

SECOND MOVE FOR CHURCH HALL IN 65 YEARS

Alberton United Church hall has been removed from the main church building to make way for a new hall. The old hall, built during the ministry of the late Rev. J.K. Fraser, has served as a meeting place for the Sunday School and various church organizations for some 65 years. This is the second time the hall has been detached from the church. When the church was moved on its present location some 25 years ago the sanctuary and the hall were hauled from the old site as separate units.

This time it will not again be connected to the church. It has been sold to Herbert Matthews. Erection of a new and larger hall will be commenced in the near future with William Gordon, superintendent building operations.

Supersonic Need Is Told By Airlines

MONTREAL (CP) — The world's airlines gave airplane makers a few quiet suggestions recently about what kind of supersonic transport they would like to have made.

Mainly, said the International Air Transport Association in a statement, a plane travelling at more than the speed of sound has to be safe, reliable, quiet and a money-maker. It should be comfortable.

IATA's statement summarizes conclusions reached after a symposium here a year ago during which airlines, airplane and engine manufacturers, government airport officials and engineers discussed the problems and possibilities of regular airline flights at speeds of 1,000 miles an hour and up. The speed of sound is approximately 700 miles an hour at sea level.

Census Reveals 7,938 Islanders Are Bilingual

OTTAWA (CP)—Canada may be regarded as a bilingual country but only 12.2 per cent of the population speak both English and French, the 1961 census revealed.

The proportion speaking only English was 67.6 per cent and only French was 18.1 per cent. Another 13 per cent spoke neither English nor French.

The figures were within one per cent of what they were in 1956.

English was the mother tongue for 50.4 per cent of the population; French for 29.1 per cent and all other mother tongues accounted for 13.5 per cent.

The Dominion Bureau of Statistics said today a more detailed classification of the other mother tongues would be issued later. The language a person first learned to speak is still understood as defined as a person's mother tongue. They may not be the same.

There were 1,254,850 of the province's 5,259,211 people speaking both French and English and 688,635 spoke only English. All provinces but Quebec were predominantly English-speaking.

Of Ontario's 6,236,092 people, 854,948 spoke English and 95,236 spoke only French and 463,720 spoke both French and English.

A study comparing industry by industry wages, earnings and hours worked in the Atlantic provinces and Ontario.

A report by the Atlantic Provinces Economic Council says that despite the country's current austerity program it hopes that continued attention will be given the basic goal of achieving a higher rate of growth in the national economy.

"As a consequence, the framework for channelling aid to the Atlantic provinces should be created and studies got underway as soon as possible. There should be general agreement that such action could be taken immediately."

Broken Boom Halts Gretel

NEWPORT, R.I. (AP) — A broken boom Tuesday forced an interruption in the first local sailing session of the Gretel, Australian challenger for the America's Cup.

The wind velocity was about 15 knots when the aluminum boom snapped at a welded joint while the white hullied sloop was about two miles off Point Judith. No one was injured.

The Gretel was towed to Newport Harbor and then sailed out again after the broken boom was replaced with one of two spars.

RACER READIES FOR NEW TRY

BONNEVILLE SALT FLATS, Utah, (AP)—Mickey Thompson, who has driven a car 496 miles per hour but can't claim the mark as a record, warmed up for a new try at the world land speed mark Monday.

He devoted Tuesday afternoon to changing the salt flat surface here to see if it is smooth enough for a try at breaking the 400 mile per hour barrier for the measured mile.

His 3,200 horsepower Blue Bird is now at 575 m.p.h. in a trial Monday.

It is the car, which he went 405.6 m.p.h. two years ago. He failed to set a record then because the car broke down on one in each direction, to count as records.

The measured mile marks must be made in two runs, one in each direction, to count as records.

The big mark Thompson is after this time will be his last attempt—394.2 miles per hour set by John Cobb of England in 1947.
