WRECKS.—During the latter part of the last, and the beginning of the present week, we had fearful stormy weather, and reports of wrecks are the topics of conversation in every quarter. Two new vessels belonging to Messrs Longworth and Yates, were blown away from the North side of the Island, and ran for the Gut of Canso. They afterwards succeeded in working their way up to the Bay opposite this Harbour, when one of them, the "SARDINIAN," came to anchor in Orwell Bay, on Friday, the 7th inst.; and in the gale which blew that night, she parted both chains, and drove on Prim Island, and is now a total wreck. The other got on the reef off St. Peter's Island, but we are pleased to learn she has since been got off, and is now in this Port.

His Excellency the Lieut. Governor in Council has been pleased to make the following appointments, viz:—

Mr. Charles Stewart Macnutt to be a Commissioner for the recovery of Small Debts for Princetown Royalty, in the place of George Sinclair, Esq., resigned, who is about leaving the Island.

Mr. Neil Mackay to be Postmaster at Princetown Royalty, in the place of Mr. John Campbell, resigned, who is about leaving the District.

Mr. Robert Ellis to be a Gauger for the Port of Bedeque.

His Excellency the Lieut. Governor has been pleased to to appoint, provisionally, George Bagnall and John Wright, Esqrs., to be Members of the Legislative Council.

CHEAP AND SAFE LIGHT!

NEWELL'S PATENT.

Safety Lamp & Lamp Feeder

Warranted to prevent all accidents from the use of BURNING FLUID, PATENT OIL, ROSIN OIL, CAMPHENE,

And all other explosive compounds used for production of light.

This INVENTION is applied to common Fluid, Solar and Camphene Lamps, Lamp Feeders, Fluid-holders, Lanterns, &c., &c.

We respectfully invite the attention of the public to NEWELL'S *IMPROVED SOLAR FLUID LAMP!* which gives a steady, brilliant flame, nearest to Gas that has ever been produced. The Burner of burning being ONE CENT AN HOUR! These Lamps are particularly adapted for Churches, Hotels, Factories, Stores and parlours. Oil Solars can be altered, using the same shade Common Fluid Lamps can be changed to Safety Fluid Lamps.

PORTER'S

Patent Burning Fluid and Camphene,

As cheap and good as can be bought in the market *Also, Shades, Globes, Lamp Wicking, Entry Hall Lanterns, Fluid Chandeliers, &c.,*

For Sale, Wholesale & Retail, by

Newell, Willard & Co.,
No. 28 Bromfield Street, Boston.

N. B.—A *large deduction will be made* from the former prices of NEWELL'S SAFETY LAMPS, &c.

☞ The following certificates are a sufficient guarantee of the entire safety and efficiency of the Safety Lamp and Feeder.

We have had an opportunity to test the Patent Safety Lamp and Lamp Feeder of Mr. John Newell, of this city, in regard to the measure of protection their construction affords. In the trials to which we subjected them, we endeavored, without effect, to produce explosions of the vapor of the fluid mixed with air, and to burst them by the pressure of the vapor alone. The principle adopted by Mr. Newell is that of the well known Davy Lamp. He has so combined the parts, that we are satisfied that all risk of explosive action is removed.

CHARLES T. JACKSON, M. D.,
AUG. A. HAYES, M. D.,
Assayers to the State of Massachusetts.

BOSTON, Aug 20, 1852.

Mr. John Newell, of Boston, has exhibited to me a Lamp, and also containing vessels, furnished with wire gauze protectors, upon the principle of Davy's Safety Lamp for miners He has used both these instruments before me with inflammable fluids, and in both, when set on fire, the flame was arrested by the wire gauze, which is coated with silver. If the instruments are faithfully constructed, and carefully attended to, so that the wire gauze does not suffer injury from corrosion, wear or violence, I am of opinion that the protection will prove effectual against explosion. Nothing short of this conviction would induce me to countenance the continued use of the burning fluids, so called, as I have thought they ought to be entirely discarded, if not prohibited from use; so frequent and dreadful are the accidents occasioned by ignorance and carelessness. In every case, glass lamps should be given up; and those of metal substituted, on account of the danger of fracture.

B. SILLMAN, senior.

NEW HAVEN, Oct. 16, 1853.

I have examined Newell's Patent Safety Lamp and Lamp Feeder. They are constructed upon strictly philosophical principles, having a *tube of silvered wire gauze, with a small perforation in the cap.* If well made, they cannot fail to insure protection against those dangerous explosions to which the vapors of burning fluids and camphene are subject, when mixed with air. Their general introduction, I have no doubt, would prevent many distressing and fatal accidents

E. S. CARR, M. D.,
Professor of Chemistry, Albany Medical College, and of Applied Chemistry in the University of Albany.

☞ BEER & SON, T. DESBRISAY & Co., and W. D. DAWSON are our authorized Agents for the sale of the above in P. E. Island.

BEER & SON.

Charlottetown, Dec. 5, 1855. 1sl. Adv. 1m.

THE BRIDE OF CHERSON.—A CRIMEAN HEROINE.—The following little story deserves a more general circulation than it is likely to have obtained in the ponderous volumes of ancient history.—On the site of the modern Sebastopol formerly stood the republican city of Cherson, famous for its freedom, its commerce, and its wealth. In the days of the Roman Empire, the young Gycia, daughter of the President of Cherson, was married to Prince Asander, son of the neighbouring King of Bosperos. To guard the liberties of the republic against treachery, it was stipulated that the Prince should reside constantly at Cherson, and have no intercourse with Bosperos. About two years after the marrige, the President being dead and his wealth having descended to his daughter and to her husband, it happened, that a favourite waitingmaid of Gycia had committed some offence, for which she was condemned to pass a certain time in solitude in a room over some granaries attached to the palace. While pursuing her employment of spinning in this room, a portion of the apparatus fell on the floor, and got entangled in a corner, so that it could not be extricated without removing a tile of the pavement. The removal of the tile enabled her to see into the granary below, and there she saw that, instead of bales and sacks, a number of Bosperian soldiers were secreted. She immediately sent to Gycia, who hastened to her, expecting to be greeted with penitent supplications for pardon. Instead of this, the young heroine's attention was directed to the formidable contents of the chamber below. Gycia immediately communicated with some of the chiefs of Cherson, and it was ascertained, that her treacherous husband had surreptitiously brought over these foreign soldiers disguised in trading vessels, and that they were kept in concealment until a sufficient force was collected, when they were to be employed in overpower-ing Cherson, destroying its liberties, and annexing it to the kingdom of Bosperos.

Her decision was immediately made. The unsuspecting traitor Asander, with his Chersonese associates, having retired to bed early one evening after a carousal, the palace was set on fire, and Asander, and his companions, his soldiers, and the whole palace, consumed to ashes (See Finlay's" History of the Byzantine Empire," p. 419). Joan of Arc, the Maid of Saragossa, and various other heroines have had their praises loudly sung ; Will no one pay a deserved tribute to the memory of GYCIA THE BRIDE OF CHERSON?

COMPLIMENTS may be offered in all sincerity, and yet have a very equivocal sound, as in the case of the city knight unable to aspirate the letter H, who being deputed to address William III. exclaimed, "Future ages recording your Majesty's exploits will pronounce you to have been a *Nero.*" Not less honest and ambiguous was the negro's compliment to the emancipator—" Gorramighty bless Massa Wilberforce ! He hab a white face, but he hab a black heart."

THE EDITRESS OF THE NEW YORK LADIES' *Repository* talking about kissing, says:—" Kisses, like faces of philosophers, vary. Some are as hot as coal fire, some sweet as honey, some mild as milk, some tasteless as long-drawn soda. Stolen kisses are said to have more nutmeg and cream than other sorts. As to proposed kisses, they are not liked at all. A stolen kiss is the most agreeable. We have been kissed a few times, and as we are not very old, we hope to receive many more."

A PRIVATE of the Galloway rifles was recently standing sentry, when an officer, noticing that he had a black eye, accosted him, and charged him with having been fighting. " Please, sir, "it was for that you engaged me."
