I Know For A Fact... that most women prefer plastic housewares that are flexible. That's why POLY-THENE housewares are so popular. They're soft and warm to the touch — stay flexible even at the coldest temperature in your refrigerator... You'll find C-I-I, polythene in the most attractive tumblers, mixing bowls, covered canisters, fruit juice containers — all kinds of useful housewares... Colours are pretty — pastel blues, rose, yellow... and pearly white. And they are practical... won't break or chip when dropped! And acids such as fruit juices won't hurt them. Buy yourself some polythene pieces for your kitchen and you'll be as delighted with them as I am! I know (that for a fact, too!)

Here's A Little Secret About washday products that you may not have known. Laundry Blue works differently from other products. In your rinse water, it becomes millions of tiny particles that weave through your clean clothes, catching light like miniature sequins — to give them new, brilliant whiteness. This is the secret of washing: soaps and detergents — regardless of their colour — take out dirt. Bleach takes out stains. But Laundry Blue adds whiteness to your clean, white clothes. It actually adds shades of sparkle to your white things. It works in an instant, too.
