Epps's Cocoa.

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctor's bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled LIVE.

THE THUGS OF INDIA.

A Terrible System Broken Up After Centuries of Horrors.

Thuggee and Thugs, what do they mean? The names are well understood by persons connected with India. To some, though, they may convey only the idea of ordinary criminals who used strangling as a method of murder, and it is but a few who are conversant with the details of the criminal system which, by combining religious superstition with desire for plunder, existed for ages, and till within the last sixty years disappeared the progress of civilization in India, making life and property alike insecure throughout the continent.

How the Thugs Worked.

To convey some idea of the way in which a gang of Thugs worked, an extract from "The Confessions of a Thug" will be of interest. It is the account of the first undertaking of Amir Ali, afterwards a most notorious leader, who was a native banker, with a valuable collection of Benares cloths laden on bullocks, was made away with.

BEWARE OF FRAUDS. The unfailing success of Dodd's Kidney Pills induces Fraudulent Imitations to attempt to pass Worthless Remedies on the Public.

Toronto, May 7.—This appears to be an age of fakes and frauds. It seems impossible for any new idea or valuable invention to be made known without superannuated trying to foist their goods on an unsuspecting public in the hope of making a name for their worthless ideas.

A lady will sometimes spend hours selecting dress goods. She is not desirous of giving trouble at all. But there are conflicting claims. There are considerations of durability, of texture, of draping, Priestley's dress fabrics have been a niche in the popular esteem when conflict ceases to vex. It is enough to get Priestley's black dress goods to feel confident that you have the best. They wear better than any other make.

A MONTREAL MAN

Relates an Interesting Personal Experience.

While the following statement of A. D. Thomson, of Montreal, is of local interest as coming from him, it is also of universal interest because it emphasizes a great truth. Mr. Thomson says: "Being troubled with nasal catarrh I was advised to try Hawker's catarrh cure, which I did, and since using it the catarrh has disappeared entirely; in fact I can walk all day and breathe through my nose without the least trouble." What Mr. Thomson says has been his experience, has been the experience of thousands. Even the most aggravated form of the disease yields to the wonderful curative power of Hawker's catarrh cure. It restores the breath to its pristine sweetness and removes all disagreeable and unhealthy symptoms of the disease. It is a most reliably produced cure for cold in the head, and will relieve the deafness caused by catarrh. For sale by all druggists at 25 cents per box. This remedy has no equal in its field of operation.

A FROZEN SOAP BUBBLE.—A frozen soap-bubble broken in two and floating like an iridescent transparent egg shell on the surface of a vessel of liquid air was one of the most marvellous sights shown by Prof. Dewar in a lecture at the royal institution in London a few days ago, on the effects of intense cold. The investigation of this new field of science is developing many wonderful bits of knowledge, some of which are sure to be turned to valuable practical account before long. The pretty experiment spoken of which delighted the audience was quite simple. The professor poured a few spoonfuls of liquid air into a glass vessel. The intense cold caused by evaporation produced a miniature snow-storm in the atmosphere above the liquid. The operator lowered the soap bubble on the end of a rod into the freezing atmosphere. The bubble became darker; it grew smaller and smaller; a rainbow-colored film grew slower. It contracted somewhat in size, and a moment later froze. A slight movement broke it from the rod in two pieces, which floated for a hour or two, and then, precipitating a tiny snowdrift within, precipitated from the freezing air above.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

Dr. G. C. Orson, Lowell, Mass.

"Castoria is the best remedy for children of which I have any knowledge. I hope the day is not far distant when mothers will cease to resort to the use of Castor Oil, and will use Castoria instead. It is a most reliable and safe remedy, and will cure all the troubles which attend the use of Castor Oil, and will give the child a healthy and natural sleep."
