

BONHOMME CARNIVAL AT PROVINCIAL BUILDING

If it wasn't for the modern cars in the background you might think this was a picture taken near the turn of the century in front of the Provincial Building in Charlotte.

DAILY MARKET QUOTATIONS

SUMMARY
By THE CANADIAN PRESS
Toronto—Market up; moderate heavy trading.
New York—Market slightly higher; fairly active trading.
CURRENCIES
MONTREAL (CP) — The United States dollar in terms of Canadian funds was up 1/16 at 83.13 1/2.
Pound sterling was unchanged at 83.02 1/2.

NEW YORK
NEW YORK (AP)—The stock market went through another frenzied session Thursday with trading heavy. Some gains and losses were crossed.
The market has been muddled by wide currents all this week as trading and investment switched in and out of various issues. Little leadership was displayed in Thursday's market, except for the stocks of cigar manufacturers which staged another rally of their own.
The cigar makers had the additional spur of a prominently published article saying that cigars were being bought avidly since the U.S. government health report gave cigars almost a clean bill of health compared with cigarettes.
New highs were made by General Cigar, up 3/4 at 47 1/2, and Consolidated Cigar, up 3/4 at 43. Baytek Cigars rose 1/4 and D. W. G. Cigar 1/4.
Elsewhere in the list, a few pivotal blue chips helped support the popular market indicators even though a few more issues declined than advanced in the overall market.

LIGHTS INSTALLED AT CROSSING
Workmen with the CNR signal department, Moncton, are in the process of installing lights at the railway crossing on Water Street east. The system is expected to give added warning and protection to motorists and pedestrians proceeding over the tracks.
Prior to the installation of these lights a man was killed at the crossing. Despite his own speed and workmen proceeded to install the lights.

Local Cigarette Sales Show Little Reduction

City stores and restaurants have reported that there has been little or no reduction in cigarette purchases in the Charlottetown area, in the wake of a U.S. report of the adverse health conditions brought on by cigarette smoking.

A great deal of discussion has resulted from the report but the reduction in sale, if any, is very slight. There have been a few people giving up the "weed" but the most just say they are not.

There are a few people switching to cigars and pipes, and some are buying patented drug store remedies for helping in breaking the habit.

Most merchants echo the feelings of one manager who said it is "too early to notice much as far as sales are concerned."

SCHOOLS CONCERNED
Not only the schools are embarked on any particular campaign to stop student smoking although they are all concerned with the problem and have been for some time. They pointed out that health classes in the schools have always dealt with the hazards of smoking. None of the principals of elementary schools contacted seemed to feel that there was a

much smoking in the lower grades.
One city high school principal reported that there has been no new campaign started in the school since the report was published, but that smoking has always been a great concern to the school. "We are constantly stressing to students not to smoke," and a young man found smoking on the premises faces suspension, the principal reported. He added that the cigarette situation has been frequently discussed in assembly and as more reports come out they will probably devote a section to smoking in the near future.

Gordon Bennett, registrar of the Prince of Wales College, said: "As an institution we have not made any plans along that line," when asked if the college planned an anti-smoking campaign. He said that the school has always dealt with the hazards of smoking. None of the principals of elementary schools contacted seemed to feel that there was a

REJECT CLAIM
FORT WILLIAM, Ont. (CP) — City council rejected a claim Tuesday turned down a \$500 damage claim filed by minor league baseball player Paul Gollat, who said 16,000 of his minnows died when the city added chlorine to its water supply. The chemical was added to the water at Loch Lomond during a month-long pollution crisis last year.

TECHNICIANS Are Qualified

Three students from Prince Edward Island have successfully passed their (R) Registered Technologists examinations conducted by the Society of Laboratories.

The course consists of a 16-month training period at the Provincial Laboratories in Charlottetown. They are each required to work for the department for a further two years.

The course has since been changed to a 21-month training period by 21 months further employment.

Mac Mackay and Miss Noonan are presently employed in the biochemical section of the Provincial Laboratories. Mr. Smith is working in the bacteriology section of the Laboratories.
