W. C. T. U. NOTES

THE POWER OF PRAYER
(Inserted by Request)
The weary ones had rest, the sad had joy
That day, I wondered how!
The ploughman singing at his work had prayed
"Lord help them now."

Away in foreign lands they wondered how
Their single word had power.
At home, the Christians two or three had met
To pray an hour.

Yes, we are always wondering,
wondering how
Because we do not see
Someone unknown perhaps and far away
On bended knee.—Sel.

BEVERAGE ALCOHOL AND THE COMMUNITY
Sunday School Lesson For August 20th

Joel. 1:5-7. Daniel 1:3-17
In 1934 the number of drinking drivers in fatal accidents in the United States increased 29 per cent.; the number of drinking pedestrians in fatal accidents, 58 per cent., according to an investigation of the National Safety Council. Many of those involved seemed sober to the casual observer, but were actually under the influence of alcohol.

Arrests for drunken, or had-been-drinking driving, have multiplied anywhere from three to sixty-nine times faster than have the number of cars on the highway, according to official reports presented by Dr. Theron W. Kilmer. He says, "The general average of the total number of States shows a 4 per cent. increase of cars, with a 45 increase of drunken drivers."

"Almost forty thousand people killed and nearly a million injured every year in the United States... The greatest menace in this regard is the drinking driver, not the drunk mind you," says the Editor of the Journal of the American Medical Association.

Evangelical youth has this to say about the social consequences of beverage alcohol: "Strong drink has sold more homes, plunged more people into bankruptcy, armed more villains, slain more children, mangled more wedding rings, defiled more innocence, blinded more eyes, twisted more limbs, destroyed more reason, wrecked more marriages, dishonored more womanhood, broken more hearts, blasted more lives, driven more to suicide, and dug more graves than any other poison."

TIRED FEEL
Tired feeling
Tired feeling
Tired feeling

ed scourge that ever swept its world-dealing waves across the earth."

The PLANTING OF A WHITE PEONY in memory of Frances Willard has been stressed and explained in the leaflet, "Let beauty blossom in her name," and no doubt there will be a good report at Convention which, we learn, is to be held at Berwick, in October.

To date, we learn that BRIDGETOWN will plant bulbs in each of their cemeteries in the fall. Mrs. Anna Dexter, by the way, said over the radio recently they would grow just as well if planted in the spring.

LUNENBURG planted one in the plot of Rouse's Brook where a monument marks the landing of the first settlers. The HALIFAX AND DARTMOUTH UNIONS have undertaken to have a bed of flowers in the Public Gardens at Halifax as a memorial. A proper marker can be obtained.

NEW CRUSADE WANTED

What was done in the eighties of the last century can be done again in the thirties of this one. It would be a fitting reply to the brewers' plot against youth if, instead of a negative defence of the rising generation, the Churches were to unite in a positive crusade, which would display the same sacrificial effort and flaming zeal as in the great Blue Ribbon Movement.—Sel.

THE MISSION TO LEPERS IN TERDEMOMTATIONAL AND INTERNATIONAL

Its object is to provide for the spiritual instruction and temporal relief of lepers, the rescue of their untainted children and, in so far as lies in its power, to assist in bringing about the extinction of leprosy.

The Homes and other work of the Mission are under the honorary supervision of missionaries of many different Protestant Societies—British, American and European.

It is now working in 20 Countries at 114 different Stations—mainly in our Indian Empire, China, Korea and Africa.

There are now upwards of 12,200 lepers and children in the Mission's own and aided institutions; of these, 10,200 lepers and 930 healthy children are in the Mission's own Homes and Hospitals, and 7,100 lepers and children are in aided institutions for the maintenance of which it is largely providing. The Mission is also providing for Christian teaching and worship at a number of government and other institutions for lepers.

Threatened numbers of lepers are in dire need, without shelter, food or medical relief, and without the "Hope of the Gospel" will you help them asks Rev. H. N. Konde, Secretary for Canada, The Mission to Lepers, 265 Bay Street, Toronto.

NEW AIRCRAFT FACTORY NEAR VICTORIA

VICTORIA, July 28.—(CP)—M.E. Foster of London, England, announced today Heliovide Aircraft of Canada will construct a factory near Victoria to employ 200 men for mass production of airplanes.

Mr. Foster said the plant would be producing within six months 30 planes a day, under a new plastic method, for distribution in the United States, Great Britain and Canada.

A training school will be operated in connection with the factory, he said to instruct men in engineering, draftsmanship, drawing and all phases of airplane and engine construction.

Timely Notes
(Continued from page 11.)

Page 25, observations on the breeding of prize winners; 26, advanced training standards for advanced registration and Canadian National field services. Page 27, an excellent reproduced photograph of a three-quarter silver prize winner, racing on silver fox shows, tracing their history from 1920; page 29, what to look for in buying foxes; page 30, particulars re tattooing foxes; 31, Experimental Station and its breeding; 32, fundamental requirements of line breeding with explanatory chart on 33 and 34. Page 35, fox illustration station. Provincial fox field service, cleanliness and its importance on a ranch; 36, how to pelt a fox with proper sizes of boards and illustrations of same on page 37 and further particulars on 38. Marketing of furs to the female of the booklet with the exception of a cut on page 40 of four beautiful pelts.

Altogether the booklet is a most valuable one and every rancher would be benefited by reading its contents and keeping it convenient for future reference. The booklet is due to the compilers who must have spent a great lot of time securing and arranging the material.

On page one of the Canadian Silver Fox and Fur for July, is a photograph taken at the Ontario Fur farmers conference held at North York, Ont., and from left to right those in the picture are Dr. Charles F. Bassett and Mrs. Bassett, Robert W. Fraser, Mrs. John Mack and John Jack. The two ladies were at all the sessions of the conference and evidenced the keenest interest in the proceedings.

Summer Management of Pastures

(Experimental Farm News)

It is not unusual to find instances where liberal applications of fertilizer have been made to pasture land without any real benefit being made to adopt a policy of pasture management. This neglect has resulted in some cases in over-grazing, but in most cases there fertilizers are not used. It should always be remembered that short grass is much more nutritious than grass that has been allowed to stem or go to seed. It should also be kept in mind that clover will not become well established where under-grazing is permitted. The clover plants require a generous supply of air and sunlight which is made available when the grass is kept under control by grazing.

Pastures should be quite dry before being grazed in the spring as serious damage may result from breaking up the sod. However, reasonably early grazing is considered advisable in order to lengthen the pasture grazing season, and incidentally lower costs of stable feeding in the fall or winter. Grazing should be continued until the last week in June, it is more likely to be beneficial than harmful to the pasture. If the growth of pasture grasses out of control for any reason at this period of the year, it is always advisable to cut it as close as possible with a mower. If small areas are cut daily, the cutting will eat the cut grass and avoid loss of feed.

Fertilized pastures should be relieved for short periods during the summer especially during the latter part of June and early in August. At the Fredericton Experimental Station, states the Superintendent, C. F. Bailey, cows are kept on fertilized pastures during the latter part of May and early June; during the flush of the pasture season these cows are transferred to ordinary pasture areas. When these pastures become short, the cows are again returned to the fertilized area. After-grass is provided early in July and is made use of at intervals for relieving the fertilized pastures throughout the balance of the season.

It is important to avoid late grazing on improved pastures. For best results these pastures should be rested for two or three weeks before the fore going into the winter. That a fair stand of plants may be developed to protect the roots during the winter months, it has been definitely proved that early spring growth is usually delayed where cows are allowed to graze heavily until the first of October.

It is good practice to harrow pastures in the fall or early spring. Harrowing both ways in a field is recommended. This practice tends to loosen up the sod and spread the droppings of the animals over the field. Several types of harrows may be used, but the chain harrow is considered the most satisfactory. The ordinary smoothing harrow preferably with the teeth destroyed. Miss Haszard, Charlottetown, Supervisor, gave a most interesting talk and demonstration on felt also on demonstration was a Russian China Plate pattern built, designed and worked by the New Perth Institute which was greatly admired by the ladies. A nomination committee was appointed to elect the following officers: President, Mrs. Hamilton, New Perth. Vice-President, Mrs. M. P. Corcoran, Baldwin's Road. Secretary and Treasurer, Mrs. Allison McLean, Montague. Delegates to Convention at Charlottetown, Mrs. Malcolm McLeod, Lorne Valley. Resolution committee was then appointed, headed by each of the members for her kind hospitality of her beautiful home and grounds.

During the past three years no grain has been fed to the milk cows at the Fredericton Experimental Station, nor has any green feed in the stable to these animals during the grazing season for the past ten years.

Properly fertilized and managed pastures will provide an abundant supply of nutritious feed for dairy cattle under average climatic conditions, in the Maritimes.

YOUNG PEOPLE TOUR CANADA

MONTREAL, QUE., July 28.—Equipped with bicycles and 19 members of the Youth Hostels Association, 15 girls and four boys from San Francisco, Los Angeles and Portland, Ore., spent yesterday in Montreal as part of a trip across Canada in a Canadian National Railways Tourist car. They left Montreal on July 1, and after visiting Vancouver, went to Jasper National Park where they spent two days. Some of them went to Mount Edith Cavell 75 miles over the new highway to the Columbia Icefield. They stopped at White River, Stanki Lodge, North Bay and Ottawa, from North Bay they made a detour to the home of the missionaries. During their stay in Montreal they were the guests of the Rotary Club at luncheon. Departing from Montreal today, the young tourists who carry bedding and cook most of their own meals, will travel to White River, some will cycle to Boston, others to New York.

Cardigan Head And Vicinity

The District Convention of thirteen Women's Institutes was catered by the New Perth Institute being held on the beautiful lawn of Mrs. John Dewar, assisted by the Baldwin's Road Institute. Meeting was opened by singing the British Ode followed by the Club Women's Creed, with the President Mrs. W. W. McLaren, Georgetown, presiding. A very interesting report was read by the Secretary, Mrs. Cowan, Lower Montague. Some very interesting talks were given by the following ladies, Mrs. Lester, Melish, Montague on Convention and International Affairs.—Peace being her topic. Mrs. Allison McLean, Montague, on Home Sanitation and garbage being destroyed. Miss Haszard, Charlottetown, Supervisor, gave a most interesting talk and demonstration on felt also on demonstration was a Russian China Plate pattern built, designed and worked by the New Perth Institute which was greatly admired by the ladies. A nomination committee was appointed to elect the following officers: President, Mrs. Hamilton, New Perth. Vice-President, Mrs. M. P. Corcoran, Baldwin's Road. Secretary and Treasurer, Mrs. Allison McLean, Montague. Delegates to Convention at Charlottetown, Mrs. Malcolm McLeod, Lorne Valley. Resolution committee was then appointed, headed by each of the members for her kind hospitality of her beautiful home and grounds.

SUGGESTS TOWERS FOR MAUSOLEUMS

PARIS, July 28.—(CP)—"How do you wish to be buried?"

Up until now good Parisians have been buried in a decent horizontal position in regular cemeteries such as is the custom in other Christian countries. But if the suggestion of M. Henri Sellier, reconstructor of ancient ruins, is followed — the cemeteries rising perpendicularly in the form of towers, not unlike the Eiffel Tower.

Parisian cemeteries are crowded to the bursting point. One of these days something will have to be done to solve the burial problem. M. Sellier supports his attitude with a number of arguments. "The perpendicular cemetery would have the advantage of being more hygienic, the bodies would decompose more rapidly and finally the saving in burial costs and territorial space would be very considerable," he argues.

The tower cemetery would probably resemble the project for circular passages in addition Congress would be piled one on top of the other in the room in the tower. Each coffin could be named, ticketed and numbered. The saving in land space would be considerable, as a solution for the problem, is frowned upon in France.

CHICKENS SENT BY AIR TO POULTRY CONGRESS

VANCOUVER, B. C., July 28.—Locked in the rigid grip of dry ice two dozen day old University of British Columbia chicks left Vancouver for the World Poultry Congress at Cleveland by air express over Trans Canada. Fair Lines on Wednesday night. They are the only poultry of their kind on this continent and will be used for demonstration work by the World Congress. Known as the "Cumber" breed, they are the only chicks that show sex characteristics by the color of their down. The strain is an entirely new development in the science of breeding. The two dozen were hatched from eggs brought here from Cambridge University which gave them their name. Nature almost failed to co-operate and hatch the eggs out in time for the big show. To make their engagements before the Congress they were killed the day they were born and shipped in a refrigerator carton since live shipments are not accepted for Air Express.

WITHOUT LIGHT SERVICE

CAMPBELLTON, N. B., July 27 (CP)—Campbellton and district went without electric light service from early this afternoon until tonight. A transmission line, supplying power from Metis, Que., was put out of commission by lightning at Val Brilliant, Que.

COMBINED STANDING FIELDS and THRESHED GRAIN COMPETITION — 1939

C.N.R. Receives Conscience Money

VANCOUVER, B. C., July 28.—Canadian National Railways hailed it as a sure sign of better times yesterday with the arrival of \$20 which was credited to "conscience money" account. The sum was turned into the account of the Railroads at Kamloops who sent it to the Treasurer for unpaid fares on freight trains. Railway officers state the incident is not uncommon although it has not happened for some time past.

Use Minard's for Dandruff.
