THE LATE REVEREND DONALD MACDONALD.

"The Minister is dead." These words of solemn import have, within the last few days, been whispered in hundreds of families throughout Prince Edward Island; and thousands of our people are mourning the death of one whom they loved with more than ordinary devotion. The Reverend Donald MacDonald, one of the most remarkable men of his time, died at Southport, near Charlottetown, on Thursday last, at the ripe old age of eighty-five years. Mr. MacDonald received a University Education, and, after filling the situation of Tutor, in the family of a Highland chieftain, became minister of the Church of Scotland. He came to this Island nearly forty years ago, and sometime after was known as a minister practically unattached to any church. He visited most of the settlements in the Island, undergoing many hardships. His preaching proved acceptable to many, especially to his own countrymen. He founded *Churches*, to which, at regular intervals, he ministered. His followers increased rapidly, and soon, wherever he preached, he was listened to by large congregations, frequently composed of *his people*, from distant parts of the country. When the writer first heard him preach, which was either in 1829 or 1830, Mr. MacDonald and his followers were the objects of popular ridicule. The minister believed that he was doing his duty as became a messenger of the Gospel which Jesus preached, and he disregarded all scoffers, and persevered, seeking council of no man. The little bands of faithful adherents which, during the first years of his ministry, were found scattered over the Island, became, in several places, large congregations, worshipping in edifices among the most imposing in the Colony. During the latter years of the minister's life, his adherents were numbered by thousands, and he was everywhere treated with respect. He lived among his people, sharing their joys and sorrows, preaching to them in Gaelic or English, and during the nearly forty years of his ministry, he performed an amount of labour which would have killed any man, not possessed of indomitable energy and an iron constitution. To do his duty, to promote the good of his followers, was the sole object of a life extended to a period rarely reached by man. He coveted no man's silver or gold. Food and raiment, and small sums of money to expend in acts of benevolence, of which little children were often the recipients, constituted his salary. He has gone to the grave, but will ever live in the hearts of the thousands for whom he so long and so faithfully laboured; and, when most of his contemporaries shall be forgotten, it is probable that tradition will long preserve the memory of Minister MacDonald.

His remains, on Monday last, were followed from Southport to the place of interment at Orwell, a distance of upwards of sixteen miles, by a line of sleighs extending over a mile. The scene at the grave is represented as most affecting—hundreds of men and women shedding tears as they took the last farewell of the mortal remains of him whom they had regarded as a father and a friend. About twelve Churches and five thousand adherents are, by Mr. MacDonald's death, deprived of a pastor. It is said that it was the minister's wish that they should remain attached to the Church of Scotland.—*Isl.*

WOOD TRADE.—Farnworth & Jardine's Liverpool Timber Circular of the 1st February, shews that the import of New Brunswick woods—pine, birch, and spruce timber and deals—for the past year has been in excess of previous years. General results, as regards importers, are deemed not over satisfactory. In regard to present prices of wood goods, in which we are specially interested, we find the following:

Hardwood.—The import has been larger than for many years past, and, though there has been a fair demand, the pressure of arrivals from Prince Edward Island was so great at one time (and as it deteriorates so much in value, by holding), that sales had to be forced from the quay at very low rates, prices ranging during the middle of the season at from 12d to 14d a few early cargoes having been sold at from 17d to 18½d per foot; latterly the Stocks have become much reduced, and prices have risen to about 14d to 16d per foot for similar size and quality. For St. John and other ports, prices have been better sustained, very little having been sold under 16d to 17d per foot; the last sale reported of Quebec was at about 20d per foot, and of Bathurst at 17d to 18d per foot. There have been no late sales of St. John.

Lathwood.—The import has been rather less than last year. The demand has been steady but not active, and prices have generally ruled at from £5 to £5 10s. per fathom for Quebec, 60s. to 80s. for St. John, &c., and from 30s. to 50s. per fathom for P. E. Island.

Spruce and Pine Deals, Boards, &c.—The market has been very uncertain, and prices have been unsteady throughout the year, for though there has been a full import, stocks have always been kept below an average, at one time not being equal to an ordinary month's consumption. Prices opened at about £8 10s. per standard for St. John spruce, and eventually fell to about £7 10s. per standard in July, since when prices have somewhat varied, advancing to about £8 per standard, and again declining to the last sales of £7 11s. 6d to £7 13s. for cargoes of St. John spruce, and £7 7s. 6d to £7 10s. per standard for Shediac, &c. Pine deals have generally brought much the same price as spruce, unless of extra quality; the last sale of St. John was at from £7 6s. to £8 per standard.

THE ANCESTORS OF THE KING OF ITALY.—When, in 1754, Henry III. passed from his kingdom of Poland to his newly-acquired realm of France, the Venetians received him with great and sumptuous welcome, and on 23rd July he was present at a solemn audience of the Grand Council, when all the patricians met to do him honour. There was at the time in Venice another guest who had also come to pay respect to the King of France, and who had refused a public entry for himself, saying that he came to honour Venice and the illustrious stranger, not to receive attentions in his own person. At the great audience Emmanuel Filbert, Duke of Savoy—for such was his name—was debarred from attendance, because his name was not inscribed on the Golden Book. In the archives of the Council of Ten there is preserved a document showing that on the 22nd of July, 1754, the same duke was admitted into the ranks of Venetian patricians, and the patent of nobility conferred upon him, his heirs, and all legitimate descendants. On the 27th July, 1574, the diploma was handed to him at Turin; on the 26th of August of the same year, thanks were returned to their Serenities from "their good son and servant." So, in electing Victor Emmanuel to be their King, the whole people of Venetia have but chosen a Dodge from their own nobles, and in uniting themselves to the rest of Italy, have carried out the prophecy of her greatest statesman, and realised the vision of her most inspired poet.

The Ottawa *Times* says: A most difficult, tedious, and painful surgical operation was performed on Monday last in the General Hospital in this city under the following circumstances: The patient is a man, whose thigh bone was broken some months ago, back in the forest, where, through want of proper attention, a union of the ends had not taken place. He was removed to Ottawa and placed in the General Hospital. The medical men soon ascertained that there was no hope that the ends of the bone ever would unite under existing circumstances. It was found necessary, therefore, to cut the flesh of the thigh open so as to enable the surgeon to slice off a portion of each end of the broken bone in order to enable them to unite. There is now little, if any, doubt that the limb will be saved, and its use recovered.

A funny story is going the rounds in Paris. A lady in the first society was recently obliged to dismiss her nurse on account of an excess of firemen and private soldiers too often repeated. After choosing as a successor to this criminal a very pretty girl, the lady explained why the first was sent away, and enjoined it on the second not to do likewise. She admitted that she should not. "I can endure a great deal," said the lady, "but soldiers about the kitchen I *won't* endure." After a week or eight days, the lady came one morning into the kitchen, opened a cupboard, and discovered a youthful military character. "Oh, ma'am!" cried the girl, frightened, "I give you my word I never saw that soldier before in all my life; he must have been one of the old ones left over by the other girl!"

FOUR CHILDREN AT A BIRTH.—This little incident happened one day last week to a lady of Mobile, and this is the third time she has thus augmented the number of her household by more than one at a time—first two, then three, and now four.

A young fellow, whose better half had just presented him with a pair of bouncing twins, attended church one Sunday. During the discourse the clergyman looked right at our innocent friend, and said, in a tone of thrilling eloquence, "Young man, you have an important responsibility thrust upon you." The newly fledged bird, supposing the preacher alluded to his peculiar home event, considerably startled the audience by exclaiming, "Yes, I have two of 'em."

CHARLOTTETOWN LITERARY AND DEBATING SOCIETY. — Instead of the usual debate on Friday evening next, the members of the above Society intend having a series of recitations and readings in the Upper Temperance Hall. The doors will be opened at 7½ o'clock, and the public will be admitted on payment of an entrance fee of 4½d.

An association of ladies has been formed in Memphis for the purpose of raising funds to erect at Memphis, or some designated spot, a magnificent church edifice to the memory of the fallen confederates. Among the honorary members are Mrs. Jeff. Davis, Mrs. General Lee, Mrs. F. P. Blair, Mrs. Andrew Johnson.

NOVEL USE OF DIAMONDS.—In July, 1864, an apparatus for boring rocks with diamonds was patented in France by Lescot. It was not practicle, but later improvements by Pachet, towards the end of 1865, made it so. As now constructed, it consists of an iron tube, one end of which is attached to a rod serving as a handle, and at the other end is the edge armed with a series of black diamonds of Siberia, which are set in such a way that by turning the tube by means of a machine, they excavate an annular grove in the rock, and leave in the centre a solid cylinder which enters the tube and easily broken off and extracted when the boring is finished. Fifteen such machines have already been manufactured; its advantages appear to be, that it progresses uniformly, how great the hardness of the rock may be; the progress is about three quarters of an inch per minute, and, no doubt, may, by further improvements, be considerably increased. The diamonds never wear out; it is known that this is also the case with the glazier's diamonds, and that the black diamond is a variety much harder than any other. It appears also that the expenses of boring with a machine of this kind is about the same as boring in the old way; however, more labour is turned out; but the great advantage is, that in the same space where, for instance, in the Mont Cenis Tunnel, three borers were attached, eight of these machines may work, requiring not more power to drive them. The expenses of excavating tunnels with a single machine of this kind, in hard rock, was found in France to be forty or fifty francs per cubic meter, which corresponds to $5 or $8 per cubic yard.

A bust of Lord Macaulay has, with the permission of the Dean and Chapter, been placed in Westminster Abbey by his sister, Lady Trevelyan. It rests upon a handsome bracket, designed by Mr. Scott, in the immediate neighborhood of the grave and of Addison's statute, in Poet's Corner.

A stranger, on his first visit to Washington, inquired, looking at the vast dome of the capitol, if that were the gas works of the city. A wag answered, "Not of the city, sir, but of the nation."

In Haarlem, a peculiar ornament of white lace and card-board, hung just outside the street door signifies the birth of a child; and for the period of six weeks after the birth, while such badge is visible, no tax collector or creditor of any kind is allowed to demand payment.

HOSTETTOR'S BITTERS. — If the stomach is wrong all is wrong. It is the balance wheel of body and mind. The dyspeptic is the most miserable of human beings; the first thing necessary to cheerfulness, to healthful sleep, to bodily strength, to clearness of intellect, to activity, to the enjoyment of life, is *a sound digestion*. If the stomach does not perform its duty, discipline it into regular and healthy action by the use of HOSTETTER'S STOMCAH BITTERS, the purest diffusive stimulant ever administered. It is mild and pleasant; it cheers invigorates and gives elasticity and energy to the whole system. Its action upon the coats of the stomach is renovating in a wonderful degree. Use it for a week, and you will find the sense of oppression after eating, and of emptiness and faintness between meals, which are the distinguishing features of dyspepsia, entirely relieved the bowels regular, the appetite good, and the pulse firm and even. HOLLOWAY'S OINTMENT AND PILLS.—Diseases of the most formidable and chronic characters have been cured by Holloway's remedies. Ulcerations which had proved themselves incurable by any other known means have healed kindly under the purifying and regenerating influence of this excellent Ointment. Sprains, stiff joints, contracted muscles, and glandular swellings can be most safely and effectively treated by Holloway's Ointment and Pills, which can do no harm under any circumstances. Neither of these medicaments has anything deleterious in its composition; both are essentially purifying and strengthening in their nature. The combined power of these noble remedies enables them successfully to cope with most descriptions of injuries, and to cure, or at least relieve, most varieties of disease.

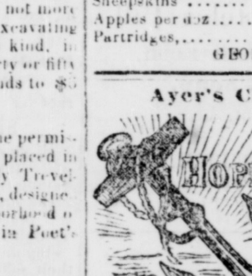
GEORGE LEWIS, Market Clerk.

Ayer's Cherry Pectoral.



Is a soothing Expectorant, prepared to meet the urgent need of a safe and reliable cure for diseases of the throat and lungs. A trial of many years has established the fact that it is more efficacious in pulmonary affections, than any other remedy. Its efficacy has now become so generally known, that it is justly regarded in many countries as a medicine of indispensible necessity. In Great Britain, France, and Germany, where medical science has reached its highest perfection, it is prescribed in domestic practice, and constantly used in the armies, in hospitals and other public institutions, where it is regarded by the attending physicians, as the most speedy and agreeable remedy that can be employed. Scarcely any neighbourhood can be found where well known cases of diseased lungs, which had baffled the efforts of the most skilful and experienced doctors, have been permanently cured by it. These results are the most convincing proofs of the superior curative properties of this preparation; and to them the authors point with peculiar satisfaction. While it is most powerful against confirmed diseases, it is extremely gentle as a medicine in infancy and youth, being quite harmless to even the youngest, when administered judiciously.

This health-restorer accomplishes even more by prevention than cure. If taken in season, it heals all irritations of the throat and lungs, whether arising from Colds or Coughs, or from other causes, and thus prevent that long train of painful and incurable diseases which would arise from the neglect of them. Hence no family should be without it. Influenza, Croup, Hoarseness, Whooping Cough, Pleurisy, Incipient Consumption, and other affections of the breathing organs, give way before this pre-eminent combination of medical virtues.

Prepared by DR. J. C. AYER & Co., Lowell, Mass., and sold by all Druggists and dealers in medicine everywhere.
