CHARLES I. MORRISON, Auctioneer, 106 Queen Street.

ARE NOT a Pur-
gative Medi-
cine. They are a
BLOOD PURIFI-
cation and Recon-
struction, as they
supply in a condensed
form the substances
actually needed to
enrich the Blood, curing
all diseases coming
from POOR and WAT-
ERY BLOOD, or from
VITIALIZED HUMORS in
the BLOOD, and also
invigorate and Build
up the BLOOD and
SYSTEM, when broken
down by overwork,
mental worry, disease,
excesses and indiscre-
tions. They have a
SPECIFIC ACTION on
the SEXUAL SYSTEM of
both men and women,
restoring lost vigor
and correcting all
IRREGULARITIES and
SUPPRESSIONS.

EVERY MAN Who finds his mental fac-
ulties dull or failing, or
his physical powers flagging, should take these
PILLS. They will restore his lost energies, both
physical and mental.

EVERY WOMAN should take them.
They cure all sup-
pressions and irregularities, which inevitably
attend sickness when neglected.

YOUNG MEN should take these PILLS.
They will cure the re-
sults of a youthful and habits, and strengthen the
system.

YOUNG WOMEN should take them.
These PILLS will
make them regular.

For sale by all Druggists, or will be sent upon
receipt of price (Five Cents per box), by addressing
THE DR. WILLIAMS' MED. CO.
Brockville, Ont.

Important Notice to Purchasers of Real Estate.

THE MCGILL PROPERTY, the handsomest in the city comprising 15 half acres and 2 one acre lots, also, 2 acres, with Dwelling House and Outbuildings, will be sold by Auction early in May, when due notice will be given.

R. BEAIRSTO, Auctioneer.

THE B. LAURANCE
Spectacles and Eye Glasses.

THE only Optical Goods in Canada which have been recommended by the Presidents of all the Medical and Surgical Societies in Canada and Great Britain. For prospectus or other for retaining perfect vision, write to the Agent for Charlottetown.

G. G. JURY, Watchmaker, Jeweler and Optician, North Side of Queen Street, Opposite Post Office.

Wall Paper.

ABOUT THREE THOUSAND ROLLS WALL PAPER, at 37 1/2 per cent. discount. I am closing out this branch of my business, and will sell out at the above discount in order to make a speedy clearance. Some very nice patterns, and persons requiring Wall Paper would do well to look at this before buying.

J. B. MACDONALD, Queen Street.

Facts are Stubborn Things

So is Bad Blood. The difference between them is that a fact is here to stay. Bad Blood can only stay until Burdock Blood Bitters is used, then it must go. It takes facts to prove this to your satisfaction, and we give them to you every time we catch your eye. Here is one of them. Don't throw the paper down, but read this letter from Mr. Fred. Taylor, a detective of Winnipeg. We present his portrait, together with that of his little daughter, mentioned in his letter.

FATHER AND DAUGHTER.

ONE OF THE GALLANT 90TH BATT.

DEAR SIRS,—Having felt out of order for some time, and having no energy or appetite, blotches on legs, tumor on neck arising from impure blood, doctors doing me no good, I was induced to buy some B.B.B. I was very much against patent medicines at the time, having tried so many, but after using two bottles I began to get better, and at the fourth bottle was completely well and around again. I believe in B.B.B. now, I tell you. I send you a photo of myself and little daughter, Lilly. B.B.B. cured her of nasty blisters which came out on her lips. Yours thankfully,

F. TAYLOR, 9 St. Stephen St., Winnipeg, Man.

DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE

EVERY MAN Who finds his mental fac-
ulties dull or failing, or
his physical powers flagging, should take these
PILLS. They will restore his lost energies, both
physical and mental.

EVERY WOMAN should take them.
They cure all sup-
pressions and irregularities, which inevitably
attend sickness when neglected.

YOUNG MEN should take these PILLS.
They will cure the re-
sults of a youthful and habits, and strengthen the
system.

YOUNG WOMEN should take them.
These PILLS will
make them regular.

For sale by all Druggists, or will be sent upon
receipt of price (Five Cents per box), by addressing
THE DR. WILLIAMS' MED. CO.
Brockville, Ont.

HE MADE A MISTAKE!

"I made a mistake" the old man said.
"To spend money on Shoes like those."
And a trickling tear escaped from his eye
As he looked at the holes in the toes.

He will never make such a mistake again, for hereafter we will buy GOFF BROS' Solid Leather Boots. feb20

TAYLOR & GILLESPIE.

We are making Special Reductions during this month on the binding of Magazines, Illustrated Papers, Periodicals, etc.

TAYLOR & GILLESPIE,
Sign of the Big Book, J. D. McLeod's Corner.

OUR \$2.75 WATCH, made by the Waterbury Watch Company, will not last as long as the more expensive Watch, but is just the thing for a boy attending school or for boating or fishing parties, saving the risk and yet doing the work of the better Watches.

OUR \$4.50 WATCH, made by the same Company, only better quality, is short wind and jeweled.

OUR \$7, \$10, \$15 AND \$20 WATCHES are correspondingly better goods. You will be safer in trading with us than by sending to irresponsible parties at a distance, and who, if a manuring breaks or anything goes wrong, are too far away to send to. We are here to guarantee and stand by every Watch we sell.

E. W. TAYLOR, CAMERON BLOCK, Charlottetown, Feb. 23, 1891.

Scientific Miscellany.

A DISPUTED CLAIM.—We have the following letter from John Newson, Esq., of this city:

SIR, I notice in THE EXAMINER'S Scientific Miscellany of yesterday, that Mr. C. H. Zenger claims that he was the first to suggest in 1888 that the sun acts as a great dynamo electric machine controlling the motion of the planet and comets by electric dynamic energy, instead of gravitation. I think you will agree with the writer that the undersigned has a prior claim, he having pointed out in your columns and in those of THE PATRIOT in December, 1877 and in 1878, all the facts spoken of in the article of yesterday. I was pointed out in the communication referred to that gravitation was electric and that it produced phenomena similar to that which electricity and magnetism produced. The phenomena of tides were mentioned, as also that the comet (nucleus and tail) was not in appearance consistent with gravitation. The rings of Saturn were also referred to in the same way as demonstrating that the gravitating force obeyed the same law as electricity and magnetism; likewise that other observed cosmical phenomena cannot be reconciled with the accepted law of gravitation.

JOHN NEWSON.

March 26 1891.
It is pleasing to note that one of our own citizens has a prior claim to the discovery referred to. Now that attention has been called to the matter we perfectly remember Mr. Newson's contention in this regard.

EUROPEAN TRAIN LIGHTING.—Experiments in the electric lighting of trains on a German railway have been made the subject of a report by Prof. Kihlrausch. He concludes that only the accumulator system is adapted for such lighting, the batteries being charged by means of fixed engines at various stations, and changed when approaching exhaustion. He cannot commend the use of power from the locomotive or the carrying of a dynamo on account of the increase in the couplings of the train. Trains on Swiss railways are being successfully lighted by accumulators.

TELEGRAPHIC LIGHTING.—The duration of telegraphic currents has been calculated in Germany, with these results: In ordinary Morse working, the signaling current lasts 1.25 seconds; and with the Hughes apparatus, only from .04 to .07 seconds. With the Meyer multiplex apparatus, however, currents may have a duration of as little as .007 second, and with the Delaney multiplex, of .002 second; while the Wheatstone automatic, when transmitting 600 words per minute, sends out 33,600 currents every minute, each having, therefore, a duration of .0018 second.

A French society has been trying electric motors for elevating and depressing heavy guns, and for moving them into direction, using a separate motor for each of the two operations. A considerable saving of time is effected. Three war vessels for Chile, now being built in France, are to be fitted with such motors, to be driven from the electric light circuit.

Rabbits have been known by M. G. Colin to live in perfect health for two months in open hutches exposed to a cold of 10° above to 15° below zero. Sheep and pigs also survive severe weather, but horses and dogs are killed by it.

A French aeronaut has been constructing an air ship of 3,000 yards capacity, to be propelled by a motor made from aluminum.

THE WISCONSIN MOUNDS.—Scarcely anything in the range of American antiquities, according to a paper by Dr. Frederick Starr in the proceedings of the New York Academy of Sciences, has caused more wonder and led to more discussion than the animal mounds of Wisconsin. Unlike many mounds in the Ohio and Mississippi valleys, these were not sepulchral. They may have been village guardians, perhaps tribal totems marking territorial limits; some may have even served as fetish helpers in the hunt, like the prey gods of Zuni. They are nearly confined to a belt of moderate width stretching through Wisconsin and overlapping into Minnesota and Iowa. Within this area they occur by hundreds. Dr. Latham published a great work on the effigy mounds in 1855, since which time no one has paid so much attention to them as Stephen D. Peet, whose articles have lately been issued in book form. Mr. Peet has studied the kinds of animals represented—the most satisfactorily identified among many species seeming to be the buffalo, mouse and deer, or elk, the panther, bear, fox, wolf and squirrel, the lizard and turtle, the eagle, hawk, owl, goose and crane, and fishes. One or two man mounds are known, although most of those so called are bird mounds. Some times, too, "composite mounds" are found, and the same forms are found out into the ground instead of built above it. These strange earth works are very skillfully done, more or less in harmony with their surroundings, and not only numerous but of large size—including a man 214 feet long, a bear 160 feet long with a tail measuring 320 feet, and a hawk with wings expanded 240 feet.

SCIENCE AND BUSINESS.—The loss to England of the great coal-tar industry, which in its early stages was particularly her own, is attributed to the more thorough and systematic scientific study of the Germans and French. Sir F. Abel states that Germany has great works where chemical research is carried on as an elaborate business, and is pursued by men who have acquired university degrees and distinction, one establishment alone having forty trained chemists at work on the particular branch of research in which it is interested.

There are now 1034 compound locomotives at work or building, 623 being in England, 430 in Germany, and 8 in North America.

AN ELECTRICAL BRAIN-TESTER.—An apparatus for measuring brain effort has been made by Mr. J. L. Balbi, who suggests that the arrangement might be made to point out the proper studies for children—or those which can be pursued with the least work and great profit.

In the centre of a head-gear of some light heat-conducting material, he places a thermo-electric pile, which is connected by flexible wires to a sensitive galvanometer. The slightest rise in temperature due to rush of blood to the head, is indicated by the galvanometer, the effect, of course increasing with the intensity of the mental work.

RATS IN MODERN MEDICINE.—A late experiment in Dr. Koch's laboratory—Mr. E. H. Rankin, of Cambridge, Eng.—has reported an interesting discovery. A long study of anthrax suggested investigations which resulted in bringing to light a "protective proteid" in the bodies of rats—which enjoy a remarkable immunity from many infectious diseases—and this, cultivated in the usual way proves to be a remedy for anthrax, and may also be effective for diphtheria.

The ratio of the circumference to the diameter of the circle was computed by A. Shimada as 2.7, and P. Meiss as 3.55113. After a tedious calculation, Shanks has now fixed it as far as 530 decimals, and Rutherford has verified his results up to the 440 decimal.

One of the greatest engineering works now in progress is the building of the great reservoir that is to supply Bombay with water. The dam will be two miles long, 118 feet high, and 103 feet wide at the base.

Successful and satisfactory experiments have been made in Germany with small locomotives for towing heavy boats on canals.

Mr. G. E. Ravenstein estimates that the earth could feed a total population of about 5,999,000,000.

Etiquette for Children—In Ten Rules

1. Always say Yes, sir. Yes, papa. No, papa. Thank you. No thank you. Good night. Good morning. Never say How, or Which, nor What. Use no slang terms. Remember that good spelling, reading, writing and grammar are the base of all education.
2. Clean faces, clothes, clean shoes and clean finger nails indicate good breeding. Never leave your clothes about the room. Have a place for everything, and everything in its place.
3. Rap before entering a room, and never leave it with your back to the company. Never enter a private room or public place with your cap on.
4. Always offer your seat to a lady or old gentleman. Let your companions enter the carriage or room first.
5. At the table eat with your fork; sit up straight; never use your fork pick (though the European do), and when leaving ask to be excused.
6. Never put your feet on cushions, chairs or table.
7. Never overlook any one while reading or writing, nor talk or read aloud while others are reading. When conversing listen attentively, and do not interrupt or reply till the other is finished.
8. Never talk or whisper at church or public places, and especially in a private room where any one is singing or playing the piano.
9. Loud coughing, yawning, sneezing and blowing are ill-mannered. In every case cover your mouth with your handkerchief (which never examine, nothing is more vulgar, except spitting on the floor).
10. Treat all with respect, especially the poor. Be careful to injure no one's feelings by unkind remarks. Never tell tales, make faces, call names, ridicule the lame, mimic the unfortunate, or be cruel to insects, birds or animals.—National Educator.

Not Rest, But Change of Occupation.

(From Harper's Bazar.)

As for the feeling that we need rest, rest, it is often a fallacious one. It is action which makes music. The spirit of life enters into us when we take a vital part in to-day. Often we suffer from rest. A change of occupation is what we most need, as a rule, and the relief hours of an active person turn out to be very intelligent. We must rest, but we must not lose our electricity, which the will, the thought, can command at all times, and which ought to be on guard, like an orderly, to summon us when we should become alert. Headaches evaporate if we must exert ourselves for those we love, or we almost forget the pain, which is the same thing and temperament cannot flourish unless we have ideas in which to reflect upon the notes belonging to some one else. With energy leading the way, ennui lifts from the horizon, and we see color and distance again. There are women who labor day by day in hunger and despair. If seems as if others might labor in comfort and health, instead of sitting down to lassitude and sighs.

BE YOUR OWN PRINTER.—The following is the unique orthography of a notice displayed in the plate glass window of a dry goods store in Amherst:—

NOVA SCOTIA SLAVES.—Says the Halifax Herald: A document now on view at Knowles' bookstore attracts much attention. It is a bill of sale dated October 6th, 1804, by which Priscilla, a negro girl slave, aged 8 years and 4 months, is sold, the words of the transfer reading "to have, hold, possess and peaceably enjoy forever." The slave formed part of Robert Dickson's estate at Annapolis. The purchaser was one William Robertson, who paid £17 for the girl. The bill of sale is said to be the last ever placed on the record in Nova Scotia, and is now the property of Mr. Williams, conductor on the W. and A. railway.

FOR OVER FIFTY YEARS Mrs. Winsloe's Soothing Syrup has been used by millions of mothers for their children while cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best-known remedy for diarrhoea, whether arising from teething or other causes. Twenty five cents a bottle. Be sure and ask for "Mrs. Winsloe's Soothing Syrup," and take no other kind. mar 31 eod & wky 3f

Bermuda Bottled. You must go to Bermuda. If you do not I will not be responsible for the consequences. "But, doctor, I can afford neither the time nor the money." "Well, if that is impossible, try

SCOTT'S EMULSION
OF PURE NORWEGIAN
COD LIVER OIL.
I sometimes call it Bermuda Bot-
tled, and many cases of
CONSUMPTION,
Bronchitis, Cough
or Severe Cold
I have CURED with it; and the
advantage is that the most sensi-
tive stomach can take it. Another
thing which commends it is the
stimulating properties of the Hy-
