guarantee, from the manufacturer, that it will give satisfaction in every case, or money will be refunded.** This guarantee has been printed on the bottle-wrapper, and faithfully carried out for many years.  
 Large bottles (100 doses) \$1.00, or six bottles for \$5.00.  
 For large, illustrated Treatise on Diseases of Women (100 pages, paper-covered), send ten cents in stamps. Address,  
**World's Dispensary Medical Association,**  
 200 Main St., BUFFALO, N. Y.
