McNeill Will Attend Drug Plan Talks

Provincial Health Minister Dr. Hubert McNeill will meet at Ottawa with federal Health Minister Monteith and other provincial health department representatives on Aug. 17 to discuss the federal government proposal concerning assistance to babies deformed by the drug thalidomide.

Some of the drug, a tranquillizer, is known to have entered this province and some has been sold in drug stores.Acting premier Andrew MacRae said, as far as is known, the drug was not sold to pregnant women but, he said, there is always a chance that some woman might have been given a sample of the drug.

At least 40 babies, whose mothers took the drug during the early stages of pregnancy, have been born deformed in Canada.

ARDA Agreement Expected Ready For Signing Here Soon

The Agricultural Rehabilitation and Development Act contract should be ready for signing the middle of this month, acting premier A.B. MacRae said yesterday. Several projects in this province will be ready to go ahead as soon as the contract is signed, he stated.

Known commonly as ARDA, the act was passed in parliament last year and contains three main aims, to be achieved through cost sharing agreements.

Primarily, it aims for alternate uses for land now classified as of low economic value, for expanded income and employment in rural areas through job retention, secondary industry, tourism and other means, and development and conservation of soil and water resources.

The federal government has provided $50,000,000 as its share for the first three-year period, from last June 1 to April 1, 1963.

TIPS ON HOW TO FRESHEN CALVES AT 20 TO 24 MONTHS!

ZEGER SALOME

Ross Corner Feed Service

The sooner your calves are bred, calve, freshen and start to pay their own way, the sooner you'll start to make a profit on them.

Over 2,000 average calves, born and raised on Purina's Dairy Research Farm have helped us develop a Purina Calf Starting Program that has given us hundreds of calves that have freshened before they were two years old.

The most important step is to feed them properly when they're young; a properly balanced ration that capitalizes on their early urge-to-grow. Purina Nursing Chow and Purina Calf Startena do supply this proper feeding program.

We can't guarantee that your calves will start right in freshening at 2 years, but we'd like to tell you how dozens of your neighbours have had strong, healthy calves that freshen early and start producing young on Purina's Calf Feeding Program. Why not stop in sometime and let's talk it over?
