

WOOL MARKETING

Wool will be received at the Reid warehouse at the foot of Prince Street, Charlottetown, after May 15th. Wool shipped by rail or truck should be carefully tagged and addressed to the Wool Grading Station, Charlottetown, "Freight Collect". Payment of freight by truck will be on the basis of rail rates only. Truckers must present a proper warehouse receipt before truckage will be paid. An advance payment will be made promptly on receipt of wool and a final payment as soon as wool is graded.

In shipping, each fleece should be tied separately with paper string and packed in old, but clean sacks. Use one large sack if at all possible, as this aids in checking. A number of old, clean sacks sewed together will suffice. Large sacks may be secured from the Sheep Breeders' Association, Charlottetown, for lots of over twelve fleeces. EACH SACK SHOULD BE TAGGED WITH THE NAME AND ADDRESS OF THE OWNER WRITTEN IN CLEAR LETTERING WITH INK. ONE TAG TO BE SECURELY ATTACHED TO THE OUTSIDE OF THE SACK AND ANOTHER PLACED ON THE INSIDE. No responsibility will be accepted for sacks without tags. A deduction of one cent per pound will be made for wool tied with binder twine or other unsatisfactory string. Shipping tags and proper paper twine are available at the Provincial Department of Agriculture free of charge.

It is in your interest to see that wool is properly prepared for market. Growers should

1. Remove all tags and dung locks before tying each fleece.
2. Any burry, chaffy, or strawy portions of wool should also be removed and shipped separately.
3. Sheep should be shorn when dry, and wool should be stored in a place free from dampness.
4. If there are any black fleeces mark it on shipping tag.

All wool should be delivered between May 15th and July 15th. Do not sacrifice your wool and market it carelessly through unreliable sources. Market it through Canada's finest Co-operative Producer Association, the Canadian Co-operative Wool Growers, Limited, whose representative is the P. E. I. Sheep Breeders' Association. Do not forget that patrons selling wool through these Associations have always received the top of the market. Furthermore these Associations are working in your interests in supplying sheep producers with equipment, parasite remedies, and services at reduced prices. Some of these materials such as Phenothiazine for internal parasites and Cooper's Sheep Dip for external treatment are now being distributed at reduced rates at our Sheep Field Days, and direct from the Department of Agriculture. In addition the Association is doing everything possible in the purchase and distribution of rams to assist the industry.

Co-operate with your Association and support it by marketing your wool co-operatively this year. Remember we pay the freight and you get the most out of your product.

N. B. Health Survey

OTTAWA — Extensive reorganization, expansion and improvement of New Brunswick's health and welfare services have been recommended by a committee which surveyed the provinces health and hospital needs.

The committee's 150,000-word report, tabled recently in the Commons by Health Minister Martin, outlined the province's deficiencies in medical, nursing and allied personnel. It cited the need for more hospital beds and laboratory facilities. The deficiencies, said the report, should be considered before any attempt is made to establish a compulsory health-insurance program. Highlights of recommendations

in the report of a two-year independent survey of New Brunswick's health and welfare services, tabled in the House of Commons yesterday.

Increase general hospital beds to 3,065 from 2,326 by 1958.

Provide 1,000 beds for chronicallly ill throughout province.

Provide a minimum of 2,580 beds for mental patients.

Establish a provincial training school for nurses, equal to the best existing Canadian and U. S. schools.

Obtain bigger medical staffs for all tuberculosis and mental hospitals in province.

Provide more medical health officers.

Increase medical and dental manpower in areas where needed, if necessary by subsidies.

Develop a social services branch of the health department

and support work of health services.

Extend maternal and child health-insurance for children.

Establish a training school for mental defectives at the earliest opportunity.

Create non-urban laboratory facilities for two or more physicians working in conjunction.

Consider deficiencies in medical, nursing and allied personnel before launching any compulsory health-insurance plan.

DERBY, England — (CP) — The local factory of the Rolls Royce Company will supply "Gene" jet engines for American-type training aircraft, to be built at Montreal for the R. C. A. F., until the Montreal plant comes into operation.
