

should put him on the "Milk Yeah!" ads. The male whale is a bull, the female a cow, and the young a calf. A group is a pod or a gam, so they may be "heard" but not "herd".

The Norway, P.E.I. blue whale has been buried. It took 3 front-end loaders and 2 bulldozers to do it. Possibly in 10 to 15 years you may see the skeleton in the Natural History Museum in Ottawa. When it comes to digging it up, I'd be a little nervous. There are likely to be some huge well-fed "critters" under the sands by that time who will not be inclined to "make no bones" about losing their own big blue whaleburger.

Environmental Calendar

- March 1: The Natural History Society meets at 8 p.m. at the Farm Centre on University Ave. in Charlottetown. Dr. David Kellum will read from his new book My Very Bestiary.
- March 10: Photographer Fred Bruemmer will show slides and speak on Arctic wildlife as part of the Island Nature Trust's Public Lecture series. At the Confederation Centre Gallery, Charlottetown, 7:30 p.m.
- March 13: (tentatively, depending on weather and interest) Two Owl Prowls will take place, starting at 7 p.m. Please let us know if you are interested. For the Charlottetown area, call Dan McAskill, 569-4351. For the Baldwin Road (Cardigan-Montague) area, call Gary Schneider at 838-2678.
