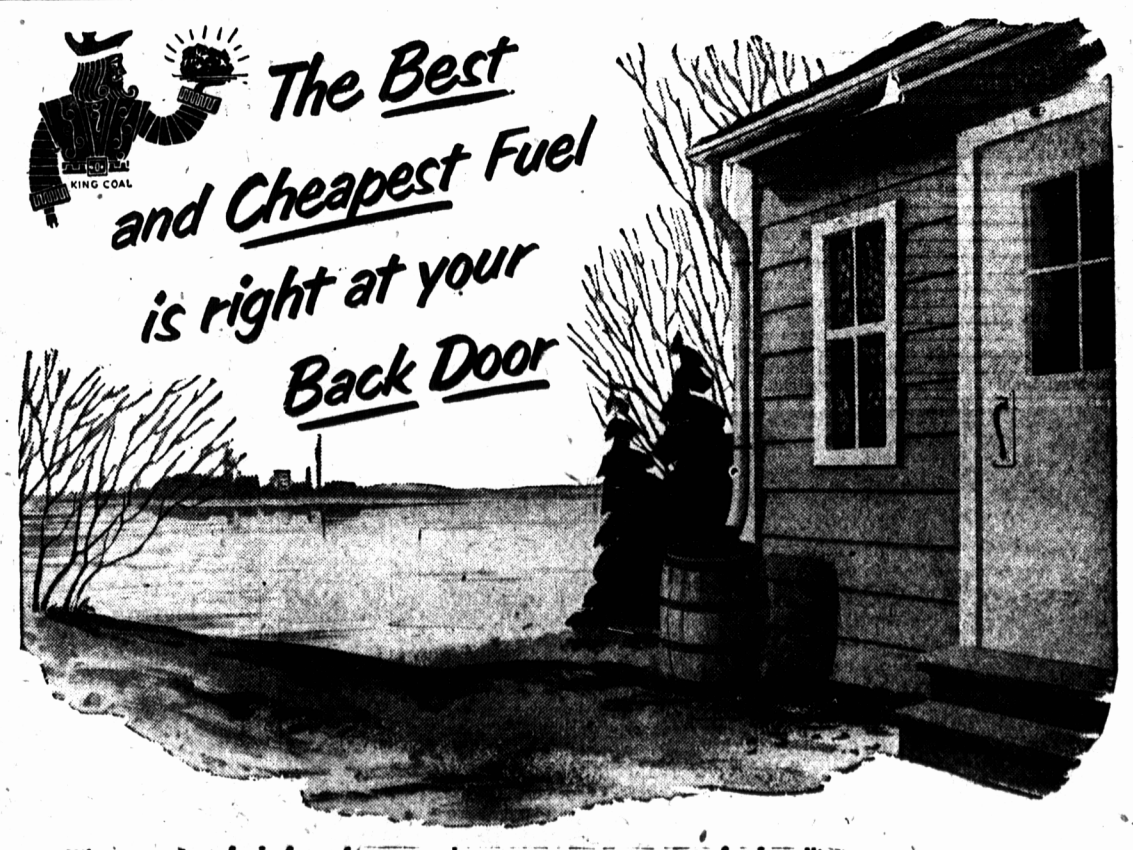
FEEDERS WHO KEEP RECORDS USE MASTER



When you buy fuels from faraway places you pay extra costs for handling, transportation, and insurance. Why do this when the *best* domestic fuel is here in the Maritimes — right at your back door.

Fuel costs for Nova Scotia coal are 20 to 25 per cent below other fuels.

By using properly sized, washed and dustless coals in automatic stoker-fed furnaces, you save money and still have maximum convenience in heating.

**COAL BUILDS GOOD ROADS!**

Without a prosperous coal industry, many of the things we now enjoy would not be so readily possible. For example, good roads depend upon tax revenues. Without prosperity in the coal industry, tax revenues would be reduced and road building affected. This, in turn, would adversely affect the tourist industry and reduce incomes and revenues still further.

The coal industry of the Maritimes annually provides $50,000,000 in wages; $15,000,000 in purchases; $8,000,000 to transport companies, in addition to the large sums spent on taxes. A prosperous coal industry is essential to full Maritime prosperity.
