

## V.P. COMPTROLLER

The position which I want to fill is that of Vice-President Comptroller, of the Student Union. As a member of this executive it is not enough to just put forth a number of ideas which the students want- rather the position of Comptroller has important aspects. In sharing the purse strings with the Treasurer, I feel that a great deal of responsibility and rational plans must be considered. It would be easy to appeal to you on an emotional level, rather I appeal to you on a rational one. As an involved member of the student body, I am aware of the beurocratic structure which surrounds us and the feeling of powerlessness which exists. This is a myth though and not a fact. The fact is students are represented on most decision making groups of the University: both administrative and academic. Interesting isn't it? considering the fact that few realize who these students are. At present they are in "ivory towers" apart from the rest of us students. This must change, and information is the key. The student body is not so much apathetic as uninformed or even worse, misinformed. How can we take part in things that we know nothing about? At present we can't. However, as Comptroller, I will strive to make the physical assets (those that cost you money) work for you. I will strive to make the Student Union media(i.e. radio & paper) work for you-all of you-so that the Union next year will

### EXTERNAL V.P.

The position of External Vice-President deeply affects the relationship between the University and the community. It is important to project an image of not only strength and autonomy, but also a willingness to participate in the life of the community. The university, like it or not, is an integral part of the community. Without the influx of capital which comes with the university students, the various businesses of Charlottetown offers a more interesting environment for students than, say, Wolfville, Antigonish, and Sackville. The university and the community must work together, and the external vice-president must facilitate this.

As one of the candidates for Vice-President Compt. in this months election I feel it is important to outline the duties and Powers of this executive position.

The Vice-President Comptroller shall be in charge of all the physical facilities which are student owned; i.e. the Barn the Cadre, Radio UPEI, etc. Being closely associated with the Treasurer in his duties on the executive the Vice-President Compt. is a co-signing authority on all financial transactions. They are responsible for the handling of the Student Union funds. If I am elected, I will attempt to make changes in the Emporium, i.e. better hours of business, better merchandise etc., and an improved system of speakers on both the lounge and the dining area so that students will be getting their money's worth from the Radio station. After all, it's your forty dollars which you pay every year; you should elect people who are going to handle it with your interest in mind. This is what I intend to do.

Bill MacIntyre

take advantage of the real power we have and make concrete use of it, for the benefit of all instead of a few. If you agree with the following, start now to exercise your powers and vote Richard O'Brien as V.P. Comptroller on February 23rd. Thank you for your patience and interest.

Richard O'Brien

It seems that the community should appreciate UPEI and show their appreciation in a tangible manner. Student discounts should be extended in many establishments. The Board of Governors should have stronger student representation than it does presently. The University is for the students, and this fact seems to have been lost in some circles. In conclusion, I will fulfill this position (if elected) to the best of my ability. That is all I can do.

Bob Gray

# STUDENT ELECTIONS

By this time I will have already spoken to you and discussed what I loosely call my platform. I hate to call it a "platform" because the word always has connotations of insincere promises. In my past experience working with the Student Union I can see what the weak points are and I have formulated some ideas which I have already passed on to you. The problems facing our University community are many and varied. I believe very strongly in hard work and social interaction. As we all know, the hard work or study can only be done by ourselves but the latter takes many and it is this interaction that stimulates the very existence of the University. Because I believe so strongly in this, I am seeking the position that will allow me to put my ideas into action and try to make our University an even better community. I am running for the position of Internal Vice-President and I will need your support on February 23rd.

Bob Gillis

There are many things I could say to help people make up their minds about whether to vote for me or not but I prefer not to go into detail. I have enough past experience working with people to do a good job as external vice-president. The external V.P. is supposed to be a public relations man and with my past experience working with media I can do a better than adequate job. If people believe that they will vote for me. My only wish is that everyone gets out and vote so this year there will be more satisfied people on campus.

Grant Woodside
