

Federal Officials Have Plan To Charge Centre Of Ottawa

By RONALD LABEL
OTTAWA (CP) — Federal officials have revealed some details of a \$100,000,000 redevelopment plan that would change the centre of Ottawa by 1970.

Works Minister Deschatelets said the plan, approved in principle by the cabinet last Thursday, would involve a complete rebuilding of a 42-acre section immediately southeast of Parliament Hill.

Negotiations were to start this week with the city of Ottawa and later with private interests, which will be invited to share the cost of the huge project.

Mr. Deschatelets spoke at a press conference called to unveil details of the plan and to answer criticism from city officials last week that they had not been informed of the government's intentions before the cabinet announcement.

"There was no breach of any understanding with the city," the minister said. "The city will be consulted in a few days."

He said Thursday's announcement by Acting Prime Minister Chevier meant only that the public works department and the National Capital Commission had been authorized by the cabinet to negotiate with the city and the four controllers of the master plan.

"I was APALLED," Mayor Charlotte Whitton said last week she was "appalled" that she and the four controllers had not been shown the plan before parts of it were made public.

The plan provides for a reflecting pool in a widened section of the Rideau Canal east of the national war memorial, a 3,000-seat theatre and convention hall, three government office buildings; a museum, privately-owned hotel, and underground parking for more than 5,000 cars.

Three buildings with 1,700,000 square feet of floor space will be built for the departments of transport, immigration and industry. Space will be created for privately-owned office buildings with 1,000,000 square feet. The plan envisages plazas, restaurants and shopping arcades. Lt.-Gen. S. F. Clark, chairman of the national capital commission, said the whole complex would likely involve expenditures of about \$100,000,000 by the NCC, the city and private interests.

Howard L. Shaw Takes On Grain

FORT WILLIAM (CP) — The grain carrier Howard L. Shaw, which waited nearly five months in vain to be loaded at Chicago, arrived at the Lakehead Monday and began taking on grain. No pickets appeared and the ship's crew loaded the ship themselves.

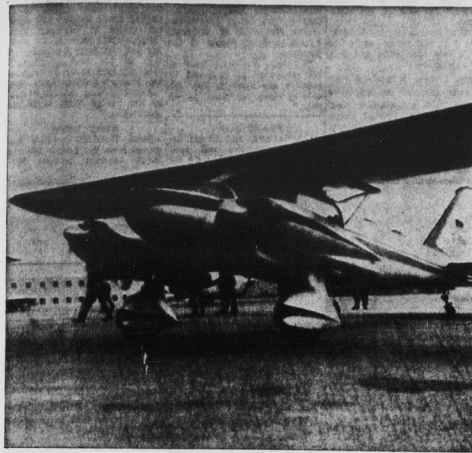

The 450-foot Canadian freighter ended its Chicago stay Friday. Workmen refused to load the ship with grain.

The Shaw, owned by Upper Lakes Shipping Limited of Toronto, was tied up after its arrival in Chicago in a dispute between the Seafarers' International Union (AFL-CIO) and the Canadian Maritime Union.

Upper Lakes Shipping announced its crews from the SIU but switched last year to the CME.

Members of the Chicago local 418 of the Grain Elevators Workers Union were acting in sympathy with the SIU.

Powal Methodist Church about 60 years ago. He is in fairly good health. Mr. Weeks made the trip by plane, leaving Sept. 4.

COALS TO NEWCASTLE

West Germany is attempting to sell, of all things, bush planes to Canada. This Doerrier DC-28 is designed to compete with deHavilland Otters and Beavers. It can carry up to 2,200 pounds and clear the runway with a 300-foot run and climbs at 45 degrees.

BEDEQUE

Charles Doull, Central Bedeque, will celebrate his 96th birthday on Sept. 25.

Mr. and Mrs. Ralph Calbeck and Mr. and Mrs. Arthur MacFarlane left Friday on a visit to points of interest in New Brunswick.

Rev. Ernest Weeks returned Sept. 17, from a trip to Ottawa, where he spent a few days with his son Dr. E. P. and Mrs. Weeks. He then went to Deep River, Ont., where he was the guest of his daughter, Mrs. T.W. Morrison and family. He then went to Fredericton, to visit his

daughter Mrs. Arthur C. Brooks and Mr. Brooks.

While in Fredericton Mr. Weeks was acting in sympathy with the SIU.

Mr. Chowen resides with his daughter, Mrs. Starr Young and Mr. Young. Mrs. Chowen has passed away a few years ago. Mr. Chowen was pastor of

ITALIAN STUDENTS HAVE THEIR SAY

Italian students hold signs at the Vietnamese embassy in Rome while Mrs. Ngo Dinh Nhu holds a news conference inside. The pickets carry signs reading: "Nhu Go Away From Rome"; "Rome's Catholics Are With The Buddhists"; and "Violence Is Not Of Christ."

Mrs. Nhu, sister-in-law of South Viet Nam President Ngo Dinh Diem, is on a world tour to present her views on her ruling family's struggle with Buddhist leaders.

Potash Plant In Sask. Town Is Nearing Half-Way Point

RELE PLAINE, Sask. (CP) — A \$40,000,000 potash plant being built for Kallum Chemicals Ltd. near this southern Saskatchewan community is almost half completed.

To date some 3,000 tons of steel and 20,000 yards of concrete have gone into the project, and a 132-foot steel skeleton flanked by beehive-shaped buildings on the left reaches into the Prairie sky 17 miles east of Moose Jay.

About 700 workmen started raising heat-retaining walls and installing heaters this month so work could continue through winter in a bid to complete the plant by the target date of late 1964.

A short distance to the north of the plant drilling rigs continue to sink shafts to potash beds 5,000 feet below the surface. The beehive-shaped structures are storage bins that eventually will have a capacity of 37,300

tons of potash each. They are 193 feet in diameter, have 16-foot high concrete walls and prefabricated wooden roofs that taper together 80 feet above the ground. Different grades of potash will be stored in different bins.

The steel skeleton ultimately will be the refining and power plant. Measuring 600 by 375 feet, it will house eight evaporators, running from the floor to the ceiling 132 feet above and four crystallizers.

OPERATION SECRET

The evaporators have not yet been installed but the crystallizers resemble large pot-bellied stoves. The company is keeping their operation a secret.

Each evaporator will also be serviced by a drying kiln nine feet in diameter and 79 feet long.

The evaporators, drying kilns and crystallizers will be linked together with connecting pipes which one engineer says will look like a steel spider web.

Potash, used in fertilizer and chemical processes, will be produced by the solution process.

Each evaporator will also be serviced by a drying kiln nine feet in diameter and 79 feet long.

The evaporators, drying kilns and crystallizers will be linked together with connecting pipes which one engineer says will look like a steel spider web.

Potash, used in fertilizer and chemical processes, will be produced by the solution process.

This involves forcing water into the potash beds to dissolve the ore and then pumping the water, containing a solution of potassium and associated minerals, to the surface. Potash will be recovered in the refinery by a process of crystallization and drying.

The refined potash then will be transferred by conveyor belts to the storage bins. An underground conveyor belt 1,200 feet long will move the stored potash to a loading terminal served by three sets of tracks.

The underground conveyor will carry 500 tons of potash an hour.

Kallum will market its potash in Canada, the United States and far east nations.

Milk, Cream Sales Show July Boost

OTTAWA (CP) — Sales of fluid milk and cream in milk equivalent rose five per cent in July to 499,357,000 pounds compared with the same month last year, the bureau of statistics has announced.

This brought sales in the first seven months of the year to 3,233,831,000 pounds, up two per cent from a year earlier. All provinces posted gains from a year earlier both in the month and the cumulative period.

January sales by provinces with the percentage gain over last year in brackets: Prince Edward Island 2,771,000 (7), Nova Scotia 11,391,000 (4), New Brunswick 15,807,000 (6), Quebec 151,494,000 (6), Ontario 182,902,000 (4), Manitoba 26,000,000 (2), Saskatchewan 220,000 (3), Alberta 31,227,000 (4) and British Columbia 42,856,000 (3).

January sales by provinces with the percentage gain over last year in brackets: Prince Edward Island 15,182,000 (1), Nova Scotia 118,894,000 (2), New Brunswick 99,888,000 (2), Quebec 1,032,708,000 (2), Ontario 1,328,648,000 (2), Manitoba 188,328,000 (2), Saskatchewan 201,291,000 (1), Alberta 225,536,000 (2) and British Columbia 287,368,000 (1).

Broadcast Union To Affiliate With Labor Congress

WINNIPEG (CP) — Canada's largest broadcasting union has accepted an offer to become affiliated with the Canadian Labor Congress, it was announced here.

The decision to join the CLC came at the annual convention here of the 2,200-member Association of Radio and Television Employees of Canada.

ARTEC represents a wide range of employees of the Canadian Broadcasting Corporation including clerical workers, sales and program people and announcers.

The three other major CBC unions already are affiliates of the national labor body.

An ARTEC press release said the Canadian union had sought CLC affiliation since its 1953 founding, but the opposition of other unions in the broadcast industry had made this impossible until now.

John Ward of Toronto, ARTEC official, said his union's affiliation with the CLC "should eliminate raiding and rivalry and provide for closer cooperation among the four major CBC unions."

The others are the American Newspaper Guild (editorial), National Association of Broadcast Engineers and Technicians and the International Association of Theatrical and Stage Employees. They have headquarters in the United States.

The CLC affiliation will replace ARTEC's membership in the broadcast division of another CLC union, the National Union of Public Service Employees.

BOOST GROWTH

VANCOUVER (CP) — Raycoier Canada Limited will spend \$21,000,000 to double production facilities at its pulp mill 38 miles northwest of here.

PISQUID EAST

A large number from this vicinity attended a shower in Mount Stewart hall in honor of Keir Jay and Joyce Adams, whose marriage takes place Saturday.

Mr. and Mrs. David Birt, Charlottetown, were recent visitors at the home of Mr. and Mrs. Alton Jay.

Mrs. Bruce MacLaren, Charlottetown, and her mother Mrs. Lemuel Jay, Mount Stewart, were recent visitors at the home of Mr. and Mrs. George Jay.

Mrs. Wallace Birt was a visitor in Sherwood this week where she was the guest of her sister, Pearl.
