Working Committees Named For 1964 Plowing Meet Here

Working committees have been set up to help organize the program for the Canadian plowing championships, scheduled for Kings County in 1964. A site has been selected on government-owned land adjacent to the Brudenell Provincial Park.

A committee of five surveyed the site Tuesday morning and made decisions as to where different events will be staged. The area for stubble plowing has already been plowed.

Committees were set up at a meeting of the P.E.I. Plowman's Council in Charlottetown, attended by several interested people from the Montserrat area. It was stated that by a January meeting committee chairmen would be appointed for billeting, accommodations, catering, banquet and parking.

The Junior Farmers organization is to be contacted for special events and an entertainment committee.

Dr. Carl Willis of the Experimental Farm is chairman of a program booklet committee.

Slippery Roads Hinder Driving

SOURIS — Several motor vehicles were damaged in accidents in and near this town, blamed on slippery driving conditions in Tuesday's snow.

On Main Street here in mid-afternoon a station wagon and halfton truck collided. No one was injured. At Souris West a car slid off the highway and struck a power pole but there was little or no damage to the car and the pole was not broken.

Other reports were heard of cars sliding into ditches. There were no reports of injuries.

By 11 p.m. some four inches of snow had fallen here. It was still snowing but the amount had tapered off. Snow began to fall about 2 o'clock, some two hours later than it did in the Montserrat area.

FORECAST: WINTER IMMINENT

Every spreader load you spread this winter, when time is available, is one less load to spread next spring, when time is vital.

Did you know New Idea have a special spreader for winter spreading. Won't freeze up, spreads frozen manure, or chunks of frozen clay or ice. Yes that's right, the No. 293 New Idea full type spreads just about anything. We think it's the most versatile and amazing spreader ever built. That's why we are offering a special price for December only, or until our present supply is exhausted.

No. 293—130 bushel, P.T.O. flail type. Regular price is \$853.40 on 20" DCR. Now a special \$100.00 off while supply lasts.

Now—same spreader, same full year guarantee for \$753.40.

Come in today and make a "red hot" spreader deal.

New Idea make—10—different models, and we stock them all!

OPERATION CARIBOU

Being lowered by derrick from a U.S. Navy jet helicopter is one of the biologists for the state of Maine on the northwest plateau of Mt. Katahdin. They were taken to the plateau to release caribou that were airlifted by the state of Maine on the northwest plateau of Mt. Katahdin. The animals were released in an area where caribou once thrived. City Camera Club Holds Final Meeting For The Current Year

The Charlottetown Camera Club enjoyed a pleasant change of scene Monday evening when the meeting was held in the National Film Board theater, Dominion Building.

Two new film board productions were shown by John Martin. Filmed in the Rockies, on the rim of the Alberta plains, "1983", its ten short minutes condenses the astounding spectacle of one day in the life of the sky.

"Pipes and A", a film lively with the skirt of the pipes first takes one back to the days following 1945, when the government of George II put an end to the Scottish clan system. Later one is swept forward to the present and to the annual Georgian Highland Games at Maxville, Ont. Here you see the Highland dances, the caber toss, and the thrilling mousie-marchant of pipes and drums.

Act Proposed For Geo'town

GEORGETOWN — Necessary action to place this town under the provincial town planning act will probably be taken shortly, Mayor Dr. A. Kennedy announced.

He said the town council met Monday night with Walter de Silva, provincial director of town planning, Wendell MacKay, deputy provincial secretary, and Claude Smith, provincial town planning, industrial planning, housing, water installation and sewage disposal.

The mayor said a "wealth of information" was made available to the council.

Mr. McGregor said the flight recorder when first developed about three years ago were "not entirely satisfactory" because of their limited abilities.

There was no recorder on the DC-8F that crashed near Montreal Friday, killing 116. Mr. McGregor doubted if it would have done much good, because even a semi-armed-plated recorder might not have survived that crash.

Indian Projects Given Support From Canada

OTTAWA (CP)—Canada has made long-term loans to India of \$5,000,000 for locomotives, \$4,000,000 for a hydro-electric station and \$1,000,000 toward an aluminum smelter being built by a private company in Kerala State.

Agreements by Export Credits Insurance Corporation, were signed Wednesday by Trade Minister Sharp and the Indian high commissioner to Canada, C. S. Jha.

The \$1,000,000 loan is part of a joint financing transaction to supply foreign exchange for a \$12,000,000 expansion of the Kerala smelter and a foil mill being built in the Bombay area for Indian Aluminum Company Limited.

Another \$2,700,000 will come from Aluminum Company of Canada Limited in Montreal. Its parent, Aluminum Limited, has 60-per-cent control of the Indian company. The Canadian company will act as general contractor to co-ordinate purchases from various Canadian suppliers.

The \$8,000,000 loan for locomotives will cover purchase of 40 diesels and spare parts from Montreal Locomotive Works. The order is expected to provide 700,000 man-hours of work in Canada. The locomotives will go to the Indian railways ministry.

Church Paper Levels Blast At Men Abroad

TORONTO (CP)—The Canadian Churchman charges in a current edition that Canadians abroad use native women as "sexual playthings."

The 285,000-circulation national publication for the Anglican Church based an editorial "Canadians Abroad — a hindrance to Christ on information it says it received from Central America."

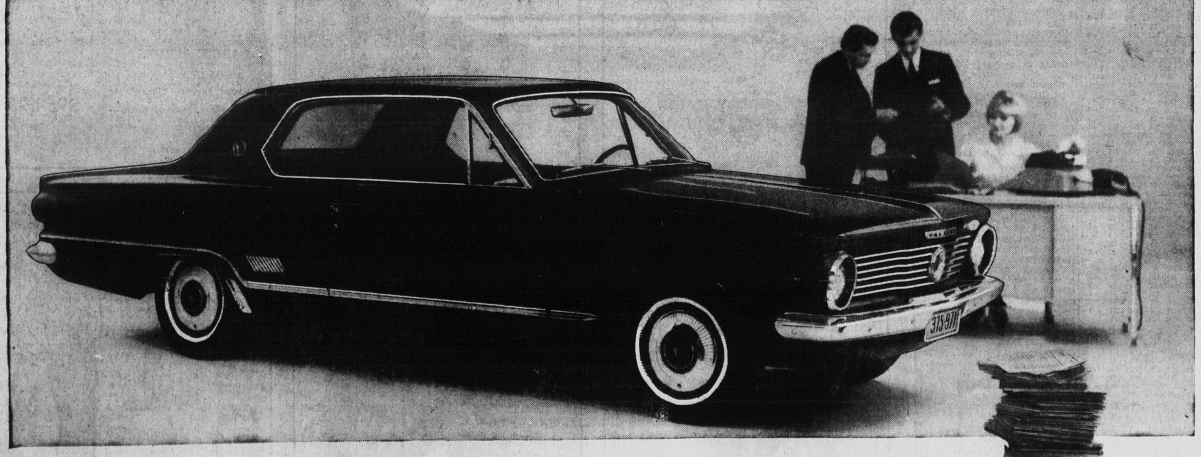

"Our information relates to the scandalous relations with local girls of Canadian married men who are employed by Canadian-owned enterprises."

"To assume that women with dark skins are always available as sexual playthings is both degradation of womanhood and racial discrimination of the basest sort."

The editorial says this "latest demonstration of Anglo-Saxon deviation from Christian moral standards is the kind of thing which has hindered Christian missionary efforts in many parts of the world."

It says that whenever publicity is given the number of illegitimate children fathered abroad by United States servicemen, Canadians have been in the habit of "insulting and thanking the good Lord that Canadians don't behave like that."

"Reliable information which has reached us from Central America suggests that certain Canadians are behaving far worse."

Great new way to balance the budget

Price the new 1964 Valiant and prove for yourself you don't need to break the budget to drive the best. What a beautiful Valiant it is... Valiant for '64 has the authoritative look and feel of a far more expensive car—and the dependability of

Canada's only 5-year—50,000-mile power-train warranty. This long-range reliability will actually stretch your budget by guarding against major costly repair bills. You'll go a long way in a Valiant... and get there more economically!
