

ARMY SEES AUTO PLANT

Capt. S.W. Leightizer of Charlottetown, P.E.I., second in Command of the Driving and Maintenance Squadron of the Royal Canadian Armoured Corps School at Camp Borden, Ont., is shown at left above during a tour which the School made recently of the General Motors of Canada plant at Oshawa, Ont. The other men from the School shown in the picture are Sgt. V.R. Mullett, Sussex, N.B., centre; and S. Sgt. J.L. Ripley, Barrie, Donald Sandford, G.M. Public Relations, is explaining details of the chassis assembly of General Motors cars to the army men.

Wants Farm Credit Act On Long-Term Loan Basis

OTTAWA (CP) — A blunt-speaking Saskatchewan independent Commons member has suggested creation of a national farm credit act through which farmers could get long-term, government-guaranteed bank loans.

Ross Thatcher made the suggestion Thursday as the Commons studied spending estimates of the agriculture department.

Lack of long-term credit, said the member for Moose Jaw-Lake Centre, has resulted in a concentration of more and more farms in the hands of fewer and fewer farmers. The number of tenant farmers had grown and farm productivity had been reduced because farmers could not afford irrigation projects and modern equipment.

Mr. Thatcher, who spoke during a debate in which a number of members brought up many local agricultural problems, said a national farm credit act would guarantee the banks against loss on farmers' loans for periods of 20 and 30 years. The money thus obtained would be used to buy farms and equipment, or for building homes and barns.

Conservatives Charge Public Funds Going Into Slush Fund

OTTAWA (CP) — The Conservative opposition Friday accused the government of using public funds to set up a \$1,500,000 "political slush fund" in preparation for the next general election, expected in the summer of 1957.

Works Minister Winters replied in the Commons that the item in his departmental spending estimates, eventually approved by the House, would provide money for planning of works that come up from time to time for consideration.

William Hamilton (PC—Montreal) criticized the minister because he could give no details of how the money would be spent, and suggested that it could be used to sweeten up certain areas in advance of the next election.

Some persons might even call the item a "political slush fund," he said.

DEFEAT MOTION
An attempt by John Diefenbaker (PC—Prince Albert) to cut the expenditure to \$1 was defeated by a standing vote of 62 to 19 while the House was in committee. CCF and Social Credit members broke party ranks to support both the Conservatives and the Liberal majority.

Mr. Hamilton referred to the amount as a "nice little pot" Mr. Winters could use as he willed in various parts of Canada.

Mr. Winters replied that the first such item was placed in the estimates three years ago. Last year, he asked for \$1,250,000, of which \$468,151 was spent. He had no idea how much would be spent during the current fiscal year.

He said that before the catch-all vote for planning was started three years ago, the department could not prepare plans or acquire sites for public buildings unless there were specific votes in the estimates for them.

ABANDON PRACTICE
That meant sums had to be carried over from year to year. The department decided to abandon the

IN MEMORIAM

DONALD LLOYD GARNHUM
The death occurred in the Prince Edward Island Hospital after a brief illness on March 23rd of Donald Lloyd Garnhum son of Mr. and Mrs. Gordon Garnhum, Laphorne Avenue, City, in his sixteenth year.

Don as he was familiarly known was a popular student of Prince of Wales College. He was an active member of the Young People's Union of Trinity Church. Keenly interested in dramatics he was also active in the Little Theatre Guild.

The funeral was held from Trinity United Church on Sunday, March 25th and was largely attended. The Senior and Junior Young People's Union of the Church attending in a body. The service was conducted by Rev. A. Frank MacLean, assisted by Rev. Howard Christie.

Six of Don's friends acted as pallbearers: Clair Smith, Bill Worth, Earle Warren, Earle Steele, Allan Anderson and Paul Weatherbie.

Left to mourn the loss of a loving son and brother are his parents, a sister Glenda and little brother Blair. The numerous floral tributes and letters of condolence testified to the popularity of this fine youth.

Beloved and esteemed his untimely passing came as a great shock not only to his family but to his many friends and acquaintances.

Industrial Development Board For N.B. Formed

FREDERICTON (CP) — New Premier Roger Pichette says the new board is modelled after Newfoundland's economic development department, but on a smaller scale.

Like Newfoundland, the province will make loans available to manufacturing, processing or business firms setting up business in the province. The board will be formed by three to five members appointed by the cabinet.

The act governing the new board said its members should be sure before it makes or guarantees the repayment of a loan. The industry should be in the best interests of the province, its operators should be qualified, and there should be adequate private investment in the enterprise.

The board has power to authorize loans up to 50 per cent of the total investment.

Flying Visit To Sydney For Air Cadet Squad

A precision drill squad from the 60th Charlottetown Squadron, Royal Canadian Air Cadets, placed third in competition with six squadrons from Cape Breton in Sydney, Nova Scotia, last Friday night.

Mr. Jack Hobbs, W. O. 2, commanded the precision Squad from this city.

The Charlottetown cadets were flown to Sydney in D. C. Dakotas on Friday afternoon. The Dakotas flew down from Summerside, P.E.I., picked up the local cadets and departed immediately for Sydney at 4:30 p.m.

The competition was won by a squadron 562 of North Sydney with a score of 100. Each of the drill teams was composed of ten cadets plus a captain. The competition was held in the Thompson High School Auditorium and the Island team went directly from the airport to the auditorium.

A march past of all seven competing squadrons commenced the programme and then each squadron was drilled separately. T.V. cameras covered the entire show. As a finale the A. V. Forbes Trophy was presented to the winner, Mr. Forbes is Mayor of North Sydney.

Flight Lieut. W. S. MacLeod, commanding officer of the Charlottetown precision squad was accompanied by the following cadets: Flight Sgt. Robert Pitcairn, Flight Sgt. Wendell MacLean, Sgt. Keir Costain, Sgt. Tom Mills, Sgt. Elwin Tombs, Corporal Frank MacLean, Corporal Charles Munroe, LAC Edson Weir, LAC Paul Weatherbie, LAC Gerald Soy, LAC W. A. Lowrie, LAC C. J. Dahal, and LAC Ronald Higgins.

The Island Cadets arrived back in Charlottetown at 11:45 p. m. on Friday night.

Small Atomic Bomb Exploded At Eniwetok Proving Ground

By ELTON C. FAY
ABOARD U.S.S. MT. MCKINLEY OFF ENIWETOK, (AP)—A small atomic weapon, described in terms of a "nominal" 20,000 tons of TNT, was exploded early Friday at this mid-Pacific American proving grounds.

Fifteen newspaper men and a score of civil defence officials aboard this command ship witnessed the rather mild spectacle from a distance of 15 miles. They were the first outside observers permitted in the area since the two Bikini atomic blasts of 1946.

In the current test series, planned to include 10 or more nuclear devices, a big one is scheduled for next Tuesday. Officials have said that it will be a large hydrogen bomb, but not the largest, and that it will be the first American air-dropped of an H-bomb.

Friday's comparatively small blast, inaugurating Operation Redwing, was touched off on the surface of Runit Island, one of the dots of land that make up Eniwetok atoll.

QUICKLY OVER
It was exploded on schedule at 6:25 a.m. (3:25 p.m. ADT Friday). To observers peering through high-density goggles it was quickly over.

There was a dot of white light. Rapidly it became yellow and

SALT LAKES

The Bras d'Or lakes of Cape Breton Island, practically tideless, are mainly salt inlets from the Atlantic ocean.

LONDON (CP)—More than 1,200 Canadian boy scouts are expected to attend the jubilee jamboree in Britain next year.

Altogether, some 28,000 scouts from 58 countries have accepted an invitation to attend the jamboree, marking the start of scouting in 1907. It will be held in a 2,400-acre park in Warwickshire Aug. 1-12, 1957.

The last World Jamboree was held in 1955 near Niagara Falls, Ont.

Give Timely Instructions Regarding Root Maggot

With the turnip planting season now on, the matter of root maggot control once again confronts the farmer. The Science Service Laboratory in Charlottetown are now able to advise growers that heptachlor or aldrin applied to the drill before planting will control infestations of the root maggot in turnips.

The method of application of the insecticide is most important if anywhere near 100 percent control is to be realized. The procedure recommended is to first make a shallow drill with a horse hoe, leveling off the top with a roller or plank drawn behind the hiller. Have the weight of the roller adjusted so that the flat surface of the drill is about two inches above ground level.

The grower will then place a five inch band of insecticide evenly along the centre of the flattened row. Next, two inches of soil is hilled over the insecticide and the turnips are then sown in the normal manner.

ONE OPERATION MACHINE
A machine has been devised at the Charlottetown Science Service Laboratory that will complete all these operations at one time and any farmer by using his ingenuity can make one for himself. In case they may want to see the unit now in use they may do so by contacting Mr. D.C. Read of the Field Crop Insect Section.

The rates of application recommended are as follows: Heptachlor as a 25 per cent wettable powder formulation calls for 20 lbs. per acre when the rows are planted three feet apart. This would give the same effect as one pound to 240 yards or 11 chains of row. Aldrin when applied as a 20 per cent wettable powder should be sown 25 lbs. per acre in rows three feet apart. Or one pound to 200 yds. in the row or one lb. to nine chains. The chemical should be weighed and the hand operated apparatus calibrated so as to apply the proper amount of insecticide.
