

Oil Saver

The little gadget Hazen Argue, CCF Commons member for Assiniboia, is holding is expected to be a big boon to motorists. In tests, the device, which contains a sodium or calcium capsule and is at-

RUHAMAH SCHEINFELD FRANK

WE AND OUR NEIGHBORS

IF WE STOP TO RECALL

Some time ago I was present at a "gripe" session of eleven year-olds who expressed their complaints against their parents. The final speaker summed up in this way: "Parents act sometimes like they were never our age." Is the e perhaps some truth in this accusation? Do we sometimes take Betty or Tommy to task from a cold mounting peak of perfection—or a seething volcano of righteous indignation? Have we really forgotten the silliness, the mixed up feelings, the stupidities of our own young days, or are we pretending we were much more mature than we could possibly have been at their age, in order to impress our lessons more forcibly? We couldn't have forgotten. There are actually on record case histories of people who claim remembrance of incidents dating from their first six months of life! Not too few are those who say they can remember their first birthday. Many of us believe we can vividly recall things that happened when we were five years old, and the years after age six or seven are generally remembered by everyone. There can, however, be blanks in our memories at any age. Psychologists say that extremely unpleasant or frightening incidents may be forced down (repressed) and buried deep in our subconscious selves emerging in disguised and harmful forms: fear of enclosed places may spring from a seemingly forgotten incident of being shut into a closet as a child. But mostly with more or less effort we can explore our past and have at least a fair idea of the feelings of our young people. And if we can see our own past selves in the small culprits (or older ones) before us, we should know that the faultless parent act is seldom effective. The eleven year old youngster quoted above knew he and his age group were full of mistakes—but, he was quite

Good Prospects For Paper Mill At Sheet Harbor

HALIFAX (CP)—Premier Hicks told representatives of the Eastern Shore Development Association Monday that prospects for a pulp and paper mill at Sheet Harbor, N.S., have never looked better. Premier Hicks said the government has received an engineering report on sources of electrical power in the area which will be studied by the cabinet and passed on to the Hearst Paper Company. A statement released by the association said the premier's announcement was taken as an indication that the government is in a position to offer the Hearst company an estimate on power rates. It was reported earlier that an estimate of available lumber had been presented to the American firm. An ESDA delegation, headed by Rev. G. S. Tanton, presented Mr. Hicks and his cabinet with a petition signed by 2,500 people who favored Sheet Harbor as the site of the proposed mill.

NO JOBS, FLUB EXAMS KYOTO, Japan (AP)—Some 146 members of the graduating class of Kyoto University law school flunked their final exam on purpose last week. A faculty spokesman said they decided on another year at school because they couldn't find post-graduation jobs. "They can take another year in college cheaper than living in the outside world," he said.

AGRICULTURAL NEWS

P. E. I. Department of Agriculture

STRAWBERRY YIELDS INCREASED WITH VIRUS-FREE PLANTS

Yield data from virus-free and non-virus strawberry plants set out in 1953 and 1954 at the Charlottetown Experimental Station emphasize the superiority of the virus-free stock. The ordinary commercial stocks of our common varieties are generally infected with one or more viruses which produce no easily recognized symptoms under field conditions. However, when virus-free plants are grown side by side with non-virus free commercial plants, differences in vigor, runner production, yield and quality of fruit, are very apparent.

NEW VARIETY

After two years of field trials and processing trials, the variety Sparkle is being recommended for extended commercial trial in P.E.I. Virus-free Sparkle at the Charlottetown Experimental Station 600 quarts per acre. It is a very deep red in color with distinctive yellow seeds. It is an extremely firm berry which makes it a good shipper. In freezing trials, Sparkle has been found superior to the commonly grown Island varieties with respects to color, flavour and texture. The Department of Agriculture will be pleased to assist growers in securing virus-free plants of any variety and also in securing common virus-free plants of the Sparkle variety.

ARTIFICIAL INSEMINATION

The organization of artificial breeding clubs throughout the Province is progressing very favorably, considering the adverse weather conditions. Five of the seven new areas have completed their surveys and are now in the process of selecting an inseminator.

O'LEARY AND DISTRICT

The directors held a meeting on Thursday March 8 and appointed Mr. Gerald Gamble, Unionvale as their president. Arrangements were made to advertise for the position of inseminator. To date, approximately twenty applications have been received. Due to the storm last Saturday, the interviews with the applicants were made impossible. It is hoped that by the end of this week an inseminator will be selected for the district. The directors for the O'Leary area are as follows: Roy Murray, Cascumpec; James L. MacWilliams, Campbellton, Lot 4; Kenneth McKendrick, Campbellton, Lot 4; Keigh H. Gard, Mill River East, Alberton; Gerald Gamble, Unionvale; Ralph Adams, O'Leary; Robert Oulton, Brae, Coleman; J. W. Don Campbell, South Kildare, Alberton; Charles E. Milligan, Milo, Coleman.

NORTHAM-TYNE VALLEY

In the Northam-Tyne Valley area, which includes lots 10, 11, 12, 13, and 14, the breeder interest has been very gratifying. A sufficient number of cattle have been signed up to warrant the formation of a club. The directors are calling for applications for the position of inseminator, and it is hoped that this appointment will be made in the near future. The directors are as follows: Joshua MacArthur, MacNeill's Mills; Norbert MacKinnon, Richmond RR; Beecher Dennis, Richmond RR; Russell Dymont, Northam; Sydney Egan, Northam; Courtney Maynard, Port Hill; Leo Gallant, Conway; Preston Grigg, Tyne Valley; Russell Adams, Richmond RR; Joseph Maddix, Wellington, RR.

CORNWALL AND DISTRICT

The directors of the Cornwall and District Artificial Breeding Club met on Thursday, March 15, in the Board Room of the Department of Agriculture. It was decided as a result of the survey, to form a club and call for applications for the position of inseminator. These are to be in by Friday of this week. The directors are: Stanley Willis, Cornwall, Lot 32; Parker Newson, Clyde River, Lot 31; Norman MacKenzie, Clyde River, Lot 65; Archie Johnson, Brookfield; Fred Kitson, Hampshire, Lot 32; Bruce MacKinley, North River, Lot 32; Jim Yeo, Cornwall, Lot 32; Floyd Stretch, Long Creek, Lot 65.

POWNAW AND DISTRICT

The directors of the Pownaw and District Artificial Breeding Club

met on Wednesday afternoon in the Board Room of the Department of Agriculture. Applications for the position of inseminator will be received up until the latter part of this week. The directors for the club are: Wilfred Furness, Vernon Bridge; Robert Brown, Charlottetown, RR 1; Bus Jones, Bunbury; Irving Tweedy, Vernon River; Harold Dunphy, Millview; Dan O'Donnell, Avondale; J.D. MacDonald, Glenfinnan; William MacEachern, Mermaid, RR 8; Francis Gleason, Cherry Valley, John Reddin, Southport.

SOURIS AND DISTRICT

The directors of the Souris and District Artificial Breeding Club met in the town hall, Souris, last Friday afternoon. Major Reid of Rollo Bay West was elected as president of the club. Working with him on the Board of Directors are: Fred Aitken, Fortune; Howard Campbell, Saint Columba; Charlie McDonald, Souris; Vernon Ernest Underhay, Eglington; Peter MacAuley, Chestow; Ernest Morrow, Elmira; Charlie Ching, Red Point; Bernard MacDonald, Bear River.

The applications for the position of inseminator will be received until the latter part of this week. The breeder interest in this area has been very encouraging. To date, over 800 cattle have been signed up for breeding.

YORK AND MONTAGUE

The results of the survey in both these areas have been very slow in being returned to the office. Unless the surveys in these two districts are completed in the near future, it will not be practical to form Artificial Breeding Clubs. As stated previously, it was necessary to have a minimum of 700 breeding farmers signed up in any one area before it is feasible to establish an Artificial Breeding Club. In the York area, only six out of twenty school districts have reported. In the Montague area, only twenty-three out of forty-three districts have reported.

THE TEMPORARY BOARD OF DIRECTORS

selected at the general meeting for the York area are as follows: John Thompson, Dunstaffnage; Albert Boswall, Harrfield; Smith MacFarlane, Harrington; James Cudmore, Winton; Lloyd Vessey, York; Mark Johnston, Suffolk; Aneas MacIntyre, Millicove; Malcolm McLaughlan, Stanhope; Gregor McCallum, Brackley Point; John J. MacDonald, Blooming Point.

In the Montague area the Temporary Board of Directors appointed at the general meeting in Montague were: Dan MacLeod, Victoria Cross; William Hunter, Dundas; Harold Anear, Lower Montague; Don Johnston, Peck's Road; Glen MacLaren, New Perth; Philip MacEachern, Cardross; Raymond Riley, Gaspereaux; George MacPherson, Kilmuir; Don MacQuarrie, Roseneath.

SEAWAY STRIKE OVER MASSENA, N.Y. (AP)

Striking workers on the U.S. portion of the St. Lawrence seaway and power projects began returning to their jobs Monday after accepting a wage increase averaging 35 cents an hour to come into effect over a two-year period. Howard Dalton, assistant supervisor of Local 545, International Union of Operating Engineers, said union members had given unanimous approval to a new contract agreed upon Saturday by negotiators for the union and contractors.

CLUB NEWS

A meeting was held in Summer-ville school on the evening of

March 6th, to determine the feasibility of organizing a 4-H calf club.

Twenty-seven people from Summer-ville and surrounding districts were in attendance. Reverend Cash acting as chairman for the meeting, R. Pierce, Agricultural Fieldman, outlined the advantages to be gained by organizing a club. Special mention was made of the financial assistance being given to the various Breed Associations by the Provincial Department of agriculture and the bonus on purchased calves to 4-H purebred calf purchases during 1956, which will be made by those Breed Associations. Considerable discussion took place on the value of purchasing purebred calves with much interest being shown.

It was decided that a club would be organized. An executive was then voted in as follows: President, James Cain; Vice-President, Frank Cain; Secretary-Treasurer, Peter Curran; Club-Leader, Reverend Cash; Assistant Club Leader, Joe Cronin, Cecil Walsh; Directors, Stephen Boudreau, Vernon Donnelly, Mr. Martin.

It was decided that the club would be called the Summer-ville "The Priests" 4-H club. The next meeting will be held on April 13th at the Summer-ville school at 8:00 p.m.

The regular meeting of the Head of Hillsboro "Busy Bees" Calf Club was held at the home of the Club leader, Mrs. Douglas on Friday, February 24th, at 7:30 p.m. The president called the meeting to order and the members repeated the 4-H pledge. The roll call which was payment of membership fees was answered by eleven members. There were nine visitors present. Following this, the minutes of the previous meeting were read and approved. Roy Coffin invited the members to his home for the next meeting which will be held at 7:30 p.m. on March 30th. The roll call will be the next order of business. The production of a herd for any two consecutive months."

The main program consisted of a talk given by Wayne Cameron and assistant club leader, on the Leadership Short Course which had been presented by the Department of Agriculture late in 1955. This led to a discussion on scholarships which might be presented by individual clubs to their most deserving members in the following year. These scholarships would enable the member or members of attend the before mentioned course in the following year at all expenses paid. This was left for discussion at a later date.

Robert Pierce, our Agricultural Fieldman, then gave a short talk on the Royal Winter Fair competition which concluded the meeting. It was moved by Garth Coffin and seconded by Arthur Cameron that the meeting be adjourned. Lunch was served by the hostess after which the president thanked the host and hostess on behalf of the club.

Massey Takes Off On Tour Of The Arctic

OTTAWA (CP) — A spotlight swung on Canada's land of the midnight sun today with Governor-General Massey's take-off on an Arctic tour.

The vast territory gets new attention with the three-week visit of the vice-regal representative. Leaving with a minimum of fanfare, the RCAF plane carrying Mr. Massey had what was described as an historic mission in that Canada is formally reminding neighbors that the far-north regions are hers.

But for the governor - general visits with Eskimos and Indians were more on his mind, aides said. Mr. Massey will also visit the Yukon. DROP CANISTER This is the first trip of a governor-general over the Pole. But Lord Tweedsmuir, governor-general between 1935 and 1940, flew north to Aklavik at the mouth of the Mackenzie river and to Copernicus, Arctic coast trading post, in 1937.

At the pole Mr. Massey will drop a canister of documents to mark his flight. The canister is expected to float down the chill Arctic waters and perhaps within eight or 12 weeks be picked up on the shores of Greenland, Iceland or Norway.

FLOOD VICTIM CHARGED TORONTO (CP)—John Copes, 29, reported dead on two occasions, was arrested Tuesday night and charged with defrauding a nurse of 1,100 by promises of Marriage. Police said the nurse gave the money to Copes, a married man, to arrange for their wedding. Copes, first reported a victim of hurricane Hazel, later was believed to have died in a United States Army jet-plane crash.

CROSS DEFENCE LINES Continental defence lines will be crossed during the 10,000-mile trip. Briefing officers stressed that newspaper men accompanying Mr. Massey were not to report details of them. A tour of radar stations—under the auspices of the United States and Canadian governments—would be made soon, the officers explained.

Mr. Massey will also fly over the north pole. After that flight, it was hoped to establish radio contact with a British expedition now in the Antarctic region. It was also possible that the Canadian flight would see Russian floating weather stations, based on gigantic ice floes, which are reported in the polar region.

After the governor - general's first stop at Great Whale river, he heads almost straight north for Frobisher and Resolute, from where he makes the hop over the Pole.

Mr. Massey will also visit the Yukon. DROP CANISTER This is the first trip of a governor-general over the Pole. But Lord Tweedsmuir, governor-general between 1935 and 1940, flew north to Aklavik at the mouth of the Mackenzie river and to Copernicus, Arctic coast trading post, in 1937.
