No Change Is Planned In TCA Policy

OTTAWA (CP)—Transport Minister Balcer said here there will be no change in the near future concerning the government's policy toward Trans-Canada Air Lines and Canadian Pacific Airlines.

The minister said that the government has rejected CPA's bid for more domestic flights. It now is permitted one flight a day each way between Montreal and Vancouver.

Mr. Balcer was replying to a Commons question by Donald S. Macdonald (L.—Toronto) who asked for an outline of government aviation policy in view of reported criticism by Paul Davoud, chairman of the ATR Transport Board.

Mr. Balcer said Mr. Davoud, who made a speech Tuesday at

Montebello, Que., on air policy, had assured him that a "wrong interpretation" had been given his remarks and that he didn't intend criticism of the government.

POLICY REVIEWED
He said policy regarding TCA and CPA is reviewed by the government from time to time and that there would be no change "in the near future."

He repeated a previous statement that the two major airlines should co-operate and investigate new fields in which co-operation would be possible.

J. W. Pickersgill (L.—Bonaville—twillington) asked Mr. Balcer to table the text of Mr. Davoud's speech before the ATR Transport Association.

Mr. Balcer said he didn't know if there was a text.

Mr. Pickersgill asked him to find out.

Wheat Crop Is Doubled On Prairies

OTTAWA (CP)—Canada's 1962 wheat crop is estimated at 537,554,000 bushels compared with 283,284,000 bushels in last year's drought-afflicted harvest, the Dominion Bureau of Statistics has reported.

The Prairie yield is estimated at 538,000 bushels or 107 per cent higher than last year, said the forecast, which is the final one for the year.

The survey reflected only minor changes from previous forecasts. It is based on information received up to Oct. 15 from field correspondents as well as processing companies and provincial authorities.

Estimates of other main grain crops, with 1961 figures in brackets: Oats for grain — as opposed to fodder — 483,610,000 bushels (283,965,000); barley 163,888,000 (112,647,000); all rye 12,644,000 (6,519,000); flaxseed 15,685,000 (14,316,000).

The bureau reported wide variations across the country in growing conditions during the season. Average yield per acre was higher for 15 crops and lower in six compared with 1961. Estimated production was larger than last year in 13 crops. Production records were posted in mixed grains and tame hay.
