For **The Children**

**A Nice New Idea.**

Sixty little gardens are being made for the kindergarten children of the St. Bartholomew parish house. Furthermore, they are to be roof gardens. Not the aerial summer-night haunts which are generally understood by that term, but really truly gardens, where seeds can be planted and vegetables can be grown. The plots will not be large, the whole sixty being included within the boundaries of the parish house roof; but the children are almost as excited as if they were about to duplicate the hanging gardens of Babylon. Most of them have never seen a vegetable growing, and are quite of the opinion that before long they will be able to sit under the shade of an arbor of turnip-vines, and perhaps—delicious hope!—climb their own radish and lettuce trees. The backward spring, and other causes, will unquestionably disappoint these dreams, but other joys will come in their stead, and the sixty little gardeners will soon be envied above all their fellows. The plan is a decidedly happy thought on the part of the St. Bartholomew people. Harper's Bazar.

**What Robin Said.**

A little robin came too soon  
From summer land away :  
He must have thought that it was June  
When 'twas not even May.  
"Oh robin press your scarlet vest  
Move closely to your throat,  
Of the songs you love the best  
You cannot sing a note.  
"There is no other bird about,  
And, in their coats of fir,  
The pussy-willows are not out—  
They dare not even purr,  
And you will freeze !, But, as I spoke,  
He hopped upon a tree,  
As if the cold were but a joke,  
And sang this song to me :—

"O Apple-tree! the while 'tis snowing,  
How your pinky buds are glowing—  
Growing—blowing—glowing  
On everything I see!  
And somewhere in your branches hiding,  
One small nest in safe abiding,  
Waiting—waiting—waiting,  
My little love and me.

"O Brook! because the ice is near you,  
Do you think I cannot hear you,  
Singing—singing—singing  
Of daisies and the spring?  
O Meadow white! with snowdrifts over,  
Don't you know I smell the clover  
Coming—coming—coming  
While loud the bluebells ring?

"O frozen Flakes! that cling together,  
You are every one a feather  
Falling—falling—falling  
To line the world's great nest.  
O Night and darkness! downward pressing,  
You are wings spread out caressing,  
Brooding—brooding—brooding,  
All tired things to rest."

And then my robin spread his wings  
And flew across the snow;  
But somewhere, dear, he always sings  
This little song, I know.  
—Harriet F. Blodgett, in April St. Nicholas.

**The Children of Puerto Rico.**

Children are an ever-present and abundant factor in the domestic economy of the peasant's life. It is called domestic economy, since it costs nothing to supply the air of day for the lungs of these little waifs; it costs nothing for their clothes, for they run about in the sunshine and the rain just as God made them, and sleep in odd corners without cover for the first half-dozen years of their baby lives, and when older a single discarded tattered garment adds to their natural grace the shield of decency. So they live, without expense, and with little tenderness bestowed on them in the shape of material comforts, though the mother's

kiss is often given and the father pats the little head. They soon toddle, at the command of the mother, to do small errands, to help weed the garden to bring in the handful of wood for the fire, to dig the tubers for a meagre meal, and, lastly, to hold up their tiny hands and with pleading eyes gain a copper from the passer-by on the roadside. They are a good investment to the family; the majority of them die at an early age, and it costs but a few strained hours to the mother's heart, a bit of cloth for a shroud, and the energy needed to carry the tiny form to the potter's field. Offsetting this is the usefulness of those who, by the laws of survival of the fittest, pull through with sturdy forms, to pick berries, work in the cane and tobacco fields, and add to the common fund until, at a varying age, they rebel against the paternal banker, and live for themselves in poverty and in bondage to the landed kings, just as the generations who came before them.—Harper's Weekly.

**GOOD HEALTH FOR WOMEN**

**Dr. A. W. Chase's Nerve Food Restores Weak, Sickly Women to Robust Health.**

Any irregularities in the monthly uterine action is sufficient cause for women to be alarmed about their health. Whether painful, suppressed or profuse menstruation, the cause can be traced to some derangement of the nerves.

A few boxes of Dr. A. W. Chase's Nerve Food will completely build up the exhausted nerves and restore the regular monthly action which removes from the body the clogged matter that would otherwise cause pain and serious disease.

It is as a restorative for pale, weak women that Dr. A. W. Chase's Nerve Food has been singularly successful. It counteracts the debilitating diseases peculiar to women by feeding the nerves and creating new nerve fluid, the vital force of the human body.

Dr. A. W. Chase's Nerve Food has restored scores of hundreds of weak, sickly women to robust health. See a box at all dealers, or Edmondson, Bates & Co., Toronto.

Dr. Chase's new illustrated book "The Ills of Life and How to Cure Them," sent free to your address.

Call on us at the Masonic Temple Building. You will receive courteous treatment whether we sell you or not.  
**T. A. MacLEAN,**  
MANUFACTURERS AGENT.  
**Fertilizer Facts!**  
The value of all Fertilizers consist in the amount of soluble Phos. Acid, Nitrogen, and Potash they contain, and the brand which shows the greatest value in these is the one to buy, on the same principle that milk testing 4 per cent. butter fat is more valuable than 3 per cent. milk ENGLISH MANURES costing the same price, contain 20 per cent. to 25 per cent. more Phos. Acid, Nitrogen and Potash than any other complete Fertilizer on the market.  
Or in other words the Plant Food contained in a ton of other Fertilizer costing, say \$35, can be purchased from us for about \$28. All fertilizers are sold under a guaranteed analysis enabling any who may, to verify the above, and the superior quality of these Manures is being shown by actual test year after year by the really wonderful results produced wherever used.
