

THE CENTRAL GUARDIAN

For the want of a nail the shoe was lost. For the want of a shoe the horse was lost. For the want of paint the shingles were lost. For the want of shingles the roof was lost. For the want of a roof the house was lost. Which all goes to show that an application of paint before the weather and decay get in their destructive work will save many a big bill for repairs.

Use Crown Diamond Liquid Paint early and often.

Sage and Sulphur Darkens Gray Hair

It's Grandmother's Recipe to Restore Color, Gloss and Attractiveness

Almost every one knows the Sage Tea and Sulphur, proper compounded brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago, the only way to get his mixture was to make it at home, which is messy and troublesome. Nowadays, by asking at a drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, at a small cost.

Don't stay gray! Try it! No one can possibly tell that you darken your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears and after another application a two year hair becomes beautiful, dark, glossy and attractive.

Alexander Mackenzie's First View of the Pacific

Trees that were a hundred years old when Alexander Mackenzie first beheld the Pacific Ocean in 1793 are being felled to-day to build homes in British Columbia and the prairies, to shingle and trim homes in Eastern Canada.

Giant fir and spruce, stately cedars and hemlocks that take centuries to grow, are daily being fed to the saw to make lumber for building purposes.

And owners are feeding seventy-five per cent of their buildings to the destroying influences of sun, wind, rain and frost when a film of paint would preserve them for three or four times the service they give without paint.

Why not stop this waste and the drain on your pocket book—with paint and varnish?

"Save the surface and you save all" - Paint & Varnish

TO-DAY it costs less to paint than it did. The cost of materials has led in the downward economic trend of manufactured products. But no matter what it costs, the fact remains that it always costs more not to paint than to paint. Rust and rot go on till you check them. The logical time to paint and varnish is NOW.
