

# education union forms

Dissatisfied Education Students met on October 7th to elect a chairman and a co-chairman who will present their grievances to the Faculty of Education.

Leon Bernard and Jim Colody are to bring to the attention of the Faculty, the inadequacies of the present program and the facilities being used.

They are presently holding most of their classes in the old bookstore. It is felt that this does not compare favourably with the facilities being used by other students. The classroom problem is to be alleviated temporarily with the removal of the uncomfortable desks and a bit of interior decorating.

'Education professors are too conventional' is the most frequent complaint against the Faculty. 'The lecture system is not the only way to teach.'

'Sessions should not be so formal.'

'It's necessary to make the course less structured.'

Arrangements were made to discuss representation on the curriculum committee and the Senate. Elections will be held at the next meeting.

## N. S. D.

On October 14, National Survival Day, a small group met on campus to discuss various aspects of pollution. Three speakers were present: Mr. Arthur Hiscock, head of the P.E.I. Water Authority; Mr. Stan Bas who works with Wildlife and Conservation on P.E.I.; and Dr. Regis Duffy of the Chemistry Department at U.P.E.I.

Hiscock spoke first. He pointed out that water pollution is a major problem on P.E.I. and he stressed the need for sewage plants to treat the raw sewage that enters the waterways of the Island. For example, Hiscock noted that the Summerside Harbor receives all the raw sewage from the neighboring towns, Wilmot and St. Eleanors. He explained why sewage plants are especially needed in Charlottetown, Montague and Souris.

Mr. Bas, the next speaker, gave a brief but informative talk about the conservation of soil and wildlife on P.E.I. Dr. Duffy picked up where Bas left off. His main concern was the use of insecticides in controlling the pests that harm the crops. He said the effects of insecticides are good and bad. In closing he remarked that insecticides will probably be with us for the next ten years since serious research on other forms of pest control is only recently getting started.

## LETTER

Dear Editor:

I am writing to you concerning the September 30, 1970 Cadre. I feel that the last page of this issue requesting the arrest of Jesus Christ (in comparing him to today's hippies) is not only sacrilegious but also in very poor taste. I think that if you, as the editor, and the entire Cadre staff have nothing else to make fun of, you should keep it to yourself and not publish your ignorance in our school paper. Our paper should be something we could be proud of, and I for one would not be proud to say that this issue came from the University that I attend.

Sincerely,

Rosemary McAlee  
Bernadine Hall

# If you love me, don't leave me.

**Please don't litter.**

We're asking you to care about keeping our countryside clean. And now that Coke comes in both cans and non-returnable bottles that means putting the empties where they belong—in a litter container. Enjoy Coca-Cola any way you want it—in the returnable bottle or the newer convenience packages. But please—don't leave them lying around.

**It's the real thing. Coke.**

Both Coca-Cola and Coke are registered trade marks which identify only the product of Coca-Cola Ltd.

**J. & T. MORRIS LTD.**  
96 KENSINGTON RD. CHARLOTTETOWN, P. E. I.

Authorized bottler of Coca-Cola under contract with Coca-Cola Ltd.
