

SMILES AND KISSERS: OR, FRIENDSHIP AND LOVE.

As sweet as a dew-drop,
The exquisite smile of Heaven, revealing
The joys that are hid in the heart.

Which friendship shines first in a ring,
A smile is the emblem of this,
My heart ever a better thing.

Whenever my spirit is wroth,
And longing for rest in its strife,
When all the future is dreary,
And dark the shadows of life.

If friendship will smile in cheer,
As feebly I struggle alone,
To bid a kiss to the angel above,
Will render me the times as dear.

Life's trials can change to pleasure,
In truth it bravely be so,
For my heart is itself a treasure,
Since Love laid its jewels so.

My pathway is dotted with flowers,
Which come on each step to outdo,
For love leads his way to the hour,
And tints them with colour deo.

Which friendship's an exquisite feeling,
A breath from an angel above,
Which ever the soul is feeling
And wakes the first notes of love;

That love is a stronger emotion,
That it is the life of the soul;
As the waters of mighty ocean
Are moved by the moonlight's control.

And if ever to mortal in given
A faith that is true and true,
Which aspires to realms in Heaven,
'Tis faith that is the gift of God.

A smile may be given to many,
To give to one is a rare gift;
But give not a kiss to any,
Who has not the love of his heart.

THE CURSENEY. The Barrie "Advance," remarking on the decimal currency, says—"We readily admit that the American change is a great improvement, but we are not so ready to concede how any man, who is competent to offer an opinion upon the decimal principle, as to be beyond all competition, superior to any other. It is objected against dollars and cents that they are not a true measure of value; but it is a consequence of the decimal arrangement! Will any one pretend to say that the shillings were divided into ten equal parts, and that the pence were divided into twelve equal parts at present? It is true the number twelve is divisible by 3, 4, and 6, but we could not have silver coins for each of these purposes, and the number six, of convenience infinitely greater than that of being obliged, occasionally, to use silver and copper together in the payment of small sums. If the penny were divided into six, and the shilling into six, and if there were two silver coins of the value of five pence and two pence, the greatest amount of copper that would be required in the payment of any sum would be as follows:—

The following sums could be paid in silver: 3 pence, 4 pence, 5 pence, 6 pence, 7 pence, 8 pence, 9 pence, 10 pence, (a shilling), 11 pence, 12 pence, 13 pence, &c. So that any number of pence (except 3 pence) could be paid in silver, and any sum above three-halfpence (except 3 pence, and 3 pence), could be paid in silver, and two pence. It would be impossible, with the present shilling of two pence and silver coins of the value of five pence and two (five-tenths and three-tenths) pence, to pay a sum of five pence and two pence (two-thirds of a shilling), you buy 1 pound, 2 pence, 3 pence, 4 pence, 5 pence, 6 pence, 7 pence, 8 pence, 9 pence, 10 pence, 11 pence, 12 pence, 13 pence, 14 pence, 15 pence, 16 pence, 17 pence, 18
