## Uncle Stevie's Cut out and Keep guide to CONTRACEPTION AND SAFE ENCOUNTERS

Method	Failure Rate	Protection against disease	Embarrassment Factor
The Pill	0-2%	None.	Fairly low. Potential embarrassment when staying with relatives and finding a good place to hide 'em. Can be a problem for those who can't use a calendar.
Condom	3-6%	Reasonable.	High. Too many silly names for it. If using this method, one should learn good conversation skills to bridge the gap of the 15 minute gymnastics it takes to put one on. Available in a variety of shapes and colors, all which look equally as foolish.
Diaphram (Cap)	3-12%	Not a chance.	High. When not in use tends to fall out in Cafeteria or Pit. When in use likely to fall out of body. Spring has a habit of suddenly catapulting the thing across the room.
The Sponge	Chancey	You're joking.	Can be embarrassing if your partner recognizes it as something he washes the car with.
Intra-Uterine Device (IUD)	2-4%	Forget it.	Medium. Possibility of picking up CB messages, space shuttle transmissions, etc. during the event.
Spermicide (Foams, jellies, creams)	10-14%	Don't make me laugh.	High. Very Messy. Problems may arise if contact glue or hair mousse are mistaken for it.
Coitus Interruptus (Watch it)	10-40%	No way.	Quite high afterwards if you know the person doing your laundry.
Rhythm Method	30-50%	Uh uh.	High. Especially several months afterwards when asked to pay child maintenance.
Celebacy	High	Excellent.	High. Friends will laugh. Chance of losing control after a few weeks.
