THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND,

Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.
(IN ADVANCE)

ONE YEAR	$4.00
SIX MONTHS	2.00
THREE MONTHS	1.00
ONE MONTH	0.35

Sent post paid to any part of Canada or the United States.

ADVERTISING RATES.

For small advertisements which are ordered for only one or two weeks the charge is 50 cents per inch for the first insertion, and 20 cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:

AN INDIAN'S ORATION.

Flying Cloud's Masterly and Thrilling Speech.

Worthy of Ingersoll, Blaine, Gladstone or Bismarck—The Bloody Past and the Peaceful Present—Presented in a Verbal Panorama—Here is a Lesson to Heed.

The Indian is the most poetic race in the world, in their relations with their own; in their habits when not on the warpath; in their customs, songs, dances; in their belief in the happy hunting ground, and in their conceptions of the Great Manitou.

The following is an extract from the speech of Flying Cloud, a famous Kickapoo medicine man:

"Children of the Great Spirit, whose form is in the air, though invisible, I am here to tell you of our wrongs and of our rights!

"Four hundred years ago a Great White Man sailed from Spain to find a New World. That World was the Red Man's. Then all went well with our Forefathers from the upper waters of the Hurons to the Great Warm Gulf that kissed the land of Fruit and Flowers, where the Seminoles hunted and fished.

Catlin says: "The word of an Indian can always be relied upon."

"The Indian welcomed the White Man, and for that welcome our people were driven step by step toward the great Salt Lake, beneath which drops the Great Spirit's Eye every day when twilight comes down upon the earth.

"We are scattered like leaves when autumn winds shake the trees of the forest.

"We, the Kickapoos, whose home was once in Illinois, later in Kansas, and is now in the land of the Sacs and Foxes, are at peace with the White Man. What we have, that we will give to our White Brother.

"Our Kickapoo Indian Sagwa makes men live to be one hundred years old.

"There are Red Men living who have used it ever since they were young men, and who are now so old that they can only sit, lie and sleep in the sun.

"Our Kickapoo Indian Oil is the foe of pain.

"Our Kickapoo Cough Cure stops the hand of death.

"Our Kickapoo Indian Salve heals and cures all wounds, and our Kickapoo Worm Killer preserves the lives of papooses.

"Our 'Sagwa'—*good medicine*—is from the great mother of us all—Nature. All that is best that grows in the woods, that blossoms on the plain, that hides in the earth, our Sagwa contains. It has preserved the lives of our warriors and our women.

"It acts upon the body like sunshine on the trees and flowers, and gives life and strength to all who use it. Men and women who partake of it freely can only die of old age.

"This secret which the Kickapoos alone possess, they give freely to their white brother. It is our richest offering.

"I have spoken. Let the voices of the world bear answer to what I have said!"

Without doubt the Indian has a profound knowledge of the mysterious herbs with which they cure radically many formidable diseases which baffle the greatest physicians of the world.

Those remedies can now be obtained of any druggist or wholesale dealer. The Kickapoo Indian Sagwa is one dollar per bottle. Six for five dollars. The Cough Cure is fifty and all the other remedies twenty-five cents per bottle. In using these remedies you may be absolutely certain that they are purely vegetable, that they contain no acids or mineral poisons, because the Indians know absolutely nothing of these harmful drugs.

The Kickapoo Indian Medicines are genuine Indian made. How they came to be given to the world is fully explained in our large book, which we gladly send free to all applying who care for it sufficiently to write us enclosing three 2c. stamps to pay postage. TERRIBLE RESULTS

Of the Recent Storm Along the Mississippi.

The first definite news from the gulf coast of the Mississippi has reached New Orleans. The financial loss from the storm and flood along the entire coast is not less than $1,000,000. Fully one hundred lives were lost. Out of more than one hundred boats on the Front bay of Biloxi, three rode the storm safely. The beach is strewn with wrecks of all descriptions. On Back bay only one or two weathered the gale. At Chandleur island was located the United States marine hospital quarantine buildings. Here the fullest strength of the storm developed, resulting in the almost complete destruction of all buildings on the island and fearful loss of life. The lighthouse was wrecked to such an extent that the lighthouse keeper has abandoned it. Miles of the island were washed away. What little remains is liable to be completely submerged with little more than an ordinary high tide.

The damage in Scranton and Pascagoula is estimated at $250,000. Pottersville, a summer resort, is wiped out, nearly every house in the vicinity has been demolished, every vessel in the bay is ashore and wrecked. The loss is estimated at $100,000. The damage to the quarantine service alone is nearly $100,000. The latest advices from the section of the state devastated by the storm places the deaths at 1200.

TELEGRAPHIC NEWS.

CINCINNATI, Oct. 8.—Consumption of cigarettes is greatly increasing in the United States. According to the Western Tobacco Journal cigars and tobacco show a decrease. Comparisons for eight months show the remarkable falling off of over 20,000,000 pounds. But cigarettes continue to increase, and the year's output will approach 3,500,000,000.

LONDON, Oct. 8.—The Tablet, the most influential Roman Catholic weekly in Great Britain, said in Friday's edition: "Events now transpiring in Italy render the Pope's position one of extreme and imminent danger. The position of Italy is too insecure and unstable to make her a safe guardian of the venerable person of the Pope, or of the monuments which are the sacred heritage of the Catholic world."

ST. PETERSBURG, Oct. 8.—The Newsky Infantry barracks, at Raslavi, was burned last night. Thirty-four soldiers were killed by jumping from windows, or by being burned to death, and eight were fatally injured. Several are missing.

ST. PETERSBURG, Oct. 8.—The official cholera returns show a steady decrease in the number of cases and deaths. In this city, from Sept. 29 to Oct. 2, there were 129 cases and 73 deaths. In Moscow from Sept. 27 to Sept. 29, there were 15 new cases and 4 deaths. The official returns received yesterday from nine governments show a total of 1,572 new cases and 602 deaths, against 1,969 new cases and 810 deaths during the preceding week. The returns mainly refer to the week ended September 23. The government of Pondolia is not included in the foregoing. In that government, during the fortnight ended Sept. 23, there were 1,306 new cases and 487 deaths, against 1,704 cases and 652 deaths during the preceding two weeks.

LONDON, Oct. 8.—During the twenty-four hours ended yesterday, 49 cases of cholera and 26 deaths are reported in Palermo, and six new cases and two deaths in Leghorn.

HARTFORD, Conn., October 6.—Robert Skinner, a joiner, of South Winsor, was murdered in cold blood about 8 o'clock this morning by John Cronin, a laborer. Cronin, who appears to have borne a grudge against Skinner, went to the latter's house and deliberately shot him. The ball entered the right side and death ensued in half an hour. The murderer was found hanging around the house with the revolver in hand and was placed under arrest. He said he was willing to be hanged so long as he had taken Skinner's life. He was about half drunk, having nerved himself up for the deed with liquor.

CHILDREN WHO TOIL.

More Than 2,000,000 Little Ones Employed in American Factories.

Here, from the Chicago Record, is the substance of a paper read by Mrs. A. P. Stevens, one of the Illinois factory inspectors, before the international convention of factory inspectors in that city on the 21st inst.:

"Factory inspectors know that child labor is one of the factors on which our captains of industry count in their calculation on cost of production; that the employment of children increases, notwithstanding statutory regulations intended to check it; that avenues for this employment are multiplied with every evolvement of genius perfected in an improved machine; and as the magical machine and the child are brought together, so in geometrical ratio is increased the number of unemployed adults. With the effects of its labor upon the child we are sadly familiar. The census of 1880, the last yet available, gave the number of wage-earning children at 1,118,258—one child in every 16 robbed of its birthright of playtime, of physical growth, of mental training. It is probable that at the present time not less than 2,000,000 children under 16 years of age are in workshops and factories.

"The child in workshop and factory is in fourfold danger: Accidental death, multilation, permanent ill health, vitiated morals wait upon its steps, and sometimes the most fortunate child is the one to which the first of these four evils comes, for that is at least a finality. To each of you will occur the instances which support this statement of fourfold danger, and I need not weary you with citations from our Labor Bureau reports, which are now fortunately available for general use, and in which have been collected a remarkably large and useful amount of data on this subject, the more remarkable as employers everywhere cover up and conceal more than they report of accidents, fatal and otherwise.

My own observation extends over a period of thirty years, for, though I have been a factory inspector for less than three months, I have been a wage-earner since I was 13 years old. For many years past I have been also, as a trades unionist and a Knight of Labor, actively interested in investigating this phase of the labor problem.

"There is very little machinery at which children are employed that does not endanger life and limbs. We are often told, as I was in a stamping factory a few days since, that accidents happen because children are careless. This is an aggravation of rather than an excuse for the crime against the child. It is one of the prerogatives of childhood that we rob them of when we make care-taking little old men and women of them among machines. No child under 16 should be allowed among steam-driven or electricity-propelled machinery."

THEIR SEA-GIRT UTOPIA.

Strange Circumstances That Established a South Sea Island Community.

Henry A. Bell is a citizen of the smallest civilized government on earth and hails from the most diminitive capital city in existence. He is from Albert Island, a small speck of land that rises out of the southern seas in the vicinity of the Marquesas group. The traveler who bears this distinction is at the Ahlborn House, preparatory to taking his departure for Nottingham, England, where he was born and whence he departed twenty years ago to follow the fortunes and share the exile of a friend who was accused and found guilty of a crime he never committed.

Bell, who is a strong, swarthy-looking Englishman, about 48 years of age, willingly told of the little island where he makes his home.

"Albert Island," he said, "is only about five miles by three in size, and, although I have lived on it for twenty years, its attractions have just as strong a hold on me as they had at first. It is a typical isle of Oceanica, and of its beauties one never tires. There is a population of just ninety-six souls, and the government is paternal in form and administered by Richard Wright.

"He left England for Australia a broken-hearted man. From a trader he learned of the existence of Albert Island, and resolved to there establish his home. He sent for a few families who were tenants of his mother's estates and with them he repaired to the sea-girt refuge. Every family is provided with a comfortable cottage, and almost everything required for domestic use is produced on the island. The trading vessels supply all that is necessary outside of this, and, besides, they leave behind handsome sums of coin every year in exchange for the surplus products of the place. Of course, every one has an occasional desire to see the outside world, and all are at liberty to go and come as they please. But they rarely take advantage of this liberty, and those who go abroad always hasten back.

We call the little settlement around Mr. Wright's comfortable residence Alberta. Mr. Wright settles all disputes, and we lead a very Arcadian life. Although we are so far away from the center of civilization, we are not lacking in all the good things of this advanced age. Our homes are supplied with pianos, fine furniture, books, and periodicals, and we are living very cozily.

"I am on my way to Scotland, and as soon as my business there has been dispatched, I shall hurry home to the little South Sea island."—San Francisco Examiner.
