ALL DEALERS SELL IT.

One reason why Scott's Emulsion cures weak throats, weak lungs, makes rich blood, and strengthens puny and delicate children is because all its parts are mixed in so scientific a manner that the feeblest digestion can deal with it. This experience has only come by doing *one thing* for nearly 25 years.

This means, purest ingredents, most evenly and delicately mixed, best adapted for those whose strength has failed or whose digestion would repel an uneven product.

HOW TO COOK APPLES

SEVERAL DELICIOUS WAYS OF SERVING THIS SPLENDID FRUIT.

The Apple as Food Endorsed by the Highest Authority as the Most Valuable of Our Native Fruits Toothsome Methods of Conserving Its Values.

The apple is the most valuable of all our native fruits, says the American Agriculturist, being richest in sugar and albumen. The juciest are the most digestible, but the mealiest are the more nutritious. Thoroughly masticated, digestion begins immediately, but some people cannot eat them uncooked as a dessert. The apple contains more phosphorus than any other fruit or vegetable. A Brooklyn physician, translating from a German writer, thus discourses on apples as food and medicine: "The apple is such a common fruit that few persons are familiar with its remarkable efficacious medicinal properties. Everybody ought to know that the very best thing they can do is to eat apples just before going to bed. The apple is excellent brain food because it has more phosphoric acid in an easily digestible shape, than any other fruit known. It excites the action of the liver, promotes sound and healthy sleep, and thoroughly disinfects the mouth. It also agglutinates the surplus acids of the stomach, helps the kidney secretions and prevents calculus growth, while it obviates indigestion and is one of the best preventives of diseases of the throat. Next to lemon and orange it is also the best antidote for the thirst and craving of persons addicted to the alcohol and opium habit."

The French have four hundred different ways of cooking them, but a less number will be acceptable. In making common apple sauce, if you wish the pieces to remain whole, add sugar when you put the apples to cook. Pare, core and cut in quarters apples that do not cut to pieces easily, and stew with cold water and plenty of sugar. Cook about an hour. If you prefer them finely mashed, add sugar after they are cooked.

Boiled apples—Select one dozen apples of uniform size, wash and remove all specks. Cook with enough water to cover. When nearly done, add a teacupful of sugar, and, if you like, a slice of lemon; when done pour the syrup over them. If red apples are used a handsome dish results.

Buttered Apples—Pare and core six tart apples and place them whole in a saucepan with a piece of butter the size of an egg; put a teaspoonful of sugar in each of the holes where the cores were and stick a clove in each apple. Stew very gently, covering the saucepan that they may cook tender by the steam; turn them occasionally and when very tender lay them on a glass dish, containing a half-inch layer of apple marmalade; put a cube of red currant jelly on the top of each, dust with sugar and cinamon and serve cold.

Frosted Apples—Simmer a dozen apples with their skins on in water containing a small piece of alum. Put them in cold water, and when the skins will pull off with the fingers remove them and dip the apples in melted butter; sprinkle thickly with coarse granulated sugar and bake in a slow oven. If carefully done, they will sparkle as if frosted. Pile in a pyramid and pass whipped cream with them.

Apple Snow—Pare and core twelve apples, steam until tender, let cool, put over them a drip made of the whites of three eggs beaten to a stiff froth. Serve with sugar and cream and flavor to taste. Or, one cupful of stewed and sifted sour apples, one cupful of white sugar and white of one egg. Beat the egg until very light; add sugar and beat again; lastly beat in the apples.

Compote—Put one-half pound of sugar and a pint of water in a granite pan, add the thin yellow rind and juice of two lemons; boil until the scum rises, remove it and add six apples, pared, cored and quartered. Simmer until the apples are clear, without breaking them, if possible. It will take about twenty-five minutes.

Baked Apples—Sweet apples require a longer time for baking than sour, and are better for adding a little water in the pan when placed to bake. They require about two hours, and when done are of a lovely brown color.

For an extra dish, pare and core tart apples, place in pan, put butter and sugar in cavity, and sprinkle cinnamon over them. Bake and serve warm with cream or milk.

To Roast a Turkey

To roast a turkey, singe, draw and wash the fowl dry, wipe dry and rub the inside with a little salt. It may be filled with a stuffing made with stale mread crumbs, half a cup of butter, one egg, moistened with a little hot water or an oyster stuffing made as follows may be used: Break into pieces half a loaf of stale bread and mix with salt and pepper and half a cup of melted butter. Drain off the liquor from a pint of oysters, heat it and pour over the bread crumbs; add an egg, and mix all well together; if the stuffing is rather dry, add a little sweet milk. Put a spoonful of stuffing into the turkey, then three or four oysters until the turkey is filled. A chestnut stuffing may be used. To make it boil the chestnuts, remove the shells and brown skins, and mash them. Mix them with a few grated bread crumbs, and moisten with sweet cream; add a little butter, and season with pepper and salt. In filling the turkey do not crowd in the stuffing. Sew up the openings and tie or skewer the legs and wings in shape. Rub thickly with butter and salt and dredge with flour. Place in a dripping pan, and put half a cup of water in the pan. Use a moderate oven, and cover the turkey with another pan for the first forty minutes. Baste frequently and turn the bird occasionally to expose all parts to the heat. It should be tender and moist and a golden brown all over when done. Garnish and dish with small balls of fried sausage or fried oysters and parsley. Serve with a giblet dressing and cranberries.

Soap on the Hair.

Soap used on the hair is apt to make it brittle. If any is to be used, tar soap is the best, and after using rinse the hair in several waters in which a little powdered borax has been dissolved.

WHEN DE CO'N PONE'S HOT.

Dey is times in life when Nature
Seems to slip a cog an' go,
Jes' a rattlin' down creation,
Lak an ocean's overflow;
When de worl' jest stahts a-spinnin'
Lak a pickaninny's top,
An' you' cup o' joy is brimmin'
'Twel it seems about to slop,
An' yo' feel jes' lak a racah
Dat is trainin' fu' to trot—
When yo' mammy ses de blessin'
An' de co'n pone's hot.

When you set down at de table,
Kin' o' weary lak an' sad,
An' you'se jes' a little tiahed,
An' purhaps a little mad;
How yo' gloom tu'ns into gladness,
How yo' joy drives out de doubt
When de oven do' is opened
An' de smell comes po'in out;
Why, de 'lectric light o' Heaven
Seems to settle on de spot,
When yo' mammy ses de blessin'
An' de co'n pone's hot.

When de cabbage pot is steamin'
An' de bacon good an' fat,
When de chittlin's is a sputter'n'
So's to show yo' whah dey's at;
Take away yo' sody biscuit,
Take away yo' cake an' pie,
Fu' de glory time is comin',
An' its 'proach'n' very nigh,
An' yo' want to jump an' hollah,
Do you know you'd bettah not,
When yo' mammy ses de blessin'
An' de co'n pone's hot.

I have heerd o' lots o' sermons,
An' I've heard o' lots o' prayers;
An' I've listened to some singin'
Dat has tuk me up de stairs
Of de Glory Lan' an' set me
Jes' below de Mahster's th'one,
An' have lef' my haht a singin'
In a happy aftah tone.

The British Museum announces the recovery of a lost classic, one of the great icric poets of the earlier period of Greek literature, Bacchylides, nephew of Simonides, the rival of Pindar. The manuscript is of a fine quality and was recently discovered in Egypt. It comprises from fifteen to twenty poems, varying in length from fourteen to forty lines, mostly celebrating victories at the Grecian games. It is handsomly written in large uncial characters, but the papyrus has been torn into many fragments, some of which are lost. The manuscript probably dates from the first century before Christ.

Coal Defined.

A simple characterization of the difference between anthracite and bituminous coal was given recently by Editor Weeks, of Pittsburg, at a hearing before the gas committee of the Massachusetts Legislature. This difference, he remarks, is practically in the amount of violatile substances that can be driven off by the application of heat; thus, anthracite coal contains from 5 to 10 per cent. of volatile matter, the remainder being carbon and ash, while bituminous coal has from 17 to 20 up to as high as 36 per cent, and good Connellsville blast furnace coke shows from half to three-fourths of 1 per cent. these coals being at one time practically the same—that is, the anthracite was at one time a bituminous coal, as the coke was, the volatile matter having been driven out of both, this being in the case of the anthracite, by the pressure of the strata of earth imposed upon it, and by the heats generated by such a great weight of surface above them.—New York Sun.

AS WELL AS EVER.

A Brickmaker Listens to Reason—Uses Six Boxes f Dodd's Kidney Pills and Tells It.

Brockville, Jan. 4 (Special).—Mr. W. H. Odell, perhaps one of the best known citizens of this town, has lately recovered from a long continued and painful kidney ailment. He tells the story of his experience to the correspondent as follows:—

"I have suffered for over a year from kidney disease, the pain in my back being so severe that I was unable to stand to my work."

"Noticing the published cures of what Dodd's Kidney Pills were doing for others I concluded to use them.

"Having used only six boxes, I can say that I am perfectly cured and well, so that I can attend to business as well as ever I could."

The report sent out from Vancouver that Senator McInnis will succeed Mr. Dewdney as Lieutenant-Governor of British Columbia does not receive much credence in Ottawa.

Water as a Food.

It is generally acknowledged by physicians that too little fluid is taken, rather than too much, and the great benefit derived from treatment at mineral springs is often quite as much due to the amount as to the kind of water; that is, so far as the cure is due to water at all, and not to regular habits, exercise in the air, better mental condition, faith in the cure, etc.

Many diseases are directly due to too great concentration of the fluids of the body, and are to be counteracted by the imbibition of larger quantities, for a time at least. To have sufficient water present is the rationale of water cures, especially that form which prescribes the drinking of a cupful of hot or cold water half an hour before meals. This not only washes out the stomach; it furnishes the medium for the active secretions—ptyalin, gastric juice, etc.—in quantity. On the other hand, excess lies in the path of this as well as other things, and what is a rule for one is not a rule for another. However, if one finds that the taking of a pint of water will relieve that sense of oppression and indigestion which sometimes occurs an hour or two after a meal, and that only favorable effects follow, the inference is that too little was taken with the food. There is not much danger of taking too much clear water.

The temperature of the water to be drunk is often a vexed question. This may be left to the individual, for the quantity taken (one-half to one pint) at any one time can have but little influence upon the temperature of the fourteen pints of blood circulating rapidly about the seventy or more pounds of water in the tissues, which are maintained at a temperature of nearly one hundred degrees.

For experiment, two tumblers of ice water have been slowly swallowed and promptly siphoned out, and found to have attained a temperature of 95 degrees in five minutes. It is true that it is possible to swallow ice water so rapidly and in such quantities that the stomach receives a momentary chill, and disturbance sets in, but this is no reason why ice water should be forbidden.—American Kitchen Magazine.

Mrs. Dobell, of London, Ont., Cured for 25 Cents

Doctors Could Help, but Couldn't Cure—Dr. Chase's Catarrh Cure Released the Prisoner, and To day She is as Well as Ever—She Says it is a Great Remedy

"Yes, I am Mrs. Dobell," said a comely, pleasant-faced woman at her home on Horton street to a News reporter to-day, "and I will very gladly tell you what you want to know. About three years ago my husband was very ill, and I had frequently occasion to rise in the night and go for a doctor or to the druggist. In my hurry I often neglected to properly clothe myself, and contracted several heavy colds, which turned at last to chronic catarrh. I tried doctors, who helped me, but did not cure me, and several special catarrh medicines. I was relieved but not cured. I was suffering intolerably when Mr. Shuff recommended me to try CHASE'S CATARRH CURE, and it began at once to help, and in about two months had entirely cured me. I cannot speak too highly of this remarkable medicine, and cheerfully recommend it to all sufferers from catarrh." The blower included is a great help to sufferers.

MANITOBA'S REWARD.

It is stated that Mr. Greenway's present visit to Ottawa while ostensibly on immigration matters, really embraces much more than that, and really includes a rearrangement of the relations between the Province and the Dominion. In other words, as the Montreal Gazette's Ottawa correspondence remarks, Mr. Greenway is demanding his pound of flesh for helping Mr. Laurier to get into power in Ottawa. Amongst the concessions which it is said he will demand is an extension of the western boundary of Manitoba by cutting a goodsized slice off of Eastern Assiniboia and adding it to the Prairie Province, vesting all the Dominion lands in that section in the Crown for the Province of Manitoba. At the same time he will, it is said, ask that all the ungranted Crown lands in Manitoba be vested in the Province, and that the school lands, and the school funds be turned over to the province, in fact that the Dominion should clear out of Manitoba and entirely surrender to the Province all right and title to land in the Province, except such as may be required for Indian reserves, public works and buildings, and such other purposes as lands are held for by the Dominion in other provinces. Should the boundary of Manitoba be extended westward it is considered most probable that Mr. Laurier will create a new province, or perhaps two new provinces out of what is left of Assiniboia after Mr. Greenway has had his slice, and Alberta, which will meet the desires of a large portion of the people of these districts, who think they have grown past the territorial stage and have for some time past had aspirations towards provincial autonomy. This will give Mr. Laurier four or six new senators besides affording him an opportunity of getting two or, perhaps, more supporters in the house, as in the creation of new provinces it is but reasonable that they should be somewhat over-represented at first in the House, as Manitoba was when the province was created.

"My little daughter, three and a half year old, suffered three years with Eczema. Her little body was covered with the itching rash, and doctors did no good. Four boxes of Chase's Ointment entirely cured and saved our child. Her skin is clear and not a sign of rash is to be seen' Andrew Aiton, Hartland, N. FRESH GROUND Coffee

Coffee loses its aroma and strength very quickly after being roasted and ground. In order to give our customert the very best value, we have a Coffee Roaster fitted up on our premises, where we roast green Coffee every two or three weeks, and having also the largest mill in the city in our store, we grind it every day as required for our trade. Try our 40c Mocha and Java Blend;
