Charlottetown, Aug. 6, 1895—3m

Physicians

prescribe Scott's Emulsion of Cod-liver Oil and Hypophosphites because they find their patients can tolerate it for a long time, as it does not upset the stomach nor derange the digestion like the plain oil.

Scott's Emulsion is as much easier to digest than the plain oil as milk is easier to digest than butter. Besides, the fishy fat taste is taken out of the oil, and it is almost palatable. The way sickly children, emaciated, anæmic and consumptive adults, gain flesh on Scott's Emulsion is very remarkable.

Don't be persuaded to accept a substitute!

Scott & Bowne, Belleville. 50c. and $1.

SWEATERS FOR GIRLS.

Athletic Girls Fond of Masculine Garments Have Adopted Them.

The return of the jersey seems imminent, and the sweater seems an evolution of that useful and elastic garment. The trouble about the sweater is its thickness (and it would seem impossible to adopt it except in rather cool weather. Men wear these convenient garments at all seasons and athletes declare that heavy woollen is necessary to prevent chilling. Women, as a rule, are not fond of thick and warm garments. However, many of the swell sportswomen who are devoted to athletic amusements, such as yachting, cycling, rowing, golf and tennis, have adopted the English sweater with effusion. A woman with a fine form shows up extremely well in a sweater, which clings to her figure without a wrinkle.

Garnet, red, navy and royal blue, black and cream are the favorite colors. They are of several different weaves, some fancy and others plain and ribbed. They are put on over the head and fasten with small bullet buttons on the shoulder. Others are laced with silken cord on one side. The most perfect-fitting ones are ribbed like the top of a man's hose for about the depth of five inches at the waist line; this adjusts them closely to the figure. The sleeves at the wrist are treated in the same manner. The well topped sleeves which subscribe to the fashionable craze is stylish, but not sensible. For bicycling a large sleeve is not desirable, as it adds weight to the costume, catches the wind and retards the speed of the rider.

Although the sweater has its drawbacks, there are many arguments in its favor, and for boating, cycling, fishing, etc., it is eminently well adapted. The sweater has an air of jaunty independence and is natty, becoming and comfortable. The athletic girls who are fond of wearing quasi-masculine costumes have adopted the sweater with effusion. English women are devoted to the sweater. It is safe to predict that the wearing of the jersey will follow, than which no more delightful garment was ever invented.

METEOROLOGY.

Suggested Improvements in Weather Forecasting.

Now, in meteorology the weather may have played and is still playing, an important part, but as a means of adding to our knowledge and forming a true study of atmospheric changes its usefulness is almost exhausted. Further advance is necessary if we are to successfully forecast local storms, fogs, rain, snow, hail, moderate temperature changes and the like ,but this advance is probable only by the efforts of competent scientific students, chiefly physicians and mathematicians. There must be the opportunity for some Galileo, Kepler, Copernicus and Newton if we are to lift the art of weather forecasting from its present ptolemaic stage into the stage of true theory as they lifted astronomy. The opportunities needed can probably be furnished only by Government, because the present establishment is a Governmental one and its services will be needed in the work, and also because meteorology is a general terrestrial science, and, like geology, is too great for private resources. The time involved in such investigations as are needed is entirely uncertain. Some of the improvements, the forecast of fog, for instance, would come very easily. A single year of systematic investigation by a competent person with proper assistance and an expenditure of perhaps $5,000 would probably accomplish it. Others, as the true and complete theory of local storms, might not be completed for a century. I have estimated that three competent physicists, left to pursue their investigations for ten years without disquiet and given proper encouragement and assistance, would probably be able to so improve our art of weather forecasting as to satisfy all ordinary requirements. The cost would perhaps be $10,000 per year, but the resulting benefit would be a thousand or ten thousand times that annually. The prospective benefits are so enormous that even greater risks would be justifiable.—Review of Reviews.

Southern New Mexico.

In a paper read by Dr. Swope before the Kentucky Medical Society recently, he summarizes the accepted points in the treatment of this disease, namely, a dry climate, having a maximum number of fair days and minimum humidity, with slight range of temperature, a moderate degree of high altitude, and ample facilities for outdoor life. Among the data made by Dr. Swope in this connection is that of permanent, or even long-continued residence. Florida is unsuited for such patients, the low altitude ,the humidity and the heat of the summer rendering this region almost untenable during the summer months; nor does North Carolina, with her pineries, fully meet the requirements, for her most noted resort, Asheville, has an altitude of only 2,250 feet, while her temperature ranges from 100 degrees to 6 below zero.

Both research and experience have led to the conclusion that Southern New Mexico comes nearer to fulfilling what is required for the advantageous treatment of pulmonary complaints and especially to be mentioned is the high plateau southeast of Silver City, partly across which runs the little mountain stream Mimbres, until it loses itself in the dry, sandy plains. This plateau, about 4,500 to 5,000 feet in altitude, about 50 miles long and 40 wide, is sheltered on every side by high mountain ranges and peaks, and has constant winds from the northwest and west, its maximum temperature is 90 degrees, and here an invalid may be out of doors 330 days in the year.—Philadelphia Record.

Mortuary Statistics Out West.

Tenderfoot—You thave a salubrious climate here, I believe?

Woollywest—Tol'ble, for some folks.

Tenderfoot—What are the most frequent causes of death according to statistics?

Woollywest—W'al, six-shooters, I reckon. Little knifin' and some Winchesters, but they ain't nothin' after all that gits around the six-shooter in a pinch.—Chicago Record.

THE FETTERS ARE BROKEN.

The Strong Chains of Disease Dashed to Pieces.

The Sunshine of True Life after Years of Darkness and Misery.

Paine's Celery Compound the Bright Star of Hope for All Sufferers.

A Campbellford Lady and Her Rheumatism.

The strongest fetters and chains of disease are surely broken when Paine's Celery Compound is called to our aid. Wonderful life-saving work has been done in the past, and to day thousands are using the marvellous compound with the greatest success. Men, women and young people, pronounced incurable by physicians, are gaining new life, strength and vigor through the use of Dr. Phelps' great prescription, Paine's Celery Compound. That hideous and life-destroying disease, rheumatism, can now be easily overcome and banished. Proof of this assertion comes in every day. Men and women who suffered for long years are made well and strong by Paine's Celery Compound, the only medicine known to physicians that can successfully cope with rheumatism and sciatica.

The case of Mrs. Mary McKillop, of Campbellford, Ont., strongly demonstrates the value of earth's best medicine. She says:—

"I was a sufferer from rheumatism for a long time, and endured great pain. The cords in the palms of my hands were drawn up in knots, and I despaired of getting relief. However, after using Paine's Celery Compound, I have banished all my pains and troubles, and find myself strengthened in every way. I think Paine's Celery Compound is the best medicine in the world for rheumatism and all nervous complaints, and I will always recommend it strongly. I particularly recommend your medicine to all weak and delicate women."

THE MANITOBA HARVEST.

The Farmers of the Northwest Will Have Plenty of Money to Spend.

WINNIPEG, (Special) Oct. 7.—The prospects of a good year for the Manitoba farmers are now assured, thanks to the abundant harvest. One of the causes for the sickness prevalent last year will now be obviated, as the farmers will have more money to spare for the purchase of the necessities of health. One of the straws which shows which way the wind is blowing is the fact that druggists are ordering the well-known remedy, Dodd's Kidney Pills, in unusually large quantities. The inhabitants of the province are well aware of the value of the medicine, and only the financial stringency has prevented its universal use.

Lord Sackville (formerly Sir Lionel Sackville-West), ambassador to Washington, who was recalled seven years ago for interference in United States politics, is circulating privately a phamplet on his mission to that country. It is said to be full of interesting facts relating to the framing of the fishery treaty and Behring Sea negotiations.

Cause Adds Her Testimony?

MR. C. S. WHITMAN of Canso, says:—"I have used PRUSSIAN OIL for cramps of a very severe kind; also for headache and toothache. It is the best medicine I have ever had in the house."

And MR. SAMUEL FANNING, same place, declares:—"I have used PRUSSIAN OIL for a lame back, for colds and pain in the breast, and it cured every time. It is a real good medicine."

MR. C. H. NICKERSON, who sells a lot of it there, says:—"It is gaining friends and a good name every day. It is a capital medicine,—there's no mistake about it."

"USE IT AND PROVE IT."

MADRID, October 9.—Steamers at Cadiz are being made ready for the transportation of reinforcements for the Spanish army in Cuba All the fresh troops will be despatched by November 15. It is expected a powerful squadron will be sent to reinforce the fleet in Cuban waters. Popular opinion is beginning to fear a change in the relations between Spain and the United States in consequence of the agitation in the latter country in favor of the Cuban insurgents.

DANGEROUS CONSOLATION.

All Right in a Day or Two, But the Day Never Came.

"All right in a day or two" is the thought that consoles every one who is suffering from any indisposition that does not prostrate him. In the case of a person bedridden for months with disease of the Kidneys being asked, "Did you not have any warning of this condition you are now in?" "Yes, I was bothered at first with backache, with occasional headaches, but did not consider myself sick or the necessity of medicine further than a plaster on my back or rubbing with my favorite liniment. It was months before I began to realize that it was useless to further force myself to ignore my condition. The backache had become a pain in the back and sides, weak and tired feeling, high-colored urine with obstructions and stoppage, pain in the bladder, palpitation of the heart, poor appetite, indigestion, and a dull, languid feeling, with entire lack of energy." Had the first signal of distress from the Kidneys—*Back-ache*—received the assistance of Chase's Kidney-Liver Pills, the after state of misery and suffering would have been avoided. A few doses dispel first symptoms; delay results in liver, heart and stomach becoming affected. It is useless to expect to overcome this complication without a persistent and regular use of Chase's K. and L. Pills. Price 25c., sold by all dealers. Edmanson, Bates & Co. Toronto.
