**Annual Convention Of Teachers From Tignish Area**

On Tuesday, August 26th, the teachers in the Tignish area met for their usual well conducted convention which extended over a two-day period.

The following committees were appointed:

Nominations: Mr. P. A. Arsenault, Mr. William Wallace and Mr. Gilbert Harper. Resolutions: Rev. Sister Saint Raymond of Milan, Mrs. James Shea and Miss Jean Callaghan. Press: Mrs. Joseph Callaghan and Sister Saint Catherine of Sweden.

Reverend Dennis Gallant, curate, capably and cordially welcomed the teachers to the Dalton School and in a well prepared address showed the teachers the necessity and beneficial influence of discipline in regard to the training of the will and the development, not only of the intellect but also and above all, the training of a strong personality. He also showed the nobility and utility of the teachers' role in society.

The minutes of last year's meeting were very capably read by Mrs. Mary Rose Bernard who was re-appointed secretary for '53. The local president, Mrs. Eulalie Gillis in her usual competent manner warmly welcomed the teachers and visitors. Then she read a fitting eulogy on the all-important "Teachers' First Day" which is a most important point, such as family allowance and its purpose, teacher's first day at school, the study of the child, discipline in the class-room, personality and character.

Mr. Malcolm MacKenzie, Chief Supervisor of Schools, spoke at length on the curriculum, the new spellers, workbooks and arithmetic books. He wished teachers to make known to parents and pupils the fact that as all goods and wages have gone up, so naturally the cost of books—even at that our text books are selling below cost—the Government absorbs a great part of the cost.

In the afternoon Mr. P. A. Arsenault very capably read a full-year report of the P.E.I. T.E.F., which was followed by a lively discussion.

Reverend Sister Saint Peter Marie delivered an excellent paper on language. As language covers such a wide field she took a most practical phase, "The teaching of the parts of speech". This was followed by a practical demonstration, a playlet on the parts of speech which was very well carried out by a pleasing group of pupils. A vote of thanks was extended for presentation of the above. This was followed by an enthusiastic discussion on the questions sent for that purpose.

**Dr. Shaw Stresses Science**

After the roll call and registration of new teachers, questions for the box were passed in. A full account of the previous day's program was read by the secretary. This was followed by an arithmetic demonstration by Sister Catherine of Sweden, who chose the main topics of the prescribed course of studies which are:

1. Why we teach arithmetic.
2. The main objects in teaching arithmetic.
3. The cause or causes of failure.
4. Diagnostic and remedial work and its practice.
5. Suggestions re problem solving.

This was added motivation and ways of motivation in the teaching of fractions, perimeters, area, cubic measure, the cylinder, and the four fundamental processes: addition, subtraction, multiplication and division. A vote of thanks was then presented and accepted.

Mr. MacKenzie capably answered and discussed questions from the box. Miss Yeo helped out also during her limited stay.

Dr. L. W. Shaw, Deputy Minister and Director of Education told the teachers he was glad to be in Tignish and was sorry he could not stay longer, due to the formal opening of a new school in the Cavendish area. In his talk he stressed the need of being more practical in the teaching of science which teaches the child appreciation for his environment which in turn helps develop peace-loving and all-round good citizens.

On the afternoon of the second day Miss Mona Clay, Charlottetown, gave an instructive film on Child Behavior and its why and wherefore. This was followed by a discussion which was worthwhile. In her talk Miss Clay showed that a child's behavior really bespeaks his interior needs which in turn should be ably interpreted by parents and teachers who are able to help him, as each individual has his own problems.

Mr. Royston Muford from Unit No. 1 spoke on behalf of music, the only international language. He showed that everyone has latent musical abilities which should be put to practical use in the
