

THE DAILY EXAMINER

AUGUST 1, 1898.

CONCERNING COLD STORAGE.

The benefits of a system of cold storage to farmers and others concerned in the shipment of butter and other perishable products to the Mother Country are so familiar to readers of THE EXAMINER that they need not be enumerated. It is pleasing to observe that in this connection the Laurier Government is continuing the work so effectively organized by their predecessors in office, and it is hoped that a steamer fitted with cold storage will be obtained for at least three trips between Charlottetown and Great Britain this fall. In this matter, as in others of more or less importance, there is a disposition on the part of the Grit press to give all the credit to the Laurier administration. For instance in the course of an article discussing the advantages of cold storage the Montreal Herald says:

"The strangest thing about this business is that the cold storage system was not adopted long ago. Canada was backward in the matter. Conservative Ministers talking a good deal about their devotion to Canada and to Great Britain, but never getting into their heads the idea that something of advantage to Canada and to the Empire might be made of that devotion. Dr. Montague, when Minister of Agriculture, seems to have been impressed by the argument with which we have no doubt Professor Robertson made him acquainted, but for some reason nothing was done, and it was not until Hon. Mr. Fisher brought his own practical knowledge of the agricultural situation to bear that anything was effected."

As this statement, which is not in accordance with the facts, will probably go the rounds of the Grit press in all parts of the Dominion including our own province attention is called to the following paragraph, condensed from the Hansard of February 12th, 1895, (page 1,619):

"Mr. Blain asked what was the expenditure by the Government for cold storage on ocean steamers for the shipment of butter to the English market during the season of 1895.

"Mr. Montague—Ten ocean steamers were fitted up with cold storage compartments, six of the steamers of the new Dominion steamship line from Montreal to Avonmouth, and four on the Allan line. The amount paid to the new Dominion company for cold storage service and the quantities of butter and cheese carried from July to November were: Amount paid, \$3,544 55; butter carried, 2,998,216 pounds; cheese, 273,254 pounds. The Allan Steamship Company have not rendered their account. The amounts paid to the Grand Trunk railway and the Canadian Pacific railway for cold storage service were (June to October): G. T. R., \$1,439; C. P. R., \$1,349."

This extract shows that the cold storage system was inaugurated under Dr. Montague, and not by Hon. Mr. Fisher, as the Herald would have the people believe. The Grit papers have become so habituated to distorting facts that when the truth comes their way they fail to recognize it.

NOTES AND COMMENTS.

—The rain of last night and this morning has cooled the air somewhat.

—The Mail and Empire, re Mr. Hardy's scheme for enfranchising, after they have voted, the constables, whose ballots are necessary to the maintenance of his majority, asks what Mr. Hardy and his supporters can know of the intention of the Legislature which passed the Ontario election law. They probably know as much as they care. It is business, not knowledge, they are out for.

—A plan by which the new Prince of Wales College could have been erected for \$23,000 was rejected, while one was accepted by which the building is to cost \$28,000, besides extras, heating, etc. Local contractors were denied the right to figure upon what was practically a new plan, and while the death rattle was in its throat the Warburton Government let the contract privately. This is what the Patriot says is in the interests of the public.

—The United States declared war against Spain on the 25th of April last. On the 30th April the actual strength of the regular army was 26,500. On the 24th of July it was 51,400, less casualties of 2000. In addition to the above the United States had, on the 24th of July, a volunteer army, physically examined, enrolled, mustered into service and for the most part equipped, of 212,000. This gives a total fighting force of 261,400, a very good showing for three months of preparation.

British Columbia Gold Mines.

ROSSLAND, B. C., July 29.—One of the most important strikes yet made in this camp is the one that has just been made in the Virginia. In that property, at 300 feet level, there has been encountered an ore chute that is known to be 28 feet wide, and the foot wall is not yet in sight. The pay streak is nine feet wide and pans \$150 a day. The management was confident of striking this vein, and has been steadily working with that end in view, but did not expect it would be so rich. The camp is excited, and dealing in Virginia stock is going on at a lively rate.

ESTEEMED EXCHANGES

Montreal Gazette: There are in the political situation some things which make it possible that there is a foundation for the rumor, coming from several quarters, to the effect that an early parliamentary election is within the possibilities.

Cleveland Leader: The battle of Manila occurred on Sunday, Cervera's fleet was smashed on Sunday, and the Stars and Stripes were raised over Santiago on Sunday. The Spaniards could hardly be blamed if they were to boycott Sunday hereafter.

Peterboro Review: Hon. Mr. Hardy's effort to keep office by legalizing the votes of constables is but consistent with the lines of action constantly followed by Sir Oliver Mowatt and himself of entrenching their government behind a stronghold of officialism. It remains to be seen whether Hon. Mr. Hardy or the people will conquer.

Ottawa Citizen: The United States went into the present war with Spain for some reason, but the people of the Republic have never been quite unanimous as to whether it was because they "remembered the Maine," or on account of their abstract interest in humanity, as represented by the poor suffering Cuban heroes, or because they wanted to annex the island of Cuba.

Mail and Empire: Mr. Tarte is having an elegant summer outing at the public expense. It is not a special car this time; but a special steamer, the Eureka. This vessel is taking him to the St. Lawrence summer resorts, all of which he is "inspecting," as Minister of public works. Last week he started for the Magdalen Islands, and after a tour there he will "do" Gaspe and the Nova Scotia coast, going south as far as Boston, where inspecting will be prosecuted. Then the Minister, will proceed to Labrador, up the Saguenay, and along the north shore home. Everything is being carefully inspected, and the Quaidien says Mr. Tarte travels with all the dignity and comfort appertaining to a Persian Shah.

The Western Crop.

WINNIPEG, Man., July 29.—The crop reports tonight from all parts west are unanimous in asserting bountiful returns from Manitoba and the Northwest this season. The showers recently made great improvement. Harvesting will begin the second week in August.

Chinese Lodge of Masons.

MONTREAL, July 29.—The Chinamen of Montreal have applied for a charter to organize a Chinese lodge in Montreal. Masonry flourishes in the celestial empire, and there are several of the craft in this city. The matter is under consideration.

Where Food Will be Scarce.

OTTAWA, July 29.—Judge McGuire, writing from Dawson City, says there may be a greater scarcity of provisions there during the coming winter than there was last year.

Lost.—Between Fort Augustus and Southport, while returning from the tea on July 18th, a lady's parasol. Finder will oblige by leaving same at this office. 178 tf

The balance of straw and crush hats must be sold, don't go around with the old hat when you can buy a new one so cheap. Prowse Bros.

KLONDIKE GOLD.

Over Ten Millions Have Already Reached Seattle.

SEATTLE, Wash., July 29.—The Rosalie the fourteenth treasure boat during July, has arrived from Lynn Canal. The City of Kingston, bringing the passengers of the Canadian steamer Athenian, makes the fifth arrival. It is estimated that \$30,000 in Klondike valuables reached Seattle through the two channels. This increases the total gold importation this month to \$9,811,600. The Rosalie's passengers report that a stampede was being made to Indian river owing to the discovery of rich diggings on the branches. The clean up on Dominion and Sulphur creeks has been completed and so favorable that claims were selling from \$25,000 to \$40,000 each.

The steamer Humboldt arrived from St Michael's today with 112 passengers from Dawson City and about \$1,000,000 in gold dust and as much more in drafts. The United States gunboat Wheeling goes to the mouth of the Yukon to seek out a supposed ship channel on south side of the Yukon. The first work of the party will be a survey of the coast line from St Michael's to the mouth of the river, and when that undertaking has been accomplished the task of locating the channel will be begun.

It is believed that this new channel extends from Behring sea inward 125 miles to Andreaski, a point from which geological indications, it is concluded, was at one time the mouth of the river, the commerce of the Yukon will be revolutionized, if the river be located among the ice floes. It will save the long trip to St Michael, now necessary.

Seems as if all the things we like disagree with us, and all the things we don't like, agree with us. Dyspepsia lurks in most of the good things we eat, and indigestion follows the gratification of appetite. Of course it is not Nature's fault. Nature does the best she can, and if a man will only help her a little bit at the right time, he may eat what he likes and as much as he likes. Dr. Pierce's Pleasant Pellets are for people who are troubled with indigestion. Particularly for those in whom it manifests itself in the form of constipation. The "Pellets" are quick and easy in their action. They are in perfect harmony with Nature. They effect a permanent cure. You need take them regularly only a little while. After that, use them occasionally when you need them—when you have eaten anything that disagrees with you. They may be taken just as freely as you would take water or any other necessity of life. Once used they are always in favor.

Ladies colored boots and shoes, \$1.00 a pair, tonight at R K Jost's, Stamper's Corner.

Cool sea breezes blow through these lustre coats, and make you feel comfortable, 55 light weight, lustre drab grey and black, sizes 36 to 42, Prices 1.60 to 4.50.

CROWN AND BRIDGE WORK

When teeth are so far decayed that they cannot be filled they can be restored to usefulness, beauty and durability by our crown system. Crown and Bridge Work is one of the most beautiful operations in dentistry. Crowns are so useful and so comfortable to the wearer, that he or she soon forgets they are different than his or her own teeth. It is astonishing to see how many roots and teeth that are considered worthless can thus be made good comfortable teeth. Crown and Bridge work with its improvements, when rightly performed, is scientific dentistry and covers a large number of cases.

We claim to be thoroughly

UP-TO-DATE

in our different branches and our Crown and Bridge Work is made and fitted by ourselves, thereby ensuring perfect results and warranting satisfaction. Call and see specimens of work. Our artificial teeth are guaranteed to give satisfaction in every respect.

You can call in in the morning and have crown and bridge work or artificial teeth same day.

All Work Painless

Charges Moderate

BERLIN DENTAL PARLORS,

Office Hours—8 a. m. to 8 p. m.

A Curious Fact

It is really remarkable the number of cheap plated watch cases that are made and sold these days—cases that will wear anywhere from six weeks to three years, and most of them containing a guarantee warranting them to wear for 20 years. A gold filled case, one that will wear for 20 years, costs within a dollar of what it did seven years ago. That dollar represents the reduced cost of making—the gold costs just the same.

I sell gold filled cases, cases that have stood the test of years, and personally guarantee every case that I sell in addition to the manufacturers warrant.

I have some of the latest and most desirable patterns in stock, also silver. Any make of movement you want.

E. W. TAYLOR
