HASZARD'S GAZETTE.

TUESDAY, AUGUST 10, 1852.

The Rose brought the English Mail on Friday last, the principal items of news are as follow :—

Latest from Europe

The Royal Mail Steamship Niagara arrived from Liverpool at four o'clock yesterday morning, bringing dates to the 24th inst. She brought 76 passengers.

The elections were nearly all over in England, giving as the result, a decided majority to the Government. The *Morning Post* gives the following statement of the returns, placing all doubtful men on the side of the Liberals.

	Ministerialists.	Liberals.	Total.
England and Wales,	373	223	496
Scotland,	20	30	50
Ireland,	25	44	69
Returned,	318	297	615

Other journals, and in the Liberal interest, give the present majority for the Ministry, fifty-three.

Below will be found all the other news of interest.

LIVERPOOL, July 24.—Although business has not been fairly resumed, the markets are beginning to feel the effect of the close of the parliamentary contests. Considerable anxiety, nevertheless, still prevails as to the final result of the elections, and the effect which will be produced upon the commercial & fiscal policy of the Government. There is evidently more confidence on the part of importers in the Colonial Produce, and the markets have been less freely supplied with all articles during the last few days; at the same time consumption, both in this country and on the Continent, exceeds that of last season. The accounts are of the most favourable description as regards the grain crops, which, under the influence of the late forcing weather, have rushed forward with amazing vigour, and afford every promise of an early and abundant harvest. The same description of report comes from Ireland and the Continent, and as a consequence the various Grain markets have been during the week comparatively dull and inanimate. Monetary affairs, however, continue favourable, and with the large quantities of gold uninterruptedly flowing in from our Australian colonies, independent of the large amounts which will be obtained by the royal mail steam-ships from the United States weekly, there seems every inducement to believe that the trade of the country must progress in prosperity.

THE CROPS.

ENGLAND.—The corn crops, under the influence of the present genial and much-desired heat, are rushing forward with amazing vigour, and afford every promise of an early and abundant harvest. The *Sherbourne Mercury* says:—" We are sorry to say the potatoe blight has made some sad ravages in the neighbourhood of Weymouth, the stalks in many parts being completely decayed, and emitting a most offensive odour."

IRELAND.—The crops are still healthy and abundant. Nothing can be finer than the potatoes, which are now generally brought into market large and well tasted, and without any appearance of disease. We have a favourable report to make of all the agricultural crops. In some distant counties of Connaught a partial rumour of potato blight prevailed; but it was in isolated districts. The recent thunder storms have been attended with a few disastrous results in some parts of Ireland. They passed over Ulster without occasioning any very serious damage.

THE NEW PARLIAMENT.—The Parliament will consist of—English and Welsh city and borough members, 339; English and Welsh county members, 159; Welsh county members, 15; Scotch members, 53; Irish members, 105; total, 654. The following have been elected representatives peers for Scotland.—Lords Tweeddale, Morton, Home, Strathmore, Airlie, Leven, Selkirk, Orkney, Seafield, Saltoun, Grey, Sinclair, Elphinstone, Blantyre, Colville and Polwarth.

NARROW ESCAPE OF THE QUEEN.—A correspondent of the *Court Journal* states that a few days since, while her Majesty and His Royal Highness Prince Albert were walking within the now dismantled walls of the building in Hyde Park, which was but a few months since the glory and pride of this kingdom, a beam of wood, of enormous size and weight, fell close to the Queen—close as to have given rise to feelings of the most painful excitement amongst the distinguished personages by whom she was surrounded.

The cost of collecting the body of evidence brought from abroad against Lord Dundonald, Achilli, by the Newman party, is estimated at £8000.

YACHTING : DEFEAT OF THE AMERICA.—At the Cowes Regatta, on Thursday, for the Queen's Cup, once round the Isle of White, the Arrow won, beating the Mosquito by two minutes, and the America by two minutes three seconds.

The unusual occurrence of three officers resigning their commissions in the Royal Artillery took place in last week's *Gazette*. *United Service Gazette* states that while the mobilization of the army is going on extraordinarily, till transactions, gambling, and other demralising habits have led to the fatal result in some of those instances.

MR. MURRAY'S CASE.—The last letters from Ancona states that Mr. Murray is still in prison and so ill that it is not expected he will live many months. The opinion of the legal persons who have been ordered by the English Government to investigate his case is, that he has not been guilty of wilful murder; but that he, Mr. Murray, certainly did not display any energy in the protection of the persons who were entrusted to his charge; and that his intimacy with men of ferocious character, know enemies of order, was such as to create a suspicion that he favoured their views.

THE ARCTIC EXPEDITION.—The Isabel, screw-steamer, Captain Inglefield, R. N., having arrived at Peterhead on Thursday morning, the instant filled up her crew immediately, and sailed for the Arctic Seas on the 10th. In addition to Mr. Abernethy, Captain Inglefield engaged as second ice master Mr. Manson, who sailed in that capacity with Captain Penny in the last voyage in search of Sir John Franklin's expedition, and who has had great experience in arctic navigation. The entire crew mounted to 17, all picked men, and most of whom had been long in the whaling trade. France will, however, have a garrison of 6000 men at Civita Vecchia, and Austria the like number at Ancona, so as to be ready to repress any outbreak. It is added that the departure of the forgin troops will be followed by some concessions on the part of the Sovereign Pontiff to the demand for reform. Mr. Freeborn, the British Consul, has left Rome for England on the leave of absence until September. Mr. Murray's affair is still in *statu quo*.

In the province of Montua seven priests have been sent to prison,—one is a principle of the Chapter of Revera, a high ecclesiastical dignity. At parral, also, numerous arrests have taken place.

FRANCE.—Letters from Dreux, of the 13th instant, announce that the Orleans property in that neighbourhood, with the exception of the family burial place, has been taken possession of by the agents of the Government.

Jean Salvatori, late house steward to the Marquis of Normanby, during his residence in Paris as Ambassador, has been convicted before the Court of Assize of Paris, of having fraudulently disposed of 17,482 francs, paid him for the accounts of the tradesmen to the Embassy. He was sentenced to imprisonment for three years. The *Debate* announces as imminent the following ministerial changes—Foreign Affairs, Drouyn de Lhuys; State, Turgot; Public Works, Magne.

It is stated that the President has not abandoned his attention of paying a visit to Algiers on the occasion of his visit to the south in September. The Chamber of Marseilles states that the visit of the President of the Republic to that place is to take place between the 15th and 20th of September. The Prince President arrived on Sunday, at Strasbourg, for the inauguration of the railway. There, as every where on his journey, he was saluted by enthusiastic cries of "Vive Napoleon." On Monday morning he crossed the Rhine by the bridge constructed by the engineers, and went to Kehl, where he reviewed the French troops amidst the loudest acclamations. He re-entered Strasbourg escorted by the envoys of the foreign powers. He left Strasbourg on Tuesday afternoon *incognito*, for Barden-Baden, to escort the Grand Duchess Stephanie and, from the chimes of Hunningen on the Bavarian side that the Prince President, having been received so warmly by the people of Alsace, will remain two or three days longer in Strasburg to testify his gratitude.

PARIS, Thursday.—Marshal Excelmans died of a full from his horse last night.—Louis Napoleon returns from Baden to Strasbourg this morning, and sets out at one for Louisville. He is expected here to-morrow.

The Duguescin, ship of the line, has left Brest with 512 convicts for the penal colony of Guiana.

There are new symptoms of a serious movement for the establishment of the Empire. Petitions with this object are being got up in the south under the avowed patronage of the authorities.

(From the Islander of Friday last.)

THE CROPS.

Residing in the country, and actively engaged in farming, we shall speak of matters as they exist next harvest, as they have fallen under our personal observation, which, we adre say, will be very generally applicable

HAY.—This important part of our crop has suffered from the long winter, and hot, dry summer. It is somewhat, but not much, under an average.

WHEAT.—This grain is, perhaps, less injured by drought, generally, than any of the other cereals, and we never saw a prospect of a heavier return. What the wheat-midge may leave us, is a question which cannot now be determined. We regret to learn that it has again made its appearance, as might be anticipated.

BARLEY is fair, but not equal to wheat. It is to be regretted that the latter is not any other sort than the English two-rowed. It is a surer crop, and a better article than the four-rowed, and will bring a higher price in the United States markets.

BUCK-WHEAT.—We have never seen this valuable, but delicate, grain, look better ; and if it escape early frosts, an abundant yield may be anticipated. Its value is not sufficiently understood in this Island. We understand it has come into very general use in some sections of New Brunswick ; and in the Western States, and in some parts of Upper Canada, the people subsist to a great extent on it, not for the want of common wheat, but because they like it better. It is there invariably eaten in light, spongy pancakes, with honey or molasses. In this Island we have two varieties—a large, coarse grain, which does not flower, and said to be somewhat bitter, and a smaller sort, bearing a white flower when in blossom. The coarser variety yields a larger quantity of flour from an acre, but the fine, white flowering buck-wheat can alone be recommended for pancakes.

OATS.—The straw was exceedingly short before the late rains, and how they may affect it, remains to be seen. In the meantime, we see no reason to anticipate a short-coming of the grain.

POTATOES.—This standard looks well, but with, in some localities, been thinned by the grubs (which are unusually abundant this season, cutting the young sprouts. We regret to learn that symptoms of disease have been observed, not in the leaves, but in the second growth of tubers.

TURNIPS.—The early Swedes have been so much injured by drought and grubs, as to be very much of a failure ; but what have survived are now doing well.

Upon the whole, we have, at present, every reason to anticipate an abundant crop.

Launched.

On the 3d instant, from the Shipyard of Messrs. A. & J. Macdonald, Vernon River, a superior built Schr. of 100 tons, called the "*Minnie.*"

PASSENGERS

In the ROSE, from Pictou, on Wednesday, Aug. 4th—Rev. W. Stewart, Messrs. F. H. Fuller, C. J. Fuller, Frecker, Thos. Andrews, W. Young, Esq. Prince Edward Island, Judge F. S. Wojowski, Mrs. Lydiard, Mrs. Macaulay, Mrs. Salinger—4 steerage.

In the Steamer from Pictou on Friday the 6th—Count Wolowski, Capt. Hamilton Gray, G. Krollman and Lady, Messrs. John Hays, John R. Watt, James Narraway, P. Gregor, John Macdonald, Misses [illegible] Mary and Watt, two Misses Davis, Mrs. Ross, Miss Ross.

Ship News.

Arrivals in Europe from hence.

BRISTOL, July 13—Margaret.

MILITIA ADJUTANT GENERAL'S OFFICE,
Head Quarters, Charlottetown, July 30, 1852.

General Order.

2d King's County Regt. of Militia.—His Excellency the Commander-in-Chief has been pleased to appoint BURROWES WILCOCKS ARTHUR SLEIGH, Esq., formerly of Her Majesty's 77th Regiment, to be Lieutenant Colonel, Vice MacDonald, absent from the Island.

By Command of His Excellency the Commander-in-Chief.

A. LANE, Lt. Col. and Adj. Gen.

The KROLLMAN's gave their first Entertainment on Friday Evening and their second, last Evening, before a very large and highly respectable audience. To all true lovers of music as a science—of music as an inspirer of high thoughts—great deeds—noble sympathy—or as a pastime and an enjoyment, it was a rare treat. Krollman's performances on the violin were extraordinary, and are said to be not inferior to the celebrated Paganini. Madame Krollman, the Vocalist, a lady of very pleasant manner, sang a number of Songs, which were greatly admired and *encored*. Count Wolowski, the Pianist, exhibited most brilliantly, all his pieces, and proved to be one of the most skilful Pianists, giving the greatest satisfaction to the audience.

The Company intend performing This Evening for Madame Krollman's benefit, and we feel confident, there will be a full attendance.

LIGHT !—We are gratified to be able to state, for the information of Mariners and others interested, that an excellent Harbour Light has been erected at the west side of the entrance to Charlottetown Harbour, on the Block House Point; and Commissioners have been appointed by Government to select scites for the erection of similar Lights at the entrances of Richmond Bay and Georgetown Harbours.—*R. Gaz.*

The U. States steamfrigate Saranac, at Philadelphia, and sloop-of-war Albany, at Boston, have been ordered by the Government, to the Gulf of St. Lawrence, for the protection of American fishermen.

Equitable Fire Insurance Company of LONDON,

[COPY.]

Office, 26 Cornhill, London, July 23, 1852.

AT a Meeting of the Court of Directors of the EQUITABLE FIRE INSURANCE COMPANY held July 23rd, 1852.

Resolved, That the Court having learned by report from Montreal, that an extensive Fire occurred at Montreal, on the 8th inst., and although no particulars are yet received, there is reason to fear that it has involved claims of more than ordinary amount upon this Company, the Court therefore request that the Local Directors at Montreal will promptly proceed to the adjustment of any claims which may arise from the said Conflagration, and draw upon the London Office for such amount as may be sufficient to enable them to pay such claims in full.

A true extract from minutes.

(Signed) HUGH CROFT,
for the Board of Directors.

UNDER THE PATRONAGE OF HIS EXCELLENCY
THE LIEUTENANT GOVERNOR
AND
LADY BANNERMAN.

Tickets, 1s. 6; reserved Seats, 3s.

August 10.

VOCAL MUSIC,

JOHN ROSS, Teacher of VOCAL MUSIC, respectfully begs to inform his friends and the public that he has been induced to appropriate a portion of his time to the instruction of Private Pupils, on the following terms : one-half payable in advance.

For 1 Pupil per Quarter, 2 lessons per week, £1 10s.
2 " " " 2 15
3 " " " 3 10
And for each additional Pupil, 0 15

Application may be made at Mr. M. W. Skinner's or at Mr. William Heard's, Charlottetown.

He would further intimate that he is prepared to open Schools throughout the Country ; he would therefore beg leave to suggest to persons desirous of aquiring a knowledge of this useful and pleasing Science, the propriety of an early application. All letters (post paid) will be punctually attended to.

Also, on hand and for sale, a quantity of MUSIC BOOKS, GAMUTS, &c., &c., adapted to the wants of persons studying Music.

Charlottetown, August 2, 1852.

LOST

ON Queen Square a WHITE [CORNELIAN BROOCH. Any person finding the same and leaving it at the Store of Geo. T. Hazard, will be rewarded for his trouble.

August 1

ETHER AND STEAM.—The *Patrie*, Paris paper, says, that

experiments have for some years past been made with ether combined with steam on board government vessels. The result has been that a great saving may be effected, but that the inflammable nature of ether renders it dangerous. It has just been resolved to replace ether by chlorform, and two engines of 50 horse power are to be placed in the Gallee to enable experiments to be made.

A UNIFORM COINAGE.—A letter from Vienna of the 17th, says—Several European powers have to accept the proposition of the English government to convoke a Congress at London, in order to come to an agreement respecting the regulating of the coin. France, Denmark, Sweden, Spain, and Portugal, have been specially nominated. The invitations have been shortly addressed to Germany. The congress will not commence its deliberations till November next; meanwhile a statistical bureau will be established for the purpose of making the necessary preparations.

EGYPTIAN PERFUMERY.—So perfect were the Egyptians in the manufacture of perfumes, that some of their ancient ointment, preserved in an alabaster vase in the museum at Alewick, still retains a very powerful odor, though it must be between 2,000 and 3,000 yeaas old.

MENTAL RUMINANTS.—Locke says we are to be classed as mental ruminants. It is not enough to cram our brains with collections of facts and theories, but we must chew them over and over, before they will yield strength and nourish meat for us.

CANADA.

The British Naval establishment on the great American lakes has been broken up. The *Kingston* (Canada) *Whig* says that H. M. iron steamship Mohawk has been sold to a private company, and her officers will immediately return to England.

The same paper, says the Toronto *Globe*, which have taken place during the last few days is unprecedented, considering the season of the year, and gives rise to the graves suspicions that they are not all the result of accident.

NEW BRUNSWICK.

ANOTHER PRIZE.—On Tuesday last, another American, fishing schooner was sent into this port, by H. M. S. *Netley*, having been seized in the Bay, for violation of the fishery treaty. Her name is the Hyadar, and she belonge to Lubec.
