JOHN W. PICKARD, Chief.

THE RIFLE.

No. 3 Company—82nd Battalion.

At the recent shooting match of this
Company held at Kensington Range, for
the Company's Silver Medal, Private Neil
Campbell again secured the prize, making
some excellent practice; Sergt. Longworth
being second, and Corporal Gillis third.
We are requested to state that the semi-
annual shooting match of the Company
for the Silver Cup and other prizes, will
come off on Saturday morning, (weather
permitting) commencing at 10 o'clock.
There will be two competitions; the first
for the Company's Silver Medal and prizes
in money and kind, ranges 200, 500 and
600 yards, 7 shots at each; the second for
the Silver Challenge Cup and a similar
series of prizes as in the first match,
ranges 200, 400 and 500 yards, 7 shots at
each. The members of the Company have
spared no pains to make this, the last
match of the season, an interesting one,
and a full muster of the corps is request-
ed. Competitors will appear in uniform
and be punctual in their attendance.
Captain Longworth, the Secretary of the
Band Committee, requests us further to
say that a meeting of this Committee, for
the transaction of certain business, will be
held in his office on Saturday evening next,
at 7.30 o'clock, when the President and
other members of the Committee are re-
quested to attend.

AUTUMN.

Short grows the day, and crowned with
wreath of vine
Temperate October lifts his leafy head;
The meadows now with lessened splendors
shine,
And the mountain side the green is fled;
While fallen leaves lie everywhere around,
And hush the travellers step with muffled
sound.
The waning year declines, and yet his guise
Is even more welcome than the early spring.
Since, gladdening the farmer's greedy eyes,
Rich stores he brings of every valued thing—
Fat olives, apples where the rose tints blend
With gold, "neath which the laden branches
bend.

The day has risen, yet the mists all pale
Lie in the valleys, though serene the skies,
And as a sea the lower levels veil,
From which the hills like island-summits
rise;
While on their verdant slopes afar and near
The shepherds' humble cots and folds appear.
The sunbeams, quivering, 'mid the vine-leaves
play,
And gild the ripening clusters hanging low;
While to the fertile meadows take their way
The bleating flocks, with steps sedate and
slow,
The birds now fly in azure face of day,
Now plunge within the cloulet cold and
gray.

EDUCATIONAL CONVENTION.—The Provin-
cial Educational Association will hold its
first general meeting in the Hall of the
Upper Prince Street School, Charlottetown,
on the 14th and 15th inst. It is expected
that a large number of Teachers will be
present from all parts of the Island, but
arrangements have been made by the
Superintendent of Education to enable
teachers from all parts of the Island to see
the working of the city schools during the
forenoon of the first day. Those who wish
to avail themselves of this opportunity
should be in attendance between 10 and 11
o'clock of the 14th. Teachers and others
attending the Convention pay one fare to
Charlottetown, and return free on certificate
from the Secretary of the Convention.

It is a truism that "a stitch in time saves
nine," and it is fully applicable to the delap-
dated condition of the fence around the Mar-
ket House. Several of the rails have become
detached from the fence proper, and lie near
the path leading to the Post Office on the
North side—a rebuke to the Street Commis-
sioner or some other official.
A despatch to the Halifax Herald says:
"It is stated that Gordon Brown has re-
ceived two years leave of absence, and will
travel in Europe for that period; also that
negotiations are now being carried on with
Shepherd, of the New York Times, to take
Brown's position in his absence. Farar, of
the Mail, is spoken of as going on the Globe
staff as leader writer, and when these
changes are made the Globe will announce
itself an independent Reform newspaper,
freed entirely from the shackles of the
party."

MISCELLANEOUS.

D. Bank's McKenzie, the temperance lec-
turer, is now in Reno, Nevada, seeking or-
dination to the Baptist Ministry.

Hon. Mr. Chapleau denies that there are
any formal proposals before the Govern-
ment for the sale or lease of the North
Shore Railway.

The man who has money in the bank
and plenty in his pocket, can wear a straw
hat four weeks longer, than one who is in
debt for his last week's board. Why is it?

The Toronto Globe says that no change
has taken place in the property which in
any way affects the political position of
that journal, or causes any change in its
management.

The latest newspaper rumor is that the
Pacific Railway Syndicate has purchased a
controlling interest in the Montreal Herald,
and that some important changes will
shortly be made in the management of
that paper.

Sir Frederick Roberts, who is about to
visit England, will return to India next
year as Commander-in-Chief of the troops
in the Madras Presidency, in succession to
Sir Neville Chamberlain; Sir Donald Steuart,
who had been previously designated for
that position, having succeeded Sir
Edwin Johnson as Military Member of
Council.

Agriculture is called both a science and
an art. The former teaches how it is neces-
sary to plow, and the latter teaches the pro-
cess of plowing. The art of agriculture has
reference to the planting, cultivating and
taking care of the crops; the science of agri-
culture teaches of what they are composed
and how crops and plants are built up from
the forces of the soil and the atmosphere.
The effect of the arts toward the soil by
constant cropping. The aid of science is
employed to restore exhausted fields and to
give a knowledge of the means to use to
accomplish it.

The Montreal Gazette has information
that the Government steamer "Newfield"
left England on the 25th ult., having on
board the cables necessary to complete our
coast telegraph system. The steamer will,
after her arrival, first lay a cable from
Gaspe to Anticosti, then a cable from Cape
Breton to the Magdalen Island, and after-
wards one from the mainland of New
Brunswick to Grand Manan. "This being
done" says the Gazette, "the telegraph
system of the Gulf of St. Lawrence will be
practically completed, and the results, we
are satisfied, will be most important to the
trade of the country.

An English farmer says that when he
gave his men, in former times, milk and
oatmeal as part of their daily food, they
were robust, hardy and enduring; but
since these have been changed for tea and
coffee—"wretched slops," he contemptu-
ously calls them,—the laborers have become
pale, out of condition, and cannot perform
the tasks of former days easily. Here is
a good hint to our own farmers in the
way of rations for their working men, and
even themselves. Great Britain cannot
compete with us in the production of
wheat, but she can produce a much su-
perior quality of oats. Let us exchange
products to a certain extent, for mutual
benefit. It is a pity we don't abandon fine
white flour, and eat the whole, ground
from the grain, as in grits and Graham
bread. Our teeth, bones, and muscles
would be all the stronger and better for
such a change of diet. Corn bread and fat
pork,—"hog and hominy," vulgarly
speaking—is too much the food of our
households, especially at the West. This,
at least, might be often varied by beef,
mutton, poultry, eggs and bread made from
unbolted wheat flour, and all the great
gainers thereby in health, strength and
endurance.—New York Tribune.

Fever and Ague.

Are you troubled with Ague, Chills and
Fever, Bilious Fever, Remittent or Inter-
mittent fever, Night Sweats or any disease
that comes from Malaria or disordered
Liver and Hot Suns? If so, procure a bottle
of Green's Ague Conqueror, which is an
acetic extract of strong tonic roots, com-
bined with Sulphate of Magnesia, etc., and
positively contains no Quinine, Arsenic or
other poisons. It purifies the blood,
cleanses the liver, spleen and other secre-
tory organs so effectually that the chills will
not return. We have never found any case
of Fever and Ague it will not cure. Price
50 cents and \$1.00 per bottle. One large
bottle has cured as many as five in one
family. Sold by all druggists and dealers
everywhere.

LAME AND SICK HORSES CURED FREE OF
CHARGE.—Giles' Linctide Ammonia,
yellow wrapper; send for pamphlet. Navicular
diseases, spavins, curbs, ringbone, knee,
calf joint, pastern and snow shoe boils,
strains. Contracts made with express, rail-
road and ice companies, and all others who
employ large numbers of horses, by which
money and horse suffering can be saved.
Address Dr. Giles, 120 West Broadway, N. Y.
Sold by W. R. Watson. Trial size 25 cents.

A Good Account.

"To sum it up, six long years of bed-ridden
sickness and suffering, costing \$200 per
year, total \$1,200—all which was stopped
by three bottles of Hop Bitters taken by
my wife, who has done her own house-
work for a year since, without the loss of a
day, and I want everybody to know it for
their benefit."
"JOHN WEEKS, Butler, N. Y."
