Lambs at Moncton: F.o.b. Good and choice, alive, 22.50. Rail Grade 54.00 delivered for Grade A. Lambs at Charlottetown: Delivered. Good and choice alive 22.50. Rail Grade 53.00 Grade A.

DAIRYING

The market report of first grade creamery prints under date of November 24th shows the Factory price at 58c f.o.b. Halifax, with Local Jobbing at 60c. Butter production in Nova Scotia for the week ending November 18th shows a 20.3% decrease, reports having been received from nineteen creameries.

The Montreal price for No. 1 Solids on November 24th was 57 1/4c with Toronto at 58c on the same date. There has been no change in the price of butter during the past week from New Brunswick. Quotations under date of November 24th give—Creameries to Wholesale, one and two pound flats—58 1-2c; Wholesale to Retail Stores—60c.

The Charlottetown market has also remained unchanged during the past week with the Wholesale price being quoted at 57 1-2c Charlottetown; Local Jobbing 59c.

The Dairy Products Board has announced that the creamery butter held in its possession will be resold in carload lots back to the trade at 57c per pound in Solids delivered. Anyone requiring carlots of butter must apply to the Dairy Products Board, Ottawa, for application forms. These application forms must be filled out to show definite need for the butter, and a statement of the purchaser's requirements now compared with the same time last year. It is our information that the butter will be distributed on and after December 1st, but there is nothing to prevent applications being forwarded before that date. It is rumored that the Dairy Products Board is holding approximately 35 million pounds of creamery butter which is not a large amount considering the present low trend of production, and the increase in consumption during the past year. All those in the dairy business, however, hope that prices will not go too much higher as butter consumption would be lessened.

POTATOES

The following are the details of potato prices at various points in the Province:

Tignish: Tablestock 45c per 75 lbs. at car. Movement slow. Seed Mountains 97c per cwt. at car. O'Leary: Tablestock any variety ungraded 30c per bus. Sebago seed 33c per bus. at farm. Movement slow. One car Mountain seed loading at 35c per bus. loaded. Wellington: No seed or tablestock moving this week. Tablestock delivered 40c per 75 lbs. all varieties. Summerside: Tablestock 30c per bus. at car or wharf. Seed all varieties 35c-40c per bus. at car. Two boats loaded ready to go; one waiting to come in. Borden Line: Tablestock 33c per bus. all varieties. Quiet last few days. No seed moving. Few

A Feature For Every Friday

Among The Farmers

Federation Of Agriculture News

The Weatherman

The weather is always a popular subject of discussion among farmers, affecting as it does, practically everything they undertake to do and having a very definite bearing on the prosperity of Agriculture. If we overlook our prolonged, and at times discouraging, Maritime springs, we have pretty close to an ideal climate. Rarely do we suffer from such violent storms as the one occurring in the Eastern United States last weekend. November has provided us with nearly ideal weather and likely made a new record for mildness.

Lord Beaverbrook

The Canadian Press has shown great eagerness in publishing Lord Beaverbrook's remarks on his difficulties with Government inspectors at his dairy farm in England. Canadian farmers are not likely to be impressed by the noble Lord's highly colored description of what surely must be an isolated case and which we feel cannot be typical of Government attitude to Agriculture in England. This is the same country which single handed, some ten years ago, opposed the forces of tyranny and saved the world from a danger far greater than socialism can ever be in any democratic country. Since the close of World War II, the mother country is succeeding in a magnificent attempt to repair her shattered industries and re-establish a position as one of the principle actors on the stage of International affairs.

The Canadian Press need not be concerned with any danger either apparent or real to our democratic system, originating, as it does, among farmers. The men who till the soil will continue to be a stabilizing force in our National thinking and a bulwark against the development of radicalisms.

Cheap Food

The consumer shows a definite tendency to unduly emphasize what is considered to be high prices for certain foods while overlooking the ever-increasing cost of production and also the very moderate price of certain other goods. We would like to call attention to the high value of potatoes as a food and to the fact that the consumer is being supplied with these at a price far below the cost of production.

Potatoes are eaten by practically everyone at least once a day and can be blended with almost every known food combination. They can be served in a wide variety of ways and can be included continuously in large quantities in our diet.

Potatoes have plentiful supplies of important minerals, iron, calcium, and phosphorus, are an outstanding source of Vitamin C, also substantial amounts of vitamins A, G and B, and very high quality protein.

Potatoes offer the housewife a way of strengthening her position in the battle of the budget.

Exports of Young People

The young people of a country or province are one of its most

turnips moving at 40c per bus. to farmer.

Kensington: Seed Mountains and Sebagoes 35c-40c per bus. Very slow movement. Tablestock market quiet. Price 40c per 75 lbs. all varieties delivered.

Colville and Wiltshire: Light movement. Seed Cobblers, Sebagoes, 35c per bus. at car.

Charlottetown: Seed all varieties 36c per bus. Tablestock 32c per bus. Turnips 28c per bus. to grower.

Murray Harbour: Loaded one car Tablestock Mountains and Sebagoes at 40c per 75 lbs. at barn. No seed moving. Price 40c per 75 lbs. all varieties delivered.

Vernon River: Tablestock Mountains and Sebagoes 42c per 75 lbs. Very little movement. Sebago seed 60c per cwt. Reasonably heavy movement. Turnips 30c per bus. at car.

Cardigan: No seed moving. Tablestock all varieties 40c per 75 lbs. all varieties. Some farm. Few turnips moving 30c per bus. at car.

Morrell: No tablestock moving. Couple of cars Sebagoes seed loaded at 30c per bus. to farmer.

Souris: Cobbler and Katahdin seed 36c per bus. to farmer. Sebago seed 40c per bus. to farmer. Small boat loaded 7,000 bags tablestock packed 100's at 33c per bus. to farmer. Two boats arriving in December.

Elmire: No tablestock moving. Foundation A Cobblers 33c per bus. at car. Foundation A Katahdins 40c per bus. at car. Loading two cars.

Montague: No seed moving this week. Tablestock 40c per 75 lbs. all varieties delivered. Montague. Loaded couple small vessels. Few turnips for vessel at 30c per bus. to farmer.

A summary of the situation would indicate a weaker tendency in the market in Central Canada for the first part of this week, with a light demand. The market is so low it will not net growers 40c per bag at the moment. Seed movement continues slow with most movement by boat to southern U. S. ports. Prices for seed range from 30c to 36c per bus. delivered and indications are that the market will not stand more. Regarding prospects for abnormal movement of potatoes to a European country, the Marketing Board reports that it is not intended that farmers should build up great hopes yet for such a deal as there are many difficulties to be surmounted before such a deal is consummated and unless we have some assistance from the Prices

valuable assets and the ability of any part of the country to hold them is a fair indication of the state of its economy. A movement which amounts to almost an exodus of our young people to Ontario is going on this fall. On a certain Monday twelve young people left one centre, followed by four a few days later. This is a cause for serious concern and one that calls for some serious thinking on possible trends in our population.

Spanish Potato Order

Potato growers will be interested in the announcement that Prince Edward Island has an opportunity of bidding on 1,000 carloads of potatoes. We will, of course, be in competition with other potato growing areas for this order.

It is possible that the Dominion Government might be prevailed upon to provide some assistance in getting the business. This is one instance in which a Potato Marketing Board is very necessary to assist in working out the details and in acting as a bargaining agent for the industry.

Our growers should bear in mind that there is no certainty of obtaining this business and that at the present time the order is more in the realm of a possibility than a fact.

The Potato Marketing Board is, however, doing everything possible to try and bring the order here.

School District Meetings

In all likelihood school district Federations will be meeting during the second week of December to consider matters arising out of the annual meetings. School district secretaries will be notified in ample time and provided with the necessary information to conduct the meeting.

Royal Winter Fair

While Prince Edward Island exhibits at the Royal Winter Fair were not large in number compared to the size of the show, yet in prize winnings, their quality was certainly demonstrated. Our exhibits in cattle, hogs, poultry, and potatoes certainly gave the Island some favourable advertising.

Freight Assistance Policy

Since its beginning in October, 1941 the Freight Assistance Policy has meant up to October 31, 1950 \$3,354,204.00 to this province at an average rate of \$8.70 per ton.

At the present time the assistance to Prince Edward Island is at the rate of \$1.40 per ton. These figures indicate what an important factor this policy has been in our island economy.

Butter Production

Butter production, as compared with a corresponding period last year, has declined across Canada. For the week ending November 18th, 1950 Prince Edward Island produced 76,061 pounds as compared with 85,491 pounds for the same week last year.

FEEDS

Feed prices have remained about the same as they were last week with wheat being quoted about one-quarter cent raise during the last three days. The premium on barley, has been reduced from fourteen to six cents per bushel, which will mean a drop of approximately sixteen cents per hundred pounds. Due to the unsettled condition of the whole grain markets dealers are only buying to fill their immediate needs. Millfeeds are remaining steady. Protein supplements are still in short supply with the exception of soybean meal which is available for those who wish to purchase. Corn is quoted at about \$4.50 per hundred landed here which would be fairly expensive by the time it was ground and bagged.

NINE MILE CREEK SCHOOL
