CORNWALL AND STORMONT.

That the Laurier Government should have captured Cornwall and Stormont is not surprising. Most majorities, nowadays, have a weakness for making friends of the mammon of unrighteousness; and for evident reasons, constituencies, generally, like to stand well with a new government. Moreover, the Government candidate for Cornwall and Stormont made all safe, in so far as the tariff question is concerned, by promising publicly, in the presence of the Premier, that "Mr. Laurier would not injure the interests of the town"; and assuring the electors that "instead of tearing down the chimney, Mr. Laurier would brace them up." The electors were thus led to believe that instead of taking away the protection enjoyed by the manufacturers the Government will give them more.

The only question that remained was that of the Manitoba Schools Settlement. How the result will affect this question must depend upon the complexion of the vote, and of this we have not yet received advice. If it should appear that the French-Canadian electors of Cornwall and Stormont were beguiled by the "human devices" of the Liberal Party into voting for Mr. Laurier's candidate, it will rightly be concluded—bearing in mind the result of the general election—that the interest of the Roman Catholics of Ontario and Quebec in the success of their brethren in Manitoba is not at all deep, and that Archbishop Langevin may as well accept the inevitable fact as last. The majority of the Roman Catholics of Quebec voted for Mr. Laurier's candidate and placed the present Government upon the seat of power. They are, literally and truly, as they claim to be, "masters of the administration." If they think that the settlement ought not to be imposed upon the minority of Manitoba, they can, through their representatives in Parliament, force the Government to accept the alternative of re-opening the question or of going out of office. But if it should appear that they are not sufficiently interested to do this, the minority in Manitoba will protest against the settlement in view, and Archbishop Langevin had better throw up the sponge at once and admit that he has been beaten. The fact that his defeat, after victory in the courts, is due to his own co-religionists and friends, will of course add to the bitterness of his disappointment and chagrin.

According to a late despatch from Havana the Rey battalion has penetrated the most famous of the hills of Pinar del Rio on the other side of Castilla and Reina without being arrested by any insurgents. General O'Bryan is operating from the Sierra de los Caballeros in the north division of Pinar del Rio, Rosario, Rabi and Manuella. It is believed, on the strength of a reliable report, that the western and eastern bands of insurgents are about to concentrate in Santa Clara province. In the engagement recently between Tera and Maya Rodriguez, the insurgents' majors, Carlos, Duc and Obislen of Santiago de Cuba were killed, as were Tejeiro, Carlos and Anacleto.

The Washington Post says: "The secretary of state has cautioned the members of the committee on foreign relations to go very slowly in regard to Cuban questions. The secretary of state urgently recommends that all action be postponed in congress until the end of the present campaign, when if the Spaniards are not successful, he believes, as recommended in the president's message, that some form of gradual intervention should be applied by the United States."

A Kansas City despatch says: U. S. Marshal Joe Shelly declared officially today that all persons within his jurisdiction who were engaged in aiding the Cuban insurgents, contrary to the treaty laws of the United States, would be arrested wherever found. D. S. Harriman, who is leading the movement here, said after becoming acquainted with Marshal Shelly's declaration that all action would be taken that would conflict with the laws of the country. One hundred and fifty Texas rangers, commanded by Temple Houston, who has notified Mr. Harriman of their willingness to fight Spain, are said to be in readiness to go to Cuba at a moment's notice.

For the past year 5,137 vessels loaded through the Canadian Soo canal, carrying 4,577,397 tons of freight.

It is understood that an English syndicate has obtained a concession to build and maintain a long railroad in China which will be a powerful counter-check to Russian designs.

There is a practically unanimous feeling among English politicians that the British government has gone to the utmost limit in the concession in relation to Venezuela. Lord Salisbury could get a solid backing in refusing to concede to any further demand by Venezuela.

Eight thousand citizens of Ohio are reported to have filed applications for appointment to office under President McKinley. Ohio shows the full effect of the fever for public jobs that the Liberal Government is doing much to create in Canada. The plan of giving the spoils to the victors is, like before, but embarrassing after, the fight. There are always more victors than there are spoils to satisfy.

The exodus from Newfoundland is still large. One of the papers issues in a black border the following "in memoriam": "Sacred to the memory of 15,000 Newfoundlanders driven from their homes into exile in the United States and Canada."

The area of the recent seismic disturbance in England was unusually wide, extending hundreds of miles from London north to Lincoln, thence west to Lancashire, south through Wales to Taunton in Devonshire, over 200 towns and villages being affected. There were no fatalities except in the case of a woman who died from fright at Herford. Telegraph lines were not affected. Attachments of the Greenwich observatory say the galvanometer, which registers earth currents, showed a very slight disturbance at the time of the shocks. The authorities at Stonyhurst observatory say the galvanometer showed no indications whatever of seismic disturbance.

IS MACCOO DEAD OR ALIVE?

The members of the Cuban junta in New York feel certain that Antonio Maccoo has met his death. The statement was made a few days ago by Dr. J. Castillo that in the junta there could be little doubt of Maccoo's death and that it was generally believed that he came to his death through treachery on the part of Dr. Zertucha. In order to learn the facts about the engagement in which the patriot was killed, emissaries have been sent from Havana to find the troops which he commanded. There exist in the minds of many Cubans in New York a suspicion that Dr. Zertucha himself fired the bullet which ended the brilliant career of Maccoo. Dr. Castillo said that it was barely possible that Maccoo was so severely wounded that he was unable to resist when the Spaniards removed the ring and the papers, but was afterwards captured by his own men and removed to his own camp. The failure to produce the corpse which he commanded. A special to the Cincinnati Commercial-Tribune from Key West says: Passengers by to-night's steamer from Havana state that rumors of fighting near the trenches were rife in Havana to-day. The movement of the troops in the south were more frequent than usual, indicating that important preparations are under way. The reports in Havana that Maccoo is not dead have bewildered the people. All the newspapers state that this matter must be sifted out and settled at once. They call upon the officials to have Maccoo's and young Gomez's bodies exhumed and brought into the city for identification. All the papers say that the present sensational acts and rumors injure the Spanish cause. The Cubans are still divided in opinion, though the general belief is that Maccoo is dead. The reports from Mantanzas cannot be explained except on the theory that some of Maccoo's old army under the command of Luis Riveras has appeared there, and then it is wondered why he is so far eastward. Gomez is advancing westward, but owing to strict censorship over the telegraph lines and the espionage over all American correspondents in Havana, it is difficult to get reliable news. It is known that the officials feel greatly worried over the state of affairs around Mantanzas, but whether it is Gomez or Riveras who is operating there is hard to determine.

The following is Dr. Richardson's letter:— Dear Doctor Ayers,—I do not find any such name among the list of graduates, nor do I know what is meant by the Berlin Method of giving anaesthetics. Sincerely, W. L. RICHARDSON.

Dear Doctor Ayers,—Your letter of Dec. 18th received. In regard to Dr. J. F. Maloney I am pleased to say that an M. F. Maloney entered our school in 1883, but soon left and went to the Medical School, but did not graduate as is evidenced by a letter from Dr. Richardson, the Dean of the Medical School. I enclose his letter to me, and this with what I have written, answer, I think fully your letter of inquiry. Yours very truly, EDWARD H. SMITH.

G. W. Stevens, special commissioner to America for the London Daily Mail, writes to his paper:— "By far the most magnificent sleeping car I have met that of the Canadian Pacific, wherein I am trying to write this, more richly and elegantly upholstered. You can tell at once that it is built elsewhere than from the United States by the inscription under the looking glass: 'Tatum est,' it says, and you may tell your life no Yankee ever had any use for a Latin inscription inside a railway carriage. In this car the two middle sections of the six have their seats along the wall of the car instead of across it; this gives a broader floor in the middle. Above these lateral seats are sheets of window nearly twice the usual size. The smoking room, again, is an especial joy. It occupies the whole width of the car at its hinder end, instead of being cranked in by a corridor leading past it, as in the cars of the United States. With the same large windows on either side and other windows and a door forming the back end of the car, it affords a splendid prospect on three sides of the train. The food on these C. P. R. trains is above the average, and the price is consistently insignificant. There is even—oh, joy of joys—a bathroom. True, you may not have a bath in it, for the bath season closes on the 1st of October, but he is a poor traveller who has not mastered the theory and practice of taking a perfunctory bath. The sleeping and dining cars in the United States belong to the Pullman Company, and are run by them; you take your berth at a different booking office from that where you get your railway ticket. The Canadian Pacific owns and runs its own, and for comfort and good service, I doubt if they have their equal in the world. Everything is done that admirable organization, care and courtesy can do to mitigate the terrors of a week's journey across the Continent."

LETTERS TO THE EDITOR

LETTER FROM DR. AYERS. Sir,—The people of Charlottetown and the surrounding country will remember the stranger known as Dr. Parker, who paid a visit to our city in the early autumn, extracting teeth on the market square; and many will also remember, with painful recollections, the unmerciful results that followed in the wake of his dretful malpractice, and it may be added that many are still suffering from such ill-treatment as he inflicted on ignorant people. On account of such injustice, I felt it my duty to inquire into the history of such men as J. F. Maloney and Kennedy, whose first advertisement in Charlottetown contained the following:— "Dr. Maloney and his associates are graduates of the leading colleges in America and the Doctor has also taken a Post Graduate course at the Harvard Dental College as a specialist in Dental Surgery. I am extracted or filled without pain by the famous Berlin Method. This method was first used by Prof. Karl Kraus, of the Berlin Hospital, for minor surgical operations, and afterwards tested with remarkable success and adopted by the Harvard Medical College."

In view of the above statements I wrote Dr. Smith, Dean of the Harvard Dental College, inquiring of him if such a person as Dr. J. F. Maloney ever graduated there, and also inquiring if he would enquire into the Berlin Method of giving anaesthetics, adopted by the Medical College. He has kindly replied in the following letter:— Boston, Dec. 17th, 1896.

Dear Doctor Ayers,—Your letter of Dec. 18th received. In regard to Dr. J. F. Maloney I am pleased to say that an M. F.
