Grain

WINNIPEG, AUG. 16 (CP)—
Grain prices moved narrowly to-
day on the Winnipeg Grain Ex-
change. Prices firmed in late
trade with commercial demand in
the form of shippers appearing
in oats and barley.
Local selling was influenced by
the large estimate of the 1950
wheat crop released yesterday by
the Dominion Bureau of Statistics,
but this was offset somewhat by
threats of frost in grain-growing
regions.
In wheat exporting, the United
Kingdom was allocated 700,000
bushels of wheat.
Closing Prices:
Oats: Oct 1-4 lower 85 1-4A;
Dec 5-8 lower 78 3-8; May 1-2
lower 79B.
Barley: Oct 1-8 lower 125 1-4;
Dec 3-8 lower 115B; May 1-2
lower 118 1-5A.
Rye: Oct 7-8 lower 146; Dec
5-8 lower 145 1-4B; May 1-2
higher 149B.
Flax: Oct. unchanged \$3.49B;
Dec. unchanged \$3.44nt. May not
open.
Prices of class two wheat for
export to countries other than
United Kingdom, were: No. 1 nor.
\$2.06; no 2 \$2.03; no 3 \$2.01; no
4 \$1.98; no 1 durum \$2.06; no 2
\$2.03; no 3 \$2.01.

Egg And Poultry Marketing Report

The production of eggs during
the month of January to April
inclusive was somewhat lighter
than for the same period last
year, reports Mr. F. M. Nash,
district inspector, poultry prod-
ucts. Production increased con-
siderably during May and June
and offset the loss in volume dur-
ing the earlier months of the
year. Total production to date is
about equal to that of 1949; how-
ever, production has now started
to decline and with a light pul-
let crop it is not likely produc-
tion will be as great for the re-
mainder of the year as in 1949.
The majority of eggs in Canada
are produced during the
months January to June. Seventy
per cent of the eggs are pro-
duced during the first six months of
the year and this creates a sur-
plus of eggs during the spring
to be followed by a deficit dur-
ing the autumn. It might be
said the spring surplus amounts
to 12% or the volume shipped to
the United Kingdom. Since eggs
were not shipped to Great Brit-
ain, these eggs had to be stored
in Canada, to be sold here during
the deficit period or from this
date onward.
Taking eggs off the market and
storing same during the surplus
period has the effect of holding
prices steady during this period
and of course when placed on the
market in the fall has the effect
of not allowing prices to go
too high during the deficit period.
The storing of eggs this spring
increased the price of eggs to the
producer by some ten, or twelve
cents a dozen.
The placing of these oil pro-
cessed eggs on the market at the
present time is having the effect
of reducing prices by ten cents
per dozen under the high of last
year. It looks as if egg prices
have about reached their high
for this year.
Canadian poultrymen in 1950
reduced their chick purchases by
17% as compared to the previous
year. At present, levels of pur-
chasing power and consumer de-
mand, the population of laying
birds as of September 1st should
just about take care of Canadian
domestic requirements in 1950-1.
The egg market at the present
time is strong at present prices
and all supplies are finding a
ready market throughout the
Maritimes. A review of paying
prices will show that some deal-
ers are apparently making a much
better job of marketing eggs than
others.
The price being paid to pro-
ducers for ungraded eggs by op-
erators of grading stations varies
considerably running all the way
from 45 to 50 cents a dozen for
Grade A Large, 43-48 for Grade
A Medium, and 25-30 cents for
Grade B.
Local dealers are quoting op-
erators for ungraded eggs by op-
erators of grading stations varies
considerably running all the way
from 45 to 50 cents a dozen for
Grade A Large, 43-48 for Grade
A Medium, and 25-30 cents for
Grade B.
Poultry receipts are light. The
majority of stock received is fowl.
There are some chicken being
marketed but generally chicken
