Sent post paid to any part of Canada or the United States.

THE WEEKLY EXAMINER

is issued every Friday morning. It is made up of matter which has appeared in the Daily, and is a first-class newspaper, containing all the latest news. Subscription \$1.00 a year.

TELEGRAPHIC

SPECIAL DESPATCHES TO THE EXAMINER

From Yesterday's 5 o'clock Edition.

LONDON, May 27.—The Paris correspondent of the Daily Telegraph reports an interview he has had with Dr. Bertances, the representative of the Cuban Republic and government in Paris.

Dr. Bertances expresses the firm conviction that the war will be over sooner than is thought in Europe.

He says: "The Americans will experience no difficulty in landing troops who will at once be joined by the insurgents, who are much stronger than is generally supposed."

Nor is there any doubt that Rear Admiral Sampson will strike a heavy blow shortly.

The insurgents would rather accept annexation to the United States than the autonomy which Spain would grant.

Before another week the Americans will be masters of Havana and firmly established in Cuba."

—The Mail and Empire says that "The imperial honor accorded to Dr. Parkin is deserved recognition of an able educationalist who has done great work for Imperial federation. Dr. Parkin has crested the globe addressing British audiences on the subject of British union, and he has the pleasure of knowing that the seed he has sown has taken root. The doctor, as head of the Upper Canada College, is a typical British public schoolmaster. He is making the college a Canadian Rugby."

—Mail and Empire: Mr. Clifford Sifton is now distributing an immigration pamphlet in which it is maintained that large sections of the North-West are unfit for settlement. It looks as if the old opposition to the Territories had not yet been eliminated. Mr. Davin, who is one of the best friends the North West has ever had, had done a service to his country in calling attention to this assault upon our country. He knows the North West, and whether on the Ministerial or the Opposition side of the House, loyally and ably champions its interest.

BORN.

At Georgetown, on May 26, to Mr. and Mrs. John Stewart, P. E. I. Railway, a daughter.

Scrofula is Snake-Like

in its subtlety. It lies hidden for years in the ambush of the blood, and when it strikes it voids its venom alike on strength and beauty, disfiguring the one and undermining the other.

Ayer's Sarsaparilla

is a specific for scrofula in its worst and most malignant forms. Scrofula is a blood disease. Ayer's Sarsaparilla is a blood purifying medicine. Mineral medicines only drive scrofula below the surface. Dr. J. C. Ayer's Sarsaparilla is a vegetable remedy and it eradicates the disease. There is no remedy for scrofula equal to Ayer's Sarsaparilla.

"I was cured of a long-standing case of scrofula by Dr. J. C. Ayer's Sarsaparilla. The disease first manifested itself when I was a child, by breaking out in red blotches all over my body. I was not free from the trouble until I took several bottles of Ayer's Sarsaparilla. That effected a permanent cure."—Mrs. E. H. SNYDER, Lehigh-ton, Pa.

AT DAWN OF DAY.

Unbroken silence, brilliant eastern skies,
Without a stirring leaf,
Incense from celestial chalice,
Afloat in midair brief,
Giving to mortal sight and sense
New beauties, rich and rare,
To the thoughtful mind a moment
For reverent praise and prayer.

Praise for our great Creator,
Prayer for our way-worn hours,
Hope for fulfilled promises,
Trust in benignant powers,
Mid awe inspiring silence,
As night shades pass away,
New life in slow procession
Proclaims the dawn of day.
—Clark W. Bryan in Good Housekeeping.

MISSIONARIES BUTCHERED.

Extraordinary Report From West Africa.

LONDON, May 25.—A letter received in this city from Sierra Leone, west coast of Africa, says that a native, who was with the American missionaries at Rutunk when they were massacred by the insurgents engaged in the uprising against the imposition of the hut tax, but who made his escape by assuming his native garb, furnishes the following account of the tragedy:

"We started to walk to Sierra Leone, but had only gone half a mile when we met war boys, who blocked the way."

"The Rev. Mr. Cain tried to frighten them by firing a revolver over their heads, but seeing they were bent on mischief, he cast his revolver away, and said he would not have any boy's blood on his hands."

"The war boys then seized the party. Misses Hatfield, Archer and Kent were stripped of their clothing, and they dragged them back to the mission house, in front of which the war boys cut down the Rev. Mr. Cain and backed him to death, and treated Miss Archer and Miss Kent in the same way. Miss Hatfield who was very ill, was thrown on a barbed wire netting and finally her throat was cut. Mrs. Cain escaped to the bush with a native, but war boys found them and they were killed."

TOBACCO PIPES.

A Medical Authority That Says Clay Is Preferable to Wood.

If tobacco smoking is justifiable at all on hygienic grounds, says The Lancet, it is generally conceded that the pipe is the least injurious means. But tobacco pipes differ considerably in material and shape, both of which must be important factors in determining the character of the smoke. Thus there are the clay, the meerschaum and the various wooden pipes, the briar, cherry or myrtle. Next to the tobacco, therefore, which should always be pure and free from added flavoring, an expedient which is resorted to far too commonly nowadays, probably in many instances to cover an inferior quality of tobacco, the best kind of pipe is a point to be considered. Even assuming that he is smoking good tobacco, the smoker knows how different in character the smoke is when drawn from a clay or a wooden bowl. There is probably a scientific explanation of this fact which must have some bearing on the noxious or innocuous character of the smoke associated with other products of combustion.

A soft clay is invariably cool smoking because the acid oils obtained on the destructive distillation of the tobacco are absorbed instead of collecting in a little pool, which must eventually either by the volatilization or by mechanical conveyance reach the mouth. A particular pipe "smokes hot" not necessarily because the temperature of the smoke is high, but because it favors the passage by one of these means of the oils into the mouth. Meerschaum is another porous material. Again, an old wooden pipe or briar, so dear to inveterate smokers, becomes "smooth smoking" because the pores of the wood widen and so absorb, as is the case with clay or meerschaum, a large proportion of the tobacco oil.

Thus an old pipe "sweats," as it is termed—that is, the oil intrudes into the expanded pores of the wooden bowl and at length exudes. Similarly a hook shaped pipe must be better than a pipe the bowl of which is on the same level with the mouth, for the simple reason that in the former a considerable quantity of the oil is kept back in the U shaped part of the pipe, while in the latter the oil travels easily down the stem. Ebony stems are in general objectionable because they commonly spoil the true flavor of tobacco smoke. This is most probably due to the sulphur of the ebony combining with the volatile oils in the smoke. We know instances where ebony stems have produced distinctly objectionable symptoms in the throat, most probably for the reason just given.

Bone or real amber makes a much more satisfactory stem, or the pipes should be of wood throughout. Amber substitutes, and especially celluloid, should be discarded entirely as dangerous, while the flavor of camphor which these invariably communicate to the smoke forms a very unpleasant combination. Pipes of special construction cannot be regarded with much favor, such as those which are said to be hygienic and usually contain a so called nicotine absorber. Those smokers who require such auxiliary attachments had better not smoke at all. As a matter of fact tobacco yields little nicotine in the smoke produced on its partial combustion. It is mainly to oils of a tarry and acid character that the toxic symptoms of tobacco smoking are due.

VISIT

— OUR —

SHIRT WAIST DEPARTMENT.

For the Latest Style and Lowest Price

Silks We are determined to get additional silk business by deserving it, and we ask you to see and consider the silks, and decide whether we are entitled to it on that basis—merit, nothing but merit, quality, choiceness, and less price.

Organdies Lapet Mulls, Grass Linen, etc. All the pretty cheerful things, that will brighten the spring, and temper the hot summer. May we get your opinion on the dainty styles we are showing of these goods.

Millinery A fine showing in Flowers, Feathers, Hat Trimmings etc, that go to make up millinery competition. We'll give you all the help you need in making a selection, and there are people here whose advice in such matters is worth having.

Dress Goods That "Perkins" is widely known for its dress goods excellence, elegance and exclusiveness is ample evidence that it is a store that meets woman's dress goods wants well and satisfactorily. We have the largest and newest stock to select from. The prices are lower than any other store in the city.

We Keep No Stamps We give our customers the discount.

F. Perkins & Co.,

SUNNYSIDE.

Very Tall Learning.
One of the officers of the rebellion had a private in his company whom the boys jestingly named "Little Mack," because of his bigness. He was the tallest man in the company—about 6 feet 3 inches—and one of the bravest in the regiment.
On one occasion when the men were ordered to kneel down behind a stone fence in preparation for an expected assault the officer, who was preparing a surprise for the enemy, on inspecting the line was astonished to see one large, serene face above the top of the fence. He shouted out angrily, "There, you—you man with the head up, kneel down, sir!" The man did not move, and again the officer thundered, "Why don't you kneel down, sir?"
Oblivious to any danger and blind to the significance of his head being exposed, "Little Mack" answered, "I am kneeling down."
"Then," shouted the officer, "put your head down, or you will have it shot off, confound you!"
Thereupon "Little Mack" curled down behind the fence, grieving because the captain had howled at him.—Chicago Inter Ocean.

FACTS ABOUT HEALTH

It is Easy to Keep Well if We Know How—Some of the Conditions Necessary to Perfect Health.

The importance of maintaining good health is easily understood, and it is really a simple matter if we take a correct view of the conditions required. In perfect health the stomach promptly digests food, and thus prepares nourishment. The blood is employed to carry this nourishment to the organs, nerves, muscles and tissues which need it. The first great essential for good health, therefore, is pure, rich blood. Now it is certainly a fact that no medicine has such a record of cures as Hood's Sarsaparilla. It is literally true that there are hundreds of people alive and well today who would have been in their graves had they not taken Hood's Sarsaparilla. It is depended upon as a family medicine and general regulator of the system by tens of thousands of people. This is because Hood's Sarsaparilla makes the blood pure. This is the secret of its great success. Keep your system in good health by keeping your blood pure with Hood's Sarsaparilla, which absolutely cures when other medicines fail to do any good whatever.

Hood's Pills are the only pills to take with Hood's Sarsaparilla.
