Mothers

Anxiously watch declining health of their daughters. So many are cut off by consumption in early years that there is real cause for anxiety. In the early stages, when not beyond the reach of medicine, Hood's Sarsaparilla will restore the quality and quantity of the blood and thus give good health. Read the following letter:

"It is but just to write about my daughter Cora, aged 19. She was completely run down, declining, had that tired feeling, and friends said she would not live over three months. She had a bad

Cough

and nothing seemed to do her any good. I happened to read about Hood's Sarsaparilla and had her give it a trial. From the very first dose she began to get better. After taking a few bottles she was completely cured and her health has been the best ever since." MRS. ADDIE PECK, 12 Railroad Place, Amsterdam, N. Y.

"I will say that my mother has not stated my case in as strong words as I would have done. Hood's Sarsaparilla has truly cured me and I am now well." CORA PECK, Amsterdam, N. Y.

Be sure to get Hood's, because

Hood's Sarsaparilla

Is the One True Blood Purifier. All druggists. $1. Prepared only by C. I. Hood & Co., Lowell, Mass.

Hood's Pills are purely vegetable, reliable and beneficial. 25c

THE INDIAN FAMINE.

Seed For Gratuitous Distribution Among the Famished Cultivators.

We are feeling a natural and increasing interest in the situation in India, a situation every day apparently more serious. We know now that not only does famine exist, but that great regions of country can grow little grain during the coming winter. These winter crops mean much more to India than those of the summer, and hence the famine must be proportionately greater. It is a satisfaction to learn that the Government is far better equipped to meet this emergency than before. Previous families have taught the powers that be the necessity of forcasting any failure in crops, so that now in each locality both the production and stocks of grain are carefully recorded, and such precise information given to the Government that remedial measures may be quickly taken. We have already commented on the extension of its transportation service, by which the evils of famine have been halved. At the request of the Indian Government, large amounts of carrot seed have been shipped from England for gratuitous distribution among the famished cultivators. The carrot can be rapidly grown even when winter rains are deficient. Within the past three months over 100,000 village wells have been made in the northern provinces at the government's expense, and much work has been furnished to the able-bodied poor in the construction of canals and railways. Our attention is also called to the famine by our own exports of wheat to India—an auxiliary to relief never before known in that country. We have thus exerted a good effect in keeping down grain prices there. It is now suggested that our corn may also be profitably exported to India. The effect of the famine on Lancashire cotton spinners has been notable, since of course the distribution of cloth in the dependency is lessened. It is said that in the northern part of Lancashire 30,000 looms have already been stopped—about one-twentieth of the whole number in that county and in Cheshire. This, too, has a direct connection with our own country, since our cotton is almost exclusively used to produce the lower quantities of goods sent to India.—*Harper's Weekly.*

The First of these Monthly Competitions will commence January 1st, 1897, and will be continued each month during 1897.

$1,625 IN BICYCLES AND WATCHES GIVEN FREE EACH MONTH FOR Sunlight SOAP WRAPPERS

As Follows:

10 First Prizes, $100 Stearns' Bicycle, . .	$ 1,000
25 Second " $25 Gold Watch	625
Bicycles and Watches given each month . .	1,625
	12
Total given during year 1897,	$19,500

HOW TO OBTAIN THEM.

Competitors to save as many "Sunlight" Soap Wrappers as they can collect. Cut off the top portion of each wrapper—that portion containing the heading "SUNLIGHT SOAP." These (called "Coupons") are to be sent enclosed with a sheet of paper on which the competitor has written his or her full name and address, and the number of Coupons sent in, postage paid, to Messrs. Lever Bros., Ltd., 23 Scott st., Toronto, marked on the Postal Wrapper (top left-hand corner), with the NUMBER of the DISTRICT Competitor lives in.

NO. OF DISTRICT	NAME OF DISTRICT
1	Western Ontario, consisting of Counties York, Simcoe & all Counties W. and S. of these
2	East'n Ontario, consisting of Counties Ontario, Muskoka & all Counties E. & N. of these
3	Province of Quebec
4	Province of New Brunswick
5	Province of Nova Scotia and Prince Edward Island

☞ The Bicycles are the celebrated Stearns', manuf'd by E. C. Stearns & Co., Syracuse, N.Y., & Toronto, Ont. Each wheel is guaranteed by the makers and has complete attachments

RULES.

1. Every month during 1897, in each of the 5 districts, prizes will be awarded as follows: The 2 competitors who send in the largest numbers of coupons from the district in which they reside, will each receive, at winner's option, a lady's or gent's Stearns' Bicycle, value $100. The 5 competitors who send in the next largest numbers of coupons from the district in which they reside, will each receive, at winner's option, a lady's or gent's Gold Watch, value $25.

2. The competitions will close the last day of each month during 1897. Coupons received too late for one month's competition will be put into the next.

3. Competitors who obtain wrappers from unsold soap in dealer's stock will be disqualified. Employes of Messrs. Lever Brothers, Ltd., and their families, are debarred from competing.

4. A printed list of winners in competitor's district will be forwarded to competitors 21 days after each competition closes.

5. Messrs. Lever Brothers, Ltd., will endeavor to award the prizes fairly to the best of their ability and judgment, but it is understood that all who compete agree to accept the award of Messrs. Lever Brothers, Ltd., as final.

POPULAR SCIENCE.

How Mineral Wool is Made—Some of the Uses to Which It Is Put.

Of those who know what mineral wool is, or silicate cotton, as it is sometimes called, probably only a small number are familiar with the simple process by which it is made. The wool itself, serving a variety of useful purposes, as a non-conducting covering against heat and cold alike, for steam pipes and cold storage room walls, as a sound "deadener" in floors of buildings, and as a means of fireproofing among many others, is, as its name implies, a soft and woolly substance, consisting of a mass of very fine mineral fibres interlacing one another in every direction, and thus forming an endless number of countless air cells. The wool appears on the market in a variety of colors, principally white, but often yellow or grey, and occasionally quite dark, and is made by converting scorial and certain rocks while in a molten state into a fibrous condition by a steam blast directed against the liquid material. Blast furnace slag forms the raw material for one variety of the wool, and sandstone for another, yielding, respectively, slag wool and rock wool, the latter being preferable for pipe covering because of the absence from it of sulphur, which, with moisture present, becomes an active corroding agent. The furnace slag or the rock, as the case may be, is melted in a large cupola, and as it trickles out at the tap hole in a somewhat sluggish stream, it meets a high-pressure steam jet which atomises the woollen material. If it may be so termed, blowing it in fleecy clouds into the storage room provided for it. Soft and downy, the stuff settles wherever a resting place affords itself, the heavier and easier wool coming down first, while the lighter portions are blown farther along by the force of the steam and settle in the more distant parts of the room, the material thus naturally grading itself into varieties of different quality. A thousand pounds of wool per hour are turned out by one of the cupolas, and after the storage room has been blown full the flocculent mass is pushed into bags, ready for the market. The whole process affords an admirable and interesting illustration of the utilization of an utterly waste product.

LOVE LASTED FIFTY YEARS.

After enduring a lifetime of despondency Elisha Payne, of Winsted, Conn., seventy years old, gave up last Friday and killed himself. Jilted fifty years ago while he was in his teens by a girl he adored, Payne loved her for fifty years. The girl was Lottie Nash, pretty and well-to do, but her parents objected to the union.

The day he heard this decision Payne disappeared and became a hermit whose only home was a cave in a mountain and his food wild berries of the wood and such game as he could ensnare. Twelve years afterwards the girl married someone else and then Hermit Payne came back to the civilization of Barkhamsted, near Winsted. He got work and lived on year after year until the other day, when the concern that employed him went into the hands of a receiver. Then Payne borrowed a revolver, went home and shot himself.

He was found fully prepared for burial, and in his pocket were directions as to how money could be procured to pay the expense of his funeral.

The Supreme Court of Missouri has made a ruling that a telegraph company is liable for mistakes made by it in transmission of telegrams, and that the printed contract on the message blank providing that the company is not liable for unrepeated messages is invalid.

PILLS CURED IN 3 TO 6 NIGHTS.

Dr Agnew's Ointment will cure all cases of itching piles in from three to six nights. One application brings comfort. For blind and bleeding piles it is peerless. Also cures Tetter, Salt Rheum, Eczema, Barber's Itch and all eruptions of the skin, 35 cents.

A pair of gold or gold-filled spectacles or eyeglasses would make a useful present. We have them at prices to suit all.—G. H. Taylor. dec12 2i

ABSOLUTELY PURE

THE KAISERS NAVAL AMBITIONS.

The German Navy Must be Strong Enough to Engage the British Fleet.

One of the most ardent wishes of that somewhat ardent young man, the Emperor of Germany, has been for a new and powerful fleet. In the expression of this desire he has not been content with direct reference to it in his remarkable speeches, but has also inspired these about him to like expression. We are not surprised, therefore, to read, in the last issue of the semi-official "Militarwochenblatt," an article from an officer of the general staff, strongly recommending that Germany ought to have a better navy than that of any other power except Great Britain. The German navy must be strong enough, he says not only to protect the German coast, but so to engage the British fleet as to give German transports ooportunity to land an army in England. The emperor's influence has been shown also in another and more notable quarter—namely, in the proposition by the finance minister, Dr. Miquel, to devote to naval expenditure next year no less than $32,500,000 a sum nearly twice as great as the appropriation for the last year. The reason of this prodigious increase is frankly avowed to be the building of new ships, over $15,000,000 being necessary to that end. Nevertheless, there is a deficit of more than $14,000,000 in the Imperial budget. It is proposed to meet this by a loan, and consequent increase to that extent of Germany's bonded debt. In this connection it is interesting to note that such an addition to the debt is by no means so burdensome as it might be in France. The total indebtedness of Germany (including the individual debts of the German states with that of the empire itself) is said to be less than $3,000,000,000; those of Russia and of Italy, about $2,500,000,000 each; of Austria, about $3,000,000,000; while that of France is stated to be over $6,000,000,000. Yet France, and Russia and England too, by this proposed action of Germany must burden themselves proportionately. When will the folly of militarism be so apparent that we shall hear the good news of disarmament?—*Harper's Weekly.*

DR CHASE'S CURES ITCHING PILES, ECZEMA, SALT RHEUM OINTMENT

H. J. Lisle, representing Ganong Bros., St. Stephen, N.B., says: "Chase's Ointment cured me of a very stubborn case of Itching Eczema. Tried everything advertised, several physicians' prescriptions without permanent relief. Know of several cases of Itching Piles it has cured."

DR CHASE'S OINTMENT

I suffered with piles for years. Chase's Ointment completely cured me. Mrs. Jos. Currie, Fergus.

BRADFORD, JULY 4, 1894.—I consider Dr. Chase's ointment a God-send to anyone suffering from piles, itching scrotum or any itching skin diseases. Its soothing effects are felt from the first application.—JNO. KEOGAN.

A Glance Abroad.

Australia has a population of less than 5,000,000, but economists declare it could support 100,000,000 with ease.

Lake Baikal, in Siberia, according to recent Russian surveys, covers 12,300 square miles, is 5,621 feet deep in some parts and is 280 miles from one end of its crescent to the other. It is the sixth largest lake in the world and the deepest of all. Its level is 1,561 feet above that of the sea.

Peter's pence collected in one week of September amounted to 136,000 francs from Italy, 235,000 from France, 300,000 from Austria, 100,000 from Spain and 70,000 from Belgium. Besides, the Primate of Hungary and the Duke of Norfolk each gave 50,000 francs, and the Austrian Archdukes a large sum.

One of Switzerland's mountain lakes, the Maerjelen See, at the foot of the Eggishorn, was completely emptied in one night during the hot spell in September. The lake was a mile long by a sixth of a mile wide and 130 feet deep; the water probably escaped through fissures in the ice of the neighboring glaciers.

Postage stamps in Macao form a not unimportant source of revenue. A new set of stamps was issued during the course of the year, with the result that the old issue was much sought after by philatelists in all parts of the world, the simultaneous sale of both issues giving the impression that the old stock would soon be exhausted and causing an appreciable rise in the stamp revenue.

The long-forgotten tomb of good King Rene and Isabella of Lorraine, his first wife, was accidentally brought to light the other day in the Cathedral of Angers. Isabella's tin coffin was not opened, but Rene's was. A crown, a scepter, an orb—the insignia of his vain sovereignty over Naples—were found in Rene's leaden coffin. As they were covered with green oxide, the gold used in making them must have been well alloyed with copper.

A girl named Slabon, called "the Sleeping Girl of Sosnitza," is creating a sensation in Upper Silesia. She fell ill there about eight weeks ago of heart apoplexy, and has suffered ever since from hysteria. She professes to have received direct communications from the Virgin Mary, and thousands have been flocking to her daily in the hope of witnessing the "miracle,' in spite' of the fact that the priest has warned them that it is all an illusion. She is now in an insane asylum.

The Public Health and Housing Committee of the London County Council has prepared a scheme for the improvement of the area on the north side of the Strand. It has a total extent of three and a half acres, and in some parts the present population is upward of 800 to the acre. The number of persons proposed to be displaced is 3,308, and provision can be made for re-housing about 2,770 of these. The net cost of the property to be acquired under the scheme is $1,071,250.

A deeper spot in the ocean than any yet known has been recently found by H. M. surveying ship Penguin. Unfortunately the observation was not complete, as a fault in the wire caused it to break when 4,900 fathoms had run out without bottom having been reached. Commander Balfour reports that this occurred in latitude 23.40 south, longitude 175.10 west, about sixty miles north of a sounding of 4,428 fathoms obtained by Capatin Aldrich in 1888. A previous attempt to reach bottom had been foiled by a similar accident to the wire when 4,300 fathoms had passed out, and the rising wind and sea prevented any further attempt at the time.

A lot of fancy cups and saucers and other nice things for the Xmas trade.—W. P. Colwill. dec12 dw 2w

IN AN EMERGENCY.

SOME HINTS TO OBSERVE WHILE WAITING FOR THE DOCTOR.

Antidotes For Various Kinds of Poison—Something About the Complexion and Wrinkles—Loss of the Voice and Its Cause.

It makes one shudder to think of the grim sign on the druggist's phials, but the shudder is worse when one of the family, perhaps a favorite child, has swallowed some deadly dose. What is done then must be done quickly. The following plain directions ought to be kept handy. They may save a life while the doctor is coming.

When the poison is unknown this is the treatment: Provoke vomiting, give bland liquids, stimulate if necessary.

For acids (sulphuric, nitric, muriatic, oxalic)—Give an alkali, provoke vomiting, give bland fluids, secure rest, stimulate if necessary.

Alkalis (hartshorn, soda, potash, lye) —Give an acid (vinegar), provoke vomiting, give bland liquids, secure rest, stimulate if necessary.

For arsenic, Paris green, Scheele's green—Provoke vomiting, give dialysed iron and salt (repeat several times), give dose of castor oil, secure rest, stimulate if necessary.

For sugar of lead—Give Epsom salts, provoke vomiting (repeat several times), give bland liquids, give dose of castor oil.

For corrosive sublimate, tartar emetic—Provoke vomiting, give strong tea without milk (repeat several times) give raw eggs and milk, give dose of castor oil, stimulate if necessary.

For phosphorus—Provoke vomiting, give five grain doses sulphate of copper, give dose of magnesia, but no oil.

Lunar caustic (nitrate of silver)—Give strong salt and water, provoke vomiting (repeat many times).

Opium (morphine, laudanum, paregoric, etc., chloral)—Provoke vomiting, repeatedly, give strong coffee without milk, keep up the breathing.

Strychnine—Provoke vomiting once or twice, give a purgative, secure absolute quiet.

Aconite—Provoke vomiting, stimulate well.

Decayed meat or vegetable—Provoke vomiting, give a purgative, give powdered charcoal.

To provoke vomiting, warm water may be used with or without ground mustard (a tablespoonful to a pint of water), or ipecac (a teaspoonful of the powder or a tablespoonful or so of the sirup), and thrusting a finger down the throat.

The Loss of Voice.

Loss of voice may be owing to inflammatory swelling, either acute or chronic, or to ulceration of the lining membrane of the larynx, to paralysis, or to hysterical affection. Coming on suddenly, accompanied with fever, pain in the larynx and upper part of the throat, increased on swallowing, and difficulty of breathing, the above symptom must be regarded with some apprehension as one of the concomitants of a rapidly fatal disease, acute laryngitis. Loss of voice, however, frequently occurs quite unconnected with the other symptoms mentioned, and is then not to be so seriously regarded. Many persons are liable to it after exposure to night or foggy air, or after much or loud talking. Persons living in damp houses suffer from this form of aphonia, which is probably owing to the thickening of great susceptibility of the laryngeal membrane. When it continues nothing affords greater relief than antimonial ointment, or croton oil, rubbed over the fore part of the neck so as to produce a free eruption. Mustard plasters may be used, but are not so efficacious. A hot bran poultice to the throat at night, and a teaspoonful of paregoric, taken along with 20 drops of ipecacuana wine, will often remove a threatened attack. Inhaling steam from hot water, or spray from Seigle's spray producer is sometimes of great service. In the more chronic form, 20 drops of tincture of squills may be submitted for the ipecacuana. A sirup made with infuson of horseradish is popularly and sometimes beneficially employed.

The Complexion Wrinkles.

A soft, beautiful complexion is certainly an attraction which every woman should desire, and any simple means which does not occupy time needed for more important matters should be tried to attain such an end. There are many complexions which chafe readily, and tan in the spring winds.

A simple preparation of sweet cream rubbed into the skin after washing it thoroughly is a remedy for this trouble. This should be applied at night, just before retiring, and the next morning the face should be washed thoroughly first in the lukewarm water and afterwards in cold to give tone to the muscles. Some ladies use glycerine in the same way, diluted with half of its bulk in rosewater. This preparation is rubbed in the face and hands, and gloves are worn at night. A little of Scrubb's cloudy household ammonia in the water is a help toward keeping the skin firm and free from wrinkles. There certainly is no remedy for wrinkles after they come. It should be remembered, however, that an amiable temper, a clear conscience and freedom from a disposition to worry over the petty annoyances of life are qualities of mind and heart that will keep the face free from wrinkles, and beautiful to the ripest old age.

Milk Diet in Typhoid.

Da Costa thinks the exclusive milk diet is a source of mischief rather than good, and recommends three parts of milk alternated with one broth. He, however, evidently does not recognize the fact that the latter has scarcely any food value, the little extract of meat it contains acting solely as a stimulant, and, moreover, with a great tendency to cause flatulence. It has on several occasions been pointed out that whenever curd can be seen in the motions, too much milk is being given, and it may indicate that it is not being digested at all. It is best replaced by white of egg beaten up, and largely diluted with water; in this way can be introduced any requisite amount of real food, and in the blandest and most readily digestible form; it leaves no solid residue and can cause neither diarrhœa nor gaseous distention.

GREAT SALES prove the great merit of Hood's Sarsaparilla. Hood's Sarsaparilla sells because it accomplishes GREAT CURES

Angus Macdonald, aged 20, who was in the measles ward of the Winnipeg general hospital when smallpox was first discovered has been taken down with the disease.

Some very nice parlor and hanging lamps are being sold cheap at the cheap crockery store.—W. P. Colwill. dec12 dw 2w

MUNYON'S NERVE CURE

Cures all forms of nervousness, nervous prostration and all the symptoms of nervous exhaustion, such as depressed spirits, peevishness, irritability, general sensitiveness of the whole nervous system, failure of memory, inability to concentrate the thoughts, morbid fears, restless and sleepless nights, pains in the head, noises in the ears and dizziness. It stimulates and strengthens the nerves and acts as a strong tonic. Price 25 cents.

Munyon's Rheumatism Cure seldom fails to relieve in one to three hours, and cures in a few days. Price 25c.

Munyon's Dyspepsia Cure positively cures all forms of indigestion and stomach trouble. Price 25c.

Munyon's Catarrh Remedies positively cure. Price 25c. each.

Munyon's Vitalizer restores lost powers to weak men. Price $1.

A seperate cure for each disease. At all druggists, mostly 25c. a vial.

Personal letters to Prof. Munyon, 11 and 13 Albert Street, Toronto, answered, with free medical advice for any disease.
