

FARMING.

Prof. Saunders at Charlottetown.

VISIT TO CUMBERLAND FARM.

Meeting of Leading Farmers and Citizens.

Interesting Points in Agriculture and Horticulture.

Prof. SAUNDERS paid a visit to Cumberland Farm—the property of John Newson, Esq.,—yesterday afternoon. He was accompanied by Hon. John Goff, of Cardigan; Hon. T. H. Haviland, Mayor of Charlottetown; Hon. A. B. McKenzie, M. L. C.; Mr. Robert Harris, R. C. A.; Dr. Bagnall, and other gentlemen. At the farm, the party was joined by R. R. Fitzgerald, Esq., Stipendiary Magistrate; J. M. Sutherland, M. P. F.; Messrs. T. A. McLean, A. B. Warburton, Benj. Rogers and several others. The excursion was a very pleasant one. Much interest was shown in a field of Ladoga wheat—three and one-third acres in extent—which was seeded from the produce of 2 lbs. of wheat obtained by Mr. Newson, at the Experimental Farm last year. Only one bushel to the acre was sown; and yet the growing stalks, just out in head, were thicker than they usually are when two bushels are sown. There is good prospect of an abundant early crop—the growth being decidedly in advance of White Russian wheat, in the same field, sown on the same day. The hayfields, too, were admirable. One, in particular, was noticeable from the fact that the clover, which is a failure in the Province this year, was here distributed throughout the entire field, and growing luxuriantly, promising a crop of from two to three tons per acre. This fact is not altogether consistent with the generally accepted theory that the failure of the clover crop is due to the bare fields and the frosts of last winter. It rather seems to indicate that there is, at present, a want in the soil of the Province, in respect to clover, which other farmers have failed to supply, but which Mr. Newson has supplied. However this may be, Mr. Newson has certainly the finest and largest field of clover that we have seen this year.

Some time was spent about the ruins of Fort la Jolie, recalling memories of the history of this most interesting spot, admiring the prospect on every hand, and treading the paths which, in the dim past, were trodden by the soldiers of old France and, subsequently, by the soldiers of old England.

In the evening Professor Saunders addressed a meeting of leading farmers, fruit growers, stock raisers, and citizens generally. The Hon. T. H. Haviland, as Chairman of the Board of Exhibition Commissioners, occupied the chair.

Professor Saunders began by referring to his earlier visits to the Province—particularly to the occasion on which he came to select products for the Colonial and Indian Exhibition, held in London. In this connection, he paid a high compliment to the skill of our best farmers and fruit growers, mentioning the name of William Brown, Esq., of this city, as one whose fruit was greatly admired by the connoisseurs of the old country. The reputation of the Island on account of its horses is now, he said, almost world-wide. When horses were wanted for the Experimental Farm at Nappan, the want was supplied by Prince Edward Island in the most satisfactory manner.

There is no occupation, he said, in which general knowledge is more necessary, or can be more advantageously applied than in agriculture. The idea that any dunce is good enough to be a farmer is foolish, in view of the skill, intelligence and energy which are required in successful operations on the farm. Nature has done much. The sun, and air, and soil which she supplies so liberally are gifts of Providence, for which we cannot be too thankful. But she has left much for man to do. The farmer ought to be ready to make the most of the conditions by which he is surrounded. Professor Saunders then dealt with the important subject of manures, pointing out the constituents which are required in the vigorous growth of plants and showing the necessity which exists for each farmer to know for himself how these constituents can be best supplied, and in what proportion they should be supplied to particular fields in the growth of particular crops, in order that the best results may be obtained. He then dealt with the subject of fruit culture, showing the importance of care in the purchase and selection of fruit trees in order that the fruit might be "true to name." The best kinds of apple tree to plant in this country are, in the opinion of Professor Saunders, the Duchess of Oldenburg, the Spy, the Ontario, the Waggoner, the American Golden Russet, and lastly, the Gravenstein—in its season, the most highly flavored of all—wherever it will flourish. Among the pests which injure the apple tree is the tent caterpillar, which lays a ring of eggs and when hatched spins a silken web. The ring of eggs and the web should be destroyed wherever seen. Another insect which infests the apple tree is the codling worm. The use of Paris Green and water applied to the leaves in the form of spray, by means of a syringe, has been effectual in preserving from 75 to 80 per cent. of the fruit subject to this pest and it will "remove" other insects as well. As to pears, Mr. Brown had mentioned four varieties as having been successfully grown by him, viz: Flemish Beauty, Belle Lucrative, Bartlett and Louise Bon de Jersey. Than these four, better varieties could not be named, and if they can be grown here, the people of Prince Edward Island have all that they want in this respect. Plums are more easily grown than pears. The best varieties are Moore's Arctic, the Lombard, the Imperial gaze, the Columbia and Glasses Seedling. Plum trees suffer much from black knot, which is not caused by an insect, but is a fungus growth resulting from spores from one black knot which, carried by the wind, root themselves in the bark of the tree and form another black knot. As soon as the knot appears, and before it becomes black, it should be cut off and burned in order that

other spores may not be formed and released from it. Of cherries, the Kentish is the most common in this Province, but there are others which are well worth cultivating. Among these are the early Russian, the Bladmer,—both of which are successfully produced in climates much colder than this. Of grapes, the earliest varieties only should be selected for cultivation in the open air of this country. The Worden is a fine large black grape, which comes early. The Champion is an early variety; but it is such a poor grape that it cannot be recommended—except for the tables of hotels! The Brighton is a fine grape, and the Delaware and Cleuton are also good. Rogers' Hybrid (Nos. 4 and 5), are two of the best and most promising sorts. Passing on to small fruits, Professor Saunders said that they should be planted in rows, and that the ground about them should be worked up and kept free from weeds by means of a horse cultivator. It is not necessary to lose time in weeding them with a hoe. Currant trees should be planted four feet apart, each way. Of black currants, the Black Naples, Sud's Prolific, and the Champion might be recommended; of red currants, there were the Ruby Castles, Fade's Prolific and Old Red Dutch; of white currants the White Grape was the only one worth mentioning. In gooseberries, Smith's improved yields a heavy crop. The Dunning Seedling and the Hulton Seedling will grow with less care than the larger and finer sorts. The gooseberry worm, or sawfly, may be destroyed by means of a tablespoonful of helobore in a bucketful of water, and also by the use of paris green. As to strawberries, the Crescents, Manchester, Sharpless, Captain Jack and the Wilson are to be recommended. They can be cultivated in rows two and a half feet apart, as easily as turnips. Raspberry trees should be placed in rows from four to six feet apart, and from one foot to eighteen inches apart in the row—in good rich soil. The Turner and Marlborough are good varieties. Blackberries might also be introduced, and Stone's Hardy and the Lucretia were among the varieties recommended.

Professor Saunders, in concluding, spoke of the work going on at the Experimental Farms, of which he is the Chief Superintendent. Mr. Francis Bain asked if a remedy could be suggested for the fungus growth which causes the potato rot. Professor Saunders recommended the use of sulphuret of lime in solution wherever the fungus appeared. Hon. David Laird asked if the Professor could suggest a remedy for the weevil or midge.

Professor Saunders replied that the insect referred to was the midge and not the weevil. He described its nature and habits and showed that it is a difficult thing to deal with. The methods adopted by the farmers of the Island, of sowing early so that the grain may be advanced before the midge is ready to fly, or late so that the grain may not have matured sufficiently for its purposes until its season is passed, are perhaps the best that can be followed until an agent for its destruction has been found. By the use of early varieties of wheat—such as the Ladoga—the midge may perhaps be avoided.

Hon. D. Ferguson suggested that the prevalence of the midge here might be due in part to seeding down of grass with wheat, and Professor Saunders said that might be so.

Mr. C. C. Gardiner said that, in his belief, wheat in the hands of good, careful farmers yielded as plentifully here as in Ontario or the States. He was aware that some farmers here had never yet been obliged to buy an imported barrel of flour.

After several other questions and answers, a hearty vote of thanks was, on motion of Hon. D. Ferguson, seconded by Hon. David Laird, accorded to Professor Saunders.

Sunday School Picnic.

THE Excursion Picnic of the Prince Street Methodist Sunday School yesterday was one of the most enjoyable that has been held for a long time. Notwithstanding the unpromising appearance of the morning, within half an hour of the time the stirring music of St. Peter's Band, under the management of the Rev. Mr. Lloyd, was heard, and there was the rallying of over three hundred children in the basement of the church, prepared to go to Suffolk at all hazards. The officers of the school, with the pastor, the Rev. Mr. Rees, after wavering a little while as to the expediency of taking so many little ones from home under so threatening a sky, concluded that the clouds of disappointment should not be added to those which lowered in the air, and wisely resolved to go. Filing into double line of march to the station, the boys and girls stepped out with the precision of soldiers, to the martial strains which accompanied them, and comfortably filled the cars which were placed at their disposal. The arrangements on the grounds, which were under the superintendency of Mr. W. H. Findley, were perfect. There were tables for hundreds loaded with luxuries and ample supplies of all sorts of things that go well at Picnics. The amusements, under the management of Mr. S. F. Hodgson, were entered into with the greatest enthusiasm; and never did the young people have a better opportunity to display their ingenuity and mettle. Many friends gathered from the adjacent settlements and sat down to tea, but the visitors from town were not so numerous as they would have been had the morning been bright. Suffolk is a delightful spot, with its smooth green fields and luxuriant growth of beech and maple, and, in holiday attire as yesterday, with its strolling groups, the voices of the children and the rich music of the band swelling through the avenues of its stately groves, was one of the most attractive places conceivable. The sunshine on the face of the proprietor, Mr. James Wyatt, showed that he thoroughly enjoyed the pleasure of devoting his beautiful acres to so goodly a purpose. At six o'clock the place was left to its original silence. Although the low voiced echoes may yet be softly telling the old-time secrets that some of the young people were whispering in the woody dells, all came safely home, satisfied with a day of innocent recreation, each one having striven to make the other happy.

Personal.

Mr. James Paton, of the firm of James Paton & Co., left on a business trip to the Old Country, via Rimouski, yesterday.

Professor Braden's Lecture.

PROFESSOR CLARKE BRADEN gave his first lecture in the Y. M. C. A. Hall last evening. The Hall was thronged. J. T. Mellish, Esq., presided, and briefly introduced the lecturer. His subject was: "A Statement of the Issues Between Christianity and Infidelity." He held that all who deny the divinity of Christ and the inspiration of the Scriptures are infidels, no matter whether they are willing to admit it or not. The various points at issue were fully and fairly stated. Accuracy of knowledge and candor in expressing his views were apparent throughout the discourse. The lecturer's style is cool, severely logical and convincing, and he held the close attention of the audience from beginning to end. The subject of the lecture this evening is: "What Christianity has Done for the World." There will likely be another full house.

Codfish Bait.

A St. Pierre despatch says:—Fishermen are greatly excited over a discovery that promises to revolutionize the codfish business. Three French ships, instead of coming to St. Pierre for bait, fitted themselves out with flat-bottomed round baskets with a small hole in the top. These they sank in 70 or 80 fathoms, and they were quickly filled with periwinkles of large size. The shells were smashed on deck and the trawls baited with live periwinkles. Codfish took to these most ravenously, and the vessels were soon loaded down to the gunwales and sailed for France with full cargoes the first week in July instead of October, as usual, thus saving three months' time and hundreds of dollars in the purchase of bait. If this new method proves successful it may go far to solve the fishery problem between Canada and the United States.

MARRIED.

At Chelsea, Mass., by Rev. G. H. Crawford, Mr. H. C. Dobson, of the Boston and Marine Railroad, to Miss Annie H. Cotton, formerly of West Cape, P. E. I.

HAWKER'S TOLL AND CHERRY.

A Favorite and Most Valuable

Remedy for all Throat and Lung Diseases.

It has cured hundreds of cases considered hopeless. It soothes, heals and strengthens the diseased or irritated Throat and Lungs in a very short time. Just a few doses will cure a fresh cold if taken in time. Price 50 cents per bottle. For sale at the Drug Stores. W. HAWKER & SON, Proprietors, St. John, N. B.

CHALLENGE.

Robert Fitzsimmons, Esq.

DEAR SIR,—I understand you are anxious to trot your three-year-old Chief filly against Lady Pilot for \$50 a side. As an accommodation to you, I will match Lady Pilot for \$50 or \$100 a side against said mare or any three-year-old Chief or Dean colt you may wish, race to take place on or about August 20 next, mile heats, best three in five, to harness, and on any track you may name, barring your own. This invitation will remain open for ten days from date, which will give you sufficient time to sign agreements and deposit your money if you mean business.

The Monster Tea

THE Ladies of the Presbyterian Congregation of East St. Peter's have decided to have a Tea at the

Head of St. Peter's Bay,

—ON—

JULY 17th, instant.,

in a lovely field owned by Mr. M. McInnis, about two hundred yards from the Station, fronting on the distance Bay, with its pretty view of nine miles beautiful to harbor, pronounced by all tourists to be the most magnificent spot in America.

Our ladies are determined that XL shall be their motto, and a Committee that is both large and active are sparing no pains to make all necessary arrangements, so that all parties can enjoy themselves.

Saloons, provided with all kinds of temperate drinks, together with fruits, wild and tame, and all other dainties usually found at such places on similar occasions.

A first-class Brass Band, along with other musical instruments, will discourse sweet music on the grounds.

The amusements will consist of Horse Swing, Football, and games which will appear in due time in Handbills. Look out for them.

The Committee will be found attentive to all except those who may appear on the ground under the influence of intoxicating liquor, or may dare to sell at or near the grounds.

Should the day prove unfavorable the Tea will be held the next fine day. Tea on the tables at 12 o'clock noon.

Trains will run as follows: A Special Train will leave Charlottetown at 7.30 a. m. (standard time), on day of tea; returning will leave St. Peter's at 4.45 p. m. Express Train from Souris will be detained thirty minutes, leaving at 6.45 a. m.; and for the convenience of parties from Georgetown Branch regular train will be detained at Mont Stewart to connect with special same evening.

Following are the fares from Charlottetown and intermediate stations, including Tea:—

To St. Peter's and Return. From Charlottetown to Union (inclusive) 85c

" York and Suffolk.....75c

" Bedford to Mt. Stewart (inclusive) 75c

" Douglas and Dundee.....65c

" Moreland Marie (incl) one first-class fare.

" Souris and Harmony.....65c

" New Zealand and Bear River.....55c

" Rollo Bay to Five Houses (incl) one first-class fare.

" Georgetown to Perth.....85c

" Baldwin's.....75c

" Peeke's to Pisiquid.....65c

Tickets from Charlottetown and intermediate stations will be issued for special, good to return by special same evening.

Tickets from Souris and Georgetown and intermediate stations will be issued by regular trains, good to return by regular same
