THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND,

Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.
(IN ADVANCE)

ONE YEAR.....$1.00
SIX MONTHS.....2.00
THREE MONTHS.....1.00
ONE MONTH.....0.33

Sent post paid to any part of Canada or the United States.

ADVERTISING RATES.

For small advertisements which are ordered for only one or two weeks the charge is 50 cents per inch for the first insertion, and 20 cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:—
R. H. Mason, Post Office, Charlottetown.
J. McIntyre, Malpeque Road, "
C. Paul, Lower Spring Park Road, "
W. M. Coffin, Grafton Street, "
S. Grey, cor. Water and Prince St. "
D. Chappell, Prince Street, "
Bazaar Store, Queen Street, "
Geo. Carter & Co., Queen Street, "
S. Gray, News Stall, P. E. I. Railway and on the trains.
M. & T. J. Walsh, Eclectic Bookstore, Summerside.
Harry McFarlane, Souris.
Hon. D. Gordon, Georgetown.
D. A. Fean, Mt. Stewart.
G. M. Clarke Alberton.
Chas. A. Gillis, Orwell Cove.

The Weekly Examiner

Is issued every Friday morning from the publishers' office. It is made up of matter which has appeared in the Daily editions, and is a first-class weekly newspaper—interesting and full of the latest news.

The subscription for THE WEEKLY EXAMINER, post paid to any part of Canada or the United States, is one dollar per year.

Advertising rates on the same scale as given bove for THE DAILY EXAMINER.

The Yost Typewriter.

THE NEW YOST

the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded.

NEW MACHINE,
NEW MANAGEMENT
NEW PRINCIPLES,
NEW PATENTS,
NEW MEN,
NEW LIFE,
NEW BRAINS,
NEW METHODS,
NEW CAPITAL,
The LATEST and BEST.

WHAT MUST GO:—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys, double scales, etc., are no longer to be tolerated or pardoned. The NEW YOST has abolished them, and no other can retain them and live.

THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Caligraph" in 1880, and the "Yost" in 1889; the latest and best improvements have been added during 1892, making the New Yost an ideal, perfect typewriter. The New Yost prints direct from steel type; its work is never blurred, put is clern cut and beautiful. The alighment is absolutely perfect and permanent. The paper is an ideal success, the best ever applied to a typewriter. The line spacing absolutely perfect.

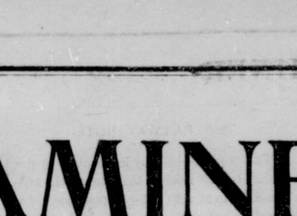
A MARVELOUS MOTOR.

The New Propelling Power That Has Come Out in Germany.

As a system of wagon locomotion, experiments have been made with the Benz motor, and complete success has been demonstrated. The most valuable of practical results have been attained as to speed power, and cost of operation. From the point of cost, the figures already at hand, from actual experiments, accompanying photograph shows a motor cab that has risen into fame. For in it, on Sept. 9 of this year, the Emperor William road from Maxau to Lauterberg in company with Instructer Frederick C. Haas of the company. The trip, a distance of fifteen miles, was made in thirty-five minutes, an average speed of two and a third minutes to the mile. During the run His Royal Highness entered into the spirit of the occasion,



showing the greatest interest and enthusiasm and speeding the carriage to the top notch of its capacity. Several continuous miles were covered at a very much faster rate of speed. On his return home the Emperior ordered a very luxurious pleasure carriage to be built at once for his private use.

The carriage in which this notable imperial run was made has arrived in New York.

There are several points to be brought out in regard to these motor wagons, carriages and cabs. In the first place, unlike an engine, they are no trouble at all to run. If they were, their practical advantages would be at once destroyed. But they are built on the simplest principle, and a few hours of instruction easily qualifies any one to handle them. It is quite as practicable for a woman to run them as it is for a man, for no expert or scientific knowledge is required. There is nothing whatever to get out of order out of the ordinary, and the few delicate parts are carried in duplicate.

No noise, smoke, steam or odor comes from the machine while in operation, and there is nothing in the handling to injure the finest clothing. No more skill or application is required in the running than would be necessary with a team of well-broken horses. The motor wagon runs easily on all roads, having been tested in eight inches of mud and sand. It mounts hills without difficulty, taking all grades up to 10 and 15 per cent. It is perfectly safe, stopping infallibly at command while running at the highest rate of speed.

The speed of the cab that carried the Emperor William has been given, but this is not the best that the wagon can do. Under proper conditions it is quite possible to cover a mile in two minutes. —N. Y. Sun.

Cost of Transportation.

At the World's Fair Congress on Good Roads at Chicago a paper was read by Professor Lewis M. Haupt, of Philadelphia. The argument in this address was opened by a statement of the total tonnage of the railroads in the United States in 1891, amounting to 704,399,000 tons, carried an average distance of 115 miles, and giving a ton mileage of 81,210,154,000. This movement cost the shippers $755,254,430. To produce this result there had been invested in railroads the incomprehensible sum of $10,389,834,228, an average of $61,878 per mile, and it had paid a fair revenue. The speaker then allowed the enormous economy resulting from reduced resistances to locomotion, as instanced by the waterways, and cited the case of the improvements on the great lakes, where a total expenditure of $30,000,000 had saved in the cost of transportation by water, as compared with rail, nearly $150,000,000 in one year. He emphasized the fact that a very large percentage of the tonnage moved by rail or water must first traverse the common road over which the resistances, as measured by the cost of movement, are 22 times greater than by rail, and 226 times greater than on the ocean—that the earth roads could be greatly improved at comparatively small expense, and that the resulting benefits would be general, affecting all classes of the community and all other systems of transportation.

Poultry House Plan.

A convenient nest box is represented in the cut. A shows the door to the passageway. The nests are on each side of the passage and have a cover over each, to lift up and secure the eggs, thus avoid going in where the hens are. On the inside are holes just large enough for one hen to pass through and a broad board in front for them to fly upon when going into the nests to lay. B represents the egress; C C door from passageway into henhouse; D nests for the laying hens; E nests for the setting hens; H is a place to keep them when they persist in setting, or for half of the hens when a large flock is kept. The two dotted lines on each side represent the roosts and F F are tubes of ashes for dust bath.

Agricultural Wonders.

A Seattle paper mentions the following among the agricultural wonders of the State of Washington: An apple weighing 2 pounds and 4 ounces. One strawberry 10 inches in circumference. A bunch of grapes weighing 6 pounds. An onion weighing 4 pounds and 1 ounce. A potato weighing 8 pounds and 4 ounces. A radish weighing 9½ pounds. A beet weighing 30 pounds. A pumpkin weighing 93 pounds. A watermelon weighing 64 pounds. A cabbage weighing 53 pounds. A squash weighing 120 pounds. Timothy 7 feet 8 inches high. Clover 5 feet high. Alfalfa, a yield of 12 tons per acre. Cornstalks 14 feet high. A hill of potatoes that yielded 43 pounds. Sixty-seven pounds of potatoes from 3 pounds planted. Hops from a yield of 9592 per acre. Wheat from a yield of 68 bushels per acre. Oats from a yield of 125 bushels per acre. A blackberry bush showing a growth of 21 feet this year. A branch from a prune tree 33 inches long with 46 pounds of fruit on it.

Hansom of Cab Fame.

Hansom, who created the cab which bears his name, sold his patent for $500,000; but the company to whom he sold it failed, and he only received $2250 for his invention.—London Answers,

For Over Fifty Years.

AN OLD AND WELL TRIED REMEDY.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for Diarrhœa. Is pleasnt to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—m. w. f. wkly—1 y

CITY EATING-HOUSES.

Successful Experiment for Stopping Begging by a Cheap Public Service.

To minimize begging and to remove the shame that no man feels more than the honest poor of accepting food in charity, cities in Germany have established eating-houses where substantial foods are sold very cheap. I have before me the report of such an establishment in Chemnitz for the fiscal year ended July 31, 1893. Not content with the report itself, I visited the place unaccompanied by anyone and found nothing to condemn, but very much to recommend, writes Mr. J. C. Managhan, Consul at Chemnitz.

The food is substantial. To a hard-working man, with an appetite sharpened by exercise, the dinner is excellent. The meats, vegetables, etc., are properly cleaned and prepared before they are cooked. Everything is kept clean and smells sweet and wholesome. The people, who look hearty and healthful, gather in large rooms on benches placed by long tables. Besides the dinner or mid-day meal, supper is served to those who wish it.

Inasmuch as the dinner is for the most part enjoyed by those men and women who are far from their homes and by those who prepare their own evening meal, the suppers of the city eating-houses play a very small part in the annual account. At those suppers, however, one can eat pickled herrings, with potatoes, for 2½ cents each person; salt herring and potatoes, 3 cents; potatoes with curds or butter, 2½ cents; warm beer, 2½ cents per cup; different kinds of soup, 2½ cents for three quarters of a liter (very nearly a quart); coffee, 1½ cents per cup (a little over half a pint); bread, of which there are two kinds—the so called black or rye bread and wheat bread—1½ cents and three-fourths of a cent for a portion.

There were sold last year 435,760 dinners. At 33,924 of these bread was bought for 1½ cents a portion. The year's expenditures were 65,367.16 marks ($15,557.28) the income 73,540.67 marks ($17,501.68), leaving a balance in favor of the city of 8,173.51 marks ($1,944.40). There were consumed 17,982 pounds of beef, 4734 pounds of pork and pickled meats; sausage, 14,716 pounds; bologna sausage, 17,567 pounds; of lard, suet, ham, smoked meats and corned beef, 7161 pounds; steaks (beef and veal), 37½ pounds; potatoes, 198,715 pounds; vermicelli, 6470 pounds; butter, 642 pounds; sugar, 275 pounds; peas, 20,079 pounds; beans, 18,911 pounds; barley, 6407 pounds; millet, 7300 pounds; carrots, 36 bunches; grit meal, 852 pounds; roasted meal, pea meal and bread crumbs, 6,873 pounds; potato meal, 5184 pounds; flour (wheat meal), 3904 pounds; sauerkraut, 2257 pounds; cabbage, 1026 heads of average size; turnips and radishes, 230 heads; celery, 2040 bunches, fruit and cranberries, 2780 pounds; bread, 23,820 pounds; sale bread for $18.33; broken bread from the bake-shops, 170 pounds; eggs, 4620; green salat (lettuce), 1590 bunches, cucumbers, large ones, from half pound each to two pounds, 930; spinach, 150 pecks; fresh peas (in pods), 4 bushels; apples, 7 bushels; plums, 2 bushels.

These dinners cost never more than 10 cents. They do away with the death-and-dyspepsia-dealing dinner-pail. They are nutritious and wholesome. Besides, they are self-supporting.—Buffalo Express.

How to Treat a Man—By a Horse.

When a man drops from sheer exhaustion or illness, promptly seize an end-board or a cart-stake, and pound him on the head and on the ribs. If this does not recuperate him, kick him violently in the belly. This treatment will restore him if persistently administered.

If a man finds his load too heavy and feels that it will seriously strain him to proceed, kick off a fence board and knock him down—and hammer thoroughly with the board. This will give him renewed energy, and he will make no more fuss. But do not on any account reduce the load. That would look too much like common sense, or humanity, and will be likely never to balk again when overloaded.

If a man refuses to drink when you offer him water, don't give him any for two days. That will "teach him" to be thirsty at any time you find it convenient to attend to him. It is a good plan to ply the whip frequently on a man who is at work. No matter if he is doing his best, hit him now and then on "general principles" and to prevent him taking any comfort. If his load is not heavy, oblige him to go enough faster to make up for it. Work him hard enough to bring down the average life of man one-half, as is done with horses. If no whip is handy, use a club.

Tie your man's head back in an unnatural position, with his eyes up towards the sun. This will give him a "fine appearance," and "prevent stumbling." Of course he will not be able to do so much work in this fix but it makes him wretched, so it's all right.

In winter remove his clothing to "prevent his taking cold." He will also "dry quicker," when you overwork him. You must hang a blanket on his back—but leave his neck and limbs exposed—when he is not at work. Men thus treated are "much healthier" than when allowed winter clothing.

If it is not perfectly convenient to feed a man who is working for you, at noon, let him go without, and, by active use of the whip, secure as much work as the food would have secured. Of course it wears out his vitality and distresses him, but that is no matter.

Put tight shoes on your man and keep them there until he is very lame with corns. To change his shoes often costs money, not much, but some, and lameness and misery and of no account if you can save a dollar's worth of shoes in a year.

When you hire a man do not be hampered by any humane notions. Get all you can out of him. True nobility consists of getting money, not in decency or kindness or what some noodles term "character." Get money, even if it is all blood-stained. These are correct principles, I am sure, for I learned them when a colt from my master, who treated all his horses on this plan—and don't he know what's what?—Chicago Humane Journal.

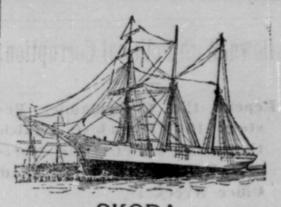
A Large Two-Piece Pulley.

The largest two-piece pulley ever constructed was cast a few days ago in Pittsburg. None of the casting works of the country would take the contract for the pulley, and the firm wanting it finally did the job for itself. The wheel is twenty-four feet in diameter, has a face of forty-eight inches, and weighs 22,000 pounds.

CAPTAIN JOHN R. HIRE, of schooner Lillian, says: "I was suffering with inflammation of the chest, brought on by exposure at sea. Took a good supply of Puttner's Emulsion, which perfectly cured me. It has given me a new set of lungs. .....

HUNDREDS of ladies in ill health have been or are being restored to health and strength by the use of Hawker's Tonic. It has become the great and popular family remedy. .....

USE SKODA'S DISCOVERY, the great blood and Nerve Remedy.



SKODA.

This beautiful ship was built by Mr. C. R. Burgess, a prominent shipowner, of Wolfville, N. S., and named for the popular remedies that are doing so much good in the U. S. and Canada. It will carry

Skoda's Discovery,

Skoda's Little Tablets, Skoda's German Soap, Skoda's Ointment and Skoda's Pile Cure, not only to keep her own crew in health, but to introduce them into foreign ports. In proof of their high standing read the following.

Nervous Prostration & Chronic Diarrhœa
CAN BE CURED.

I have used several bottles of Skoda's Discovery in my family, and regard it an excellent remedy, especially for nervous prostration and chronic diarrhœa. In my extensive travels, I hear frequent and favorable reference to these remedies.
