TRUCK INFERNO PERILS BLOCK

WINDSOR, Ont., — This fiercely blazing gasoline truck threatened a whole block of stores and homes for more than two hours Thursday. Driver Tom Girard had delivered 400 gallons of gasoline to a customer, had 600 gallons still aboard, when the truck suddenly caught fire. He drove away from buildings to a safer location ignoring the fire at his back. Firemen praised him for his courage and extinguished the blaze. (AP Wirephoto)

DAILY MARKET QUOTATIONS

SUMMARY

By THE CANADIAN PRESS

Toronto — Market higher in moderate trading.

New York — Market higher; advance continues.

Montreal — Market higher in fairly quiet trading.

CURRENCIES

MONTREAL (CP- — The U.S. dollar closed Tuesday at a discount of 2⅝ per cent in terms of Canadian funds, up 1-16. Pound sterling $2.72 13-16, up 5-16.

TORONTO

TORONTO (CP—Western oils led the stock market ahead Tuesda, in moderate post - holiday trading.

Western oils gained more than one-half on index. Golds and base metals were ahead a few decimal points.

Golds and base metals had few big changes on the day. Hollinger added ¼ at 24 among golds while Hudson Bay and Geco scored ¼ gains in base metals. Noranda was down ¾ at 44½.

Pembina, ahead ½ at 9, and Home Oil B, up ¼ at 19½, gave western oils their advance. Pacific Pete cut their loss to ⅛, at 19¼ in closing trading.

New Mylamaque was the leading speculative. It gained 12 cents at 53 on a turnover of 480,394 shares. New Hosco lost 7 cents at $1.40 and Rowan Consolidated was up 2 cents at 20 cents.

Index gains: golds .01 to 83.43; base metals .03 to 163.95; western oils .68 to 137.87.

NEW YORK

NEW YORK (AP—The stock market began its fall season Tuesday with its best gain in a month.

The advance pushed the average once again close to the 1958 peaks that were reached Aug. 11.

Studebaker - Packard was the most active stock, up ¾ at 7½ on 128,100 shares.

Non-ferrous metals and steels were ahead consistently.

Active gainers included U.S. Steel up 1.

The Associated Press 60-stock average rose $1.20 to $185.90 with the industrials up $1.60, rails 80 cents and utilities 40 cents.

Among Canadian issues, Aluminium Ltd. gained ¾, International Nickel ⅝, Hudson Bay Mining ¼ and Walker Gooderham ⅛. McIntyre Porcupine declined 1¼, Canadian Pacific, Dome Mines and Granby Mining ⅛ each.

Molybdenite was up ¼ in the Canadian section of the American exchange. Shawinigan lost ⅜, and Brazilian Traction ⅛.

Nuclear Weapons To Be Discussed At Council

OTTAWA: A recommendation that the time has come to renounce all war as an instrument of national policy is contained in a report of the Committee on the Church and International Affairs, being prepared to present to the 40 Commissioners who will attend the 18th General Council of the United Church of Canada at Ottawa, September 17 to 26

The lengthy report, which covers a dozen weighty topics including nuclear energy, United States Canadian relationships, Commonwealth problems, African opportunities, refugees, the threat of war and what should a Christian's attitude be toward war, technical assistance to "have-not' nations, and world food problems is expected to highlight the 10-day debate of the Churchmen.

Professor Charles E. Hendry, Director of the University of Toronto's School of Social work, heads the United Church's Committee on the Church and Instrumental Affairs. .The Committee was organized in 1938, operates under the church's Board of Evangelism and Social Service, and its membership consists of leading ministerial and la: members with special skills in international affairs. The Committee has in other years urged admission of China to the United Nations, selling wheat to China, friendlier relations with the Russian Orthodox Church, extension of the Colombo Plan and urge the discontinuance of atom and hydrogen bomb tests.

Recent views of the United Churche's Moderator, the Right Rev. Dr. S. Thomson, on the implications of the new powers of nuclear weapons and the function of the Church in relation to peace and war have sparked wide interest in these subjects which are bound to receive serious consideration by the United Church's highest court

P.E.I. Department of Agriculture

PREVENT BLOAT IN CATTLE

A cud chewing animal of about 1,000 lbs normally produces gas in the rumen at the rate of about two quarts a minute. If this gas cannot satisfactorily be despelled, bloat or distended stomach occurs. In a lot of areas losses from this disease have amounted to many dollars.

Many theories are held as to what causes bloat, and methods of prevention and cure are numerous, but the actual cause is still a mystery. However, a great deal of research is being done on it in various parts of the world.

The P. E. I. Veterinary Division says that the standard preventive measure is still to feed a palatable hay before turning cattle on to a legume pasture. This stimulates belching but also reduces the amount of lush pasture that can be consumed. The cattle should be watched for a few hours when put into a new pasture.

Experiments over a period of years showed that bone meal by itself or mixed chop or the use of a commercial mineral mixture was effective. This was fed before cattle were turned out to pasture. In some instances where the bone meal and chop or mineral mixture is maintained in the legume field at all times less difficulty with bloat was encountered. Although these were no control experiments circumstantial evidence would indicate value on bloat problem farms.

If acute bloat should happen to occur, prompt measures must be taken or death may occur quite rapidly. A half cup of kerosene, coal oil or turpentine mixed with milk and given drench is sometimes effective as an emergency treatment until the veterinarian arrives. The placing of a gag in the mouth; a stick, rope or horse bit stimulates belching and helps the animal to eliminate some of the gas. On occassion it is necessary to pierce the rumen with the trocar and canula to quickly let off the gas.

VETERINARY COLLEGES

Colleges of Veterinary Medicine accredited by the American Veterinary Medical Association Council on Education in North America number 19. Included in this total are the two Canadian Colleges, the Ontario Veterinary College located at Guelph which is affiliated with the University of Toronto and in the province of Quebec the Ecole de Medicine Veterinaire which is located at Saint Hyacinthe.

In the United States the seventeen colleges are located in the various parts of the country. There is the School of Veterinary Medicine associated with the Alabama Polytechnic Institute Auburn, Alabama; The School of Veterinary Medicine at the University of California; The College of Veterinary Medicine at Colorado State University; The New York State Veterinary College at Cornel University Ithaca, New York; The School of Veterinary Medicine at the University of Georgia located in Athens, Georgia; The College of Veterinary Medicine associated with the University of Illinois at Urbana; The Division of Veterinary Medicine of Iowa State College at Ames, Iowa; The School of Veterinary Medicine at Kansas State College, Manhatten, Kansas; The College of Veterinary Medicine at Michigan State University at East Lansing, Michigan; The College of Veterinary Medicine, University of Minnesota, St. Paul; The School of Veterinary Medicine at the University of Missouri located in Columbia; The College of Veterinary Medicine at Ohio State University in Columbus; The College of Veterinary Medicine Oklahoma State University located at Stillwater, Oklahoma; The School of Veterinary Medicine University of Pennsylvania, Philadelphia; The School of Veterinary Medicine at the Texas Agricultural and Mechanical College, College Station, Texas; The School of Veterinary Medicine Tuskegee Institute in Alabama and the College of Veterinary Medicine at the State College of Washington located in Pullman, Washington.

In the year 1957, 3,797 students were in roll in all these Veterinary Colleges. This showed an increase of 43 students over the previous year. The Ontario Veterinary College that year had enrolled 209 students, the Quebec College 97.

ONT. VETERINARY COLLEGE

Authorized in 1861 and established in 1862 this was the first of the accredited Veterinary Colleges now operating to be found in America and has been in continuous operation since then. It was started in Toronto by Andrew Smith, F. R. C. V. S., who had first taught all the subjects. In 1908 the College became a Government Institution and under the Minister of Agriculture of the province of Ontario and was affiliated with the University of Toronto. The College was moved to Guelph in 1922.

In 1862, the entrance requirements were the equivalent of admission to high school, or by entrance examination conducted by the college. In 1919 entrance was raised to junior matriculation and in 1940 to partial senior matriculation. In 1945 admission was raised to senior matriculation with better than credit standing in specified subjects.

At first the professional curriculum covered two years. This was increased to three in 1908 and to four years in 1918. In 1949 the course was increased to five years. The first class of three members graduated in 1866. The total number of graduates through to 1957 was 5786.

USE OF FOAM RUBBER

Foam rubber is made by whipping pure latex to a froth and baking it. It consists of a honecomb of interconnecting air cells which are open to the outside air. When pressure is applied or released air is continually being expelled and drawn in and because of this action good ventilation is assured. To get full benefit of this action, ventilation holes in solid bases of wood or metal are necessary.

Since the length of beating time regulates the firmness of the product, mattresses, pillows, etc., are available in different degrees of hardness or softness. Firm orthorpedic foam rubber mattresses can be the answer to many back ailments. Such mattresses have been tested in hospitals for a period of fifteen years and are still like new. They offer no feeling of resistance to weight. By conforming to body contours there is no pull to where the weight is the greatest. Foam rubber pillows are especially recommended for suffers from hay fever, asthma and all dust and feather allergies.

Foam rubber can also be used by amateurs to rejuvenate upholstered furniture. Two types are used. One is a cavity sheet made up to a thickness of 4½" for chair seats and backs; the other, a plain sheet from 1-8 to 1½" has a variety of uses. To obtain a good fit each piece should be cut just a little bigger than the pattern.

IN MEMORIAM

MRS. GEORGE F. RILEY

Mrs. George F. Riley passed peacefully away in the Prince County Hospital, Summerside, on Thursday. July 10th, 1958, leaving sadness and a sense of loss in many hearts, for she had a great love of people and a great talent for friendship.

A devoted Christian and a loyal Presbyterian, she found comfort and admonition in her Bible and seldom missed worship in her church and was an active member of the Womans Missionary, a member of the choir, and actively interested in the welfare of the community.

She was in her 82nd year but young at heart and in appearance.

Mrs. Riley had been in failing health for some time, but the seriousness of her illness became apparent only in the last few hours of her illness. Prior to her admission to the Hospital for x-rays and examination she had been lovingly and tenderly cared for at the home of her daughter, Mrs. Harold Moase. New Annan, for several weeks.

She was born Matilda MacLeod, of Grahams Road, on August 3, 1876, a daughter of Donald MacLeod and Annie MacKinnon, and was the last of her family.

From the time of her marriage in 1904 until February 1956, she had lived at Clinton where the Riley home was well known for its hospitality, and where many happy gatherings were held down through the years. Sorrow was known in that home too, for in 1953 the husband and father Mrs. George Riley passed away, and in 1955 the only son Willard was also taken from the earthly scene with little warning.

The homestead was then sold and the mother made her home in Kensington with Mrs. Willard Riley, who was devoted in caring for the comfort of her mother-in-law.

Also left to mourn the loss are her only daughter Mrs. Harold Moase, one granddaughter Thelma Moase, and two grandsons, George Moase, New Annan, and Frank Riley in the Dominican Republic, as well as a great granddaughter Patricia Jean Riley whom she had never seen.

The funeral was held on Saturday afternoon, from New London Presbyterian Church, following a short service conducted by Rev. E. H. Bean at the home of her daughter. "Forever With The Lord" was sung.

The Rev. Leslie D. Bartlett conducted the service at the church and preached from the text found in Psalm 116, verse 15 "Precious in the sight of the Lord is the death of His Saints". Scripture was read by Rev. H.M. Buntain of Pictou, N.S., a former pastor, and prayer by Rev. E. H. Bean of Kensington. Hymns led by the choir were: "The Lord's My Shepherd" and "Asleep In Jesus". Mr. Roscoe Walker, Kensington feelingly rendered the solo "Saved By Grace".

The pall bearers were: Messrs. Harry Marks, George MacKay, Roy Paynter, Elmer Cotton, Donald MacEwen and Ellis Profitt. Interment was in New London Cemetery.

The floral tributes were:

PILLOW

The family.

WREATHS

Grandchildren.
