

MONTAGUE HIGH

Are Proud As If Curiers Had Won Championship

Hello again! There are some glum faces in the corridors and class rooms of Montague High this week. The teachers were all on the beam with their exam correcting, and have returned all our exams-good and bad-with the results being mirrored in the pleased smiles on most student's faces, and the disappointed frowns on others.

We have been advised of extra curricular classes which are to be held after school hours three days a week. This is to enable the pupils to obtain extra help on weak subjects from their ever willing teachers. Let's all take advantage of this opportunity to bring the school average up even higher than it's present high level!

HOCKEY VICTORY

Last Saturday the High School boys hockey team defeated the Morell squad quite badly, but the score was not significant of the playing which was clean and rugged. Perhaps both teams could do with more practise.

Our boys curling team came home from the Provincial play-downs at Summerside carrying the runner-up prizes and we could be hardly more proud of their showing had they come home with the trophy. We would like to take this opportunity to congratulate the victorious team of Welshmen.

At the Student's Council meeting on Wednesday, Kent MacLean reported that he was given a play to read by our principal as Mr. Hughes felt that putting on a play would be a worthwhile project of the student body.

There was some discussion re the arrival of school sweaters and rings.

A play which is being put on by the Montague Dramatic Workshop, has several members of our faculty in the cast. It should be most successful. Also well attended was the annual Scottish concert on Wednesday, when a

aircraft missiles such as the army's Nike Hercules and the air force's long-range Bomarc, and for other defensive weapons.

H-BOMB TOO

This, of course, does not preclude the likelihood of continued tests of the big strategic weapon—the hydrogen bomb.

The most powerful hydrogen explosion set off by the United States was in the 1954 Eniwetok tests, when a blast believed to be equivalent to about 17,000,000 tons of conventional TNT was fired off. Fallout dangers caused the bomb testers thereafter to limit the size to about 10,000,000 tons (10 megatons of energy yield).

'Bye for this week from Montague High.

M. R. U. C. Men Elect Officers

The Murray Harbor — Murray River — Little Sands Mtn's Association met in the Murray Harbor United Church Hall on Monday Jan. 27th at 8 p.m. Representatives from the three congregations were present. The meeting opened with devotions led by Mr. W. F. Harris followed by a business period.

OFFICERS

It being the annual meeting the following officers were elected: President, Curtis Penny; Vice-President, Raymond MacLean; Secretary, John Garpin; Treasurer, Fred Johnston; publicity, Luther P. Herrin, Jr; sick, Charlie McLeod; Hospitality, John Bruce; Ways and means, M. A. MacNeill; Membership, Mert Ferguson; attendance, W. F. MacLeod; program Rev. L. S. Woolfrey. After the business period there was a short program consisting of buzz sessions and discussions.

Lunch was served by the wives of the members of the Murray Harbor men.
The meeting closed with singing Bless Be The Tie and the benediction pronounced by the minister, The Rev. L. S. Woolfrey.

Say Farewell To Woollen Drawers

LONDON (Reuters) — Britain's women soldiers said a grateful farewell Friday to 35,000 pairs of long woollen drawers originally earmarked for them by the war office.

The International Save the Children Fund announced that the ungainly underpants are being forwarded to youngsters in Austria, Greece, Germany, Italy and Korea.

Faced with a female rebellion, the war office 15 months ago agreed to grant a modest allow-

ance to servicewomen to buy their own underclothes. So few women were willing to wear the woollen drawers that officials estimated the stock on hand would have lasted for generations.

7 MONTHS IN HOSPITAL, STILL CHEERFUL

Leading Aircraftman George H. MacDonald, son of Mr. and Mrs. Augustine MacDonald, Briston P. E. L., who has been hospitalized since being involved in a motorcycle accident while enroute

home in June, smiles as he is being carefully placed on board a 102 Communications and Rescue R. C. A. F. aircraft at Trenton, Ont., enroute to Queen Mary Vet-

erans hospital in Montreal, where he will undergo further treatment. Willing hands assist with the stretcher as F-L V.J. Fowlie (third from right) Matron

U.S. May Test Nuclear Blast In Stopping ICBM

By ELTON C. FAY
WASHINGTON (AP) — The United States may find out how effective a nuclear blast in space would be against ballistic missiles during weapons tests this spring at the Pacific proving grounds.

The semi-annual report of the Atomic Energy Commission said Friday the firings of nuclear devices and weapons at Eniwetok "will advance the development of weapons for defence against aggression whether airborne

missile-borne, or otherwise mounted."
There has been speculation that the 1958 Eniwetok tests might include firing a nuclear charge to an altitude of 100 or more miles.

The suggestion is that the army might be designated to loft a nuclear device into space—perhaps using one of its Jupiter-intermediate range ballistic missiles. The Jupiter IRBM, with a lateral range of 1,500 miles when fired in a long trajectory, climbs several hundred miles high.

In a test involving only altitude, the missile presumably would be pointed almost vertically to keep the explosion above the instruments on the Marshall Island atolls that would record the test.
The United States never has

detonated a fission or fusion device at extreme altitude. The projected Zeus anti-missile missile presumably would utilize a nuclear warhead for blasting an enemy intercontinental ballistic missile while it was near the zenith of its trajectory, hundreds of miles high.

Weapons experts have only been able to theorize on what would happen in an explosion where there is little or no air. One theory is that the absence of atmosphere might work against the shock wave—an important factor in the destructive features of nuclear explosions.

Further proof-testing of nuclear weapons either in the hands of the armed forces or well along in development is expected. These could include warheads for short-range missiles and artillery shells, for anti-

WINTER HATS clearing at greatly reduced prices at Belle's Dress Shoppe, Montague.

RACK of ladies dresses clearing at \$4.95, \$5.95, and \$7.95, Belle's Dress Shoppe, Montague.

ENTERTAINS CLUB — Mrs. J. M. Fraser, Montague, was hostess to the members of ACME Past Noble Grands Club Tuesday evening. A brief business meeting was conducted by the president, Mrs. Fraser, after which a social hour was enjoyed and lunch was served by the hostess, assisted by Miss Mary Hemphill and Miss Adah MacGregor.

LODGE MEETS — The regular meeting of Acme Rebekah Lodge, Montague, was held Thursday evening and was conducted by the Noble Grand, Miss Adah MacGregor. The correspondence and the minutes of the last meeting were read by Mrs. Dorothy Campbell. Following the minutes and business session, the members participated in games of scrabble and auction with prizes being won by Mrs. Minnie MacDonald and Miss Mary Hemphill.

PERSONALS

Mr. and Mrs. Neil Hooley, Montague, were weekend visitors to Halifax, Nova Scotia.

Mr. Earl Power and Mrs. John FitzPatrick, Toronto, spent the past week at their home in Montague, having been called here because of the death of their father, Mr. Jerome Power, on January 24th. They were accompanied by Mrs. Power and Mr. FitzPatrick.

Matchless Paint Appointment

MR. GRAHAM

The Directors of Standard Manufacturing Company Limited of St. John's, Newfoundland announce the appointment of Mr. George T. Graham as Sales Supervisor for their Matchless Paints in the Maritime Provinces. For the past sixteen years Mr. Graham has represented Ramsay's Paints in the same territory and is therefore very familiar with Maritime paint users and their requirements.
