NEW SERIES. CHARLOTTETOWN, P. E. ISLAND, TUESDAY, NOVEMBER 11, 1890. VOL. 26.—NO. 140

R. M. H. S.

Testim nial From Duluth, Minnesota.

DEAR MRS. ROSS,—Having tested your "MAGIC HEALER," I wish to express my gratitude to you by this testimonial, which you can use, if you think it will assist you in selling it: Having cut my hand severely with a chisel, the corner of the chisel having entered the palm of my hand, making a long and deep cut, I applied your "MAGIC HEALER" at once, and after three applications I was able to go to work, and in three days the cut was healed up.

Yours truly,
ALONZO H. LAVERS.

CHARES I. MORRISON,
Commission Merchant

LETTERS TO THE EDITOR.

Brick Sidewalks.

SIR,—Enclosed find a cutting from London Invention, a paper that should be in the hands of the engineer of every corporation requiring any considerable works. As agent, I shall be glad to supply free sample copies. From London Invention of Oct. 4, 1890: "Brick paving has been thoroughly tested in Galesburg, Ill., and is pronounced a success after six years' trial with about five miles laid says *The Industrial World*. Three manufacturies there now make paving bricks, turning out about 160,000 daily and employing 400 men. The clay is exceptionally good and is ground up and sifted as fine as flour, and then moistened, moulded, and burned in a closed kiln with downward draught. From one-fourth to one-third more time is consumed in burning than with the ordinary brick. In burning the brick shrinks from nine inches in length to eight inches and proportionately in other directions. It is thoroughly vitrified throughout and weighs about five pounds. This brick will resist the best steel drill and a chip will scratch glass. In laying, the street is properly graded and covered with four inches to five inches of macadam, then four inches of sand put down and levelled. Then one course of brick is laid down flat and lengthwise with the street and rolled with a light roller; on this course is placed one inch of sand, and then a final course of brick is laid on edge and across the street; one inch of sand on top fills the crevices and the whole is well rolled. The street is graded with a fall of six inches in 19ft. from the centre. The fall is carried to within three feet of the curb, where it is level to within one foot of the curb, and then rises one inch. This pavement has stood the test of the severest traffic of the town, in some cases for six years; it shows no wear, and has cost literally nothing for repairs. As to price, the contractors were required to do the grading, furnish sand and all materials, except only the guttering, and make the pavement complete, and all this they did for 1.40dol. per yard. The paving bricks sell at Galesburg for 8.50dol. per 1,000 on cars, and the price is shaded to 8.25dols. per 1,000 on large contracts."

For a generation past the corporations of Charlottetown have gone on from year to year patching up temporary sidewalks and moving clay or hard mud from one street to another, but after spending hundreds of thousands of dollars, you have not one good paved street or one hundred yards of continuous good sidewalk. The best medical authorities are a unit in the opinion that large quantities of decaying wood poisons the surounding air. Consquently, the less you have of plank sidewalks or block pavements the better, if you wish to live long and die happy. Yours respectfully,

H. F. COOMBS.

Halifax, Nov. 6, 1890.

Islanders—Stay at Home.

SIR,—Now that a large number of persons intend leaving the Island for different parts of the United States, it may not be out of place to caution property holders who are contemplating that step to consider well what they are about to do.

It is true, that this not being a manufacturing country it is necessary for some to seek a livelihood in other lands, but there are scores who have gone and who are about to go to the United States that I feel confident would be as well or better remaining on the Island. Stories of three dollars a day and sixty a month cause visions of gold to dangle before the eyes of the uninitiated Islander, until he persuades himself that this is a land of hardship, toil and poverty.

The result is that he sells his farm and journeys to the land of his golden dreams, only to find that he has to work harder, endure more hardship, and perhaps has to live among a crowd of strangers, inhospitable and addicted to vice.

The law is universal in all established countries that wages are governed by the cost of living, and to live up to the style of a country and save much money is something impossible.

Although very few are honest enough to admit the fact, it is nevertheless true that the vast majority of laboring men who have saved money in the United States have done so by depriving themselves of some of the necessaries and all of the luxuries of life; and if they had done so here to half the extent they did abroad, there would have been no necessity of travelling thousands of miles to better their condition.

It seems natural for a man to consider his position and his country as being worse than they really are, which accounts for so many farms we see advertised for sale in the newspapers.

In conclusion, I would say to my fellow-Islanders, we are living in one of the most beautiful spots on earth, where liberty and peace reign supreme, and where one dollar will purchase as much as two or three in parts of the United States. Therefore, cast aside the unjust prejudice you have to against your Island Home; go to work as you would be compelled to if you went abroad, and you will become a prosperous, contented and happy man.

ISLANDER.

Kingston, Nov. 7, 1890.

ADVICE TO MOTHERS.—Mrs. Winslow's Soothing Syrup has been used by mothers for children teething for over fifty years with perfect success It relieves the little sufferer at once; it produces natural quiet sleep by relieving the child from pain; and the little cherub awakes so "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels and is the best known remedy for diarrhœa, whether arising fram teething or other causes. Twenty-five cents a bottle. apl18'90dyeodwkyly

Montague Shipping.

Entered for week ending Nov. 8.—S. Eldon, Smith, Pictou; Clementina, Macdermid, Pictou; Dwina, Lloyd, Halifax; Fannie Young, Poirior, Georgetown; Orion, Pelrine, Canso; Nicanor, Westhaven, Lunenburg; Harvest Home, Walsh, Georgetown; Acadia, Knickle, Hawkesbury; M. B. Smith, Smith, Georgetown, Latonia, Romkey, LaHave; J. B. Fay, McAvoy, Buctouche; Byron, Hines, Pubnico; Ajax, Martin, Georgetown; Elisha Crowell, Butler, Georgetown; Will Carlton, Nickerson, Halifax; J. C. Kelley, Strupot, Arichat; Guardian Angel, Foughar, Georgetown.

Cleared.—Clementina, McDearmid, Pictou, ballast; Wilhelmina, Glawson, Salmon River, 1530 bush. potatoes, 640 bush oats, 250 bush. turnips, by Geo. Wightman; Ida May, Macdonald, Pictou, ballast; Vidette, Reeves, Hawkesbury, 700 bush. potatoes, 900 bush. oats, 150 bush. turnips, 1000 lbs. pork, 10 brls. vegetables, by D. G. Cameron; Will Carlton, Nickerson, Georgetown, ballast; Nicanor, Westhaven, Halifax, 3200 bush. potatoes, 350 bush. turnips, by Macdonald & Bros.; Cora Louise, Wood, Booth Bay, 2300 bush. potatoes, by P. Kelly; Talenar, Wentzell, 3389 bush. potatoes, 120 bush. turnips, by G. Wightman, for Newburyport, Mass.

There are now eighteen schooners, mostly all of a large size, lying at the wharves, several of which are about loaded, while the remainder have commenced or are about commencing to load. During the week potatoes and oats were in good demand, with an advance in price, while turnips took a downward tendency. The prices now are: potatoes 20, oats 43, and turnips 15 cents per bushel. A few small lots of oats passed hands at 43 cents. From late information it is evident that oats has attained its highest figure, and that a decline may shortly be expected. At present Ontario oats can be delivered in Halifax much cheaper than by buying here and shipping to that port.

Martin & Nelson made another large shipment of live geese this week to the United States.

Again, your correspondent is forced to call the attention of the P. W. Department to the wretched condition of the bridge and the approaches thereto. Scarcely a day passes without some of the planks in the side covering giving way. In fact, the whole of the planks on both sides is in such a rotten state as to be entirely unsafe for travelling. Then, again, the approach to the bridge on the north side could not be in a worse condition. During a great part of the week it was almost impassable. Horses could be seen tumbling over the large unbroken granite rocks, while the contents of the carts and wagons were scattered in all directions. Who is responsible for this deplorable state of affairs? When work was commenced on this spot last Monday, why was it not carried on and finished?

A few nights ago, as one of our enterprising citizens was wandering his ways to the telephone office, he accidently fell into one of the holes on the south side of the bridge. In falling his face came in contact with the rail, from which he sustained a severe injury. It is to be hoped that the temporary disfigurement caused by the fall will in no way interfere with the negotiations now pending towards a matrimonial alliance which he contemplates closing in a few days, with one of the fair daughters of Rollo Bay.

About five years ago, Mr. Alexander A. McLean, who was one of our intellegent and prosperous farmers, left the Island and settled in California. He is now on a visit to his friends, and he speaks in glowing terms of the healthy climate and general prosperity of his adopted land. It is understood that on his return he will take with him one of our fair ladies to share as a partner in his new home.

Montague, Nov. 8, 1890.

Mistakes in Butter Making.

Mr. Jas. Youill, dairyman of Carleton Place, has been travelling among the farmers of Renfrew, and thus records his observations on the costly mistakes he saw.

The mistakes we saw may be briefly summed up as follows:

1. Milking beef breeds. You might as well beef the dairy breeds for profit as to milk the beef breeds with the same end in view.
2. Milking at the right time of the year. We strongly recommend winter dairying.
3. Milking only six or seven months in the year when they should milk ten or eleven months.
4. Milking at irregular hours. We found instances where cows were milked at five in the morning, and not again till seven or eight at night.
5. Milking in wooden pails.
6. Setting in shallow pans and allowing the milk to set to long before skimming.
7. Ripening cream at too high temperature.
8. Using the old dish churn.
9. Keeping butter over summer without proper places to keep it in. We find too few women who have a good idea of the amount of cleanliness needed to make good butter. The men are to blame in a great many instances, as they will not allow the women the proper appliances.
10. We strongly recommend butter and cheese factories.

Chronic Coughs and Colds,

And all diseases of the throat and lungs, can be cured by the use of Scott's Emulsion, as it contains the healing virtues of cod-liver oil and hypophosphites in their fullest form. See what W S Muir, M D, L R C P, etc, Truro, N S, says: "After three years' experience I consider Scott's Emulsion one of the very best in the market. Very excellent in throat affections. Sold by all druggists. 50c and $.

CHURCH SCHOOL FOR GIRLS.—The people of Windsor, N. S., have thus far taken 1,996 shares in the new church school for girls, to be started in that town, representing an amount of $9,980. A general meeting of the shareholders will be held at Edgehill, Windsor, next Wednesday. Parents desirous of sending their daughters to the school are requested to make application to the secretary without delay.

Room Paper—An entirely new and choice stock just opened at the Diamond Bookstore.
