The Weekly Examiner.
ONLY ONE DOLLAR A YEAR.
"THE EXAMINER" supplies to country districts all the home news—which a foreign paper cannot do.
Send One Dollar by registered letter or money order and get the
CHEAPEST AND BEST
paper published in P. E. Island.
N. B.—Persons who have relatives or friends in any part of Canada, the United States or Great Britain, may have them provided with THE EXAMINER for a year by payment of One Dollar—postage paid in this office. This is the very cheapest way to provide a friend abroad with the Island news.

BUY the DAILY EXAMINER for the latest news—local and telegraphic.
Ch'town, Dec. 27th, 1879.

SECOND EDITION

THE DAILY EXAMINER.

FEBRUARY 4, 1880

THE Ottawa Free Press starts the report that Dr. Schultz, who is about to take up his abode in Ottawa, is likely to enter the Dominion Government shortly.

DR. BERGIN's majority in Cornwall appears to be 182. His Grit opponent obtained a majority in only one section of the district, and that amounted to five only.

THE Conference of Temperance men at Montreal, under the auspices of the Dominion Temperance Alliance, appears to be very successful. Sir Leonard Tilley, and John Dougall, of New York, are in attendance.

THE Montreal Cotton Company and Hudson Cotton Company are both about to begin the manufacture of Canton flannel on a large scale, and machinery for the purpose has just been ordered from Lowell, Mass, which will arrive in a few days.

A NOVA SCOTIA shipmaster complains to the N. Y. Maritime Register that "one of the blots upon the civilization of the age" is the attempt of an insurance corporation in his Province to charge one per cent. extra premium on those vessels whose masters have their wives on board.

IT appears that since 1874 the funded debt of England has been reduced to the extent of about \$100,000,000. On the other hand, the English floating debt has been increased by nearly the same amount, but nearly four-fifths of it is for money lent by the State on good interest, and can, therefore, scarcely be called debt at all.

HONEY FIND.—A Mr. Jeffrey, of Linkletter Road was at work in the woods near St. Eleanor's, a few days ago, he found a hollow tree in which a swarm of bees had taken refuge, and on taking home the part of the tree containing the hive, had it dissected and found some fifty or sixty pounds of honey.
—Progress.

THE principles of Temperance, according to the Newfoundland newspapers, are well advanced in that Island. The St. John's North Star states that it is very difficult to get spirituous liquors at all in the out-districts, and that the "capital will compare favorably with St. John, N. B., Halifax, and other places in the matter of Temperance and sobriety." An impression has existed that St. John's, N. F., was an exceedingly temperate city.

DIPHTHERIA.—Diphtheria is said to have extended from Egypt to Asia Minor about 1,500 years ago, having existed in the former country 500 years previously. Spain, Italy and Sicily were visited by it. In A. D. 334 it appeared in Rome, extended to Holland as an epidemic in 1837, France as early as 1818, and so up to 1835 was dangerous, and showed itself in England, Canada and the United States in 1856. The German Empire offers a large prize for the best essay on the essence of the disease and the mode of treatment.

THE storm of last evening did not prevent a large audience from assembling in St. Patrick's Hall to hear the Rev. Dr. McDonald lecture on Cardinal Pole. The audience of itself, considering the very stormy weather, was positive proof of the Rev. Dr. McDonald's ability and popularity. The lecture was delivered extempore and in the Dr.'s usual pleasing style. He was, to use a common phrase, fully "at home" on his subject. The audience were highly pleased, and frequently applauded. At the close of the lecture, complimentary remarks were made by Robert Shaw, Esq., Judge Reddin, and Hon. W. W. Sullivan. A unanimous vote of thanks was, on motion of the two last-named gentlemen, given the Rev. lecturer, which was very suitably and feelingly acknowledged. We understand it is the intention of the St. Patrick's T. A. & B. Society to have further lectures during the winter; and, if the opening one of last night is taken as an indication, they will be well worth attending.

ACCIDENT TO A RAILWAY EMPLOYEE AT TRURO.—A railway employe named Robert Williams got badly injured in the station yard on Wednesday night while coupling cars. He had accomplished his task and while coming out from between the cars was caught between the stanchions by his back and breast, sustaining painful injuries which, however, we are glad to learn, are not likely to prove fatal. Accidents of this kind, fortunately, have been exceeding rare in the Truro station yard.—Guardian.

THE Toronto Mail is authority for the statement that Miss Howard, a Canadian girl from the neighborhood of Kingston, has attained brilliant success as a physician in China. She received her professional education at Ann Arbor, Michigan, as at that time the Royal College at Kingston, since opened to ladies, did not admit female students. She was poor and was obliged to deny herself many comforts in order to pursue her studies. She is now a popular physician in Tientsin, and at last accounts had been sent to Peking in a royal barge, loaded with presents, because of her successful treatment of the wife of a leading Chinese statesman. She seems to have found her "sphere."

THE Normans are credited with reviving round dances in the twelfth century; the Bohemians, with inventing the redowa; the Poles, the polka, and the Hungarians the mazourka and galop. The cotillon is at least as old as the time of Louis XIV.

The Horse and Carriage Tax.

To the Editor of the Examiner.
DEAR SIR,—Looking over your paper a few days ago, I noticed that Mr. John Beer would, at next Council meeting, move that every horse, sleigh and wagon should be taxed. Now, is it right that we poor truckmen should have to pay to truck, then to be taxed for a horse which only is able to do enough work to keep us both from starving. This same John Beer will perhaps be very sorry to have to pay double price for his trucking, &c., if he is the means of us being taxed for horse. It is as much as we are able to live, let alone having to be taxed for our only source of livelihood, I remain, yours truly,
J. G.

The Latest Masonic Emblem Story.

The latest development of the Egyptian Masonic Emblem story, is the following dispatch to the New York papers, from Alexandria, under date of the 26th ult. :—
"Dr. Fanton, a highly instructed Mason, has finished a careful examination of the foundations of the obelisk, and confirms Lieutenant-Commander Goringe's discovery of the Masonic emblems, which establish the relations of many ancient Egyptian monuments. Dr. Fanton declares that the Hiram version of Masonry which originated with the construction of Solomon's Temple is disproved by the revelations of the foundations of the obelisk. The Masonic emblem of Life and the Sun, beyond doubt, is identical with the monument of the Egyptian god Osiris. This proves that Masonry originated with the construction of the pyramids or at least with a far remoter period than the construction of the foundation of the obelisk. The number of blocks comprising the foundation, as well as their position and arrangement, indicate that the ancients were familiar with the higher degrees of Masonry, at least as high as the eighteenth degree. Many peculiar emblems not understood by Lieutenant-Commander Goringe were fully explained by Doctor Fanton from a Masonic point of view. This discovery furnishes a clue to other important discoveries not only under the fallen obelisks but also in other parts of Egypt, rendering probable a solution of the mystery of the construction of the Pyramids. Among the discoveries was found a perfect cube and also emblems of all Masonic foundations. Lieutenant-Commander Goringe, who is a member of the Masonic fraternity, entirely approves Dr. Fanton's explanation, and gives this despatch his entire approbation.

The Printing Contract.

Some of the Grit journals have been trying to make the country believe that the contracts for the Parliamentary printing, over which Mr. Boyle and the Globe had the recent dispute, were the work of the Government. This is very far from being the case. The St. John Sun gives the following correct version of the matter :—

"The contract was a Parliamentary contract, under the supervision of a joint committee of both houses, selected from both sides of politics, the chairman of the joint committee being that "grand old Reformer" Senator Simpson, the bosom friend of the still more illustrious Reformer Senator George Brown. The Mr. Boyle, who was accused by the Toronto Globe of selling his tender to McLean, Roger & Co., the Parliamentary printers (who, by the way, are Reformers), was the Mr. Boyle who worked tooth and nail, for the Reformers in the Ontario Local elections. The Government had nothing to do with inviting tenders; nothing to do with awarding the contract; nothing to do with the affair in any shape or form. The matter was entirely in the hands of the Parliamentary Committee, Senator Simpson being the head of that Committee. It may be that the Committee may have to revise its mode of letting this contract, but we do not see how we are going to prevent one tenderer from selling out to another. The Committee exacted a considerable deposit from each tenderer, and this, if we mistake not, was Mr. Mackenzie's method of protecting the public interests. It failed under Mr. Mackenzie's administration of the Public Works, which was characterized by jobs of every imaginable description, from the purchase of the "Neebing Hotel" shanty, to gigantic operations in steel rails. In fact the deposit system merely enabled large operators the better to monopolize the buying out business, so that where the country was formerly salted to the extent of hundreds of dollars, it came to be plundered by tens of thousands. Most of Mr. McKenzie's "reforms" were of that character.

"Mr. Smith, you said you once officiated in the pulpit. Did you mean by that that you preached? "No, sir; I held the light to the man that did preach." "Ah! the court understood you differently. It supposed that the discourse came directly from you." "No, sir; I only threw light upon it."

Note from the diary of a swell: I have observed that my habits are very elastic in one direction—I suspect I could live to almost any income.
