

Local and Other Items.

The mails left Cape Traverse for this city at 1.30 p. m.

Nowhere can better bargains be had than at R. Young's.

The ice on the Hillsborough is the best of the season.

The "Northern Light" arrived at Pictou at noon to-day. She will return to-morrow.

GOOD WORK.—Mr. Finlay Smith, of Orwell, raises mussel-mud at the rate of fifty loads per day.

J. B. McDONALD, Esq., who has been very ill since Sunday, is, we are pleased to learn, recovering.

LORNE RESTAURANT.—Oysters on the half shell, fresh and good, at the Lorne Restaurant, mar 31 31

MR. CRAWFORD, Second Engineer of H. M. Surveying Steamer "Gulnare," arrived at Orwell on the 25th inst.

An electric light company, with a capital of \$2,000,000 for lighting towns by electricity has issued a prospectus in London.

REMEMBER the "Cumming" benefit at the Rink to-night. The Band will be in attendance from 8 to 10 o'clock. Good ice.

BANK OF P. E. Island Notes taken in exchange for beef during Easter week.—WHEATLEY & SONS. [mar 31 1882]

SERIOUS disturbances have occurred in Galway, between the Connaught Rangers, aided by the mob, and the 84th English regiment.

SEVERAL of the religious orders in France, who had quietly re-established themselves in their old quarters, have been ejected by the authorities.

The latest scientific curiosity is a lady's brooch, in which a tiny incandescent spark takes the place of an outworn brilliancy of a diamond.

THE Educational Institute will meet at the Upper Prince Street School at 8 o'clock this evening. The subject of Music and Vocal Culture will be the subject under consideration. All are invited.

"NORTHERN LIGHT"—L. E. Prowse will receive, per first trip of "Northern Light," a very large stock of Hats, for spring, direct from London, Montreal and Boston, including all the leading styles. mar 31

At the auction, to-day, by Mr. William Dodd, Union Bank stock sold at par, Merchants Bank at sixty five to sixty-seven, and Gas Stock brought three per cent. premium for preference.

PARTIES having any claims against the proprietor of the Lorne Restaurant will oblige by furnishing same at once, and parties owing me will please pay up at once, as my business in future will be conducted on the pay as you go principle.—A. McDONALD. [mar 31 1882]

We learn that Capt. Cameron failed to find, during his recent trip to Great Britain, a steamer which would be suitable for summer service between this Island and the mainland. The Steam Navigation Company have, therefore, concluded to have an iron screw steamer suitable for the service built on the Clyde next summer.

VENOR says: "You may look out for a rather heavy storm in your section of New Brunswick about the last of March or entry of April—possibly a blockade of snow again, and at any rate very strong gales. If you can get this prediction in a local paper it may be of some service to the people."

THE "Northern Light" left Pictou at daylight this morning, and arrived at Georgetown at eleven o'clock. All the Express goods—the accumulation of two months—will arrive in this city by noon train to-morrow. The steamer may now be expected to ply regularly, the recent westerly gales having cleared the Straits effectually.

MACK'S Magnetic Medicine—the great brain and nerve food—will restore lost nature to young, middle-aged and old. Life is too short to waste away. Read the advertisement in another column, and if you are afflicted make no delay in procuring the cheapest and best medicine ever sold. Sold in Charlottetown by Apothecaries' Hall Co.

THE Secretary of the meeting held in this city on St. Patrick's Day, which adopted resolutions in reference to granting Home Rule to Ireland, has been informed that those resolutions were duly received by Mr. Costigan, M. P., and the Island representatives in the Dominion Parliament, and that the Address to Her Majesty on this important subject would receive their best attention and support. He was also informed that the motion would be passed by a unanimous vote.

A MAN, named Kelly, appeared at the Stipendiary Magistrate's Court this forenoon, on the charge of drunkenness. He left the city yesterday evening to walk on the ice to Belfast; but he had not passed the Three Tides, until, overpowered by liquor, he fell helpless on the ice, and went fast asleep. A number of boys, who saw him fall, went to his assistance, hauled him to the city on a "topsy," and gave him in charge of the police. He was fined \$2 and costs.

THE market to-day was very well attended. The following are the prices: Beef (small) per lb. 6 to 12 cents; do (quarter) 5 to 9 cents; Mutton per lb. 6 to 12 cents; Lamb per lb. 5 to 10 cents; Veal per lb. 4 to 8 cents; Ducks each, 25 to 30 cents; Poultry each 20 to 30 cents; Chickens per pair 30 to 50 cents; Butter (fresh) 22 to 25 cents; do (tub) 16 to 18 cents; Eggs 12 to 15 cents; Hay per cwt 30 to 35 cents; Potatoes per bush. 35 to 40 cents; Flour per cwt \$3.00 to \$3.50; Oatmeal per cwt \$2.50 to \$3.00; Oats per bush. 32 to 36 cents; Geese each, 50 to 60 cents; Sheepskins, 70 to 80 cents; Pork per carcass, 6 to 7 1/2 cents; do, small 3 to 11 cents; Turkeys each 75 cts. to \$1.50; Turnips 20 to 22 cents per bushel; wild geese, 75 to 80 cents.

Weather Bulletin.

TORONTO, March 31—10 a. m. Fresh to strong westerly to northwesterly winds, fine cold weather.

BIRTH.

At Village Green, Lot 49, on March 27th, the wife of Samuel J. Sentner, of a daughter.

DIED.

At Santa Barbara, California, on the 30th March, George M. Brown, in the 80th year of his age.

DOMINION PARLIAMENT.

Coal and Breadstuff Duties.

Telling Speech by Mr. Hackett.

NEW POST OFFICES.

Special to the Examiner.

OTTAWA, March 31.

In the House of Commons, yesterday, Mr. Laurier, moved a resolution to abolish duties on coal and breadstuffs, imported from the United States and other places outside the Dominion.

Sir Hector Langevin made a telling speech in reply to Mr. Laurier's remarks on the motion.

Sir Hector was followed by Mr. Edward Hackett, M. P., for Prince County, who spoke at length in defence of the National Policy. Mr. Hackett's speech was a good one, and he was frequently applauded. He said the Waythorne Land Government imposed duties on grain and breadstuffs in the year 1880, but they now passed as Free Traders. Two million bushels of oats were imported into Canada during the year 1878, but in the year 1880 only two thousand bushels were imported. Thus the duty imposed on grain and breadstuffs left the Canadian markets open for Canadian farmers, and particularly for Island farmers, who thus control the Maritime markets.

New Post Offices have been granted to St. Peter's, North Carleton, Baldwin's Road, Millburn Road—all in King's County.

GENERAL NEWS.

MEMPHIS, March 30.

The steamer "Golden City," when approaching her wharf, this morning, at 4.30 was discovered on fire. The boat's bow at once headed for the shore, and in four minutes afterwards she touched the wharf, where a coal fleet was moored. A line was made fast to one of the coal barges, but the current being swift it soon parted, and the burning steamer floated on down the river, a mass of flames, with many passengers and the crew aboard, who were unable to reach the shore and were lost. The "Golden City" left New Orleans on Saturday, en route to Cincinnati. She carried a crew of about 60; she had 40 cabin passengers, 23 of whom were ladies, and nine children. The cargo consisted of 300 tons, among which was a lot of jute. The fire is said to have had its origin in this material. It is estimated that 35 lives are lost.

LONDON, March 30.

In the Commons to-night Mr. Gladstone stated that arrears of rent under the Land Act would be a subject for consideration during the Eastern recess. The debate on the "closure" resolution was resumed.

Mr. John Bright said that there would be no doubt unless something was done to deliver the House from its difficulties it would stand before the country as having neglected its duty. If the proposed resolution erred, it was in not being sufficiently severe. They concluded with an appeal to members generally to assist the Government in the discharge of its duty.

Mr. Sexton said he would rather his name should go down to posterity with names of the base informer, who has sworn away the lives of innocent Irishmen, than with the names of Irish members voting with the Government.

After speeches by Sir Stafford Northcote and Mr. Gladstone, Mr. Maristie's amendment was rejected by a vote of 318 to 279.

Mr. Gladstone then moved the adjournment of the debate until Monday. The motion was carried.

MADRID, March 30.

A serious strike has occurred in Barcelona and other towns opposed to the reform of the tariff, and workshops and mills have been closed. There have been fifty arrests.

BERLIN, March 30.

Terrorist placards are again making their appearance on the walls of St. Petersburg. One, which is of the most violent character, declares that Alexander III. is to be condemned to death.

ST. PETERSBURG, March 30.

Another Nihilist leader has been arrested for participation in the construction of the mine in little Garden street.

CORRESPONDENCE.

We do not hold ourselves responsible for the opinions or statements of our correspondents.

To the Editor of the Examiner.

DEAR SIR,—Will you do me the favor of publishing the following letter which was sent to the Journal, but which the liberal minded editor of that truth-loving sheet silently refuses to publish, and oblige, Yours, etc., A. McDONALD.

March 30, 1882.

To the Editor of the Journal.

DEAR SIR,—Though no name is given, there is no mistaking the fact that I am the party accused in the last issue of the Journal of being the writer of certain letters which recently appeared in THE EXAMINER. With reference to that charging the Journal with abuse of the Hon. J. C. Pope, you say that you have been credibly informed that I am the writer. Now, I beg to state, in the most positive terms, that I am in no way responsible for the appearance in print of the letter in question, and that the party—whichever he was—who informed you to the contrary, never gave utterance to a more untruthful statement in his life. The attempt to fasten upon me the authorship of the letters signed "Liberal" and "Disgraced Liberal" is quite as unfair as the charge already referred to is unfounded, and I defy the production of proof in support of either one or the other.

As I cannot think you would do me an intentional wrong, I have to ask you to do me the justice to publish the foregoing denial of an utterly unfounded charge. Yours, etc., A. McDONALD.

BY ALL DEALERS THROUGHOUT THE WORLD.

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BAY'S PATENT" Burners, which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers. These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas. Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £130,000 (\$250,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best unburnt Burners attainable at moderate cost, I have selected them for a series of experiments. The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Willis, F. C. S., F. I. C. E., showed that Bray's Burner yielded the greatest amount of light of all the two or three scores of Burners reported upon which included all the Burners of repute in the market. In a pamphlet upon Light and Heat, published by R. B. Taylor, A. M., he says: "The cost of Gas as used in the most efficient illuminants is much more economical when rightly used than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devco's Brilliant Oil and ordinary Oils, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devco's Brilliant Oil costing 27.4 grammes costing half a cent, gave a light equal to 9 candles. "A good Argand or Johnson's Burner, the Burner's used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, in the authority of scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and dangers, renders its use desirable wherever it can be introduced. As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.63 per 1000 feet as now charged here when consumed, more especially through Bray's Burners. Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are affording a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced. [no 4 eod]
