Cloudy with a few showers. Warmer. Light northeast winds. Low-high at Charlottetown 50 and 65.

"Covers Prince Edward Island Like The Dew"

FLY TO MEET THE QUEEN

This Summerside crew shown above will act as escort to the DC-7 aircraft carrying Her Majesty the Queen and her party to Canada.

F.O. "Bud" Daye, F.I.M.O. Bell, F.I. D.F. McGrath, Captain, LAC B.A. Berry, LAC D.J. Watson, SGT. R.M. Sharkey.

where they will commence their escort. The purposes of the escort are twofold, first being security and safety of the Queen's aircraft and second to demonstrate the mobility of Maritime Air Command aircraft.

US Test Satellite To Be Launched In December

WASHINGTON (AP) — President Eisenhower has given assurance the United States will launch next March a satellite scientifically superior to the one the Russians now have spinning through space.

resistant qualities of metals and all the other things we have to know. But he said that "I can't say that I am dissatisfied."

particular need to be disturbed about Soviet activities in the satellite and missile field and no compelling reason for putting the U.S. programs on a crash basis.

Dragger Catch Is Somewhat Behind The 1956 Season

The dragger catch is down about 1,200,000 lbs. at the end of September this year, according to figures released yesterday by Hon. Douglas MacKinnon, Minister of Fisheries for the Province.

reason given for the decrease in landings is the fact that the draggers were delayed by ice last Spring in getting an early start to the fishing grounds.

Most of the inshore catch is either canned or salt processed. It is hoped that in the near future some of the inshore catch can be diverted to the two filleting plants at Souris which are not being supplied to their full capacity with fresh fish from the dragger fleet.

Says Negroes Must Go To Settle Little Rock Crisis

LITTLE ROCK, Ark. (AP) — Arkansas Governor Orval Faubus said Wednesday the only solution to the Little Rock integration crisis is withdrawal of nine Negroes from Central High School.

As to the troops entering the dressing rooms of the girl students, I have names, addresses and telephone numbers. I do not choose to release them at this time, because if I named the students, they would probably be expelled; if I named a teacher or teachers, they would probably be suspended or fired; and if I named soldiers, they would be in danger of court-martial, even though they were carrying out at the time the orders given by their superiors.

The Canadian data will be supplied to Harvard University in the United States where satellite studies now are under way. The Dominion astronomer said in his opinion the most important aspect of the satellite is that it will provide hitherto unknown information about the density of the earth's upper atmosphere.

Get Picture Of Red Satellite

OTTAWA (CP) — The Russian satellite has been photographed over Alberta by astronomer Arthur Griffin of the federal observatory at Newbrook, Alta.

The Canadian data will be supplied to Harvard University in the United States where satellite studies now are under way. The Dominion astronomer said in his opinion the most important aspect of the satellite is that it will provide hitherto unknown information about the density of the earth's upper atmosphere.

Charges Army Prepping

Faubus Monday accused soldiers on duty inside Central high of following girl students into dressing rooms, where they change clothes for gym classes.

He said the troops were "preparing" for a possible riot.

He said the troops were "preparing" for a possible riot.

See No Danger From Satellite

CAMBRIDGE, Mass. (AP) — Dr. Fred L. Whipple, director of the Smithsonian Astrophysical Observatory, said Wednesday night there is no danger to the earth if the Russian satellite falls.

"If it falls to within 100 miles of earth, it will rapidly grow red hot, its skin will melt as well as some of its interior and it will fall very rapidly from then on," Dr. Whipple said.

"If it falls to within 100 miles of earth, it will rapidly grow red hot, its skin will melt as well as some of its interior and it will fall very rapidly from then on," Dr. Whipple said.

U.S. Stresses Need For Space Missiles Control

UNITED NATIONS, N.Y. (AP) — The United States stressed Wednesday the need for an approval of a disarmament plan which emphasizes control of outer space missiles.

The proposals advanced in London called for establishment of a technical committee to study an inspection system aimed at ensuring that the sending of objects through space will be exclusively for peaceful and scientific purposes.

Chief Sark Will Meet Royal Couple

OTTAWA (CP) — Ten Indians, representing each province, have been chosen to meet Queen Elizabeth and Prince Philip during their visit here starting Saturday.

Newfoundland — Joseph Ashini of the Montserrat at Northwest River, Labrador.

Nova Scotia — Ben E. Christmas, leader of the Sydney band.

Officials said they do not know yet whether the Indians will wear their native dress to meet the Queen. That has been left up to the Indians to decide.

Pleven Fails To Form New French Gov't

PARIS (AP) — Rene Pleven Wednesday night abandoned his attempt to form the next French government.

Pleven gave up about 36 hours after the president had entrusted him with the mission of being 24th post-war premier of France.

He had said he would not form a minority government and insisted on a broad majority including all parties in Parliament except the extreme right and left wings.

Change Name Of New High School

The name "Abegweit" which some time ago was chosen for the new Charlottetown High School has been changed to "Birchwood," it was learned from an official source last night.

The cornerstone laying ceremony for the new school is scheduled to take place some time in the latter part of the month. Dr. W.J.P. MacMillan will lay the stone.

Says Satellite Taking Pictures

BELGRADE (Reuters) — A Soviet scientist said Wednesday night that Russia's earth satellite contained several "elements" which were taking photographs.

Aleksandar Sherban, vice-president of the Ukrainian Academy of Sciences, said he did not know how the photographs were being received in the Soviet Union.

Rock Kills Man On Road Project

PENNANT, N.S. (CP) — A highway construction worker, James Melvin Gray of Pennant, died Wednesday when a piece of rock broken by a dynamite blast struck him on the head.

He was working on a road project in this village, about 20 miles southwest of Halifax.

See No Danger From Satellite

CAMBRIDGE, Mass. (AP) — Dr. Fred L. Whipple, director of the Smithsonian Astrophysical Observatory, said Wednesday night there is no danger to the earth if the Russian satellite falls.

"If it falls to within 100 miles of earth, it will rapidly grow red hot, its skin will melt as well as some of its interior and it will fall very rapidly from then on," Dr. Whipple said.

Aged Woman Is Fatally Burned

SUSSEX, N.B. (CP) — A 93-year-old woman died three hours after being admitted to hospital here with critical burns and face burns.

Lodge will ask endorsement of western proposals for starting the world on the path toward disarmament.

Direct Talks Out

On the eve of the debate, President Eisenhower said the United States is prepared to enter into multi-power talks on control of outer space missiles for peaceful purposes, provided Britain, France, Canada and other interested allies agree.

Report Britain Leads US In Making "Clean" Bomb

Death Of W. P. Bruce Recalls Outstanding Military Career

The death occurred suddenly yesterday at Georgetown of William P. Bruce well known Charlottetown businessman and soldier. He had been in failing health for the past few years.

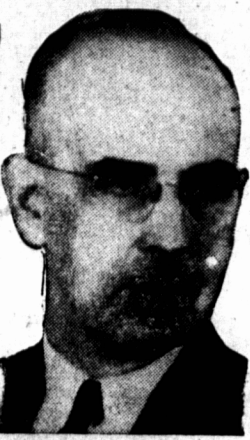

In October 1941, Mr. Bruce joined the 2nd Heavy Battery of Artillery and served in France Belgium and Germany before his discharge in May 1919.

For bravery on the field of battle he was awarded the Distinguished Conduct Medal. He held the rank of Sergeant Major at his discharge.

During World War Two, Mr. Bruce again enlisted in the Canadian Army and served from 1940 until 1944 with the Veterans Guard of Canada.

Born in Charlottetown, he was the son of the late D.A. Bruce and Nancy (Fleisher) Bruce. As a young man he was associated with his father in the tailoring business on Queen Street and on his return from overseas in the first war he started a men's clothing store.

Surviving are his widow, the former Miss A.M. Phillips and one son, Donald of Edmonton Alberta. Three grandchildren also survive him.

WILLIAM P. BRUCE

Passengers Have Anxious Time As Engine Fails

ARGENTINA, Nfld. (CP) — Thirty-four people on a transatlantic plane spent an anxious hour or two Wednesday when two of the plane's four engines failed over the ocean off Newfoundland.

The pilot of the Pan American Airways Stratocruiser made an emergency landing with two engines at the United States Navy airfield here.

The plane carried 23 passengers and a crew of 11. It was bound from Paris to New York. Passengers included Alfred Gwynne Vanderbilt and Lester Colbert, president of the Chrysler Corporation. They continued their trip in another plane.

The pilot was identified only as a Captain Watkins. Bad weather didn't help him in his plight. Poor visibility prevented him landing at Gander or Torbay airports, which were nearer.

His first engine acted up about 800 miles off the coast. When he was still 1 1/2 hours from Argentina on the Newfoundland south coast the second one quit.

A U.S. coast guard plane flew to the side of the crippled airliner and escorted it here. Pilot Watkins made his landing here without further trouble.

Hint Warhead Can Be Used With Long-Range Missile

MARALINGA, Australia (Reuters) — Australian observers say the explosion of a British nuclear rocket warhead here Wednesday shows Britain leads the United States in making "clean" hydrogen bombs.

Suspended from three barrage balloons, the warhead was detonated 1,000 feet above the desert. The test crushed the target area with a terrific pressure wave and sent up a huge, glowing cloud of hot dust and smoke.

The weapon, nicknamed The Gentleman was designed to wreck enemy installations with a minimum of radioactive fallout to harm civilians.

DEADLY MARRIAGE — According to hints by British Defence Minister Duncan Sandys the atomic device will be "married" to a long-range missile being developed at the nearby Woomera rocket range.

The Gentleman is said to be the 15th British atomic explosion, including three hydrogen bombs in the central Pacific this year.

Before detonation, the weapon looked like a large pointed cone as it hung earthwards in the sky. The explosion generated heat so enormous that the cloud of blue-red dust and smoke, five miles across, still was glowing a minute after the explosion.

HEAT THEN THUNDER — The heat could be felt by correspondents seven miles away. Twenty-three seconds after detonation they heard a thunderous crack.

The explosive yield of the weapon was believed to have been between 10,000 and 20,000 tons of TNT, somewhat less than that of the first atomic bomb dropped on Hiroshima in 1945.

Although the exact size of the weapon was not described, it was small enough for the warhead on a missile.

Work On Hillsboro Causeway Proceeding Satisfactorily

The northern part of the Hillsboro causeway now under construction is progressing satisfactorily according to engineers on the job.

Already 15 per cent of the fill has been placed and about 50 per cent of the distance covered. The length of the fill is about 1,700 feet.

Nine crays are working two ten hour shifts and a suction dredge from the Maritime Dredging Company is working around the clock keeping the displaced mud away from the piers.

Although 50 per cent of the distance is covered this does not in any way mean that the job is half way completed.

At the present time the fill is being placed in about 13 feet of water at low tide with about 50 feet of mud under the water.

As the structure pushes its way across the river there will be 60 feet of water at low tide in places and 40 feet of mud which means that the causeway will at this point be 100 feet high.

The top of the causeway will be 46 feet in width and at its widest point will be 360 feet at the bottom.

The job was started on the 25th of August and calls for completion one year from the date of signing the contract.

Non-operating Rail Workers Outline New Wage Demands

MONTREAL (CP) — Non-operating employees of Canadian railroads Wednesday announced they will make "substantial" wage demands at fourth coming negotiations on a new collective agreement.

Wage increases, improved vacations and one extra statutory holiday—making eight—will be sought by the 14 unions negotiating as a unit under Frank Hall of Montreal.

Mr. Hall announced the demands in general terms Wednesday following a three-day meeting but did not elaborate. They will be submitted to the carriers before Nov. 2. The current two-year contract expires Dec. 31.

SEEK ONE-YEAR CONTRACT — The unions will also seek a one-year agreement and the review of a health-welfare contributory plan signed last Jan. 1.

Mr. Hall said the wage increases are sought to bring the 140,000 non-operators — those not directly concerned in running trains—to the level of the durable goods industry. The increases

also took account of increased employee production, he said.

Long-drawn negotiations last year ended in the union getting wage and other concessions valued at about \$60,000,000 annually.

The railways based opposition on two points in initially opposing any concessions whatsoever. They claimed inability to pay and attacked the union's durable goods industry yardstick which the originally had introduced in negotiations several years ago.

This year, both main lines have reported declining revenue and the CNR has predicted a deficit.

Frigate Goes Back To Sea

HALIFAX (CP) — The frigate La Hulloise which helped sink a German U-boat during the Second World War, was re-commissioned into the navy's 7th Escort Squadron here Wednesday.

Since 1945 the frigate has served as a depot and training ship. Completely modernized in a Quebec shipyard, the 2,100-ton La Hulloise will be based at Halifax, Lt.-Comdr. Robert Greene, 36, of Halifax and Gaitneau, Que., is the ship's skipper.

Guest of honor at Wednesday's re-commissioning ceremonies was John Brock, of Rothesay, N.B. He commanded the frigate when she was first commissioned in 1944.

He told reporters here Wednesday that more Canadians than ever will buy cars next year and the industry expects to produce and sell between 415,000 and 423,000 passenger vehicles. He said this represents approximately five per cent above this year's sales.

Mr. Todgham said the market for the rest of 1957 looks good although it will not be the largest year for the industry. He predicted Canadian auto manufacturers will wind up with between 395,000 and 400,000 passenger cars. Last year's sales were 404,605 vehicles.

He said he bases his prediction of a banner 1958 on the steady growth of population and income in Canada, the fact that 1955 was a record year for auto sales and many people will be in the market for new cars in 1958, and the predicted easing of tight money conditions and the proposed reduction or elimination of the 10 per cent excise tax on cars.

Tourists Top Trade

LONDON (Reuters) — The tourist trade remains Britain's biggest dollar earner. It brought in \$130,000,000 last year, Sir Arthur Morse, chairman of the British Travel and Holidays Association, told the group's annual meeting Wednesday.

AP EDITOR DEAD — NEW YORK (AP) — Melbourne Christerson, longtime employee of The Associated Press, died Tuesday night in a New York hospital after a lengthy illness. He was 52. Christerson was president of the National Press Club in Washington early in the war while editing foreign news in the capital. He was transferred to the AP foreign desk in New York during the war and worked there until his illness.
