THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND,

Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.
(IN ADVANCE)

ONE YEAR	$4.00
SIX MONTHS	2.00
THREE MONTHS	1.00
ONE MONTH	0.35

Sent post paid to any part of Canada or the United States.

ADVERTISING RATES.

For small advertisements which are ordered for only one or two weeks the charge is 5 cents per inch for the first insertion, and 20 cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents :—

R. H. Mason, Post Office, Charlottetown
J. McIntyre Maipeque Road, "
C. Paul, Lower Spring Park Road, "
W. M. Ochs, Pavilion Street, "
S. Grey, cor. Water and Prince St. "

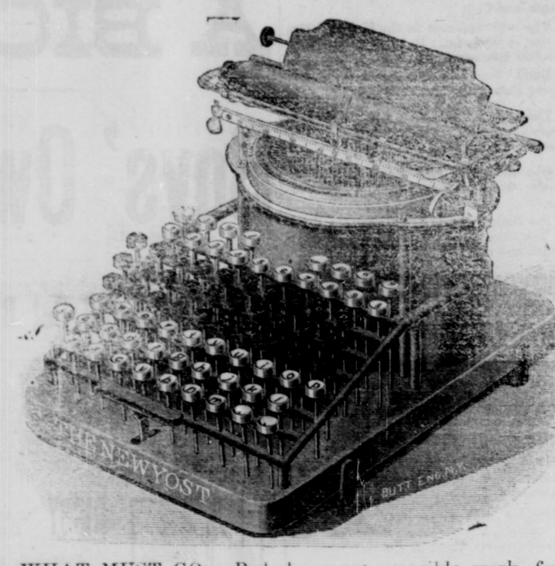
The Yost Typewriter.



THE NEW YOST

the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded.

NEW MACHINE,
NEW MANAGEMENT
NEW PRINCIPLES,
NEW PATENTS,
NEW MEN,
NEW LIFE,
NEW BRAINS,
NEW METHODS,
NEW CAPITAL,
The LATEST and BEST

WHAT MUST GO :—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys, double scales, etc., are no longer to be tolerated or pardoned. The NEW YOST has abolished them, and no other can retain them and live.

THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Caligraph" in 1880, and the "Yost" in 1889; the latest and best improvements have been added during 1892, making the New Yost an ideal, perfect typewriter. The New Yost prints direct from steel type; its work is never blurred but is clern cut and beautiful. The alighment is absolutely perfect and permanent. The paper is an ideal success, the best ever applied to a typewriter. The line spacing absolutely perfect.

Harper's Weekly.

ILLUSTRATED.

Harper's Weekly is, beyond all question, the leading journal in America, in its splendid illustrations, in its corps of distinguished contributors, and in its vast army of readers. In special lines it draws on the highest order of talent, the men best fitted by position and training to treat the leading topics of the day. In fiction, the most popular story-writers contribute to its columns. Superb drawings by the foremost artists illustrate its special articles, its stories, and every notable event of public interest; it contains portraits of the distinguished men and women who are making the history of the time, while special attention is given to the Army and Navy, Amateur Sport, and Music and the Drama, by distinguished experts. In a word, Harper's Weekly combines the news features of the daily paper and the artistic and literary qualities of the magazine with the solid critical character of the review.

HARPER'S PERIODICALS

SUBSTITUTE FOR SILK.

A Process by Which It Is Made of Cobwebs and of Wood.

A prominent revenue officer of Montpellier, France, named Bon, conceived the idea of using cobweb as a substitute for silk. The notion was not a new one. In 1665, when, one day, near Merseburg, Germany, the fields, meadows and trees were covered by masses of peculiar, blue cobwebs, the women of that town, both married and unmarried, wanted to preserve souvenirs of the strange phenomenon. They therefore by spinning made ornamental strings and similar trinkets of the cobwebs.

Bon had gloves and stockings manufactured of common cobwebs, and sent these articles, together with a treatise on the raising of spiders, to the Academy of Sciences at Paris in 1709. A commission was appointed for examining these propositions, to which commission the famous naturalist Reaumur belonged, the inventor of a thermometer still bearing his name. He showed that Bon's plan was impracticable because not enough flies could be procured for feeding the spiders kept for breeding. This seems to be credible, if one considers that nearly 700,000 spiders would yield only one pound of silk. Bon's idea was repeatedly revived, and particularly American spiders, yielding a more compact thread, were recommended, but cloths made of cobweb silk always remain curiosities. Thus the French naturalist d'Orbigny had a pair of solid trousers for which South American spiders had furnished the raw material.

Reaumur, however, went further than Bon. "Why shall we borrow from animals?" he asked. "If a common worm is able to change the foliage it eats into silk, man, with his higher intellect, should be able, too, to make silk of similar things." Yet Reaumur failed when he attempted to prepare silk of gums and rosins. In the meantime mankind has advanced, chemistry has been greatly improved, and at Paris they now manufacture silk of wood.

In this respect even two methods have become known of late—that of Chardonnet and another of Du Vivier, which both, in reality, are based upon the same concept. If one pours nitric and sulphuric acid, not particularly concentrated and in limited quantity, upon cotton, consisting of cellulose (woody substance), one receives a kind of weak gun cotton that, placed into a mixture of ether and alcohol, becomes a mucous mass known as collodion. Exposed to the air this mass becomes solid again by volatilization of the ether and the alcohol. The two French chemists named prepare of wood a mass similar to collodion that, placed in water, becomes solid nearly instantaneously. From this mass under water threads are spun that are called artificial silk.

It is a well known fact that artificial products are always inferior to natural products. This is also the case with the artificial silk just described. It is glossy, it is true, but it differs in some degree from natural or genuine silk, particularly by its combustibility. It burns with a brighter flame than silk proper, wool, or even cotton. Ladies therefore wearing such stuff will do well particularly to beware of coming in contact with fire.

Nevertheless the beginning has been made of producing artificial silk at the laboratory. Perhaps the time will come when man will excel the silkworm in the production of silk. For the present, however, the silky orm still excels man in this respect. —Philadelphia Press.

Names In New York's Directory.

The new city directory is even more interesting than its predecessors. People in search of light reading rarely turn to the volume, yet there is a great deal in it that challenges attention.

A perusal of the new edition will show that Julius Cæsar is now making cigars for a living. Mark Antony is selling newspapers in Canal street. Cicero is a Thompson street tailor. Michael Angelo will be very pleased to shave you if you will step into his shop on Third avenue. William Shakespeare is a printer. Richard B. Sheridan is an engineer in the annexed district. There are not less than 25 Tom Johnsons, five Macbeths, and six Macduffs. Washington Irving has apparently forsaken the barren field of literature and is gathering coin as a broker. Henry Clay is a cook, and James G. Blaine a coachman. There are nine Knickerbockers in the good book. It is a significant fact that there are also nine Angels, and only one of them is a woman.

There are eight Homers, three Virgils, nine Miltons and two gentlemen bearing the name of Columbus. A. Dumas is engaged in the retail candy trade in Canal street. It is not stated whether this is Dumas pere or fils. Miss Cleopatra C. Ice is a typewriter. Eighteen people bear the name of Moon, but there is only one Sun—Mr. Kwung On Sun. There is an Isaac Sunshine however.—New York Times.

River Traffic Steadily Decreasing.

Some old river men profess to believe that traffic on the Missouri will increase year by year, but it has been a noticeable fact that during the past 10 or 12 years the traffic has steadily decreased year by year, until now it is almost entirely wiped out. The building of railroads has caused this, the uncertain navigation working to the injury of the river traffic as against the railroads. For instance, if a regular steamboat line was in operation between here and Sioux City, and the freight rates were but two-thirds as much as charged by the railroads from the same place, the steamboat line would not control one-tenth of the traffic simply because merchants usually want their goods as soon after they order them as possible and would not care to trust their goods to a steamboat which might make the trip in but a few days and again might have trouble with sand bars, etc., and not get through in a week. Steamboats of course are necessary to carry freight from railroad points to Indian agencies and military posts which are far removed from railroad points, but the river traffic from one end of the river to the other as formerly is a thing of the past.—South Dakota Cor. Minneapolis Journal.

The Vision of Birds.

Birds have very acute vision, perhaps the most acute of any creature, and the sense is also more widely diffused over the retina than is the case with man; consequently a bird can see sideways as well as objects in front of it. A bird sees—showing great uneasiness in consequence—a hawk long before it is visible to man. So, too, fowls and pigeons find minute scraps of food, distinguishing them from what appear to us exactly similar pieces of earth or gravel.

Young chickens are also able to find their own food—knowing its position and how distant it is—as soon as they are hatched, whereas a child only very gradually learns either to see or to understand the distance of objects. Several birds—apparently the young of all those that nest on the ground—can see quite well directly they come out of the shell, but the young of birds that nest in trees or on rocks are born blind and have to be fed.—Chambers' Journal.

Testing His Honesty.

Your druggist is honest if when you ask him for a bottle of Scott's Emulsion he gives you just what you ask for. He knows this is the best form in which to take cod liver oil. .....

Why Lucy Is Afraid of the Office Boy.

'Dolphus is not married—he says he thinks the "mahwid state is chock full of trepidations." His chosen companion in life is a tame crow named Lucy. This gentle name seems singularly inappropriate, as Lucy is the blackest and most ill tempered crow that ever cawed.

Her one accomplishment is that she knows how to mail letters. 'Dolphus taught her to drop letters down the mail chute in the office, and he and Lucy are very proud of this achievement. It nearly brought them to grief one day. The office boy in one of the upper offices is deeply enamored of a pretty typewriter on the floor beneath, and occasionally, so rumor says, indites tender missives to her.

The other day when he was writing he called Lucy to him before the letter was ready to mail. Lucy sat there on his writing table for some time, and the boy seemed in no haste to finish his epistle.

Finally Lucy could stand it no longer and snatched the open page in her beak and flew through the transom to the mail chute in the hall. The open letter was too big to go in. Lucy knew her duty. That letter must go down, so she flew to the elevator shaft and dropped it gently down, then flew away with a triumphant "caw."

The office boy was in despair. He tore madly down stairs only to find that the engineer, who had been oiling the top machinery of the elevator, had caught the letter and was reading it aloud to an interested audience, among which was the office boy's hated rival, the elevator boy.

Lucy fights very shy of the office boy now. 'Dolphus says Lucy can understand every word he says, so it may be that she understood when the office boy announced that if he caught her he'd wring her neck. —Chicago News-Record.

Bjarni, the Discoverer of America.

All impartial historians give to the Norsemen the honor of being the discoverers of America. However, but few of them ever give the name of the real discoverer. According to the most authentic records, monks from Ireland discovered Iceland about the year 725 A. D. About 125 years later the Norsemen (knowing nothing of the discovery made by the Irish monks) also ran afoul of the little boreal island. In the year 874 these enterprising sons of the vikings had planted a colony on the island which soon became a flourishing settlement. In the year 893 Eric the Red discovered the east coast of Greenland and skirted along it for many miles. In 995 one Bjarni, who was making a trip in his vessel from Norway to Iceland, was driven from his course and finally found himself, vessel and crew in a harbor on the coast of what is now Nova Scotia.

These facts, being indisputable, should accord to Bjarni the individual honor of being the discoverer of the western continent. But the Scandinavian historians, when pressing their claims of being the true discoverers of America, seldom mention Bjarni, seeming to prefer conferring the honor upon one Leif, a son of Eric the Red, otherwise known as Leif Ericson. This man Leif seems to have deliberately left Iceland with the avowed intention of planting a colony in the new southwest—this some five years after the fateful voyage of Bjarni, who was the real pathfinder to the new world. Ericson's colony was landed at what is now Rhode Island (known in Norse history as "Vinland"), and was maintained for many years, according to some writers, until finally wiped out by the plague.—St. Louis Republic.

Women Should Keep an Account.

Whether a woman is poor or rich, it behooves her to acquire methodical business habits, keeping her little accounts accurately and knowing to a cent just what she does with her money, whether she has 10 cents or $10 to expend on her own little personal wants.

An allowance is the first step toward this end, if at the same time it is impressed upon her that every sum spent should be set down with unfailing regularity. In black and white one notes how much more easily the money can be spent, how quickly it goes and just what foolish little nothings have lured it from our pockets.

Without setting down each item it is ten chances to one that you will conclude you must have lost some money when you cannot see how that $10 bill went when you only bought such a very few things.

The neat little figures are a genuine restraint, besides instilling a habit and system that will be of great value if fortune ever smiles, and a great estate comes to your hands, and still greater if economy is a necessity, and the dollar has to be forced into doing duty for two.

Unless the accounts are kept accurately and cash made to balance every evening you had better not attempt any bookkeeping at all, for slipshod methods are worse than none and only confuse everything rather than help matters.—Baltimore Herald.

Helping Out the Vicar.

Some years ago, in a very rural district, a farmer had a cow for sale. Now, as there was no weekly paper to advertise in, it was the custom of the vicar to give such notices out to his congregation on Sundays. So the farmer thought he would go to the vicar and get him to advertise the cow in church.

"Yes," says the vicar, "but you don't come to my church."

And they struck the bargain that the vicar should advertise the cow, and the man in return should go to church. Now, unfortunately, the man was very deaf, and on the Sunday following when the vicar gave out the banns of marriage between Joseph So-and-so and Sarah So-and-so—a rather unusual incident, for they seldom had a wedding—the farmer took it for granted that the vicar was giving out particulars of his cow and shouted out:

"You may as well say, while you are about it, that she is a most gentle creature, entirely free from vice and a great eater." —London Tit-Bits.

Those Nice Large Buttons.

Here is a nice little story conducive to a continued popularity of hooks and eyes. "One secret of the Chicago packers great fortunes is simply," said a resident of that city recently, "they don't waste anything. The meat, the entrails—everything is made use of but the squeal. They can't catch that, so it is wasted. Funny thing what they do with the blood. It is all caught in a great tank, and after it clots is carted off to a stamping house, where powerful machines are busy stamping it into buttons. Yes, buttons of blood are a novelty. It is all done at one stamp of the big dies, and it was found that they wear remarkably well. They are distinguished by their peculiar red color."—New York Sun.

Antiquity of Embroidery.

Embroidery has a great antiquity and an authentic record extending back to the Phrygians, but the Sidonians excelled in the art, and it is mentioned in 1491 B. C. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804.—Washington Star.

A Railway Manager Says:

"In reply to your question do my children object to taking Scott's Emulsions, I say No! on the contrary, they are fond of it and it keeps them pictures of health." .....

HUNDREDS of ladies in ill health have been or are being restored to health and strength by the use of Hawker's Tonic it has become the great and popular family remedy. .....

A Letter From His Dad.

DEAR SON,—

Yours to hand yesterday. It gives me great pleasure in sending you a cheque for $100. Thanks to Prowse Bros. & Co. They have done the people of this country more good and saved them more money than any firm that ever started business in Charlottetown. I am glad you are buying your Furnishings and Carpets from men you can depend on. They won't misrepresent an article to make a sale. You spoke about me recommending anyone who might want a Carpet to trade there. It would be impossible for me to tell anyone who has not already heard of Messrs. Prowse Bros. & Co. Why, your sisters, your cousins and your aunts all trade there. They say their store is like a fair on market days. Crowds of thankful buyers are found pressing their way up to the counters to have a share in the bargains which they daily offer. Good bye.

From your loving
FATHER.
