## THE DAILY EXAMINER.

JANUARY 26, 1889.

Editorial Notes.  
—There were \$22,000,000 more in the banks of Canada, on the 31st December, 1888, than on the 31st December, 1887. On the other hand, there has been an increase of commercial loans, amounting to \$12,000,000.

—In Halifax a few days ago a man was arrested under a warrant charged with allowing his horse to work with a bad sore on its back and for neglecting to feed the animal. More than one man in Charlottetown is liable to arrest on a similar charge. But, then, we have not a society for the prevention of cruelty to animals.

—The Canada Gazette to hand shows that the deposits in the Charlottetown Savings Bank for December amounted to \$39,759, and the withdrawals, \$26,738.10, showing an increase of \$13,020.90. The returns for the Summerside Savings Bank for the same time are, deposits, \$7,018, withdrawals, \$5,182.31, increase \$1,835.69. It is a remarkable fact that the greater portion of the net increase in all the Government Savings Banks of the Dominion for December—\$17,206.34—is found in the Charlottetown and Summerside Savings Banks which amounts to \$14,856.75.

—In view of the success which has attended the skil or black cod fishery in British Columbia, this fall, and the definite location of the fishing grounds off Queen Charlotte Islands, it is not at all likely that the Department of Fisheries will send out an exploratory steamer next summer. If, however, the industry attains anything like great proportions, doubtless some action will be taken to afford due protection to those engaged in it. It is understood that already arrangements have been perfected for the establishment of a supply and store station on one of the islands in the Queen Charlotte group, so that schooners will not be compelled to return to Victoria with their cargoes or to obtain supplies.

—The Montreal Gazette points out that every citizen of Canada can obtain the right to vote under one or other of the existing qualifications if he chooses to have his name placed on the lists, and, therefore, manhood suffrage would not in any appreciable way extend the franchise. What it would do, however, is to simplify the basis of qualification and substitute citizenship for the half dozen classes of franchise now prevailing, an advantage that ought to be availed of. The simplification of the franchise by the adoption of a single qualification while not increasing the army of voters would make the system more workable and meet with general approval.

—The St. John Telegraph says:—  
"Canadians appear to be more stable in their party allegiance than the people of most countries enjoying responsible government. We have had but two changes of administration since confederation. In the like period Great Britain has had six changes, France a larger number. Between 1856 and 1876 South Australia saw no less than 29 ministries succeed each other, whilst, in the same period, New Zealand had 17 governments, with the distinction of five cabinets in seven months. Victoria had 18 ministries in 22 years; Tasmania, 12 in 21 years, while in the same space of time New South Wales had the luxury of 17 governments."

—The Telegraph must not forget that Canadians have an exceptionally good government.

—A freshet on the Potomac River has unearthed an Indian burying-ground in Hampshire County, Virginia. The oldest residents were not aware that the place had been the receptacle of dead braves, squaws and papooses until the river disclosed the skeletons. Many of the bones are in a good state of preservation, but crumble away when exposed. The Indians were all found in a sort of reclining position, resting on their left side. In the lap of each Indian were earthenware pots, and in these pots were found the belongings of the corpse—beads, arrow, spear, or tomahawk heads, Indian money made of bone or ivory. Some of the beads are made of bone and others of beautiful and curious colored stones. A few are of glass. These, together with some fishhooks and copper trinkets, seem to have been the extent of their property. All of the trinkets are perforated. The holes in some of the beads are so small that in the absence of cotton they must have been strung on hair. These which the Indians are supposed to have made from bone are in perfect preservation, even to the coloring. Residents of the surrounding country have gathered hundreds of the relics. There are, it is thought, many others not yet unearthed. Pieces of the pottery of peculiar manufacture are among the other curiosities which the river disclosed.
