Truman Gives Lie To Soviet Atom Bomb Claim

PARIS (Reuters)—Harry S. Truman said here today that an overnight Moscow radio claim that Russia tried to stop the atomic bomb attacks on Japan in 1945 was "pure propaganda and a lie."

The former president, who ordered the United States Air Force to drop atomic bombs on Hiroshima and Nagasaki, told reporters "These are the facts and I know them better than anyone else."

"The first atomic explosion in the world was in New Mexico on July 16, 1945.

"As soon as I got the message that the explosion was a success I told Mr. Churchill and Stalin that the explosion had been a success and that it was an immensely powerful explosion."

STALIN TOLD LITTLE

"Mr. Churchill knew all about it because the British had started investigation first and turned their information over to us.

"Stalin just knew it was a very heavy explosion. I told them we were going to drop it on Japanese towns devoted entirely to war work.

"It took the Russians three more years to steal the information, and they stole it from us by various and devious means.

"They knew nothing about the atomic bomb, and it was pure propaganda and a lie out of the whole cloth in the usual Russian manner."

The Moscow radio broadcast, beamed at Japanese listeners, asserted that Russia had tried to intervene with Truman against the 1945 attack, and accused the U.S. of dropping the bombs not for purely military reasons but as a "political threat to the peoples of various countries."

VISA AGREEMENT

South Africa and the United States have agreed to reciprocal free issue of visas to emporary visitors.

Soviet Offers Egypt Money To Build Dam

CAIRO (AP)—The Soviet Union has offered to lend Egypt $1,120,000,000 to finance almost all of the proposed Aswan high dam, an Egyptian source said Tuesday.

The source said Premier Gamal Abdel Nasser will not accept the offer "at the present," pending a careful study of all the factors.

The Russian offer was reported made during the weekend by Soviet Foreign Minister Dmitri Shepilov. He came here to attend Egypt's celebration of British evacuation of the Suez canal zone and Egyptian National Day.

WESTERN OFFER

Britain and the United States also have offered financial assistance to Egypt to get the big dam on the Nile started. They offered an initial gift of $70,000,000 and to lend later $80,000,000 to $150,000,000 as work progresses.

Tied in with this Western offer is the promise of a World Bank loan. Egypt would provide $760,000,000 worth of labor and local material.

Nasser has neither accepted nor rejected the Western offer.

EXPAND PLAN

General Motors Corporation has announced a $5,600,000 expansion for its plant at Port Elizabeth, South Africa.

Young Man with a Plan

One of these days, Fred's going to take over the farm. Meanwhile, he's planning; studying and working hard . . . learning right on the job.

Already he's learned a lot about modern farm management, and how a chartered bank can play its part in making farm living more comfortable, more profitable. He has found, for example, how useful the bank can be as a place to build up savings, to obtain credit, to seek financial advice and market information. He knows that the bank manager's door is open to everyone.

When you see a good-looking, well-run farm, chances are the farmer uses the services the chartered banks have built up for *all* Canadians.

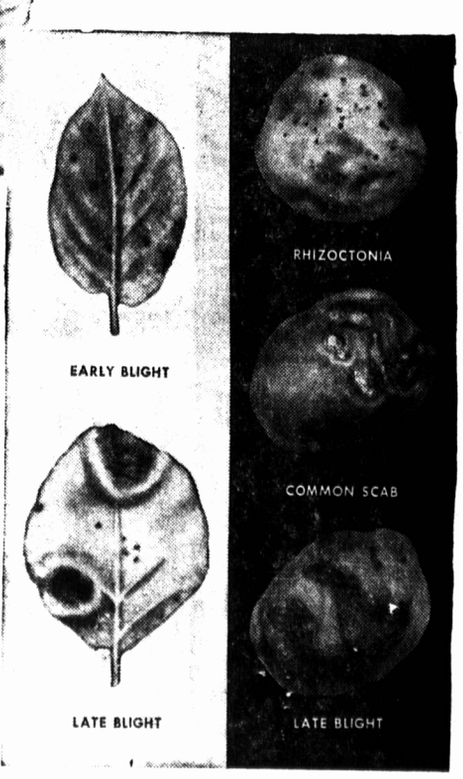
"We would heartily recommend **MANZATE*** potato fungicide to all potato growers"

says Robert Woodside
Robert Woodside & Sons
O'Leary, P.E.I.



"We find it stimulates growth, and is very easily applied, thus eliminating the extra work of mixing ingredients. We think it is a very effective spray for blight," wrote Mr. Woodside in a letter dated 13th September, 1955.

In this field of Sebago's, Mr. Woodside averaged 390 bushels per acre of marketable potatoes. He applied five sprays at 1½ pounds of "Manzate" to 80 gallons of water at intervals of six to ten days during the warm part of the day. Mr. Woodside knocked down the tops on 17th of September.

"MANZATE" MANEB FUNGICIDE *The best fungicide available for early and late blight control. No need to switch from one chemical to another . . . Wherever these diseases strike, "Manzate" does the job straight through the season. With "Manzate" you get full vigorous production of healthy tubers. More No. 1's, less Smalls. Users highly recommend "Manzate" for blight-free profitable production.*

*Reg. Trademark of E. I. du Pont de Nemours & Co. (Inc.)

Higher Yields — More Profit with
