

S'ide Town Council To Seek Increased Borrowing

A resolution proposing that the town of Summerside issue a 20-year serial debenture of \$400,000 amount not exceeding \$400,000 and borrow by way of an overdraft, a sum not exceeding \$200,000 was approved at a regular meeting of the Summerside Town Council held last evening in the chambers and presided over by Mayor W. A. Currie, with all councillors present, as well as town manager Mr. Joseph Brophy.

The resolution, which needs the approval of the Legislative Assembly, states that the \$400,000 debenture issue is to be used to pay capital expenditures made by way of general permanent works and to retire the overdraft caused by these capital expenditures. The loan of \$200,000 will be used for anticipated capital expenditures, which Coun. MacCausland, chairman of the finance and assessment committee said must be kept at a minimum this year.

CHARGE ELECTION DATE

As a result of a lengthy discussion regarding the present regulations as they concern auditing of the town books, which at present, have to be completed by January 21st, a motion to extend the auditing time by holding the annual civic election on the last Tuesday in February through an amendment of the Incorporation Act was approved.

LIGHT, POWER REPORT

Coun. Clark, reporting for the Electric Light Department, said that the light plant's largest engine is presently out of order, while awaiting the arrival of a small part. He said that this engine is responsible for 1,100 kilowatts of the plant's 2,800 kilowatt capacity and added that never before has the value of the tie-in with Maritime Electric been brought home so forcibly as it has been since the breakdown of the engine. He said that the firm load (that is the load supplied without the large engine) should be near the capacity output, and as this is not the case, purchasing of another power plant should be taken into consideration.

WELLINGTON

Mr. and Mrs. Roland Millar and son Roger of Freehold, were guests of Maud, Mrs. Clayton Barlow on Sunday.

This community was deeply shocked and saddened by the sudden death on Saturday morning, January 26th, of one of its young and highly esteemed citizens, the late Meddus Arsenault, in his 35th year. The late Mr. Arsenault is the son of Mr. and Mrs. Arsene Arsenault. He is survived by his sorrowing wife, four young daughters and one son, ranging in ages from one to six years, also two sisters and four brothers. He was a valued employee at the R.C.A.F. Station in Summerside for the past nine years. He was also a Veteran of World War II. Funeral was held Monday morning from his late residence to Immaculate Conception Church. Interment was in Church cemetery.

WESTERN GUARDIAN

PERSONALS

Mr. Alex Morrison, Coleman, entered Prince County Hospital for treatment.

The many friends of Mrs. George Heffel, Summerside, regret to hear of her illness and wish her an early and rapid recovery.

CARD OF THANKS

We wish to express our sincere appreciation and thanks to the members of the Alberton Fire Dept., for their prompt action during the fire at our home and also to all our kind friends from Alberton and vicinity for their most generous assistance with a special thanks to the Red Cross Disaster services committee, and the Alberton branch of the Canadian Legion.

OTHER BUSINESS

Coun. Wood, chairman of the streets committee, suggested that the street foreman in need of transportation in order to get about the town and added that he believes the foreman should be put on the job supervising the men and not in the office.

He concurred with Coun. Clark in regard to the need of another generator for the light plant.

Coun. Wood said he had heard that four Summerside policemen brought suits rather than police uniforms with the money appropriated for the latter purpose and stated this should not be tolerated.

In speaking of the Fire Department, he stated that gas masks are still needed and that as far as facilities for drying out hose are concerned, the department was better off 40 years ago.

Predict Canada's Economy To Continue Expansion During '57

OTTAWA (CP)—Canada's economy will continue to expand during 1957 but the rate of growth will be down substantially from the peak of 1956, the government estimated Monday.

Inflationary pressures are expected to ease towards the latter part of the year and informants said that in turn could lead to a relaxation in federal credit curbs and "tight money" policy.

Planned capital investment, key to expansion, is forecast to rise by eight per cent this year to a high of \$3,533,000,000 from the \$7,900,000,000 spent in 1956, Trade Minister Howe said in his annual report made public in the Commons.

The rate of anticipated climb, however, is "substantially less" than the 24-per-cent rise last year when outlays on new factories, houses, schools and other built-up structures as well as new machinery and equipment increased by \$1,550,000,000.

Spending is estimated to increase for pipelines and hydro power, factories, shops, schools, hospitals and churches. Outlays by government departments also are forecast to rise.

Major anticipated reduction is in housebuilding, where spending is expected to drop by \$292,000,000, to \$1,283,000,000.

"The 1957 capital program, as

would have to be placed this year to prevent a recurrence.

He said the water situation is the same in regards to the air in the system and that this cannot be remedied until the Harvard Street pump, which is the main source of supply, is taken out and the necessary repairs effected.

Coun. Cannon said he didn't know how long this would take as it is not known at what depth the trouble lies. He said to remove this pump would jeopardize the position of the town if a fire should break out and that it might become necessary to drill a new well, which, he added, will certainly be necessary in the near future anyway.

Coun. Clark stressed the necessity of enforcing that law in regard to non-parking areas in the town, especially in front of the theatre exits and this matter is to be taken up again with the Police Department by Coun. Jenkins.

Approval was given to several proposals moved at a recent meeting of the rink committee and presented by Coun. MacCausland. After a brief discussion on whether the Stadium should be controlled by a commission or by the present type of committee Mayor Currie said a meeting to discuss the advantages and disadvantages of both systems will be held in a few days.

CONTRASTS WITH PM

The temper of Mr. Howe's statement contrasted with that of Prime Minister St. Laurent, who estimated in Toronto Jan. 21 that the capital-investment program for 1957 may rise by 12.5 per cent—about seven per cent in volume and five per cent in prices.

Mr. St. Laurent said then: "Such an increase of about seven per cent in real terms would greatly intensify the present shortages and something will have to yield—either in the competition for funds to finance projects or in the competition for labor and materials to carry them out."

Mr. Howe provided no price-volume breakdown in his survey, but officials estimated the anticipated rise would result from an increase of about six per cent in volume and two per cent in prices.

A two-per-cent price rise is considered fairly normal in an active year. It would not be one leading to a major fears of inflation. Thus it appears there has been some shift in federal thinking during the last month. Fears of inflation appear to have abated.

The Cat Jumps, After Nine Days

SCRANTON, Pa. (AP)—The cat jumped. After nine days perched atop a 60-foot pole, the animal leaped to the ground Monday, ending the outstretched hands of would-be rescuers, and disappeared.

The cat had climbed the towering Pennsylvania Power and Light Company pole at Simpson, Pa., Feb. 3, safely brushing past a line that carried 23,000 volts and supplied the nearby Fairview State Hospital for the criminally insane and three small communities.

The company didn't want to send a man aloft, because of the danger. And it didn't want to shut off the power, either.

The cat, meantime, ignored all enticements of food and water. Monday the company, swamped by hundreds of telephone calls, decided to try to get the cat down.

Workmen climbed up 40 feet and insulated the deadly wire with rubber wrappers. Another fellow carried a basket of fish. The cat nervously moved down 10 feet—leaped and was gone.

Euclide Bernard and family. A staff dinner was held recently at Mulberry Lodge, Summerside, for the management and staff members of the firm of Arsenault and Gaudet, commemorating their 50th anniversary of business. A delicious turkey dinner with all the fine trimmings was disposed of, the guests enjoyed a few fine remarks presented by the executive members of the management. Mrs. E. J. Arsenault, Y.P.M. Cedric Arsenault; Secy-treas. Mr. Euclide Arsenault. Guests present were: Mr. and Mrs. E. Arsenault; Mr. and Mrs. Cedric Arsenault; Mr. and Mrs. Joseph Gaudet; Mr. and Mrs. Joseph Gaudet; Mr. and Mrs. Edmond C. Clair; Mr. and Mrs. Edmond C. Arsenault; Mr. and Mrs. Jolien Arsenault; Mr. and Mrs. Wilfred Arsenault and Miss Helen Gallant. Also present was Mrs. E. J. Arsenault, wife of the late Mr. Emmanuel Gaudet who was partner of the firm up to his death in 1949.

Mr. Fidele Perry who has been employed in Knob Lake, Quebec, is visiting his parents, Mr. and Mrs. Paul Perry.

Sympathy is extended to Mr. Emile C. Arsenault on the recent death of his sister, Mrs. Philip Arsenault in U.S.A.

Memorial Cross For Widow Of First War Veteran

Mrs. T.H.E. Inman of Summerside has received from the Minister of National Defense a beautiful silver cross. A card and a letter accompanying the cross states: "This memorial cross is forwarded to you by the Minister of National Defence, on behalf of the Government of Canada in memory of one who died in the service of his country and as a slight token of appreciation of the sacrifice you have made."

The cross is in memory of her husband, the late Major T.H.E. Inman, a veteran of World War I who passed away a short time ago as a result of disabilities received during the war.

The late Major Inman left Valcartier, Quebec, for overseas as second in command of the 105th Battalion early in the war and was later second in command of the 104th Battalion. He was returned to Canada in May, 1918, due to sickness contracted while on duty in Britain.

He was a valued member of the Summerside Branch of the Canadian Legion B.E.S.L. and was one of the faithful few instrumental in procuring the first Legion Home for this branch. He was an active member until a few years ago when aggravation of his sickness forced him to retire from active participation.

ANCIENT WALL

The old Roman Wall which extended three miles around the ancient city of London was built about 45 A.D.

FOUR PHASES OF ACTIVITY AT S'SIDE SCHOOL

Representing four phases of curricular activity at Summerside High School, the first photo (TOP LEFT) shows two students of a chemistry class, John Hancock and Paula McIvor, receiving instruction from Francis McNeill, a member of the teaching staff of Summerside High School for the past 20 years.

Mr. McNeill is a native of Summerside, served six years with the Canadian army in World War II, and is a major in the army reserve. He received his Bachelor of Arts degree from St. Dunstan's University, and his Bachelor of Science degree from St. Francis Xavier University.

The chemistry lab consists of four tables and an instructor's table which seats 32 students for practical work, and up to 50 for demonstrations. Each table has two electrical outlets, 6 busen burners, and four sinks. There are also 15 individual lockers in each desk, and a fume hood for experiments in which poisonous or odorous gasses are withdrawn by means of an electric fan.

Attending classes in the chemistry lab are some 70 students in grade 11, and some 40 students from grade 12.

Photo (TOP RIGHT) shows Carol Bethel, grade 12 student, at work in the Home Economics Department completing the sewing on a jacket which forms part of a grey worsted gabardine suit which will be modelled at the fashion show to be held during education week about the first of next month.

Carol, 18, is the daughter of Sgt. and Mrs. Walter Bethel of R.C.A.F. Station Summerside, and she is a student at Summerside High School.

Photo (LOWER LEFT) shows Lorraine Cameron checking the length of an evening dress modelled by Barbara Clark who has completed making this dress under the supervision of the home economics teachers, Mrs. Allison MacLean and Mrs. Davis Lidstone.

This evening dress will also be modelled at the fashion show. Both of the girls in this photo are grade 12 students.

Photo (LOWER RIGHT), four grade 12 students are observing a point of explanation made by their biology teacher, Gordon MacKenzie. The students are, seated, Ned Henthorn, Maureen Forbes and Arthur Morrison, while the fourth student, Anne Birch, is seen standing.

The biology laboratory consists of six tables which seat 48 students. Each table is provided with three electrical outlets and three gas jets, making it possible for individual microscopic study as well as group study. There are numerous specimens of both plant and animal life, as well as prepared slides. In this biology class there are 29 students in grade 11, and 25 students in grade 12.

The teacher, Mr. MacKenzie, has been on the staff of the Summerside High School for the past five years, and received his Bachelor of Science degree from Acadia University.

Soviet Russia Dangles Offer To West Germany

By ROY ESSOYAN MOSCOW (AP)—Soviet Premier Bulganin dangled promises of a new era of friendship before West Germany in a letter published Monday night. He proposed "profitable" trade with the Bonn republic and Moscow's good offices in seeking German reunification.

"War or peace in Europe depends first of all on how we settle the relations between us," he said.

The Soviet premier's offer was made in a letter delivered to West German Chancellor Konrad Adenauer last Friday. It came as Adenauer was preparing for a general election. His main opposition, the Socialists, believe closer relations with Moscow and putting Bonn's rearmament and NATO alliance on the bargaining table would advance unification.

The Russians made the contents of the communication public as Socialist Leader Eric Olenhauer arrived in the United States to explain his policies to American leaders.

(Bonn officials said the chancellor would reply to the Bulgarian letter in a broadcast to the people Wednesday.)

In his letter, Bulganin warned the Germans against taking "the fatal road" upon which he said they were being pushed by aggressive Western forces. This was a reference to Adenauer's policies of membership in NATO and rearmament.

In phrases which reminded of the short Soviet-German honeymoon of 1939, when the two countries joined in a non-aggression pact just before the start of the war, Bulganin lauded the "creative genius" of the German people and "broadminded" German statesmanship of the past. He dropped the threats and invective that have characterized many Soviet declarations on West Germany since the two countries established diplomatic relations a year ago.

In a mild man-to-man tone, Bulganin suggested that the Soviet Union and West Germany enter upon an era of friendship, co-operating in cultural, scientific and technical matters, and profitable trade. He did not specify any details for the proposed conventions on these questions.

U. S. Jet Crashes Into House; Pilot Killed, Woman Escapes

MOUNTAIN VIEW, Calif. (AP)—A U.S. Air Force F-84 Jet fighter exploded and crashed into a home Friday three blocks from the business section of this San Francisco peninsula city.

The pilot was killed.

Mrs. Ogal Wright, lone occupant of the house leaped out a window and escaped with injury to a leg and hip. Her home was destroyed.

The Thunderjet, bound from Luke Field, Ariz., for Hamilton Air Force Base, north of San Francisco, was coming in for an emergency landing at nearby Moffett Field, a navy installation.

The pilot's body was found a block from the Wright residence. His seat ejector may have been triggered by the explosion, or possibly he tried very late to bail out.

The Wright's two children were at high school, 2 1/2 blocks away. Flaming fragments of the fighter showered nearby houses, damaging 12. Firemen quickly extinguished the flames.

The plane struck a service pole and ripped out telephone lines. Service in the immediate area was disrupted.

CRAPAUD RINK CARNIVAL — WEDNESDAY, FEB. 13

Classes are provided for ladies, gents, girls and boys, adult and minor classes for couples. Contestants must pass in card at wicket for registration as to age and class represented, also have similar card on shoulder.

WIND PUSHES GIANT ICE FIELD AWAY FROM ST. JOHN'S, Nfld.

By GERALD FREEMAN Canadian Press Staff Writer ST. JOHN'S, Nfld. (CP)—A giant ice field rubbed its shoulders against the entrance to St. John's Harbor Sunday and early Monday but retreated under the urgings of a stiff westerly wind, carrying with it the immediate threat of a shipping blockade.

As the ice moved offshore the wind churned the blue water behind it into a brisk chop. The northern slob ice extends in a virtually unbroken field at least 85 miles offshore. An ice crust that had formed across St. John's Harbor during the weekend followed it out to sea.

Nearby Conception Bay remained icebound Monday but also benefited from west and north-westerly winds following on the heels of the easterly that earlier drove the icefield inshore.

Ice was blowing out of Conception Bay Monday, and conditions were improving to the point where resumption of ferry service between Bell Island and the mainland was expected sometime today. During the easterly blizzard Sunday ice rafted 30 feet above the ferry wharf and the ferry Kipawo had to remain at Brigus, her temporary terminal, unable to take miners to their jobs on the island.

Reports said Bell Island could hold out three or four weeks without severe rationing if the ice blockade lasted that long. The main shortages suffered at present by the 10,000 residents were not caused by the ice. Beer is scarce because of the St. John's brewery strike and water because of frozen pipes.

The fields of Arctic slob ice lying off St. John's and the rest of Southeastern Newfoundland are reported loose enough to permit passage of shipping.

From the north of Conception Bay along the coast to Labrador however, the slob ice is packed solid into every bay and inlet, except where it is held off by local sheet ice. Much of Hamilton Sound and Notre Dame Bay is sealed by sheet ice, and for the first time in years people were able to drive to Twillingate across the ice Sunday.

Cars from Lewis port, Botwood and Gander set out on the ice at Comfort Cove, end of the highway, drove 15 miles across the summer stamping grounds of motor boats and dories to New World Island, crossed the island on local roads, then drove a couple miles across a cross congealed Main Tickle to Twillingate Island.

The west coast of the province is also sealed in by the huge ice field gripping the province, but the south coast remains open.

Alberton Council Holds Meeting

The final meeting of Alberton's retiring town council was held in the library last evening with Mayor H.E. Barbour presiding, Councillors Nicholson, Atkinson, Hardy, Burke and Matthews were in attendance.

Prior to a short business session by the old council, Justice of the Peace Howard Clark administered the oath of office to Mayor-elect Herbert Matthews and Councillors, J.W. Don Campbell, Richard Jeffery, Jr., John C. Proffit, Frank J. Carpenter and Perley Hardy. A sixth councillor, Clayton Travers, was not present and will be sworn by Mayor Matthews at a later date.

The new council discussed the matter of a town magistrate and policeman and it was agreed that both positions should be filled.

Fire Chief Stephen Burke presented a budget for 1957 covering a list of new equipment, hose, wages etc. for the fire brigade.
